THE American Protective Tariff League of New York is early in the field for the campaign of 1904. Realizing that the percentage of new voters may prove to be sufficient to turn the scale in several States, The League has mailed to its members and connections inquiry cards asking names and addresses of young men who will, next year, cast their first votes at a Presidential election. Replies to these cards are coming in by the hundreds in every mail, and The League is rapidly accumulating an immense list of names to which it will send literature of the sort calculated to inform young electors as to the merits of the questions dividing the two political parties.

WE are indebted to Franklin Dye, Secretary, for a copy of the report of the State Board of Agriculture.

LAST week people were praying for rain. It came, and judging from present appearances, they will now have to petition for it to cease for a while.

PENSION office figures show that veterans of the Union army are dying at the rate of nearly 40,000 a year, and the mortality among former Confederates is not much less. More than half the men who took part in the Civil War have answered the last muster.

TOMORROW, Sunday, June 14th, will be Flag Day, and while it is not a legal hoilday, it is more generally observed each year. As it falls on Sunday this time, the day will be observed on Monday, by appropriate exercises at the schools and a display of flags wherever possible.

NEW JERESY'S State building at the World's Fair at St. Louis, will be a reproduction of Washington's headquarters at Morristown. The New Jersey site joins that of Iowa on the main plaza. In this historic reproduction no exhibits will be permited. The rooms will be fitted up with the furniture in vogue in colonial days, and the decorations will embrace many Washington relics. The building will be headquarters of the New Jersey commissioners, and a resort for visitors from New Jersey.

A High Priced Fricassee.

Lord Alvanley, a noted wit and high liver in England a hundred years ago, insisted on having an apple tart on his dinner table every day throughout the year. On one occasion he paid a caterer $1,000 for a luncheon put up in a basket that sufficed a small boating party going up the Thames. Being one of a dozen men dining together at a London club where each was required to produce his own dish, Alvanley's, as the most expensive, won him the advantage of being entertained free of cost. This benefit was gained at an expense of $540, that being the price of a simple fricassee composed entirely of the "noix," or small pieces at each side of the back, taken from thirteen kinds of birds, among them being 100 snipe, 40 woodcocks and 20 pheasants—in all about 300 birds.

A Cool Soldier.

Remarkable for his self possession even in the most trying moments of battle was the famous Marshal MacMahon. One day he was dictating a letter to his secretary in the midst of an action when a shell from the enemy's camp fell directly upon his tent and exploded within a few feet. Pale with fright, the secretary sprang up, leaving his letter.

"What's the matter?" asked the marshal.

"The shell," gasped the frightened subordinate.

"And what has the shell to do with the letter you are writing? Go on with your work, sir."

Bay Rum.

Bay rum is manufactured from the dried leaves of Pimento acris. Bay rum is procured by distillation and this in a very simple manner. The leaves are picked from the trees and then dried. In this state they are placed in the retort, which is then filled with water, and the process of distillation is carried on. The vapor is then condensed in the usual way and forms what is known as "bay oil," a very small quantity of which is required for each puncheon of rum.

The Cost of It.

City Man—What makes rents so high here?

Villager—This is an incorporated town.

"Things don't look very metropolitan."

"N-o, but the taxes are."—New York Weekly.

A Milder Aspersion.

The statement by one of the victims that a laundryman is in the "iron and steal" trade is undoubtedly a slander. Accurately stated, he is in the "mangle and lose" business.—Pittsburg Dispatch.

Uncontaminated.

"What a pure, serene face Miss Fairchild has!"

"Yes; she does look as though she had never been to the theater in her life."—Harper's Bazar.

Won Out.

"His marriage was a failure, wasn't it?"

"Great smoke, no! It saved him from bankruptcy."—Judge.

The way to avoid the imputation of impudence is not to be ashamed of what we do, but never to do what we ought to be ashamed of.—Dryden.

It Wasn't.

"Boys, don't you know it's wicked to fight? Now, if I were you I'd kiss and make up."

"Say, wot do yous tink dis is—a woman's club?"—Life.

If You Want

If you want posters,
If you want bill heads,
If you want envelopes,
If you want statements,
If you want note heads,
If you want show cards,
If you want letter heads,
If you want calling cards,
If you want business cards,
If you want invitation cards,
If you want business circulars,

If you want job printing of any description done in a satisfactory manner, you can have your wants gratified by calling on THE REVIEW, 33 Somerset street North Plainfield, and leaving your orders or if preferable, use the telephone and our representative will call on you.

Notice to Correspondents.

Personals, social gatherings, celebrations, anniversaries of various kinds, reception, etc., will be published in the REVIEW free. All copy must be written plainly, preferably in ink; and names must be clearly written and correctly spelled. write only on one side of the paper. Full information in regard to weddings is always desired, and when requested a reporter will call to secure facts for publication. No attention will be paid to items of news forwarded to this office unless the sender gives his or her name and address. These will not be printed, but it is necessary to have them properly vouched for.

LEGAL NOTICES

NOTICE OF ORDER TO LIMIT CREDITORS

Somerset County Surrogate's Court.

ESTATE OF C. A. Girard Lewis, deceased.

Notice is hereby given, that on the FIFTH DAY OF FEBRUARY, A. D. 1903, on the application of the undersigned, as Executors of the will of C. A. Girard Lewis, deceased, an order was made by the Surrogate's Court, requiring the creditors of the said C. A. Girard Lewis, deceased, to bring in their debts, demands and claims against the said decedent, under oath or affirmation, and present the same to the subscriber within NINE months from the date of said order; and in default thereof any such creditor should be forever barred of his or her action therefor against the subscriber.

TWO IN A TOWN

By *A. H. Lee*

Copyright, 1902, by T. C. McClure

"But you are ill, a stranger in a strange land, and in all this benighted city I can find no one able to read English intelligibly whose time is not already filled. So if you will accept my services in the spirit in which I offer them I will go to you for an hour or two each day until you can use your eyes again. During the past year I have been through an experience much like yours, and I know just what it all means the impatience and discouragement over the enforced idleness, the brain that refuses to be coerced and that grim specter of unfinished work."

"You sweet saint!" he broke in. "Could a man resist such an offer, even though he knew, as I do, that he has absolutely no right to make such demands upon your time? You are acting from the purest unselfishness, and I can't begin to thank you enough."

"As to its being unselfishness, I am not at all sure about that," she answered. "I wish to lay up sugar plums of thought for my old age."

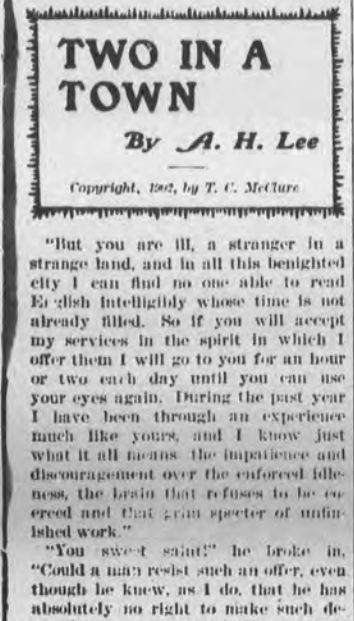
She looked up at the big fellow striding along at her side and wondered what her motive really was.

"Why," she continued laughingly, "does a Samson shorn of his strength appeal so much more strongly to a woman's sympathies than a pygmy in the same plight?"

He left her at her door and strolled across the Ringstrasse in the direction of his lodging. At first he had not liked Vienna over well, but now he began to think it the sort of place which grew upon one. He had certainly liked it much better during the past week.

* * * * * * *

Six tched out on a couch, his glance straying from the pipe smoke curling about his head to the girl by the window, her head bent over a book from which she was reading aloud, he felt at peace. Outside the snow was com-



SHE FANCIED HE HAD FALLEN ASLEEP.

ing down and fast muffling the noises of the street, so that even the bells of the electric tram came up to them faint and sweet as of a bell buoy across the water. With a sigh of contentment, he put down his pipe and closed his eyes that he might listen the better to the voice, every modulation of which had grown so familiar to him in the past two months. Each afternoon she had come and sat in that same position by the window, reading steadily until the clocks struck 5, when, with a brisk "Time's up" she had put on her things and gone.

At first when his head troubled him he had suggested that they talk, and she had retorted, "I did not come here for that, and if your head isn't strong enough for therapeutics today I shall go."

"Independent little thing!" he thought. "I wonder if she could look appealing? Confound it, she can look tender enough over that dachshund downstairs."

Looking up and seeing his eyes closed, she had fancied he had fallen asleep. As she turned to watch the feathery flakes striking silently against the window pane she thought: "You do not need me, and now I must go away. Though I know I am no more to you than a nurse, I would do it all again—and a thousand times more."

Here his voice startled her. "What are you thinking of that brings that tragic look into your face?"

"Am I looking tragic?" she replied after a slight pause. "It must be because I have known some huge frauds in the course of my life, but never quite so colossal a one as you are."

"It is quite true that I have more inches than are required by the army regulations."

"I was not referring to inches—unless you measure deceit and hypocrisy by them. I said I would come and read to you until you were able to use your eyes again. As I came this afternoon I saw you reading, but I enter and find the same old invalid relaxing in a cloud of tobacco smoke. Samson, what have you to say for yourself?"

"Nothing, Delilah. Those clear eyes of yours have deprived me of my strength—to lie. But if I had told you that I could use my eyes it would have been equivalent to saying that I did not want your services any longer, and this would be a lie compared with which the one of which you have just accused me is white as the driven snow."

"Clever as always at saying the pretty thing. I believe that you have not only kissed the blarney stone, but carry a piece of it around in your pocket. I am glad that you no longer need me. Vienna is not giving me the thing I want in my work. In a day or so I am off to la belle France."

He rose from the couch and strode toward her. He was only primitive man, with no thought but of loss and possession, and he caught her up in his arms, kissing her again and again.

"Let me go," she panted in anger.

"And you would leave me with no more feeling than this? Do you think I am made of stone? Don't you know how I love you?"

"You are hurting me," she sobbed. "Oh, how can you, how can you?"

His grasp relaxed, and he let her slip to the floor. In her expressive face he read love wounded to the quick, shattered respect and confidence.

"Don't—don't look at me like that," he begged.

"And this is the honor of a gentleman and what a man calls love?"

His head began to swim with the old dizziness, and he sank into a chair, burying his face in his hands.

"If he only wouldn't look so wretched," she thought. Going to him, she dropped to her knees at his side and drew his hands from his face to her lips, saying gently:

"I know they would never hurt me knowingly, and you may kiss me now if you like."

He looked stupidly down at her.

"I don't understand what you mean."

"I mean that I love you, that I cannot bear to see you look like this, and that so long as you want me I will never go away from you."

"I am not worthy of it, dearest, and I have not even the right to speak to you of love. I am too poor to ask you to marry me."

"But I can support myself, and don't you know the joy it would be to feel that I could help you? The question is, which means the most to you, your pride—and a totally false pride, too—or my happiness?"

With reverence he drew her head to his shoulder and kissed the tear stained eyes.

What to Teach the Boys.

A philosopher has said that true education of boys is to "teach them what they ought to know when they become men."

First.—To be true and to be genuine. No education is worth anything that does not include this. A man had better not know how to read and be true and genuine in action rather than to be learned in all sciences and in all languages and be at the same time false in heart and counterfeit in life. Above all things, teach the boys that truth is more than riches, power or possessions.

Second.—To be pure in thought, language and life—pure in mind and body.

Third.—To be unselfish, to care for the feelings and comforts of others, to be generous, noble and manly. This will include a genuine reverence for the aged and for things sacred.

Fourth.—To be self reliant and self helpful even from childhood, to be industrious always and self supporting at the earliest possible age. Teach them that all honest work is honorable; that an idle life of dependence on others is disgraceful.

When a boy has learned these things, when he has made these ideas part of him, however poor or however rich, he has learned the most important things he ought to know.

Two Strange Oaths.

A Chinaman was summoned as a witness to a court in London, and instead of being sworn in the usual manner a lighted candle was given to him, which he blew out and then said solemnly, "If I do not tell the truth in this case may I be extinguished as this candle has just been extinguished." As there was no perceptible change in him after performing this ceremony it is reasonable to suppose that he did tell the truth.

A native of India, being summoned as a witness in an Australian court, informed the magistrate that he did not believe in the usual oath and that his testimony would be useless unless he could be sworn by the waters of the Ganges. The magistrate was nonplussed, but the interpreter, with a smile, left the court and returned in a few minutes with a glassful of water.

"Is that water from the Ganges?" asked the astonished judge.

"No," replied the interpreter, "but I'll tell him that it is, and he'll certainly believe me."

He was right. The Indian swore by the holy water, never dreaming that it had been obtained from a nearby pump.

Could Have Waited.

A certain suburbanite was accustomed to bring home some little remembrance for his little girl, who always ran up to him and put her hand in his pocket expectantly.

Once, however, he was delayed and at the last moment found that he could not catch the express train that he always took if he stopped to purchase anything. When upon his arrival home his little daughter started to put her hand in his pocket he shook his head.

"I had to disappoint you tonight, dear," he said, and, seeing her quivering lip, he went on:

"It was this way: At the last moment a man came into my office, which kept me later than usual, and I only just had time to catch my train. Now, if I had stopped as usual to get you something I would have had to wait an hour for another train, which would have made me get home too late for dinner."

His daughter thought a moment and said:

"Well, papa, I could have waited."—New York Times.

Prayed

To Be Released From Life.

Almost Insane From Nervousness.

Dr. Miles' Nervine My Salvation.

Do you enjoy life, or do you sleep so poorly that you are more tired when you get up than when you go to bed? Is your appetite failing, are you getting thin; does your head ache, back ache, eyes tire easily? These are symptoms of a nervous disorder, which should be promptly treated or fainting spells, mental and physical nervousness, morbid fears and loss of control will lead to insanity or mental irresponsibility. Strengthen the nerves with Dr. Miles' Nervine. It quickly supplies nerve-force and vitality to the weakened system, bringing sleep, appetite and health.

"I was almost insane with nervous trouble. Could not eat or sleep. Could see no pleasure in life; indeed, life was a burden to me, and I even prayed God to release me from it. Three doctors did all they could for me, all to no purpose. I was in despair of ever getting better when I saw the advertisement of Dr. Miles' Restorative Nervine. I got a bottle, commenced taking it and wrote you for advice. I followed it carefully, taking your Nervine, Restorative Tonic, and Nerve and Liver Pills. Those remedies were my salvation. It is some months since I stopped taking the Tonic but I keep the Nervine in the house all the time, as it is a friend that I do not feel safe without. If any sufferer should doubt the truth of this statement, let them write to me and I will do my best to drive all doubt from their mind."—MRS. MABEL REIDEN, La Jose, Pa.

Europe's Banking Methods.

By Frank A. Vanderlip.

IN Italy a bank check is looked upon with suspicion. Practically no small tradesman would take a check, and none of them keep a bank account. It was still more surprising to me to find that such a statement would be almost literally true of Paris itself. I was studying the mechanism of the Bank of France under the guidance of one of the officers. We went into one great room in the old building in which there were 200 desks enclosed in wire cages, all empty at the moment I asked what these were for.

"These cages are for our city collectors," I was told. "When a small merchant borrows from the Bank of France, he does not, as with you in America, borrow a bank credit, and have his loan merely added to his balance on the books of the bank. With us a merchant, when he makes a loan, gets the actual money and takes it away. He probably has no bank account with us. He writes no checks. When the loan is due, he does not, as would be the case in your banks, come in and pay his indebtedness with a check; instead of that we send a collector to him, and that collector is repaid the loan in actual currency. Two hundred men start out from the Bank of France every morning to collect matured loans. Several days each month it is necessary to send out 400 men, and on the first and the fifteenth of each month 600 collectors go out."

These collectors were uniformed men carrying leather pouches in which they have the matured notes and which are later filled with currency as the collections are made from the bank's borrowers.

I stood at the paying teller's desk as I went farther along in my tour of the Bank of France. As I halted there the man who happened to be at the window at the moment presented a check for 50,000 francs. The money was counted out and handed over to him, stored away in a big wallet, and he passed on. I asked if it were not unusual for a man to draw out so much currency, and was told that it was not. It was but another illustration of how undeveloped is the banking system of Continental Europe in its uses by the general public.—From "The American 'Commercial Invasion' of Europe," in Scribner's.

The Waste of Youth.

By O. S. Marden.

HOW the handicapped millionaire envies boys in school or college, and would give half his wealth for the chance to lay a foundation which they are thinking of spurning! How many an embarrassed man in public life longs to relive boyhood, that he may correct the mistakes of his youth! How much more he could make of his life, of his position, if he had cultivated his mind when young! He does everything at a disadvantage. His grasp of documents, speeches and books is weak because he does not know how to study. He must employ a literary secretary to save himself from blunders in grammar, errors in history and biography, or in political economy. He is forced to petty expedients to hide his ignorance.

Oh, what a pity it is to see splendid ability made to do the work of mediocrity. A man of magnificent parts, feeling that he is by nature intended to shine as a leader, is pitiable when compelled to do the work of an inferior and plod along in hopeless obscurity.

The eager unrest of youth, that chafes at restraining school walls and longs to rush to action, makes havoc with countless careers. In after days the old proverb will ring mockingly in memory:

"He that will not when he may,
When he would he shall have nay."

What are investments in bonds and stocks, in houses and lands, compared with investment in an education, in a broad, deep culture which will enrich the life and be a perpetual blessing to one's friends?

To rob one's self of the means of enjoyment which education and culture can give has no compensation in mere money wealth. No material prosperity can compare with a rich mind. It is a perpetual wellspring of satisfaction, of enjoyment. It enables one to bear up under misfortune, to be cheerful under discouragements, trials and tribulations which overwhelm a shallow mind an an empty heart.

The Wearing of Mourning.

MAX O'RELL said a sensible thing not long ago, when he explained to the public that the ostentatious mourner is not necessarily the one who feels the most deeply. This has been said before, but it is worth saying several times.

It is salutary to remember that there is no real merit in a long face. There is nothing more heathenish than the way in which mourning is conducted in certain cities of American society. Whether genuine sorrow is felt or not, quantities of crape must be worn, the house must be darkened, and grief, the more emotional the better, must be displayed, regardless of the presence of children or working people who need all the pleasantness they can get in their lives. And it is a lamentable fact that in some cases this sort of thing is more a matter of parade than anything else.

It seems heartless to say it, and one could not venture to comment on any particular case in this way, but there are people who go through all the outward ceremonies of grief, not so much because they really feel that they have met with a terrible bereavement, as because they like the importance of the occasion, and feel that people will think that they are not showing proper sensitiveness unless they behave in the traditional manner.

One finds these people saying, when others depart from the routine of mourning:

"Well! I don't see how she bears up under it. She seems so cheerful she can't have cared much for her husband. But, then, some have so little feeling."

It may be that the apparently cheerful person is forcing herself to endure without outward sign a crushing weight of sorrow, in order that the lives of others may not be darkened by her continual tears and lamentations.

The woman who does this for the sake of her children is rendering them a service for which they will live to thank her. There is no danger that they will think she does not care. Children have their own ways of finding out these things.—New York News.

Country Training For Boys.

By President Eliot of Harvard.

WHEN a child grows up in the country, it gets a natural training in accurate observation. It wants to find a four-leaf clover; it runs to see where the green snake went to; tracks the woodchuck to its hole and gets it out; it learns the songs of the birds, and knows when the smelts run up the brooks and when the twilight is just right for finding the partridges. In short, the country child gets naturally a broad training in observation. It also has on the farm an admirable training in manual labor. From an early age it can actually contribute to the care of animals, the successful conduct of the household, and the general welfare of the family. In the city all this natural training is lacking, and substitutes for it have to be artificially provided. This necessity has brought into our schools nature-study and manual training, to teach the child to use its eyes and its hands, and to develop its senses and its muscular powers; and these new beneficent agencies in education, already well in play, are in the near future to go far beyond any stage at present reached. We do not yet see how to replace in urban education the training which the farmer's boy or the seacoast boy gets from his habitual contest with the adverse forces of nature. The Gotts Island boy, on the coast of Maine, goes out with his father in the early winter morning in a half-open sailboat to visit their lobster traps and bring home the entrapped lobsters. They start with a gentle breeze and a quiet sea, though the temperature is low. The boy knows just how to steer the boat five or six miles to sea, where the traps are sunk on some rocky spot which the lobsters love. The father is busy pulling the traps. The boy watches the weather, and suddenly he says, "Father, there is a northwester coming. See the clouds driving this way over the hills." The boy knows just as well as the father what that means. It means a fearful beat to windward to get home, facing a savage spray and a falling temperture, the spray dashing over the vessel and freezing to the sails and ropes and loading down the bow with ice. It means a life-and-death struggle for hours, the question being, Shall we get into harbor or not before we sink? Now, that is a magnificent training for a boy, and the sheltered city offers nothing like it. The adverse forces of nature, if not so formidable that men cannot cope with them, are strenuous teachers; but in modern cities we hardly know that the wind blows, or that the flood is coming, or that bitter cold is imperiling all animal life.

EVERY MAN FOR HIMSELF.

'Tis well enough, for you and me,
To glory in our ancestry,
And laud the honors they have won;
But we will never write our name
On the immortal scroll of fame,
Through anything that they have done.
—The Journalist.

THE LAUNDRY ON FLOOR THREE.

By JOHN H. RAFFERTY.

NEVER is it easy for a self-respecting man to come back to his "home town" broken in spirits and finances. Yet that is what Raoul Delisle did, though he was young, well nurtured and within the memory of his old neighbors. It was a dark, rainy night in May when he alighted in the old, familiar station. He saw an acquaintance of the old days hurrying across the area. The man owed him $10. In his own pocket was forty cents. But his clothes were threadbare, faded and ill-fitting and he could not bring himself to accost his debtor. Raoul was tired and hungry. He had come West from Buffalo in day coaches with few opportunities and small means to satisfy his hunger.

He knew exactly the way to his old home, but as he wandered thither he realized that the growing traffic of the town had encroached upon what once was the most aristocratic section. As he trudged along in the narrow shelter of the houses, he remembered the very corners he had turned, riding in the cab which bore him upon his first "start" for Germany. Those had been noble, radiant, halcyon days, when he bade good-bye to his father and friends and set out for a tour of Europe and a course of study at Leipsic. There was no reason why he should go to the old home. His father was dead, his family scattered and poor. It had all happened like a devastating storm of the prairies while he was crossing the sea. Even the funeral had occurred before he reached New York. Ten years had passed since he had learned that he was an orphan, a pauper, an outcast of fortune.

Raoul was a very commonplace man. He had done the best he knew, and was quite sure that it was very bad. After a decade of precarious adventure in a dozen trades he was now so poor that the anticipation of breakfast was almost as remote and fantastical as his boyish dreams of heaven. He went into a cheap cafe near the depot and bought a meal of bacon and eggs, with bad coffee and faded lettuce as tokens of the prodigality of the menu. When he came out the rain was falling in cold, smiting sheets, though it was May. He turned up his coat collar and edged along by the walls toward the old house. Ten years make a mighty change in the average American city. Raoul found outbuilt, one-story store fronts in some of the old mansions where the elite of the older day had lived and triumphed. The old corner church, whose chime of bells was yet fresh in his memory, had been transformed into a barroom, with wine parlor and a gayety where once had been sanctuary and auditorium. Yards which he remembered as green, breathing spots of his boyhood, were black and slimy with the grime of smoke and moisture.

He recalled with a bitter smile the stories he had told his cousin Marguerite in Leipsic of the glories, the freedom, the opportunity, the republicanism of his home. Of what fields there were for her young genius as a musician; of what hope there was for her un-German yearning for personal recognition. "How lucky," thought he, "that she had sense enough to forget my invitation to visit us—to visit the Delisles—and know at first hand the splendor which I then thought to be real."

He slunk down the street, bending his thin face from the slanting rain. He began to wonder where he would pass the night. The wind blew keen and chill against his tattered front. His heart, warm yet with the unbidden memory of Marguerite, his yellow-haired cousin of the far land, was not cast down.

"I shall pass by the old home," he thought.

And then he looked into the gray, ashen, rain-swept lot where he had played marbles and flown his kite when a boy. There was frost in the whipping wind which swept across it, and Raoul, alert now, and yet oblivious of the years, hastened along till he stood in the wet shadows of the old house—the home that had been his father's and might have been his own. The old iron paling that had separated its narrow lawn from the sidewalk was battered and rusty. He looked up at its foggy walls and felt the tweak of pity at his heart when he saw that some of its blank, unlighted windows were broken. He dodged into the shelter of its squalid doorway and tried to picture the last day of its activity—the day when they bore away his bankrupt, broken-hearted father. The flare of kerosene lamps at the lunch counter next door distracted him. A dismal, stooping figure crossed the street yelling "Crawfeesh!" Some slatternly women, with shawls on their heads, speaking in raucous voices and laughing boisterously, ran across the lighted crossing.

"What a lucky thing for Marguerite," he was thinking, "lucky that she stayed at home with her cheese-making and her cow-milking." And then he thought of the tawney-haired girl, with the big, blue eyes and the yearning lips who had listened to his stories of America. But the night came down colder and colder till Raoul fingered the two silver dimes in his wet pocket and wondered what he should do for shelter. A gust of drenching wet wind drove him against the door. His hand rested upon the knob. He turned it and entered. The sound of his first footfall echoed among the empty spaces. The smell of moldering wall paper and dank soot stifled him. But the air was dry. No rain fell upon him.

"I am at home," he said, smiling sardonically at the whim. He went to the newell post, which had been the goal of a thousand swift descents along the banister in the days of his curls and knickerbockers. Like the floors, the sills, the walls and the stairs it was deep beneath the rust and dust of disuse and neglect. The window at the first landing was broken, the rain swept in and the wind howled like a Miserere, but he went up and remembered the days he had witnessed the circus parade from that vantage. Dark as it was, he wandered up and back into the old nursery. To the room that had been his mother's. To the library, where his father, in stern but yielding aloofness, had written his journal of the war; to the third story—the guest chambers, where once old Casper Witfield, the father of Marguerite, had been a guest of honor.

The dust rose in the dark as he tramped alone through the unseen scenes of his youth, but he went from room to room, tired, heart-worn, but glad that there was a roof above him and that he might at last lie down even in the dirt and debris of the home that he had known first and best.

When he stamped and stumbled up the narrow stairway that led to the attic, a pungent, wet and soapy smell struck his nostrils. When he came to the top he was in the old playroom, memorable chiefly for the swing that had once hung from the rafters. But some wet, woolen fabric smote him in the face. He struck a match and saw across the dim room the ghostly outlines of garments draped from a clothesline.

"Humph!" he muttered. "There must be a squatter here."

And then he saw, glowing from under the door of the old lumber-room, a red, dull light. He tiptoed across the creaking floor and rapped.

"Wilkommen," said a sweet voice, as the door swung broad and the flood of yellow light from the open room almost blinded him.

But when he saw again, there was Marguerite, her sleeves rolled up, her face thinner, but just as beautiful as of old, standing smiling before him.

"I'm Raoul," he began, "Raoul Delisle, Miss Witfield. I——"

But she had her arms around him, saying:

"We did not wait too long, cousin. Mamma, here he is at last. Look Mutter, here is Raoul. What did I tell you?"

And then he was at home.—Chicago Record-Herald.

The Deluded Gold-Seekers.

"I didn't take out any gold to speak of while in the Klondyke, and yet, despite the hardships I underwent in that region, my stay there was not without its pleasing features," said Mr. Peter Taylor at the Arlington. "Looking back on my Klondyke experience, I have no cause for regret.

"I got up there pretty early in the summer of 1898, and found that hundreds had preceded me. It didn't take me long to rid myself of the delusion that I would strike it rich, for I soon saw that not more than one man in 500 stood any chance of getting gold. But all the same I prospected with all the ardor of my soul and spared no effort to win the shining stuff. The excitement of hunting for gold is a fascinating thing and it will cause even timid men to brave almost any perils.

"I went over dangerous trails, braved the rapids and swift currents of the Yukon, defied the cold and lived on a bean diet for months, and still the life didn't seem half bad as long as there was any hope of making a strike. When finally all hope of that vanished, it occurred to me that beans three times a day smacked of monotony, and I made a break for beefsteaks and civilization."—Washington Post.

"The King's Private Band."

King Edward has given orders for the disbandment of his private band, one of the ancient features of his court. In its present form it was established by Charles II., and some authorities assert that a "state" band existed in the days of Queen Elizabeth. It is composed of thirty-four musicians, under the direction of Sir Walter Parratt, "master of the musick." Its members are the best that can be secured in England, and this is the real cause of its dissolution. Unlike his mother, King Edward does not care much for state concerts by his own musicians, and since his accession the duties of the band have been confined chiefly to the playing of light music, including ragtime, during royal dinners. This they regard as undignified, and the king regards as extravagant. The same music can be played as well by fewer and less notable musicians. Therefore another ancient institution has been done away with.

She Settled the Trouble.

Talk about your true philosophy, how is this for an example that a woman can meet most emergencies? In a Broadway car bowling down town a man refused to pay his fare for some reason not made evident to the other passengers. After vain argument the car was stopped and the conductor jumped off to find a policeman. As usual, this took time, so the people began to be impatient. Finally a woman in the corner called out:

"See here, I'll pay his fare if you'll only go on. I've got to catch a train and can't wait any longer."

And as no one, not even the culprit, seemed to object, the matter was passed over and the trip continued.—New York Times.

GOOD ROADS.

President Roosevelt's Address.

THE fact that the nation's Chief Executive attended the National Convention at St. Louis and participated in the proceedings indicates the importance which the good roads movement has attained. The fact that the convention unanimously indorsed the national aid plan also indicates the trend of sentiment in that direction.

The President's entrance was signalled by cheers from the assembled delegates. He was introduced by President Moore, of the National Good Roads Association, and spoke as follows:

Mr. Chairman, Ladies and Gentlemen—When we wish to use descriptive adjectives fit to characterize great empires and the men who made these empires great, invariably one of the adjectives used is to signify that that empire built good roads. (Applause.) When we speak of the Romans, we speak of them as rulers, as conquerors, as administrators, as road-builders.

There were empires that rose overnight and fell overnight; empires whose influence was absolutely evanescent, which passed away without leaving a trace of their former existence; but wherever the Roman established his rule, the traces of that rule remain deep to-day, stamped on the language and customs of the people, and stamped in tangible form upon the soil itself.

Passing through Britain fifteen centuries after the dominion of Rome has passed away, the Roman roads as features still remain. Going through Italy, where power after power has risen and flowered and vanished since the days when the temporal dominion of the Roman emperors transferred its seat from Rome to Constantinople; going through Italy after the Lombard, the Goth, the Byzantine and all the peoples of the middle ages have ruled that country—it is the imperishable Roman road that reappears. The habit of road-building marks in a nation those solid stable qualities which tell for permanent greatness.

Merely from the standpoint of historical analogy, we should have a right to ask that this people which has tamed a continent, which has built up a country with a continent for its base, which boasts itself with truth as the mightiest republic that the world has ever seen, which we firmly believe will in the century now opening rise to a position of headship and leadership such as no other nation has ever yet attained (applause)—merely from historical analogy, I say, we should have a right to demand that such a nation build good roads. (Applause.)

Much more have we a right to demand it from the practical standpoint. The difference between the semi-barbarism of the middle ages and the civilization which succeeded it, was the difference between poor and good means of communication. And we, to whom space is less of an obstacle than ever before in the history of any nation, we who have spanned a continent, who have thrust our border westward in the course of a century and a quarter, until it has gone from the Atlantic over the Alleganies, down into the valley of the Mississippi, across the great plains, over the Rockies, to where the Golden Gate lets through the long-heaving waters of the Pacific, and finally to Alaska and the Arctic regions, to the islands of the Orient, the tropic isles of the sea—we, who take so little account of mere space, must see to it that the best means of nullifying the existence of space are at our command.

Of course, during the last century there has been altogether phenomenal growth in one kind of road, wholly unknown to the people of old—the iron road. The railway is, of course, something purely modern. Now, a great many excellent people have proceeded upon the assumption that, somehow or other, having good railways are a substitute for having good highways—good ordinary roads. A more untenable position cannot be imagined. (Applause.) What the railroad does is to develop the country, and, of course, its development implies that the country will need more and better roads. (Applause.)

A few years ago it was a matter, I am tempted to say, of national humiliation that there should be so little attention paid to our roads—that there should be a willingness not merely to refrain from making good roads, but to let the roads that were in existence become worse; and I cannot too heartily congratulate our people upon the existence of a body such as this, ramifying into every section of the country, having its communications in every State of the country, and bent upon this eminently practical work of making the conditions of life easier and better for the people who of all others we can least afford to see grow discontented with their lot in life—the people who live in the country districts. (Applause.)

The excessive, the wholly unheard-of rate of our industrial development during the past seventy-five years, together with the good sides, has had some evil sides. It is a fine thing to see our cities built up, but not at the expense of the country districts. (Applause.) The healthy thing is to see the building up of both the city and the country. But we cannot expect the best, the most eager, the most ambitious young men to stay in the country, to stay on the farm, unless they have certain advantages. If farm life is a life of isolation and mental poverty, a life in which it is a matter of great difficulty for one man to communicate with his neighbor, you can rest assured that there will be a tendency to leave it on the part of those very people whom we should most wish to see stay on the farm.

It is a good thing to encourage in every way any tendency to check an unhealthy flow from the country to the city. (Applause.) There are several tendencies in evidence. The growth of electricity as applied to means of transportation tends to a certain degree to exercise a centrifugal force to offset the centripetal force of steam. Exactly as the uses of steam have tended to gather men into masses, so now electricity, as applied to transportation, has tended to scatter them out again. Trolley lines running out into the country are doing a great deal to render it possible to live in the country, and yet not lose the advantages of the town. The telephone is not to be minimized as an instrument with a tendency in the same direction. Rural free delivery is playing its part along the same lines. But no one thing can do as much to offset the tendency toward an unhealthy trend from the country into the city as the making and keeping of good roads.

They are needed for the sake of their effects upon the industrial conditions of the country districts, and I am almost tempted to say that they are needed even more for their effect upon the social conditions of the country. If winter means to the average farmer the existence of a long line of liquid morasses, through which he has to move his goods if bent on business, to wade and swim if bent on pleasure; if winter means that, if an ordinary rain comes, the farmer's girl or boy cannot use his or her bicycle, if a little heavy water means a stoppage of all communication, why you have got to expect that there will be a great many young people of both sexes who won't find farm life attractive.

It is for this reason, among many others, that I feel the work you are doing is so pre-eminently one for the interest of the nation as a whole. I congratulate you upon the fact that you are doing it. In our American life it would be hard to overestimate the amount of good that has been accomplished by associations of individuals who have gathered together to work for a common object which was to be of benefit to the community as a whole. And among all the excellent objects for which men and women combine to work to-day, there are few indeed who have a better right to command the energies of those engaged in the movement, and the hearty sympathy and support of those outside, than this movement in which you are engaged.

WORDS OF WISDOM.

All men are fools, but only the wise stop being so.

Truth is with ourselves; it takes no rise from outward things, whate'er you may believe.

The mother who sees all the virtues in her own child is blind to those in other children.

It is by presence of mind in untried emergencies that the native metal of a man is tested.

The thoughts will turn to the future when one comes to reckon the rapidity of Time's flight.

There is any quantity of gold in the land, but we enjoy it most when the other fellow digs for it.

Few men are wise enough to prefer the blame that is useful for them to the praise that betrays them.

The pleasures of dissipation are like gaudy colors—they attract for a moment, but afterwards they oppress the senses.

Be not disturbed about the future, for if ever you come to it you will have the same reason for your guide which preserves you at present.

Patience and strength are what we need; an earnest use of what we have now; and all the time an earnest discontent until we come to what we ought to be.

Were we to believe nothing but what we could perfectly comprehend, [illegible] only our stock of knowledge in all the branches of learning would be shrunk to nothing, but even the affairs of common life could not be carried [illegible].

Carnegie's Indifference.

The rejection of a proposal to build a library does not worry Andrew Carnegie in the least. He is familiar enough with iron structures to make allowances for heat and cold, expansion and contraction. "Sometimes the people are warm, sometimes cold," said one of Mr. Carnegie's former associates, "it all depends on how the sun of prosperity affects them. Talk to Carnegie about this refusal of his libraries and most likely he'll tell you about the man who built a chicken house. The walls were constructed of wood. For a temporary roof he stretched an old carpet over the structure. That night it rained. In the morning the owner found his hen house in collapse and the fowls dead beneath the wreck. He blamed his enemies, but he should have censured the elements. What had caused the carpet to shrink and the walls yielded.

"So will a rainy day humble a people built up under the sun of prosperity."—Detroit Free Press.

To Make Trade.

The idea that there is just so much trade has been abandoned by experienced business men. They find that business may be created by advertising—the people can be induced to become buyers when they have had no intention to make purchases. By special sales and by convincing people that it is to their advantage to get things now the merchants keep the wheels going. Persons in every line can do the same.

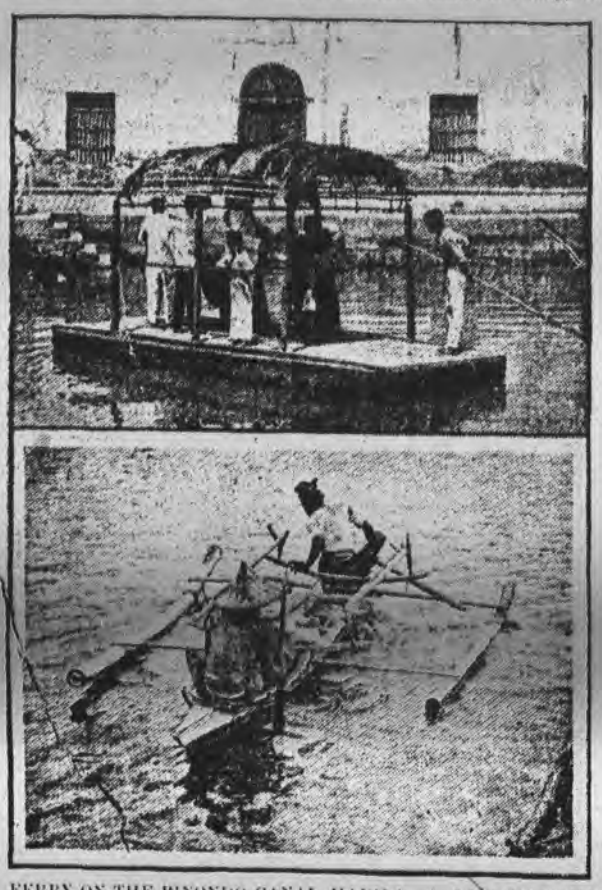
Miles of Fishing Lines.

A North Sea codfishing boat usually carries eight miles of lines, with very nearly 5000 hooks upon them.

QUEER CRAFT SEEN ON MY TRAVELS IN THE PHILIPPINES, CHINA AND SOUTH AMERICA.

Our first view of Manila as we steam on a small launch up the Pasig River to the landing stage discloses a panoramic assortment of shipping not equaled for strange and interesting features anywhere. At times this narrow river with its always rapid current is so completely jammed or choked with shipping that navigation is attended with great danger.

Here we find the huge, heavy casgoes in which merchandise and freight of all descriptions are transported from the large steamer anchored in the bay to the wharf. These casgoes are of wood, about the size of an American



1. FERRY ON THE BINONDO CANAL, MANILA. 2. DUGOUT CANOE, WITH BAMBOO OUTRIGGER, USED BY MOROS, SOUTHERN PHILIPPINES.

canalboat, and are covered with a bamboo roof, easily removed in sections. Over the after part of the boat the roof is considerably raised, thus forming a roomy cabin wherein live the navigator and family. It was in these boats that most our troops were taken ashore from the Army transports.

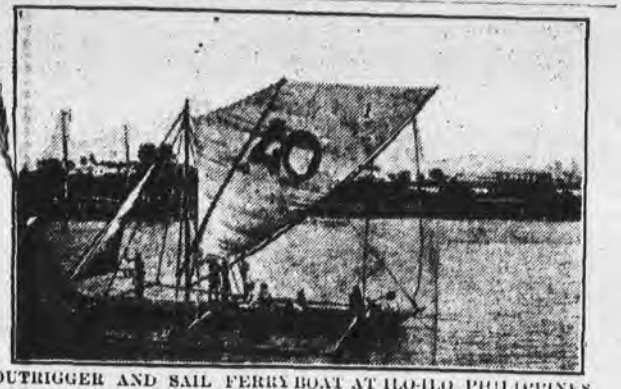
Within a few blocks of the Captain of the Ports' office at the landing stage we come to the Binondo Canal, on our way to the central or old part of Manila. On this canal are used curious ferryboats. They are small, but of heavy timbers covered with a wooden flooring, over which is erected a skeleton framework of wood, in turn covered with a bamboo roof. Each boat carries about fifteen passengers and is

BALSA (BOAT BUILT OF GRASS) ON LAKE TITICACA (PERU AND BOLIVIA).

impelled by means of a long pole dexterously handled by the native "botero."

The change in management in reference to these ferryboats offered proof that the native is very susceptible to, and capable of, conforming to American customs, which he imitates promptly. For years it had been the custom to have a small tin can fastened directly under the roof of these boats; into this the passenger dropped a copper coin. Shortly after the arrival of the troops the discovery was made that certain persons, instead of dropping a copper coin into the can, would drop a small stone, or nail, etc. It was the introduction of this latter custom which at once caused the native boatmen to adopt the American method of collecting fares. In the river here we see many canoes or dugouts passing back and forth; these are made by the natives from solid logs, which are dug out, and they are impelled with a paddle. It is interesting to watch the natives pass up or down, with or against the swift current, in these small craft laden with all sorts of goods, produce, vegetables, fruits, grass for fodder, etc.

I had the good fortune to travel south from Manila with General Bateson on his memorable trip when he made the now famous bloodless treaty with the Sultan of Jolo, who controls 1,500,000 people, who are perhaps the craftiest of all Filipinos. Our first stopping place was at Iloilo, Island of Panay, which



OUTRIGGER AND SAIL FERRY BOAT AT ILO-ILO, PHILIPPINES.

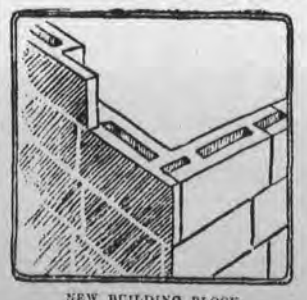
known to the world as a dangerous tribe; for until very recently these islands were marked on the charts with the warning sign of "Pirates." The Moro travels in his outrigger boat many miles from island to island; his boat and paddle are his most valued possession, not even excepting his wife, who is practically a slave to him.

Across the China Sea from Manila, a distance of some 700 miles, we find not only interesting craft of all kinds, but that the native boats are navigated in nearly every instance by women, who act as pilots for large vessels that enter the beautiful harbor of Hong Kong. It is not unusual to see a woman at the tiller wearing a huge umbrella-shaped hat and having fastened on her back a child. These native boats are constructed of wood and bamboo, are fitted with a mast and carry a set of sails, and are used to carry produce and merchandise from place to place. The native family lives on these small boats; in fact, they spend their entire time on the water. For a rudder a very long oar is used and handled in an expert manner by the woman navigator.

The strangest craft I have ever seen on all of my travels were the balsas of Lake Titicaca in Bolivia and Peru. These balsas are made of grass, an aquatic plant, growing in the waters of the lake. The principle on which they are constructed by the Aymaras Indians proves their ingenuity. A bale of hay naturally floats in the water, and according to the quantity of dried grass used in constructing the boat do they control the displacement or carrying capacity. These boats are likewise fitted with a mast and sail and in some instances carry from eight to ten persons. The Indians travel long distances over this vast inland lake, the surface of which is on a level with the summit of the Jung Frau of the Swiss Alps.—E. C. Rost, in Scientific American.

New Building Block.

The building block shown in the accompanying cut is of a new design for which many advantages are claimed. In the first place, it permits of the construction of a hollow wall, the passages of which are intercommunicating and which can be made use of for conducting wires and pipes. It consists of a body of rectangular and oblong form cut away in the centre so as to



NEW BUILDING BLOCK.

leave a hollow space comprising about one-third of the width of the block. At diagonally opposite corners there are projecting portions which comprise a continuation of each of the faces of the block. The method of laying these bricks, as shown in the cut, is said to increase the strength of the wall, and the hollow construction results in a very great decrease in the weight.

The inventor says that this form of block is capable of a number of variations, and the simplest design is the one which is shown in the cut. It is also proposed to make the blocks with a single extension instead of the double and for the purpose of making a very close joint it is further proposed to supply them with recesses which will register at the abutting surfaces, so that after the block has been laid in its place in close contact with its neighbor the mortar or cement can be put into the recess made and the pieces held firmly together.

Charles Fox's Aunts.

A correspondent writes: The best case of "linking lives" is that of two aunts of Charles James Fox, one of whom was alive 170 years after the birth of the other. Sir Stephen Fox, who was born in 1627, and is said to have attended Charles I. on the scaffold, married in 1654, and had in the following year a daughter, who died in infancy. At the age of seventy-six he married a second wife, and had four children, of whom one was later created Lord Holland. He eloped with a daughter of the Duke of Richmond, and was the father of Charles James Fox. A sister of his wife was that Lady Sarah Lennox whom the young George III. is supposed to have thought of marrying. She died, the mother of the heroic Napiers, in 1826. She was maternal aunt of the statesman, and the little girl who was born in 1655 was his paternal half aunt.—London Chronicle.

AN UNFORTUNATE FIGURE OF SPEECH.

Doctor (in his own consulting room, to lady whom he has always hitherto seen at her own home)—"Well, madam, this is indeed a case of the mountain coming to Mahomet"—Punch.

A CENTURY PLANT IN BLOOM. . .

By ARTHUR INKERSLEY.

The "century plant" was so named because of the popular idea that it blooms only once in 100 years. It need hardly be said that this idea (like most popular ones) is erroneous. In the genial climate of California the plant blooms in from fifteen to twenty years, but in colder climates from forty to

A FLOWERING CENTURY PLANT.

fifty years may be necessary to bring it to maturity. The botanical name of the plant is Agave Americana variegata, and was given to it because of its splendid appearance. The agave is a native of Northern Mexico, where it is named the maguey, and furnishes pulque, the national drink of Mexico. In Golden Gate Park, San Francisco, the sandy soil is specially favorable to the agave, of which there are about twenty species in various stages of existence. When the plant begins to bloom it throws up a single stalk, from which the tassel-like flowers sprout forth on either side. The great flower-stalk draws all the sap and vigor from the broad leaves of the plant, which, after it has reached its perfection, droops and dies. But at the base of the fleshy, glossy, dark-green leaves are found little suckers, each with a root, which, when planted, at once begins to grow. Though a century plant in flower is not a very uncommon sight in California, it is sufficiently so to attract considerable attention, while to most Europeans it is a very rare and wonderful occurrence. The accompanying photograph was taken by Charles Weidner, of San Francisco, and was sent by Mr. Arthur Inkersley, of the same city.—Scientific American.

The Pickpocket Trust.

Pocketpicking is the latest industry to pass into the hands of the octopus, according to Chief of Police O'Neill. That a regularly organized syndicate exists in the profession, with branches extending throughout the entire country, the Chief says the police have had occasion to learn to their cost in the prosecution of hundreds of cases against members of the fraternity.

"Convictions of this class of criminals are almost impossible," he asserted. "If necessary, the organization will spend $50,000 to protect its humblest member. That's the reason so few pickpockets are ever sent to prison. Did you ever notice it?

"The syndicate's methods in the protection of its members are many," continued the Chief. "False alibis play a prominent part. These are seconded by a liberal buying-off of complainants, and when the evidence has been thus weakened, powerful law firms are hired to do the rest.

"The use of straw bonds is resorted to when everything else fails. If necessary, good bonds are given and jumped."—Chicago Inter-Ocean.

Bound to Advertise.

The proprietor of a comparatively small but growing department store says that three-fourths of his trade comes from regular customers, the remainder being due to his newspaper advertising. "You must understand," he said, "that I have to advertise as persistently for my regular customers as for transient buyers. If I did not I could not hold them."

A SERMON FOR SUNDAY

AN INTERESTING DISCOURSE BY DR. HOWARD DUFFIELD.

Subject: Heart Failure—The Autobiography of Our Souls Is Often Stained With the Very Faithlessness Which Blots the Memoirs of the Apostles.

NEW YORK CITY.—Dr. Howard Duffield, pastor of the Old First Presbyterian church, Fifth avenue and Twelfth street, preached Sunday morning on "Heart Failure." He took his text from Mark xiv: 99: "And they all forsook Him and fled." Dr. Duffield said:

What cowards! Comrades of Jesus, death a three years' friendship with the Master come to such an end? Shall the intimacies of man months go swirling like leaves in the wind before a puff of panic fear? Apostles of Jesus, why will ye be pilloried for poltroonery? When defeat brooded over the hills of Gilboa and the remnants of the armies of Israel lay strewn through the Judean valleys, Saul and Jonathan died together. When Socrates kept tryst with death the prison yard in which he sat became like a hall of banqueting and the jail shakes echoed with the converse of devoted friends restless of sharing with him the cup of hemlock. When the sun of Austerlitz that had bathed the earth in glory at its rising, sank eclipsed in blood behind the plain of Waterloo, the files of the imperial guard drew up as on parade and died beneath the flag. But in the hour of His extremest need the comrades of Christ "forsook Him and fled." Those that had seen Him walk the storm swept lake; conquer disease with a finger-touch and dethrone death with a syllable, when a squad of hirelings with swords, and the riffraff of the city with staves, came out to take Him, they forsook Him and fled.

Jesus walked the pathway of tears, and no one kept step with Him. The hour has sounded for chivalry, and His friends exhibited poltroonery. The call was for heroes, and those He loved showed their backs to Christ, instead of their faces to the foe. Occasion beat the long roll, but the battle line became a rout. Imagine that scene reversed. Imagine that cordon of apostles buttressing Christ against assault as with a citadel of rock. We can almost see them rooting themselves like storm-defying oaks, and opposing the metal corslets of Christ's foes with the breastplate of their invulnerable affection. We can almost see them converting Gethsemane into a Gibraltar of affection, and shattering the onset of embattered persecution upon the impregnable front of a devotion that was stronger than death. We are well nigh envious of their opportunity of renown.

The possibility of such loyalty has not yet passed away, it has not yet become impossible for one to show a stalwart allegiance to Jesus Christ in the face of contempt and antagonism. "They are not yet dead that seek the young child's life." Christ does not recede with the ebb of passing years. The men of His age are sleeping in their sepulchers.

The first element of heart failure is disappointment. The apostles had a very well defined theory as to what Christ had come to do for them, but they had thought very little of what they were to do for Him. They had a clear conception of the prerequisite of discipleship. They were deeply concerned as to the pattern of their crowns. They knew to a nicety the comparative altitude of their thrones, and they were anxiously parcelling out the cities over which they were to rule. With their feet treading the very ascent to Calvary they were badgering each other as to which of them should be greatest. Jesus had come to give them a life of ease and self-satisfaction. No more stormy nights out upon Gennesaret; no more fagging at the nets and pulling the wet cordage of their boats; no more weary days brawling in the Capernaum market place to get salt for their meat and butter for their bread. Christ had a whole cornucopia of splendors to empty into their lap—kingships, and dignities, and thrones, and scepters. When as with a lightning stroke all these fond dreams went whistling down the wind, and their cloud palaces vanquished like mist at sunrise, disappointment thrust its iron into the soul, and away they went, spurred by an impulse which for the moment was irresistible. Their thought had been centered on the good they were to get, not upon the good they were to do.

It is not impossible that you and I should just as mistakenly interpret the purpose of Christ's mission. In some pivotal moment the consciousness of sin unexpectedly leaps up and chills us with its shadow. We are lashed by the scorpion whip of conscience. We shudder at the thought of death. The awe of eternity overshadows us. With timid fingers we open the Book of God. With eager eye we scan the page of Scripture. A wondrous gospel salutes us. Glad tidings ring like music through our hearts concerning One who has a welcome for the outcast, who can whiten the most soiled soul, who will uplift the fallen and recall the wandering, and who has planted His mighty heel upon the head of death. We kneel rejoicingly at the foot of the cross. We surrender our life into the keeping of Jesus. We yield Him the ready homage of our hearts. Then comes the danger hour. Then we are in peril of thinking how much Christ has to give, and too little of what He is training us to give. Then we are prone to dwell in imagination with the spirits of just men made perfect, and the companies of the shining ones who walk with Christ in glory, until we lose touch with the men and women who throng about us warped and stained with the sin and sorrow of the world. We forget that forgiveness is not the last word but the first word of the Gospel. We forget that pardon is not the last utterance but the first utterance that Jesus has spoken. We overlook the fact that there is a culture of character which demands the energy of a hero and the patience of a devotee, that there is a service of others that calls for the crucifixion of self.

Another element of heart failure is doubt. How was it possible for the apostles to recognize a Messiah under arrest? Was this the upshot of centuries of prophecy? Was this the story that the messengers of God had been telling of majesty and glory and of victory? Was the Prince of the house of David to be dragged away in chains and the Lion of Judah to be thrust into a cage? Clouded in their perceptions, confused in their thought, confounded by the inrush of doubt, Jesus' disciples hurried away beneath the shadows of a night that but faintly suggest the dark questionings that must have shadowed their devoted hearts.

This is an age of doubt. Demon whispers are upon every breeze. Siren songs are at every turn. Faiths are under the scalpel. Creeds are in the crucible. Beliefs are upon the anvil. A searching and pitiless criticism is passing under its lens everything that men have counted helpful and holy in the days gone by. For one, I do not regret it. Flame will never harm gold. A file's tooth cannot bite a diamond. But an age of doubt brings many a doubting day into the hearts of faithful and loving disciples. The champions of the faith had their doubting days, the record of which is written in the Scripture with a pen dipped in tears. There came a day when David loving, trusting, aspiring spirit that he was, bemoaned the time when God's face was hidden. There came a day when Elijah, that man with nerve of steel and heart of fire, lay spent and worn by the stress of mental conflict under the juniper tree in the desert. There came a day when John the Baptist, that mounted like an eagle to greet the dawn of truth, felt his heart weaken and his eye film. There comes a Gethsemane to every one that is following Jesus closely, a time of darkness, of loneliness, of a wrestling in the night, when those that love us most seem wrapped in sleep, unable to comprehend the conflict that surges within our soul. There are doubting days in the calendar of experience when the earth trembles beneath the feet, when the guiding stars of destiny are veiled with a cloud, when the altar flame of life burns into ashes, when the eyes of faith are blinded with a mist of tears, and when hope bows her serene head and hides her radiant face.

Another element of heart failure is danger. There was an element of personal peril that night which we must not forget to introduce into our analyses of the impulses that drove the apostles away from Christ. In all likelihood the thought of danger little affected the comrades of Jesus. With us it is apt to be the overmastering consideration. The retreating apostles were not so much afraid of some things as we are. We talk about absolute monarchy. We tell stories of Siberian atrocity with the blood chills. There is but one absolute monarch—the czar of human opinion. The ukase which he issues drags us all into a Siberia of the mind but faintly typified by the degradation of those gloomy mines that burrow into the Arctic mountains. The opinion of the world exiles those it fears. It dungeons truest manhood. It puts chain and ball on our loftiest resolutions. It verges independence. We dare not be free and manly and genuine. It makes us fast fast in the stocks of its whims. We are all the while asking which way the weathercock points—and we trim. We are diligent in inquiring how the current sets, and we veer, instead of asking whether the needle points and setting our prow to the pole star; instead of reading the chart and laughing to scorn the fret and roar of the billows. We serve Christ, by the world's permission. Why should we be so deferential to the world's opinion? If you sin, will the world help you up? If you have blurred the fair page of your life, is the world helping you to whiten it? If you are sick, will the world play physician? If you are struggling with all the energy that is in your soul to scale some starry height of purity and of nobility will the world lend you a hand? When your path enters the valley of the shadow will the world walk beside you on that lonely and mysterious way? When your stay here is ended will the world spend one thought upon you, keep flowers growing on your grave or tear the lichens from your tombstone? There is one who loves you, one who, whenever you slip, has an arm of love ready to catch you; when you fall has messages of hope ready to whisper in your ear. He will whiten your soul. He will gird your weakness. He will school your ignorance. He will share your sorrow. He will companion you as you cross the frontiers of time. He will introduce you into an unclouded eternity beyond. Why care very much for the opinion of the world in which we are but a fleeting now and in which tomorrow we will be a memory? Why not very humbly care for one whose love survives the hour as with an atmosphere?

Turn the page and read the later story of apostolic loyalty. The sequel is different from the preface. Call the roll of that glorious company of the apostles and hear every compass point ring with fidelity to Jesus. Read how they sowed the earth with martyr blood from Abyssinia to India. Begin the chronicle with that tradition of Simon Peter, who was led out to death in the Roman amphitheatre while his wife was crowned with martyrdom before his eyes, to shake if possible the stanch rock of his bedded faith. And while she suffered he called her by name and addressed her in terms of most endearing affection and exhorted her to remember the love of the blessed Lord and to be firm until the very end. His turn came next. He had but a single favor to ask from God as he stood there in the old Roman circus face to face with death, and that was that he might remain firm for one more hour. He had but a single favor to ask from man, and that was that he might be crucified head downward, as it was too great an honor for one who had deserted Jesus to suffer in the same way Jesus did. The whole company of the apostles went sweeping home to their Master in chariots of fire. They sealed their allegiance to Him with their blood. Since the night of panic they had come to see Jesus under a new aspect. They had known Him as a friend. He had a place at their table and a voice in the home talk. He had a seat at their firesides and a share in their plans. They had strolled together up and down the field paths. They had paced side by side through the city streets. He had colored their sympathies, molded their character, enriched their lives; but the bond of friendship broke in the hour of trial. They had known Him as a teacher. They had been fascinated by the crystal-clear form of His statements. They had thrilled to the searching and subtle touch of His mountain sermon. They had felt the subtle charm of His parables, but the spell of His wisdom did not keep them true on the night of His betrayal. They had seen Him as a miracle worker. They had beheld the storm sleep like a child at His command. They had witnessed leprosy converted into purity at His touch. They had seen the winter of the sepulcher bloom into the spring when His sandals touched the lintel of the tomb, but the power of Jesus did not arm them to look upon the face of fear. But since that hour of heart failure they had come to know Him as their Saviour. They had seen Jesus die for them. They had felt the touch of love that death could not quench. They had been beneath the arms of the cross outstretched to shelter them. They had caught the accents of His parting prayer, "Father, forgive." They had heard His triumph shout, "It is finished." As their Redeemer Jesus riveted them to Himself with hooks of steel.

In this day of force worship it is timely to uplift Christ as the vitalizing energy of humanity. It is pertinent to emphasize the deathless power that resides in Christianity. It is interesting to watch it soaring like a phoenix from the ashes of Jerusalem, smiting like a mailed giant the forces of the Graeco-Roman civilization, sweeping like a white-winged angel of mercy beyond the Alps and the Rhine, and scattering glorious benedictions upon Scandinavian, Celt and Saxon; to watch it as it carries the same beneficent potencies to the dark continents and hermit nations of our own time, and blessing with its exhaustless bounty attic and cellar, avenue and alley, and parlor and schoolroom, and market place of latter day civilization. In this hour of culture craze it is timely to mark the unique wisdom of the Christ and to note that through all the ages a train of gifted minds has brought the treasures of their life and laid them at the feet of Him who was cradled in the Bethlehem manger; to observe the masters of human thought bowing with wondering homage before the sweet and the clarity of Christ's insight; to remark how the boldest of the skeptics become deferential and unsandal when they pass within the charmed circle of this singular personality. But when I see one who dwelt in the light of the face of God hastening down into the shadows and miseries of this stricken earth; when I behold Him stripping Himself of those robes of divine majesty which He wore before the world began and apparelling Himself with that sad-hued vesture which we mortals wear, stained with woe and broidered with tears; when I behold Him who was the centre of angelic adoration, in pathetic loneliness, becoming a target for the scorn of the world, despised and rejected of all men, spurned by bigots in the tribunal of His people and buffeted by brutes in the guardroom of the Roman; when I mark the bolt of doom that was whistling in its flight toward my heart, bury itself in the bosom of His love, and all this for me, for me, a sinner, then I am His. Then, if ever, the elemental depths of being are stirred and a loyalty of affection is enkindled that knows no swerving.

A woman is never so lonely as when she knows a secret and has no one to tell it to.

Animals Becoming Extinct.

Every century sees several species of animal becoming extinct. In the race for life the weak must yield to the strong, and because they are persistently sought for food or for feathers not only individuals but whole families cease to exist. The disappearance of the great auk can be laid to the nineteenth century. It became extinct on the American side of the Atlantic about 1840 and in Europe about 1844. The South African quagga disappeared about 1870 owing to the slaughter by hide hunters. The twin shelled tortoise of the Galapagos islands became extinct in all probability about 1875. The black emu of South Australia was also exterminated during the century, though it was abundant in 1803. The great cormorant was last seen alive about 1839, and many other species of birds from all parts of the world have likewise been exterminated. In the Danish West India islands, for example, out of fourteen species catalogued in 1795 only six still exist, and a similar history can be told of many other localities.

Shelley Liked Bread.

The poet Shelley was very simple in his tastes and found his chief pleasure in long, solitary rambles. Bread became his chief sustenance when his regimen attained to that austerity which afterward distinguished it. He could have lived on bread alone without repining.

"Do you know," he said one day to a friend, with much surprise, "that Mr. G. does not like bread? Did you ever know a person who disliked bread?" His friend explained to him that Mr. G. probably had no objection to bread in moderate quantity at a proper time and with the usual adjuncts and was only unwilling to devour several pounds of dry bread at a meal.

Shelley had no such objection; his pockets were generally well stored with bread. Sometimes he ate with his bread the common raisins which he bought at small grocers' shops.

FOR SALE OR EXCHANGE.

Useful Articles of Daily Need for Sale or Exchange for Other Articles.

One cent a word first insertion, or three times for two cents. Nothing less than ten words considered. When convenient call at REVIEW office in reply to ads, where explicit directions will be given regarding same.

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

Arthur Smith, son of W. C. Smith, of Grandview avenue, this borough, was graduated at Rutgers College last week.

Maurice A. Audsley has leased the new house of A. V. Searing, Jr. located at 146 Westervelt avenue, and will take possession next week.

Plainfield High School commencement was held Thursday evening at the First Baptist Church. Judge W. N. Ashman, of Philadelphia,, addressed the graduates,of whom there were thirty-five.

Plainfield authorities are after the Plainfield Street Railway, and the police department has been instructed to put a stop to violations of city ordinances. Flat wheel cars have stirred the citizens to action.

The commencement exercises of the North Plainfield High School were held in the Y. M. C. A. Hall last evening. Rev. Jesse Lyman Hurlbut, of Morristown, addressed the twenty-two graduates. Miss Ursula Krewson was salutatorian, and Edgar W. Adams valedictorian.

Rev. R. C. Hancock, pastor of St. Paul's M. E. Church, Ocean Grove in a paper read last Monday to the New Brunswick district preachers, advocated the formation of fraternal a society in every church, the church to pay a weekly benefit to the sick, as well as the payment of a lump sum to widows. Also urged the establishment of a home for old church members in every presiding elder's district, this home to be supported by the fraternal societies of the churches and by legacies.

Plainfield May Have City Park.

At a meeting of the Plainfield Common Council last Monday evening Mayor Olin L. Jenkins outlined his plans for a city park. He suggested that a tract of acres in the southern part of the city be purchased at an early date, and suggested that one of the features be an artificial lake covering twenty-five acres. A resolution was passed by the council and president will appoint a committee of fifteen to investigate and perfect the plans.

Death of Peter Newmiller.

Peter Newmiller, of Mt. Bethel, who had been paralyzed for some time, died at his home Wednesday morning. The funeral services were held yesterday afternoon at the house and Coontown Reformed Church.

Mr. Newmiller was sixty-nine years of age. For twenty-five years he had been township assessor.

Last week his son Peter Newmiller, was killed in a railroad wreck in Kansas.

Pythian's Memorial Day.

Local lodges of the Knights of Pythias will observe Pythian Memorial day tomorrow. W. N. Runyon will act as marshal in the parade to the different cemeteries. Members from the following lodges will be present: Port Chester Lodge, of Port Chester, N. Y.; Rathburn Company, of Brooklyn; Palestine Company, of Jersey City; Black Prince Company, of Newark, Unity Lodge and Perseverance of Plainfield. The Independent Fife and Drum Corps will head the line.

Dr. Moldenke on the Labor Question.

Dr. Richard Moldenke, of Watchung, has returned from Milwaukee, where he has been attending the annual convention of the American Foundrymen's Association. The Milwaukee Journal of the 10th instant, contained the following interesting article regarding Dr. Moldenke:

Dr. Richard Moldenke, one of the leading iron men of the country to combine practice with theory and who is secretary of the American Foundrymen's Association in session in Milwaukee, taught for a number of years in the Michigan School of Mines, and is credited with having made some of the most valuable of recent experiments in the mineral world.

Dr. Moldenke characterizes the friendly attitude taken by some of the members of the Milwaukee convention as a reply to statements hostile to labor unions recently made by President Parry of the National Manufacturers' Association.

"I believe heartily that the laboring man's wages should be in a manner commensurate with the profits of the manufacturer," said Dr. Moldenke. "It is the walking delegate proposition that complicates the situation. I own a large foundry at Pittsburg, employing 1,200 men, with an investment of $800,000, making the castings for steel cars. I have been through two strikes and know more or less about labor agitators. I know many of them personally, and sometimes say to them: 'Boys, I know it's your business to stir up these matters, but when it comes to war, I am willing to stand out, even to war with the knife.'"

Dr. Moldenke thinks that laboring men have the right to combine, and that their combinations may be conducive of good results, if they are rightly and sanely directed, as he thinks they are not in every case.

"A compaign of education is what is going to solve the labor problem," he said. "And that is just what our organization is aiming at."

Lough-Saunders Wedding.

Miss Elizabeth Saunders and Percy Field Lough were united in marriage at the home of the bride's parents, Mr. and Mrs. Nathaniel Saunders, 154 Westervelt avenue, Friday evening, June 12. Rev. Dr. Cornelius Schenck officiated at the wedding ceremony.

On account of two deaths in the family during the past year, the wedding was a very quiet affair, only the relatives of the bride and groom being present.

The bride was the recipient of many presents consisting of upholstered easy chair and divan, cut glass, silver tea service, spoons etc., china, onyx clock, pastel, etching, beautifully embroidered center pieces, tray cloths and sofa pillows.

Mr. and Mrs. Lough are spending the honeymoon in the Adirondacks. Upon their return they will make their home with the bride's parents.

Annual Meeting of Children's Home Society.

The ninth annual meeting of the New Jersey Children's Home Society was held in Trenton on June 11. The financial showing of the past year for the Society was the best in its history. There was raised during the year for the General Fund, $8,477.23, and for the McKinley Memorial Fund, $2,630.73, a total of $11,107.96.

The Board of Managers reported that they had purchased a Receiving Home on Brunswick Avenue, just outside Trenton city limits, for $8,000, and that $3,000 had been paid upon the same, with another $1,000 in the treasury to be devoted to that purpose. There are eight acres of land, with a good house upon it. The Society has already taken possession, and fifteen children are in the Home awaiting placement. The committee in charge of raising money for the Home are preparing to make a canvass of the State.

In the nine years the Society has received 837 children and placed 767 for the first time. Many of these have been replaced, a number of them again and again.

The following officers were elected: President, Rev. D. R. Foster; Trenton; Vice Presidents, David Warman, M. D., Trenton; Mr. C. V. Brinkerhoff, Hackensack; Secretary-Treasurer, Rev. G. H. Ingram, Trenton; Counsellor, Hon. John T. Bird, Trenton; General Superintendent, Rev. M. T. Lamb, Trenton; Assistant Superintendent, Mr. C. V. Williams, Trenton; Superintendent's Assistants—Mrs. E. H. Braddock, Jersey City; Rev. E. J. Brewer, Trenton; Rev. J. M. Huntting, Hackettstown.

The New Newark Bay Drawbridge.

Nearly every one crossing the New Jersey Central's Bridge over Newark Bay is interested in the work incident to the pier building, and though it is a gigantic undertaking, the work is progressing rapidly and traffic has not been delayed. Seventy foot piles have been driven to form foundation for the new piers, and these have been cut off by machinery at a depth of 30 feet below water. As these piles were driven and cut off under each track separately, it was necessary to carry the traffic on a single track, which has been done with almost no delay to trains, which at this point are very numerous.

The large caissons in which the piers are built were erected last fall on the north bank of the Bay. These consist of a grillage, or floor, four feet in thickness, and sides built with strong posts and planks, and the whole is made water tight, the joints being caulked in same manner wooden vessels are built. Three of these caissons have already been towed to the site of the new draw and partially filled with concrete, of which the new piers are to be built. When the weight of concrete sinks the caissons at low water to the level of the foundations, they are towed into their final position under the trestle, and when accurately located, by boring a few holes in their sides, they are filled with water and sunk in their permanent position, being supported by the piles, and stone filling which has been thrown in, making a durable and substantial foundation. Work is then continued on each pier until they have reached their final height.

It is expected that all four piers in the westerly half of the new pier will be filled and ready to receive the steel work by the 20th of June.

CLASS DAY EXERCISES

Borough High School Pupils Celebrate With Song and Verse.

Class day exercises of the senior class of the North Plainfield High School were held in the High School building Friday evening, last week. The room was filled with relatives and friends of the class, who were rewarded with an excellent and enjoyable program. Following are the special features of the occasion:

OPENING ADDRESS BY PRESIDENT OF CLASS, FRED. ARMSTRONG.

To the friends gathered here, to teachers and classmates, the class of 1903 greets you all and welcomes you to our exercises.

It is with mingled feelings of joy and sadness that we meet here tonight.

We look back upon the past year as the most delightful of all and recall many occasions which afforded us special sources of pleasure. But this feeling of gladness is mingled with regret as we remember that old ties must now be severed. We have long been fellow students together; let us not cease to be fellow-students as we go out to our work as we enter upon the real life for which this was but a preparation. We cannot take leave of these familiar walks and sunder the pleasant associations which have bound us together here, without acknowledging the debt of gratitude we owe to our school. We know we are wiser and better for the lessons we have learned, and whatever success we may hereafter achieve in the world we shall be largely indebted to our school for success.

And now as our historian tells of the four years spent here and discloses all our shortcomings, our prophet shall reveal our future. Remember that back of all this is a most kindly feeling, so we are willing to sacrifice our follies to enjoy those of others.

To these exercises we the CLASS of 1903 bid you all a hearty welcome.

CLASS HISTORY, RAYMOND MARTIN.

Though not aspiring to a place beside Xenophen. Livy, Gibbon, and other famous historians, I have humbly endeavored to chronicle a few events connected with the class of 1903.

Class History, to begin with, is a record of the trials and tribulations, the battles and successes, lying as stumbling blocks and helping hands in the path that leads to knowledge. It is an outline of the struggles of the Freshmen, the pride of Sophomores, the exclusiveness of Juniors, and the triumphs of Seniors.

History recalls to us some of the events of our High School life. To-night we would show you a panorama of the four years spent within these walls; of our pleasant associations and happy memories, passing by the dark clouds on the horizon, composed of sleepless nights—the results of anxiety-agonies of apprehension before examinations, and the grief and dispair when we were informed that "it will be impossible for me to pass you in this subject as your examination now stands." At present these dark spots are totally obscured by the joy and gladness we have at last attained.

In our Freshman year we numbered twenty-two. Seldom is it that quality and quantity are so admirably associated as they were in our class. Though our actual number was not great, it is impossible to compute our real value to the community.

Our great originality displayed itself in that year, when we held our first class-meeting. Not only did we elect our officers and class colors, the beautifully blending red and black, but we gave into the hands of a special committee the ordering of silver pins that were to be official pins of the class of 1903 for the next two years; the first time such a thing had been done in the history of the school.

Many and varied were the experiences of that year, but not more so than in the ensuing terms.

At the begining of the Sophomore year our class numbered twenty-seven members. In this year we were initiated into the myths of first-year literature. Why did not the authors of that book die before it was written? We can very easily understand why they die after that, if all who studied it felt towards them as we did. The myths, gods, goddesses were continually becoming entangled with each other, and how the authors kept them apart in their own minds is a mystery. Therefore, we were very much relieved when the second year came to a close.

In our Junior year we numbered twenty-one. Some had dropped out and but few had entered, but those who remained were the pick of the class.

The first half of the year went along uneventfully, but toward the close of the term we began to realize that, unless we made great efforts to bring up our averages, our class would probably be disgraced by the failure of many of its members to pass the yearly examinations.

So we struggled and worked at our lessons, and at last found that nearly every one of us had passed the Junior year in safety!

'Twas, however, in our last and final year that we began to feel the glory of being the most advanced class in the school, and as such to receive many small priveleges from the faculty, and many looks of envy from the lower classmen.

It is the custom, in our school, to have a Christmas tree of which the Senior class has charge, and in this year we had the honor of selecting the Christmas presents for our fellow students, but we were very much disappointed by their lack of appreciation of the practical jokes we played upon them, although when we were in their places we thought no better of them than they.

On the 13th of February, 1903, our friends the Juniors gave us a delightful little reception in these rooms, for which we thank them very much. During the evening we were entertained with a play, rendered by talent from the Junior class, and later enjoyed a delightful hour or so of dancing.

Between that time and this, few events of any moment have taken place, and now, as we near the end of our school life, we look back with pleasure upon the happy days spent within these walls.

Though the last four years, as a class, we have been one, with one end and aim before us, and now, as we are about to take leave of our school and of each other, we faithfully cherish the remembrance of our school class, and whatever there is of good, we heartily invoke for both. Let us hope that, in the future, when the class of 1903 is scattered, the remembrance and the love of our Alma Mater will remain with us forever.

ADVICE TO JUNIORS, CLYDE SLATER.

When asked to give advice to the Juniors, I was greatly troubled as I realized my inability to do so. The more I thought of it, the more perplexed I became until one day while wandering through a shady glen I came upon a large oak tree, where I sat down to rest. The stillness gave me ample time for thought and naturally my mind turned toward the Juniors, and I pondered what I could say to them, that would direct their steps in the straight path, which the class of 1903 have trod. I thought of the spirits and wished I were a clairvoyant, but dared not hope for such a blessing.

While I was still thinking of these things, I was startled to find myself sinking, sinking, and the objects in my sight were moving round and round, and making roaring sounds in my ears, as if a terrible wind storm were raging. I made an effort to rise but fell back and then all was black and still.

For some time I knew nothing for as you probably have surmised, I was in a trance. Soon, however, I heard mumbling sounds from afar off, then as they came nearer I was able to understand what was being said. This spirit, for such it was, spoke in a low, monotonous tone and just as it came up to me, it said,

"He speaks between the change of man and boy
With a reed voice, and turns two mincing steps
Into manly stride, and speaks of frays,
Like a fine bragging youth, and tells quaint lies
How honorable ladies sought his love,
Which he denying
They fell sick and died."

Of course, I knew immediately that the voice was speaking of Mr. Hanford Miller, therefore, I counsel Mr. Miller to have pity upon the young ladies in his class, and in order that his charms may be somewhat allayed, I advise him to change his style of hair dressing, so that his locks will not fall in such a ravishing range over each eye, and also to adopt less fascinating poses while in class as these charms cannot be withstood by the majority of the feminine sex.

After a short interval, the low voice continued, but on a different subject as it said, "She giggles and giggles, she talks and she wiggles." This I knew was Miss Mazie Mair, and I trust Miss Mair will try to overcome this mirthful habit, as all the seniors know by experience that nothing exasperates the instructors, as giggling. It is evident that Miss Mair has never been reproved by a teacher, who, when a general giggle is going round the room, looks up and asks, "What is the matter, if there is anything to laugh but don't GIGGLE."

The voice went on saying, "Since knowledge is but sorrow's spy. It is not good to know." I had little trouble in applying this to Miss Quipp, who for some time past has been crowding in her mind a surprisingly large number of facts.

I will feel it our duty to advise Miss

(Continued on Last Page.)

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

The Asbury Park Council has appropriated $300 for the baby parade this summer. The parade will be over the new board walk and not on Ocean avenue as last summer.

A vase sixty-two inches high and twenty-four inches in diameter, probably the largest ever made in Trenton, is in process of manufacture at the Trenton Potteries. Peter Korzillius, who worked eight months on models for the St. Louis exposition, has completed the model of this vase in clay. When finished it will be worth $500.

Rev. P. W. Bilderback, pastor of the Fourth Methodist Episcopal Church, Millville, has introduced a new feature in his Sunday evening service, that of a choir of thirty young men whistlers. The choir made its first appearance Sunday night before a large congregation and whistled several selections. Some of the boys in the gallery joined in the chorus.

Reports received by Director Voorhees, of the agricultural experiment station, New Brunswick, indicate that conditions in Middlesex have been very much benefited by the rain, and that many crops, supposed to have been destroyed by the drought, are sprouting and bid fair to do almost as well as if the seed had germinated on time. Farmers who plouged their planted fields under are disposed to regret their lack of patience.

George Thompson, a coachman employed by Alexander L. Kean, of Livingston has been fined $50 by Justice of the Peace James H. Vreeland, of East Orange, on a charge of assisting in the docking of a sorrel stallion's tail. The alleged docking operation took place on May 8. The stallion belonged to the stables of Mr Kean, against whom there is also a complaint, made by the Society for the Prevention of Cruelty to Animals.

Charles Sorter, superintendent of Fairview Cemetery, near Westfield, is being congratulated that he is alive. He was blowing out stumps in the addition to the cemetery and was leaning over a stump adjusting the firing wires to a stick of dynamite, when an assistant, who was arranging the wires, connected them. Sorter and the stump went up in the air together. He escaped with injuries to back, and one foot, and, though he is confined to his bed, his condition is not considered serious.

Rev. William Ostrander, one of the oldest Methodist ministers in New Jersey, died at his home in Passaic, Sunday, after a long illness. Mr. Ostrander was seventy-seven years old. He was placed on the retired list by the Methodist conference of New York twenty-five years ago. For a quarter of a century before this he had charge of churches at Chester, Washingtonville and other places in Orange County, N. Y. For many years he was the chaplain of the grand lodge of Masons of New Jersey, and prominent in Masonic circles in this city.

The Delaware and Raritan Canal, New Brunswick, from the outlet lock to the second lock, or upper level, closed June 14, and will not be opened again until July 1. The close of this part of the canal for sixteen days is to permit the laying of the foundations for the pier in the centre of the canal which is to support the canal arches of the new railroad bridge. No canalboats going south will be able to enter the canal during the period, and canalboats going north will be able to get only to the entrance to the lower level. The line of steamers running to Philadelphia and New York will be suspended temporarily.

Endicott C. Allen, whose home is in Boston, has been in the Monmouth Memorial for three weeks. He sleeps most of the time. There does not seem to be anything the matter with him except his inability to stay awake for more than short intervals. His turns of sleep last two or three hours. Then he will awaken, take nourishment, talk intelligently and even cheerfully with those around him. Then, despite his own efforts to keep awake and the efforts of those about him to prevent his going to sleep, he will slumber again. He has gained in weight at the hospital.

Visitors to the beach Asbury Park about 7 o'clock Sunday morning were startled by the appearance of a great waterspout about 200 yards from the shore. When first observed the waterspout was off Bradley Beach, two miles south of this place, and was travelling rapidly in a northerly direction. It appeared to be more than 100 feet high and fully twenty-five feet in diameter. A four masted vessel bound south was in its path. When near shore the officers of the vessel steered the boat shoreward, and in doing so nearly drove it on the bar. Fortunately the waterspout, soon after passing Bradley Beach, changed its course, and, swerving, speeded out to sea, and was soon lost to sight. After it disappeared the sea became unusually rough. The waves rolled in with tremendous force and the breakers dashed completely under the new boardwalk, but without doing any damage. Later the rain fell in torrents and the thermometer dropped several degrees.

WATCHUNG.

Arrival and departure of mails at Watchung.

Leave	Plainfield	9 a. m.	5.35 p. m.
Arrive	Watchung	9.30 a. m.	6.00 p. m.
Leave	Watchung	12.30 p. m.	6.10 p. m.
Arrive	Plainfield	1.00 p. m.	*6.40 p. m.

*This mail makes connection for all outgoing mail from Plainfield the same evening.

The best attendance at the public schools for the year is as follows:

GRAMMAR GRADE.

Douglas Demler, 184 days; Willie Demler, 183; Theresa Schmidt, 179; Martha Wersing, 171; Georgie Schmidt, 170; Clara Wersing, 169; Eda Wersing, 165; Bertha Wyckoff, 151.

PRIMARY GRADE.

Elsie Schmidt, 188 days; Charlie Wersing, 185; Clarence Schmidt, 181; Tiny Texier, 176; Freddie Wessell, 176; Clara Kelm, 171; Eddie Wersing, 171; Minnie Blume, 170.

Those who received rewards were: Grammar Grade—Best school record, Douglas Demler. Best scholarship, Theresa Schmidt. Best record in Class A, Willie Demler. Primary Department—Perfect attendance, Elsie Schmidt. Second in attendance, Charles Wersing.

Pupils on Roll of Honor, June, Grammar Grade—Willie Demler, Douglas Demler, Albert Perrett. Primary Grade—Elsie Schmidt, Charlie Wersing, Tiny Texier.

The number of pupils enrolled during the year. Grammar Grade 35. Primary Grade 50.

WARRENVILLE.

The lost boy, mention of which was made in last week's REVIEW, was restored to his father by Judge Jno. C. Cooper, who took care of the boy after the overseer of the poor refused to have anything to do with him.

A case which created great interest was tried before Judge Cooper last week for Catherine M. Pavillard, of Warren Township, vs Albert Sutterlin, of Plainfield. The Jury found him guilty. He gave bond to pay the girl $2.50 a week. S. S. Swackhammer appeared for the Township, and Wm. DeMeza for the defendent.

The recent rains insure a good hay crop. Corn already planted will be O K, and there is good prospect of an average crop for late planting.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

John Grogan et ux to Seymour L Smith, $3250 00

John C Milne et ux to James D Frazer, $500 00

Robert Clark, Jr, et ux to Crescent Avenue Presbyterian Church, $1 00

Cornelius E Gulick et ux to Wm Birrell $1 00

First National Bank of Plainfield to Frederica Smally, $1 00

Fannie L Fanders and husband to Elm'ra M Archold, $800 00

Wm C Stanberry to Judd Stewart, $5000 00

Mary McGlone to Geo. Giddes $1 00

George Moore to Isablle S Simonson, $1 00

Albert J Drayton et ux to Emme E Burner, $1 00

Lake Hopatcong

Lake Hopatcong has become justly famous for several reasons but chief of these is its location. High up in New Jersey's beautiful mountains, a thousand feet above the sea level, surrounded by verdant hills and charming landscape, it is the perfection of outing places. To reach it is a delightful journey through a series of picturesque valleys, and the time the traveler is so occupied feasting on the scenic sight that the few hours journey are like fleeting moments. For a Sunday excursion no place is more popular than Lake Hopatcong, and if you want a day of enjoyment take in the $1.00 excursion to Lake Hopatcong. The New Jersey Central is to run on June 28th. There will be a special train from Plainfield at 9.20 a. m., and the return train does not leave the lake until late afternoon. There is ample opportunity for a trip over the lake or such enjoyment as one may care to indulge in. 2 t

HUNDREDS PERISH

Cloudburst Sweeps Through Heppner, Ore., Carrying Everything Before It.

HEROES OF THE DISASTER

Horseman, Who Galloped Ahead of Huge Wall of Water, Saved Scores.

TELEGRAPHER DIED AT KEYBOARD

Child Saw Parents Swept Away While She Was Left Uninjured in Railroad Station.

The Dalles, Ore.—The search in the great mass of debris which was once the town of Heppner has caused the conviction that the number of people drowned in the flood was at least 500, and many of the bodies will never be recovered.

The loss by the destruction of buildings alone amounts to $1,000,000. One hundred and fifty of the best residences in the town were swept away. The debris is piled along the railroad track in piles as high as freight cars.

Relief work is progressing satisfactorily, but more supplies are being asked for. An offer to send physicians and doctors was declined, there being but few injured.

Eighty-five identified victims have been buried. One hundred and fifty names have been recorded on the list of the missing, besides twenty visitors to the town, whose names are not known.

The disaster developed a number of heroes. An unknown horseman, who rode at breakneck speed ahead of the flood and warned the inhabitants of Lexington and Iona in time for them to escape from the valley, was one of these. He has not been seen since the flood.

Joseph Keitley, seventy years old, used the roof of a house as a raft and saved the lives of three persons who were struggling in the water.

James Kernan, the Oregon Railway and Navigation Company's agent, met his death at the telegraph key while trying to call Portland to inform the outside world of the impending calamity.

His little daughter Katie, who was saved by remaining in the station house, said her father and mother were lost in the whirl of waters. Katie stood by while her father was calling the Portland office, when the flood swept in the lower floor and curled around him. Mrs. Kernan rushed out of the house and started for a high peunt of ground, but was drowned.

One of the most thrilling adventures was that of Tom Shuter, who, with his family, was carried downstream in his house for a mile and a half. His wife and two children stepped into the upper rooms. Below town the house was shot across the creek to the west side, where it lodged in debris, 150 yards from the canyon banks. Shuter then took his two little ones and swam 200 yards. He landed the children, and then rescued his wife.

H. R. Baird, of Portland, lost his wife and three children. They were visiting her father, Mrs. Clarence Andrews and three children, of Seattle, are among the lost. Her husband is in Sitka, Alaska. She is a sister of Mrs. Baird.

R. D. Kelly, who escaped from Heppner, says: "The rain was not falling in Heppner, but could be seen some distance away. Sharp flashes of lightning were accompanied by the howling thunder. Then, suddenly, the thunder died away, and a low noise was heard, very faint at first, but growing louder. The city is situated on Willow Creek, which makes a sharp turn above the city. As the noise grew louder and louder the people became frantic. Then, in a moment, the van of the flood burst into view around the curve of the creek, carrying on its crest the cabins and houses which stood in its path. The people made a rush to the hills, but were too late. The flood was upon them. The little river in five minutes was transformed into a roaring torrent 400 feet wide and twenty feet deep. Houses were lifted from foundations and carried on the swirling waters. People were caught in their homes and forced to crawl on the roof. Then, as the house moved down the stream, they caught on to the trees and hung there until morning, when they were rescued.

"The depot was left standing; also two warehouses containing 2,500,000 pounds of wool."

Elias Connor, a stock raiser, of Ione, one of the latest to leave the scene of the disaster, said:

"One hundred and fifteen corpses have been hastily buried in wooden boxes and some were merely wrapped in blankets. There were still several wagon loads of dead on their way to the cemetery when I left. Heppner itself has now been pretty well searched, except in piles of debris, where it is thought great numbers of bodies will be found.

"Between Ione and Heppner there are great piles of debris, but the flood passed so quickly that the roads have not been seriously damaged.

"It looks strange to see the heavy steel rails bent and twisted like corkscrews and the heavy timbers splintered like matchwood.

"In Heppner itself the flood swept a clean path a mile long and two blocks wide through the town, following generally the course of Willow Creek."

Portland, Oregon.—Heppner, county seat of Morrow County and a town of about 1500 inhabitants, and Lexington, a village of 300 population, eighteen miles northwest of Heppner, were destroyed by a flood which resulted from a cloudburst.

The people were caught in their houses with no chance of escape. A heavy rain had been falling all afternoon, and the residents were in their houses. Without warning a wall of water twenty feet high came tearing down Willow Creek, on whose banks the town is located, and the next moment the houses were wrecked and carried away, a mass of ruins, on the crest of the immense wave.

Many persons were killed outright. Others were drowned after heroic efforts to save themselves. Bridges were swept away like so many matches and all means of communication by wire was destroyed.

The buildings which were not carried away were moved from their foundations or toppled over. Hundreds of horses, cattle, sheep and hogs that had gone into the creek bottoms for water perished.

As soon as the first excitement had subsided the survivors went to work. Messengers were sent out to the neighboring towns and relief parties were organized as rapidly as possible.

Heppner is the centre of a large farming and stock growing country. The town is built on the banks of Willow Creek, in the neighborhood of the converging point of four other mountain streams that drain a large area of rolling and hilly country that reaches from three to twenty miles to the foot hills, and along the course of Willow Creek itself for a distance of twenty-five miles to the base of Blue Mountain.

The greater part of the business and residence section of the town, lying to the west of the creek, is a low bottom covering an area of about 1500 by 1200 feet.

City incorporation was effected in 1887, and since then the town has grown, having a fine hotel, a good substantial bank, good public schools and two immense wool houses. Morrow County is a great grazing country and Heppner furnishes the principal outlet, so that the wool-growing industry is the mainstay of the place, and during the season large sums of money are handled.

IRISH LAND BILL THREATENED.

Redmond Warns Government That Concessions Must Be Made.

London.—The Irish leader, John Redmond, during the debate in Commons on the Irish Land bill, made the declaration that unless the Government granted concessions reducing the minimum price at which the landlord may sell it would be impossible for the Irish members to represent the measure as acceptable to the Irish people.

Chief Irish Secretary Wyndham declared that he considered that limits on bargains were essential precautions, and was unable to accept Mr. Redmond's proposal to raise the minimum reduction to fifteen per cent. in case of second term rents, and twenty-five per cent. in case of first term rents. Mr. Redmond said he was afraid the parting of the ways had been reached, and further consideration of this point must be had, otherwise ninety-five per cent. of the Irish members would be found in the lobby against the Government.

Mr. Wyndham further replied that he realized the gravity of the situation, but the minimum reductions must remain ten and twenty per cent., respectively.

SLAIN BY POLICY VENDER.

Superintendent of Anti-Crime Society Shot Down in Court Corridor.

New York City.—William Spencer, a negro policy player, shot and killed Superintendent S. A. McFarlane, of the Goddard Anti-Policy Society, on the General Sessions floor of the Criminal Court Building.

Spencer's arrest was secured by his victim seven weeks ago, and he was about to be tried before Judge Cowing on a charge of violating the policy law.

Philip Bray, Assistant Superintendent of the Goddard Society, who accompanied Superintendent McFarlane, was shot in the arm in attempting to seize and disarm the murderer. Spencer, who was speedily overpowered, was taken to the Police Headquarters at once and the Grand Jury was informed of the case.

Within an hour of the shooting Spencer was indicted for murder in the first degree. He has a very bad criminal record. McFarlane leaves a wife and child.

FIVE BURNED TO DEATH.

Four Children and a Man Victims of New York Firebugs.

New York City.—Five persons were burned and suffocated to death in what is believed to have been an incendiary fire in a four-story tenement in Harlem. Two persons were removed to Harlem Hospital suffering from burns.

The dead are: Theresa De Cicco, four years; Camillo De Cicco, two and a half years; Alfredo De Cicco, four months; Francisca Stafino, eight years. Guisseppe Cipriano, twenty-four years.

The injured are Angela De Cicco mother of the dead De Cicco children and Florono Stafino, mother of the dead Stafino child.

The police say that the hallways of the basement were soaked with kerosene and that bundles of oil-soaked rags also found.

Made New Governor of Kishineff.

Prince Urosoff, hitherto Lieutenant-Governor of the Government of Tambof, has been appointed Provisional Governor of Bessarabia, in succession to Governor Von Raaben, who was dismissed as a result of the Kishineff massacre.

Steamer Wrecked and Looted.

The steamship Haussa, of the Elder-Dempster line, has been wrecked off the coast of Liberia. Natives looted the cargo. The crew has landed at Las Palmas, Canary Islands.

Chaplain of the Lost Maine Resigns.

The Rev. John R. Chadwick, who was chaplain of the battleship Maine when the vessel was destroyed in Havana harbor, has resigned from the Navy. He was one of the first Catholic priests appointed in the Navy. It is understood that he will be appointed to a large New York City parish.

Liberty Bell Goes to Boston.

Thousands lined the path of the Liberty Bell in Philadelphia as it started on its journey to Boston, Mass., accompanied by a military and civil parade.

ELECTED KING OF SERVIA

The National Assembly Unanimously Chooses Prince Peter.

NEW CONSTITUTION LIBERAL

A Revival of That of 1888—Prince Peter Accepts the Crown and Sends a Message Praising the Servian Ministry—A Resolution of General Amnesty Adopted—Powers of Europe Wait.

Belgrade, Servia.—Prince Peter Karageorgeritch has been unanimously elected King of Servia by the Senate and Skupshtina in joint session.

After the Senate and Skupshtina assembled the members proceeded to church. Upon reassembling in joint session they passed a resolution of general amnesty, and then proceeded to the election of a King. The presiding officer of the joint session then proposed the election of Prince Peter as King. Loud cheers greeted the proposal, which were repeated on the announcement that the vote was unanimous.

The Minister of Justice hastened to the balcony and announced the fact to the waiting crowd. The people received the notification with loud cheers and a royal salute of 101 guns was fired.

At 7 o'clock p. m. a telegram to the Government arrived from the new King. It ran:

"The splendid proofs of devotion from my beloved people, my faithful army, and patriotic Government have deeply touched me. From the bottom of a true Servian heart I thank Providence, which has vouchsafed me, by God's mercy and through His will, to ascend the throne of my famous ancestors. I beg you, the Premier and your colleagues in the Government, to accept my royal acknowledgment, with the assurance of my particular goodwill."

The resolutions adopted by the National Assembly have practically granted immunity to all concerned in the coup d'etat; the attitude of the army has been recognized and approved, gratitude has been extended to the Government for the patriotism displayed in such a fateful crisis, all the Government's measures have been indorsed, and it has been empowered to conduct affairs until King Peter's arrival.

KING PETER I. OF SERVIA.
(Descendant of a swineherd unanimously elected to the throne by the National Assembly.)

THE PALACE AT BELGRADE, SERVIA.
(The scene of the assassination of King Alexander and Queen Draga by the Army.)

NEW KING ACCEPTS.

His Emotions as He Received Congratulations on His Election.

Geneva, Switzerland.—Prince Peter Karageorgevitch has telegraphed his acceptance of the Servian throne. He has also telegraphed to the Emperor of Russian and Austria and to the King of Italy announcing his election and adding that he hopes to work for the good of Servia.

The King received calmly, but with evident satisfaction, the telegraphic notification of his election. Subsequently, as he received congratulations he became more excited, laughed hysterically, marched vigorously up and down the room, and finally flung himself into a chair, trembling with excitement.

His acceptance of the throne is stated to be subject to four conditions:

First—That the action of the Skupshtina is constitutional and entirely free from bribery or force.

Second—That those directly implicated in the assassination and revolution should be exiled.

Third—That the civil list be increased.

Fourth—That an official delegation come to Geneva to confer with him.

King Peter, in an interview, announced that he had accepted the crown of Servia and would assume the title of Peter I.

"I am profoundly touched," he said, "at the confidence shown me."

ALEXANDER LIVED IN TERROR

Queen Draga Had Prepared For Flight Independent of the King.

Belgrade, Servia.—It is now known that King Alexander lived in a state of terror during the last weeks of his life. Nightly soldiers belonging to the Pioneers division searched the palace from roof to cellar, peering into all dark corners for bombs. Each night the King was locked in his bedchamber by the adjutant in the presence of the palace commander.

It is also stated that for several weeks the late Queen Draga had prepared for flight, independent of the King, who is supposed to have been gradually growing reconciled to the project of his divorce from Draga and his marriage with Princess Xenia of Montenegro. The conspirators are reported to have learned this, and, fearing that this marriage would prove a continuation of the Obrenovitch dynasty, hurriedly commenced the task of extermination.

In the King's desk there was found, in addition to various interesting private papers, about $10,000.

The latest information as to the extent of the casualties during the uprising is that fifty-five persons were killed or wounded.

No Message of Sympathy.

Washington, D. C.—The President has decided not to send any message of sympathy in connection with the death of King Alexander and Queen Draga. The only person to whom such a message could with decency be addressed is former Queen Natalie, but for the reason that she does not occupy any official position and a communication to her might give offense to the Government of Servia, none will be sent. The United States Government will, of course, recognize the new ruler of Servia when he shall have been officially installed.

The New Constitution.

A commission for the revision of the Servian Constitution, consisting of eighty-five members, met in Belgrade, under the Presidency of King Milan, in November, 1888. The Great Assembly was practically forced to adopt the Constitution as drafted by the commission. This Constitution is now to be revised.

The direct active franchise under the Constitution is given to all citizens paying fifteen dinars in direct taxes, and the passive franchise to persons whose taxes amount to thirty dinars. Every elector is eligible to election to the Skupshtina.

In the place of deputies appointed by the King a class of official deputies is created, consisting of the members of the Council of State, the Bishops, Generals on the retired list, and the Presidents of the Courts of Cassation and Appeal.

The Skupshtina has the initiative in legislation. The Great Skupshtina consists of double the number of deputies in the ordinary Assembly, and its functions comprise the consideration of question affecting the throne, the election of a Regent in case of its vacancy, and constitutional revision.

The Council of State consists of eight members nominated by the King and an equal number chosen by the Skupshtina for life, whose duties are to draw up bills and administrative decrees and to nominate candidate for Judges of the Supreme Court and the Courts of Cassation and Appeal.

The courts are absolutely independent, and the Judges irremovable.

The liberty of the press is guaranteed, and newspapers may be founded without the deposit of caution money.

No citizen is to be arrested or have his house searched without a warrant.

Foreigners may possess any kind of property in Servia and may be employed in the State service.

Street Fight in Belgrade.

Geneva, Switzerland.—King Peter received a telegram from Belgrade announcing that a sharp fight had taken place in the streets between the partisans of the new King and those of Milan, the legitimatized son of King Milan. Young Milan has recently been living in Constantinople. His partisans posted a proclamation on the walls of Belgrade, and it was torn down by King Peter's supporters after a free fight.

Six Death Sentences Confirmed.

The State Supreme Court of Alabama broke all records by handing down opinions in the cases of Felix Hall, Sidney King, Albert Jones, Will Starks, Alex. Means and Jim Stuart affirming the action of the lower court, convicting them of murder and sentencing each of the prisoners to death.

Trouble on an Indian Reservation.

An attempt of an Indian agent to collect taxes on herds of more than 100 cattle is causing trouble on the Flathead reservation, in Montana.

PROOF OF POSTAL FRAUDS

Payne Gives Out Bristow Letter and Inspectors' Reports.

MONEY ORDER CHIEF REMOVED

James T. Metcalf is Dismissed From the Postal Service After a Hearing—An Indiscretion in Regard to a Contract the Cause—Tulloch's Charges Are Fully Sustained—Reports on Irregularities.

Washington, D. C.—Postmaster-General Payne has made public all papers and documents connected with the investigation of the Washington postoffice in 1899 and 1900, as a result of charges preferred at that time by Seymour W. Tulloch, former cashier of the Washington postoffice, which were recently repeated by Tulloch in a formal communication to the Postmaster-General.

The most interesting feature contained in the documents, which cover fifty typewritten pages, aggregating 30,000 words, is the admission of Fourth Assistant Postmaster-General Bristow that he recommended to Postmaster-General Smith that the office of First Assistant Postmaster-General Heath, be investigated. This was charged by Tulloch, who also charged that the investigation requested had been "called off." The papers show, however, that later the investigation was made and a number of irregularities corrected.

The documents made public by Postmaster-General Payne include his letter to Fourth Assistant Postmaster-General Bristow under date of May 1, 1903, calling attention to the Tulloch charges, and asking for an explanation; Fourth Assistant Postmaster-General Bristow's letter in reply; the report of the inspectors who transferred the Washington city postoffice to the present postmaster, John A. Merritt; the report of Inspector Little, under date of July 31, 1900, and the result of the investigation by Postmaster-General Smith of the charges contained in the confidential report of June 30, 1900.

In concluding his statement Postmaster-General Payne says:

"The papers are filed without action for the reason that they relate to the business of a prior administration. The subject-matter of the complaints is four years old, and all action thereunder was closed over two years ago. The charge of Mr. Tulloch is in its essence against President McKinley and Postmaster-General Smith. President McKinley is no longer living; Postmaster-General Smith, who carried out President McKinley's policy, has answered for himself."

The special report of July 6, made by Captain Smith, disclosed, Mr. Bristow says, what seemed to be glaring irregularities, and he submitted it personally to the Postmaster-General, suggesting that it contained matter to which Postmaster-General Smith might want to give his personal attention.

The synopsis of the report of the investigation of June 30, 1899, shows that an item of $50.30 for traveling expenses to George W. Beavers, and of G. D. Fisher, a clerk under Beavers, to Philadelphia and Hartford, was paid out of the funds of the Washington city postoffice on order of First Assistant Heath, although the expenses formed no part of the legitimate expenses of the Washington office.

The report shows that Robert G. Willett, son of the former Washington city postmaster, drew two salaries from July 1 to December 10, 1898, one as a laborer, at $600 a year, and one as a mechanic, at $2 a day, on special roll for the free delivery service.

The confidential report of Inspector Smith names Edward S. Allen, appointed at $1400 in 1899 as an expert mechanic; H. A. Cummings, appointed at $900 and promoted to $1000 on the military roll; D. M. Monroe, placed on the military roll by First Assistant Perry S. Heath, and Frank E. Murray, on the military roll at $1000 a year, and says:

"None of the above named appear to have performed any service in connection with the military postal matters, and no good reason appears either for their original appointment or continuance on the rolls."

On January 3 and 10, 1899, First Assistant Heath transferred twenty clerks from the clerks' roll to the military roll, and put these people to work in the Washington city postoffice, and paid them from the military appropriation.

Washington, D. C.—As a result of an indiscretion in matters pertaining to the award of contracts for printing the money order forms of the Government, James T. Metcalf, for many years Superintendent of the money order system of the Postoffice Department, was removed from office by the Postmaster-General. A full investigation of the case will be made later. The dismissal is the result of acts of Mr. Metcalf in opposition to the bid of Paul Herman, of Rutherford, N. J., the lowest bidder by $45,000, and in favor of the next highest bidder, the Wynkoop-Hallenbeck-Crawford Company, of New York City, of which Mr. Metcalf's son is an employe, for the contract of printing money order blanks and books.

Postmaster-General Payne, in announcing his action, stated that there was no charge that Mr. Metcalf had done anything that is amenable to the law, but said that his conduct was a serious indiscretion that could not be overlooked. Mr. Metcalf, he said, always has been considered a faithful, efficient, painstaking and honest employe.

Mr. Smith Will Not Reply.

Philadelphia, Pa.—Former Postmaster-General Smith was informed of Mr. Bristow's letter in reply to the Tulloch statement and of its variation from his own reply. When asked if he had anything to say he answered: "There is no occasion for me to reply to Mr. Bristow, and I will not."

Spider's Bite Kills a Woman.

Mrs. Kate Rice, of Harleysville, Pa., was recently bitten by a spider while picking strawberries. A few days ago she died of blood poisoning.

PROTESTS FOR THE JEWS

President Expresses Indignation Over Massacre at Kishineff.

At Washington Representatives of B'nai B'rith Learn That Diplomatic Intervention With Russia is Impossible.

Washington, D. C.—President Roosevelt by authorizing the publication of the views exchanged by him and Secretary Hay with the Executive Committee of the B'nai B'rith on the treatment of the Jews in Russia has done all that he could toward helping them, in addition to bringing the sentiment of this country to the notice of the Russian Ambassador, Count Cassini, when he called on the President the other day.

The expressions of sympathy made by the President and Secretary Hay to the representative Jews who called upon them were given official significance, and were intended to have that effect abroad as well as at home.

The President was speaking not only to the half dozen men who were introduced by the Secretary, but to the Jews of the world and to the rulers of the countries in which they live. What he said to them was said directly, in response to what they said to him, their desire to have the Czar informed of American sentiment, and in view of the appeals coming from mass meetings of Christians and others all over the United States.

The Russian Government will hear from Count Cassini, and may hear later from Ambassador McCormick as to the sentiment of this country on the subject.

At the same time Secretary Hay, during his conference with the representatives of the B'nai B'rith in the Ambassadors' room at the State Department, and the President, in a summary of it at the forty-minute White House interview afterward, showed them that no direct intervention by diplomacy was practicable under the practice of nations and our own precedents.

The statement presented the President consisted of a memorandum on the massacre in April, and a tentative draft of a petition to the Czar, which it was desired the Government should unofficially or semi-officially assist in delivering to the Czar and procuring a reply thereto.

President Roosevelt, after the memorandum was laid before him, said in substance:

"I need not dwell upon a fact so patent as the widespread indignation with which the American people heard of the dreadful outrages upon the Jews in Kishineff. I have never in my experience in this country known of a more immediate or deeper expression of sympathy for the victims. The United States is that country in which, from the beginning of its national career, most has been done in the way of acknowledging the debt due to the Jewish race and of endeavoring to do justice to those American citizens who are of Jewish ancestry and faith.

"Any one who goes through any of the old cemeteries of the cities which preserve the records of Colonial times will see the names of many an American of Jewish race, who in war or in peace did his full share in the founding of this nation. From that day when the Jews of Charleston, of Philadelphia, of New York, supported Washington and his colleagues who were founding this Republic—from that day to the present we have had no struggle, military or civil, in which there have not been citizens of Jewish faith who played an eminent part for the honor and the credit of the nation."

COAL STRIKE AVERTED.

Miners Adopt Mitchell's Suggestion to Elect Their Representatives.

Scranton, Pa.—President John Mitchell, of the United Mine Workers of America, has won another victory for peace. There will be no strike in the anthracite region.

The miners in three separate district groups reluctantly but unanimously followed their leader's suggestion and formally elected District Presidents Nicholls, Fahy and Dettrey as their representatives on the Board of Conciliation. Many favored a simple indorsement of this trio's previous appointment by the Executive Board, but Mitchell knew just what was wanted to assure a more promising condition of peace than any which the anthracite region has known for years, and his will prevailed.

There was no enthusiasm, no manifestation of personal approval even, when the resolutions looking to an election and to peace were adopted. Voicing the evident sentiment of many in the convention, Delegate Gilden, however, said, before the resolutions became a finality:

"Let us put in some proviso that if they don't recognize these men now we will resume the conflict of last year."

"Such a proviso is not necessary," said President Mitchell, "as your representatives, I can tell you, will be recognized."

So the resolutions were adopted, and the separate district elections were held by the delegates, with the harmonious results above stated.

A SHAMROCK IV. PROBABLE.

Sir Thomas Lipton Will Try Again Beaten With Shamrock III.

London.—Entertained by a number of distinguished men at a send-off dinner at the Savoy Hotel Sir Thomas Lipton said a hundred proverbial reasons boded success for his third attempt to capture the America's Cup. But if unfortunately he failed he would be found at the starting line a year hence with Shamrock IV.

Buchanan Read's Old Home Sold.

The home of Buchanan Read, at Cincinnati, Ohio, in which the famous poem, "Sheridan's Ride," was written, has been sold by auction for $12,000. The property was offered for the purpose of paying legacies in the will of the late contractor, Hugh Campbell.

French Deficit is Announced.

In the French Chamber of Deputies Admiral Rouvier, the Minister of Finance, presented his budget statement. He estimated the deficit for the year at 58,100,000 francs.

UNSPEAKABLE CRUELTIES WHICH CHRISTIANS SUFFER IN THE LAND OF THE SULTAN

In the land of the Sultan of Turkey there seems to be no falling off in the unspeakable cruelties practiced on the Christians who have been forced to take up their cross there. Month after month come reports of new cruelties, and the truth of them cannot be doubted. Europeans are gradually working their way into more remote provinces, and the conditions they find are almost beyond belief.

Especially sordid and miserable are the lives of the Bulgarian and Albanian Christians, and they suffer most at the hands of fellow Bulgarians or Albanians who have accepted islam. No crime is too brutal for the hands of these fiends. They know no mercy, and moral law is for them a thing apart.

In no country in the world has taxation been reduced to such a science, yet because of the treachery of his officials the Sultan is always poor. The tax list for the Albanian peasant begins with the military tax. The poorest pays $8.80 a year to escape military service. For every male child the family has to pay $1.80 in addition.

Every one remembers the protest which went up in this country over the income tax. They have such an institution in Turkey, but it operates in a peculiar Turkish way. The tax is collected from those who have incomes, and then the collectors go to those who have none. They pay at the same rate and the collector does the estimating.

There is besides a road tax which the male subjects begin to pay at the age of twelve. Of course, very little of the money is ever expended on the roads. A tenth of the farm products are supposed to be turned over to the Government, but the farmer is usually forced to hand over an eighth or a seventh of his entire crop, and, in the case of wheat or similar grain, to thrash the tax gatherer's share. The privilege of collecting this land tax is usually sold outright by the Government, and the one who purchases the gathering privilege profits by the extortion.

As if the burden of taxation were not enough, the additional burden of unlimited bribes is put on the poor subject. They have a line of bribes in Turkey that would make a political combine lash its tail with envy. One instance will show how this works out:

A farmer managed to save enough money for a new house. He paid one bribe for a permit to pull down the old one, and another for a permit to erect the new structure. The building was completed, and the tax collector came. The collector put an overvaluation on the new house, and refused to remit the tax on the one which had been torn down. It meant another bribe, and the farmer preferred to give it rather than pay taxes on two houses.

The mounted police, who get the equivalent of $4 a month from the Government, and have to furnish their own horses, are among the most prosperous people in the country. They go to the stable of a well-to-do farmer and take out his best horse.

"I beg of you to leave the animal," cries the farmer; "he is not fitted for your purpose."

"The Government ordered me to take him," declares the officer.

"I will reward you for leaving him," says the farmer, handing over some gold pieces.

"Well, we are old friends," says the officer. "I will do you this favor."

Then he goes to another house and repeats the operation. When he has collected horse money from a dozen farmers, does he go to a market and buy a mount? Not on his black Turkish soul! He goes to a man too poor to pay and seizes a horse.

The worst cruelties fall on those who have wandered into other lands to make a living, and who return to their homes for a brief visit at holiday times. They always bring back a small store of savings, and generally travel in parties under the false idea that it will give them greater protection. The Turks lie in wait for these homecoming pilgrims, and in lonely places on the road they are ambushed. If the party is small they are shot down first and robbed afterward; if large, the holdup is carried on more humanely. The unfortunates are surrounded by an armed band, one of whom advances and places a rug on the ground. On this the travelers place their money, and woe to the man who does not give up his last cent.

Even more terrible is the fate of Christian women and children under this travesty of Government. No woman is safe from the all powerful Turk, and from insult and dishonor or kidnaping at his hands there is no trustworthy recourse. Albanian fathers and mothers know this, and in their very extremity they have found one safeguard. As soon as a Christian girl begins to show signs of feminine beauty, an indelible cross is tattooed on her forehead between her eyes. The sight of the cross flags as the crescent loving Mahometan, and the girl once marked in this way can never become a desirable subject for the harem.—New York Tribune.

TURKISH TROOPS ON THE MARCH.

PEASANT WOMEN DISFIGURED BY AN INDELIBLE CROSS BETWEEN THE EYES.
(They gave promise of beauty when young, and were so marked by their parents in order to keep the Turks from kidnaping them for the harem. The cross disgusts the Turk.)

TURKS BRINGING IN ALBANIAN PEASANTS HANDCUFFED TOGETHER.

An Old Double-Barreled Cannon.

In one of the city squares of Athens, Ga., stands an interesting relic of the Civil War—what is probably the only double-barreled cannon ever made. It was designed by a resident of Athens for use in the Confederate service, the idea being to discharge a projectile from each barrel simultaneously, the projectiles to be connected by a chain. No chain was found to be sufficiently strong, however, to withstand the strain, and the weapon was never tested in actual warfare. The cannon is made of cast iron and was molded at one of the local foundries. It is of three-inch caliber, having a diameter across the muzzles of eight inches and across the barrels of thirteen inches, while it is fifty-five inches in length. It is provided with what is familiarly known as a "touchhole" in the breech, connecting with both barrels, so that it could be discharged by igniting a fuse if desired. The idea of the inventor was to connect the balls by a chain several feet in length, the ends of the chain being fastened into each by staples. Chain-shot was often used in naval battles to carry away the rigging of an enemy. It was discharged once after being built, but unfortunately one barrel for some reason did not "go off." The force of the explosion of the other barrel tore the chain from the ball which remained, and gave a curved motion to the projectile. As a result of this accident it was considered too dangerous to adopt for use, and was stored away, finally being discovered only a few years ago in a shed. It was then mounted upon its present carriage, and placed in the park for an ornament.—Scientific American.

A DOUBLE-BARRELED CANNON.

Many Samoan Fish.

In the Bay of Apia, in Samoa, a surveying party has discovered 453 distinct species of fish.

Over 500 infants are killed every year in London by being overlaid in bed by their parents.

Brussels Sprouts

BRUSSELS SPROUTS.

Persons of moderate means justly regard Brussels sprouts as a luxury, because they are sold at thirty-five cents per quart—in berry boxes—during the season. And yet they are as easily raised as cabbages, and there is no reason why they should not be as plentiful. There are comparatively few who realize what a delicious vegetable Brussels sprouts provides, at a time, too, when most of our vegetables have disappeared from the garden.

Brussels sprouts are of easy cultivation and will thrive in any soil that will grow any other member of the cabbage family. If the soil is too rich, the plants are liable to produce rather loose sprouts instead of the compact round buttons that are wanted. These constitute the edible part of the plant, and form along the stalk, in the axils of the leaves. They are ready to gather when about the size of a walnut.—Boston Cooking School Magazine.

Systematic Fishing.

Some men get fun out of catching fish and others out of fishing. The distinction is that one fellow will come home with boxes and baskets filled with his plunder from the sea, while the other returns with glowing stories of the exciting battles maintained with the denizens of the deep and thrilling adventures and escapes. An exceedingly business-like system of fishing has been recently devised, a patent for which has been granted to John W. Wallace, which will appeal to one of these classes of sportsmen. It has the recommendation that it increases the capacity of the fisherman for hooking his prey by four-fold. Incidentally, the inventor claims that it also has the advantages of preventing any confusion of the lines and of enabling a person to hold a favored fishing place without danger of drifting away from it. He provides an anchor of the mushroom type, which is thrown over at any desired location, and, when this is drawn taut, it acts as a guide for the passage of a spreader, which consists of a piece of light wood with four or more hooks fastened to it. These hooks are separated by such distances that they are unable to catch in each other, and thus facilitate to the operation of bringing the fish to the surface.

Where many people are fishing in a prescribed space and many lines are blown in close proximity to each other, the lines are frequently entangled and confused. This is especially true where many people are fishing from a single boat and from different decks of the same boat, as frequently happens at the fishing banks in the vicinity of large cities. Not only is there a chance of confusion from the crossing of lines in the acts of raising and lowering them, but also because of the struggles of the captured fish. The invention provides for such a separation of the several lines and such a control of the spreader and hooks that entanglement and uncertainty as to the ownership of the catch may be decided, while also permitting the fisherman when he has secured a good location at the bed or bottom of the sea to retain that location so long as he desires and to raise and lower his line an indefinite number of times without changing the location of his point of fishing at the bottom or bed of the sea.

BUSINESS-LIKE FISHING TACKLE.

Great Britain spends $112,500,000 a year on the support of the poor. This does not include private charities.

GOOD ROADS.

Government Construction of Roads.

A bill has been introduced in the House of Representatives of the United States providing for the establishment of a Bureau of Public Roads to take charge of the survey, planning and construction of good roads, outside the limits of cities and incorporated towns or villages, which may be petitioned for by the authorities in any political division of any State. It is proposed to appropriate $75,000 for the maintenance of the office and $20,000,000 for the construction of the roads. The limitations are that the National Government shall pay one-half the cost of a road and the locality the other half—this half being divided between State, political sub-division (county or township) and property owners in any manner determined by them, and that no State shall receive more of the sum appropriated than the proportion which its population bears to the entire population of the United States.

Twenty-two officials and employes are provided for, the director to receive $4500 a year and others from $2500 to $720 a year, and "such other officers, agents and servants as the director may from time to time require." The $75,000 appropriated in one section would scarcely provide for these twenty-two men and the expenses enumerated, and would fail completely to provide for a force sufficient to plan the work and supervise the expenditure of the $20,000,000. Fortunately the section appropriating the latter sum for "co-operation and actual construction" includes "the maintenance of said Bureau of Public Roads."

The Government has in the past constructed public roads, but they were highways to carry the traffic between sections of the country without other means of communication, approaches to Government reservations or of similar public use. The excuse for the improvement of rivers and harbors has always been the service or the development of national commerce, however far the actual practice may have deviated from this ideal. This bill, however, goes to the furthest limit and leaves it to the judgment of the director of the bureau as to whether the road fund shall be used in developing communication by highways between States or distributed in improving sections of road entirely local in character, whether largely traveled or not. There are many who defend the principle of the river and harbor improvements who could not advocate such a bill "for the relief of the Treasury of the United States" as this.

Were the principle of the bill to secure a majority vote the form of and the lack of safeguard of expenditure in this bill would scarcely receive favorable consideration except in a Legislature composed entirely of "practical" politicians. The Bureau of Public Roads, under this bill, could readily be made the place for paying political debts and for distributing public patronage to the hungry. There have been State Legislatures which would pass this sort of bill, but Congress has never done so except in the river and harbor bill in its worst days, which was a gradual growth from a legitimate beginning.—Municipal Engineering.

Crushing Plant For Macadam Roads.

The cities of New England are wiser in their day and generation than are most other municipalities in the country. They make a dollar go further than the average city. Economy and prudence may have been inherited from the Puritans, but whatever their source the example is a good one to follow. Authorities of large and small municipalities throughout New England for years have been noted for their economical methods in the construction and maintenance of streets and highways. More portable stone crushers and permanent plants built on a larger scale will be found within New England territory than any other equal area in the United States. In Connecticut and Massachusetts, particularly, the highways have been greatly improved. For instance, the city of Newton has its own crushing plant, which has been in operation for years, and as a result not only are the streets of the city well macadamized, but the roads leading from the city are carefully improved. This is made possible by the economical use of this plant. There is an abundance of good trap rock in a quarry not far from the limits of the city, at which is installed an up-to-date plant.

There is no public improvement more popular to-day than that connected with the construction and maintenance of a better highway system. The good work is being pushed along by many national, State and town good roads associations. All classes of people are interested in the work, the rich and the poor, the farmer and laborer, the bicycle rider and the one who walks; for all alike can and do appreciate a well built and maintained thoroughfare.

This movement means that the farmer can transport his produce to market over a good road at less expense than over a poor road. This is a fact which is being repeatedly demonstrated, and a larger number of people are coming to recognize it as a good argument why the roads should be improved. If it benefits the farmer in this way it cannot fail to benefit every one who uses the public highways. Therefore, every municipality should promote the work by investing in a stone crushing plant adapted to its needs, to be used both for the improvement of its streets and the main highways leading into it. A better investment could not be made.—Municipal Journal and Engineer.

If it were not for the trials of life the lawyers would starve to death.

The Funny Side of Life.

HER FINISH.

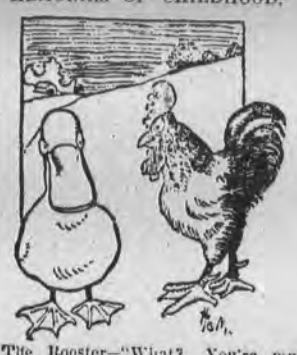
She used to read novels
With heroes so fine
Whose speech and whose manners
She vowed were divine.
She read 'em devoutly
A third of her life,
Then married a fellow
Who eats with his knife.
—Washington Star.

OVERWORKED.

Gobang—"Ukerdek seems to be a man of few words."

Chipluone—"Yes, but he keeps them busy."—Puck.

MEMORIES OF CHILDHOOD.



The Rooster—"What? You're my long-lost brother? Get out!"

The Duck—"Sure I am. Don't you remember when I tried to teach you to swim, and you were afraid of the water?"—New York Journal.

POWER OF WORDS.

"What does your wife say when you come home late?"

"Say, do you expect me to reel off a three-volume serial at a moment's notice?"—Cleveland Plain Dealer.

JUDGMENT SUSPENDED.

Mrs. Homer—"What did your husband say about your new tailor-made gown?"

Mrs. Nextdoor—"Not a word. He hasn't seen the bill yet."—Chicago News.

TRIED BY FIRE.

"He has courage, you say?"

"Well, rather. Why, we tested it last night."

"How?"

"We dared him to dine at a swell restaurant and come out without tipping the waiter and he did it."—Chicago Post.

INFORMING.

"Who lives in that big house on the corner, Dennis?"

"The Widow O'Malley, sor, who is dead."

"Indeed! When did she die?"

"If she had lived till next Sunday she would have been dead a year."—Kansas City Journal.

ORIGINAL HARRY.

Gunner—"Yes; Harry Blueplace won the prize at the automobile show."

Guyer—"But I thought Harry didn't own an auto."

Gunner—"He didn't. He bought an old traction engine from a farmer and every one thought it was some new idea in racing motors."—Puck.

CAUTIOUS.

"You are absolutely certain about your statement?" asked the lawyer.

"Absolutely certain," assented the witness.

"You swear that it is true?"

"I do."

"Would you bet on it?"

"Er—well—yes, if I got the right odds."—Town Topics.

HIS COSTLY ERROR.

Diogenes was still hunting for the honest man.

"But, why," demanded the indignant public, "don't the old stuff spend $3000 of our money and then put in a bill for it?"

Sneering at his obsolete methods, they promptly stoned him and ran him out of town.—New York Sun.

WOMAN'S LOGIC.

Husband—"But, my dear, we can't afford to give a dinner party."

Wife—"I know we can't, but if we don't give it everybody will know we can't afford it."—New York Journal.

RELIEF.

Carrie—"Oh, how do you do, Kate? I'm so glad to see you! Constance's gown is the dowdiest thing I ever saw."

Kate—"Isn't that a queer way of opening a conversation?"

Carrie—"Yes, I suppose it is; but I just told Constance her frock was the most beautiful and the most becoming thing she ever wore, and I was just dying to say what I thought about the dress."—Boston Transcript.

North Plainfield Weekly Review

ISSUED EVERY SATURDAY BY

HARRY H. WEBB

AT NORTH PLAINFIELD, N. J.

33 Somerset St. Telephone 217

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, JUNE 20, 1903.

IS IT A CONSPIRACY?

There seems to exist (whether it does or not is for others deep in the mysteries of North Plainfield politics to say) a conspiracy against the good name and fame of the borough, which shows itself weekly and sometimes daily, through the medium of Plainfield newspapers. As to who are the parties to it and how deeply they are involved in the plot the REVIEW is likely, from time to time, to make known, unless the plotting ceases. We are securing facts, and these facts will be presented to the public as they occur.

The first part of the conspiracy began last year, if not the previous year, when it was determined by some person or persons, that the tax rate of the borough should be increased.

We do not purpose now to rehash the circumstances of the increase of last year, but call attention to the fact that during the present current year publications have been made continually and evidently with a purpose, that "the tax rate will jump six or eight points next year," etc., etc.

In order to get a clear understanding of the situation the reader must remember that it is impossible for any man to know the value of the assessable property of the borough for this current year until the assessor has completed his work, which will not be for some time yet.

Now this prognostication has been going on for a long time, and two recent cases we will mention, namely: first the statement of the Mayor at the last meeting of the Borough Council, in which he said that if the school board insisted on having the back taxes advanced to them as the law directed, it would be a burden upon the borough, and the "*tax rate would be increased several points.*" The second case is the publication, the present week, in the *Press*, that one of our citizens had disposed of a certain large block of bank stock which had been previously assessed to the borough, and that consequently there would be a "jump of six or eight points this year."

How does the editor of the *Press* know that the taxes will be increased? It is not to be assumed that the borough assessor will forward a movement to keep down the assessable value of property and thus increase the rate of taxation.

It is to be noted that in the publication concerning the Brunson change of bank stock, that the next day after its appearance in the Plainfield newspapers the same matter appeared in the New York City newspapers. It does not matter to the writers of these articles that the prediction that the borough taxes will be increased will naturally tend to the injury of the borough as a place of residence; that seems to be a part of the general scheme to compel the annexation of the borough to the city of Plainfield.

The recent attack upon the Board of Health, which was also published in some of the newspapers of the city, is along the same line of injuring the credit of the borough as a place of residence.

The publication in the Plainfield and also metropolitan newspapers that the borough is without police protection, and the fact also that our police force has been allowed to dwindle practically to a unit, is only of the same species of petty and next to criminal conduct which characterizes whoever has taken hold of this matter of pilfering the borough of its good name.

Now, this is the peculiar situation and the sooner the public know the ins and outs of it the better.

We have it, on authority, that, during one of the visits to Trenton of a delegation from this place, in the interest of the annexation scheme, that certain men agreed together that until the borough was annexed in its territory and as a municipality to Union county, everything possible would be done to increase the taxes and to make the sentiment against annexation unpopular. And events since that conference was held certainly bear out the belief that some such scheme does exist, and that a preconcerted movement against the peace and welfare of the borough is being carried out by some person or persons.

DOCKING OF HORSES.

Below we give in full a communication which appeared in the Newark *Evening News*, and which was editorially endorsed by that newspaper.

Probably not one person in ten thousand is aware of the suffering occasioned by this cruel practice, and we hope the time will soon come when it will be considered a disgrace, if not a crime, for a person to be found with a docked horse in his possession.

We believe that until the law specifically makes it a misdemeanor for any one to have in his or her possession a docked horse that the cruel practice will continue.

The article referred to follows:

"Had Dante lived today he could have pen-pictured a horror which, as an example of man's inhumanity to the helpless and submissive, would have occupied no modest place in his awful collection.

"The docking of horses' tails is an act so cruel as to render its discussion in temperate language almost impossible. It is to be hoped that comparatively few of those who calmly sit behind their maimed and quivering beasts fully realize the agony to which they have been subjected. A more widely known and accurate idea of this and it must be true that fewer men and women would own, and see before them, this evidence of useless and monstrous cruelty.

"A horse to be docked is roped in all four legs and an instrument called a 'twister' is fastened around his muzzle. His tail is then strapped high above his back—a strong cord bound sharply around it, just above where the cutting is to be done.

"The poor creature is, by this time, panting, trembling and helpless, with an unerring foreknowledge that something frightful is about to happen to him. The demon who operates then takes a great knife, fashioned something like a pair of pruning shears, and cuts off that horse's backbone, with its myriads of nerves. The next act is to place a cup-shaped iron, heated red-hot, over this wound just made. This latter act of mercy (?) is to save him from lockjaw, and even then there is an average of one in fifty that dies of lockjaw. The cry of agony which goes up from that horse could never be unheeded or forgotten by any one but one who is so calloused to every humane instinct as to render him a dangerous element in society.

"The horse is then condemned for life to the maddening torture which only the sting of insects can inflict, with no means of defence or relief.

"Not one argument for the sanity of this treatment can be brought forward, its whole operation being based upon the vanity that sacrifices and the selfishness that kills.

"This may be vigorous language. It is directed against no particular violator, but is uttered with the hope that with a fuller understanding of the subject an amelioration of the condition of God's most beautiful creatures may be brought about, and some one who might otherwise instigate this act will never be forced to think that through him was awful and needless suffering inflicted upon the innocent."

ACCORDING to the Newark *Truth*, the average reign of a political boss is eight years. If this be true, there is hope for North Plainfield in the not far away future.

IF THOSE scientific men who purpose making coal out of water will come here now we will guarantee to furnish them free of charge plenty of the raw material to work with.

THE Trenton *State Gazette* suggests that in case voting machines are placed at West New York (this state) that it would be well to nail them to the floor. Gracious! Would the *Gazette* have us infer that without such precaution the machines would be in danger of disappearing?

THE managers of the passenger department of the New Jersey Central railroad will entertain the editors and their wives who reside along the line, with a ride up the Hudson next Thursday on the initial trip of the new steamer, "Asbury Park." Special trains will connect with the steamer at Jersey City.

AN ARTICLE prophecying higher taxes for North Plainfield, and written, it would appear, with intent to injure our borough, was published in the New York *Tribune* this week. But the writer reckoned without the man in the *Tribune* office who writes the heads, for he substituted "Plainfield" for "North Plainfield" in the head. So instead of the arrow hitting the mark intended, it was deflected and struck the very mark which the writer would naturally wish to avoid.

The Heart.

The human heart is practically a force pump about six inches in length and four inches in diameter. It beats 70 times per minute, 4,200 times per hour, 100,800 times per day and 36,792,000 times per year and 2,575,440,000 times in seventy years, which is "man's appointed threescore years and ten." At each of these beats it forces 2½ ounces of blood through the system, 175 ounces per minute, 656¼ pounds per hour or 703 tons per day. All the blood in the body, which is about thirty pounds, passes through the heart every three minutes. This little organ pumps every day what is equal to lifting 122 tons one foot high or one ton 122 feet high—that is, one ton to the top of a forty yard mill chimney or sixteen persons seven score each to the same height. During the seventy years of a man's life this marvelous little pump, without a single moment's rest, night or day, discharges the enormous quantity of 178,850 tons of blood.

Sea Serpents Breathe Air.

Like all other serpents, the sea serpents, though permanently inhabiting the sea, are air breathers. The lateral flattening of their tails greatly helps them to swim in any direction, and it specially enables them to rise rapidly to the surface of the water to breathe. That they may do this the more easily and securely their nostrils are placed at the very end of the muzzle and are furnished with valves, which secure them from being entered by the water in which they live.

Unlike other snakes, they cast their skins in small pieces. Their eyes are not adapted to see well out of water, and thus they cannot when in the air take a good aim to bite. They feed on small fishes, which they paralyze by means of their poison, and thus they have nothing to fear from the spines of the fishes they eat.

Mimickry In Caterpillars.

A very large caterpillar stretched itself from the foliage of a tree which I was examining and startled me by its resemblance to a small snake. The first three segments behind the head were dilatable at the will of the insect and had on each side a large black pupillated spot, which resembled the eye of the snake. It was a poisonous or viperine species mimicked and not an innocuous snake. This was proved by the imitation of keeled scales on the crown, which was produced by the recumbent feet as the caterpillar threw itself backward. I carried off the caterpillar and alarmed every one in the village where I was then living to whom I showed it.—"Records of a Naturalist In the Amazon."

Two Tales of Truffled Turkeys.

The Abbe Morelet was accustomed to say: "There needs be two to eat a truffled turkey. I never do otherwise. I have one today. We will be two—the turkey and myself."

The archbishop of Sanzai was another truffled turkey lover. His grand vicar had lost a turkey to him on a bet and delayed paying up because, as he alleged, "truffles were bad that year."

"Bah! Bah!" said the archbishop. "We will chance the truffles. This is a false report that has been circulated by the turkeys."—"The Pleasures of the Table," by G. H. Ellwanger.

Toilet of the Cat.

Cats, large and small, make the most careful toilet of any class of animals, excepting some of the opossums. The lions and tigers wash themselves in exactly the same manner as the cat, wetting the dark, rubberlike ball of the fore foot and inner toe and passing it over the face and behind the ears. The foot is thus at the same time a face sponge and brush, and the rough tongue combs the rest of the body.

Wavering.

Nervous Old Lady (addressing officer on board a passenger steamer)—Oh, captain, I wish you'd go and speak to the man at the wheel. He keeps turning it first one way and then the other, and I'm sure he doesn't know his own mind.—London King.

A Bit Unkind.

Holden — Burgess says he always says what he thinks.

Belden—That accounts for it. Saw him at the club last night, and he didn't utter a word the whole evening.—Boston Transcript.

Her Title to It.

Nell—Is she a society woman?

Belle—Yes, indeed. She belongs to no less than eighteen societies for the suppression of as many things.—Philadelphia Record.

The genius and inspiration of American civilization rest upon the individual thought, character and action of every citizen.—Schoolmaster.

If You Want

If you want posters,
If you want bill heads,
If you want envelopes,
If you want statements,
If you want note heads,
If you want show cards,
If you want letter heads,
If you want calling cards,
If you want business cards,
If you want invitation cards,
If you want business circulars,

If you want job printing of any description done in a satisfactory manner, you can have your wants gratified by calling on THE REVIEW, 33 Somerset street North Plainfield, and leaving your orders or if preferable, use the telephone and our representative will call on you.

Notice to Correspondents.

Personals, social gatherings, celebrations, anniversaries of various kinds, reception, etc., will be published in the REVIEW free. All copy must be written plainly, preferably in ink; and names must be clearly written and correctly spelled. write only on one side of the paper. Full information in regard to weddings is always desired, and when requested a reporter will call to secure facts for publication. No attention will be paid to items of news forwarded to this office unless the sender gives his or her name and address. These will not be printed, but it is necessary to have them properly vouched for.

LEGAL NOTICES

NOTICE OF ORDER TO LIMIT CREDITORS

Somerset County Surrogate's Court.

ESTATE OF C. A. Girard Lewis, deceased.

Notice is hereby given, that on the FIFTH DAY OF FEBRUARY, A. D. 1903, on the application of the undersigned, as Executors of the will of C. A. Girard Lewis, deceased, an order was made by the Surrogate's Court, requiring the creditors of the said C. A. Girard Lewis, deceased, to bring in their debts, demands and claims against the said decedent, under oath or affirmation, and present the same to the subscriber within NINE months from the date of said order; and in default thereof any such creditor should be forever barred of his or her action therefor against the subscriber.

SAGE ADVICE FROM THE DRIVER.

Pilot of Fifth Avenue 'Bus Resents Blame for Passenger's Error.

The Fifth avenue stage driver is usually endowed with a strong sense of humor. Whether the following "bull" was intentional or not does not appear:

An elderly woman entered the stage at a downtown point and asked to be let down at Forty-ninth street. That point was duly reached and the driver pulled up while the woman alighted. To his surprise she shook her umbrella at him and cried:

"And now I should like to know what you mean by carrying me a mile past my stopping place?"

"But, lady, you asked to be let off at Forty-ninth street."

"Well, I meant Twenty-ninth street, and, even if I didn't say so, you ought to know where I live, as I ride in your old 'buses every week."

"Well, ma'am," replied the driver, "I've been driving these here stages for going on ten years, and I ain't never been accused of carrying a passenger past the corner at which they wanted to get off. It's my opinion that if you don't know where you live you'd better move."—N. Y. Mail and Express

It Makes a Difference.

Boy—I thought you said your hotel was just around the corner.

Mr. Meanman—So it is. I didn't say which corner, did I?

Good-Byes at $1 a Time.

The great ship was just about to sail away when the worried-looking business man hurried down the gang plank and approached a man who looked as if he had considerably more time than money to spare.

"Like to earn a half a dollar?" he said.

"Can the moon shine," was the oracular reply. "How's it to be done?"

"You see that lady dressed in black, standing at the ship's side? Well, that is my wife. She will expect me to stand for twenty minutes and wave my handkerchief to her until the ship is out of sight. I have no time to waste; my wife is very short-sighted, so it will do just as well if you take my place."

"S'pose she looks though an opera glass?"

"Bury your face in your handkerchief as if overcome with emotion."

"That wil cost half-a-dollar extra."

"All right! Time is more valuable to me than money. Throw in a few hand-kisses."

The money changed hands. The merchant's business was attended to, and his wife got her farewell. What wonders are worked by strategy!

The Point of View.

A gentleman went to a dentist and asked him to "take a look at his teeth."

The dentist did so and seemed full of admiration.

"What do you think of them?" asked the patient.

"Magnificent, magnificent!" was all the dentist could say.

"Then you don't find anything to do to them?"

"To do to them? Why, there are four to be pulled, six to be filled and three to be crowned!" said the dentist.

Cool in Trying Emergency.

Damocles had been invited to dine.

"How do you like the sword?" asked the King, pointing to the suspended weapon.

"Oh, that's all right," he responded, "so long as the hair doesn't fall in the butler."

Hereupon, even those who deplored the vulgarity of the remark were fain to applaud the man's sangfroid.

Driving Him to Drink.

Mrs Hoyle—I have told my husband that he can't kiss me again until he stops drinking.

Mrs. Doyle—Are you aware of the fact that you are encouraging the liquor traffic?—Brooklyn Life.

Why She Was Discharged.

Homely Heiress—I wish I knew how to have my photograph taken so it would be sure to please dear George.

Her Maid (knowingly)—Well, I have no objection to sitting for you.—Chicago News.

Without Prejudice.

She—You certainly wouldn't marry a girl for her money, would you?

He—Of course not. Neither would I have the heart to let her become an old maid merely because she had money.

Unlucky at cards and luck at love,
'Tis thus that philosophers view it.
If so, you can bet
I'm a bold male coquette,
But blest if I ever knew it.

Would-be Artist—Did you get anything for your last poem?

Ditto Poet—Yes, I got many happy returns.—Harvard Lampoon.

NEW DIAMOND FIELDS.

British Guiana Produces an Enormous Quantity of Sparklers.

It may safely be asserted that no more important event has happened in British Guiana than the discovery of diamonds. The beneficial effects of the discovery are apparent to-day in every corner of British Guiana, and it is claimed by many that diamond mining will soon be a prominent factor in the productive element of this colony. It is already spreading new life and energy throughout the country, which, a couple of years ago, was in a languishing and impoverished condition, and will no doubt in a few years convert some of the most despised possessions into sources of revenue to the mother country, as well as provide fields of ever-widening enterprise for her sons.

Among the results which have followed the discovery of diamonds are the increase of importations and trade generally, the greater employment of native labor, the progress of developing work, the general but gradual dissemination of wealth throughout all classes of the community, the greater spreading powers of the people and last, but not least, the steady advance of civilization into hitherto unexplored regions. Before diamonds and gold were discovered, the wealth of the country was derived almost exclusively from sugar. During the twelve months ending June 30, 1902, 132,077 diamonds have been declared at the department of mines. One of the largest shipments was made by the Royal Mail Steamship Company in September, and one of the largest individual shipments from the mines, of 18,000 stones, was made in June. The British Guiana Diamond Syndicate also made the very recent shipment of 18,705 stones (as from March to September, 1901). One of the encouraging signs has been the discovery quite lately of stones larger than the ordinary run, the first stones discovered being very small in size. Out of the 132,077 diamonds declared in British Guiana for the past twelve months ending June 30, 1902, 132,036 were taken from the Mazoumi district.

There was £70,000,000 sterling realized from diamonds found at Kimberly during the first twenty years of its discovery, which has benefited all the sections of the population and enriched the whole of South Africa, and it is predicted that British Guiana will feel a proportionate advantage from the development of diamond mining within the territory. But for the discovery of diamonds the Mazoumi basin, or diamondiferous area of British Guiana, would probably still have remained in almost undisturbed possession of the original Indian or native.—Jewelers' Circular.

Hypnotism for Drunkenness.

Dr. Forbes Winslow, in an address delivered last night before the members of the Psycho-Therapeutic Society, advocated the treatment of inebriety by suggestion. He said that years ago the idea that medical men should use hypnotism in the cure of disease would cause members of the old school to shudder in their shoes, but public feeling was turning round, and they did not now regard those who practiced hypnotism as charlatans but as scientists. The treatment was suitable in a great many cases, but unsuitable in others. It was often effective in cases of hereditary drunkenness, but was not much good in cases where people suffered from severe brain disease and took alcohol as the effect and not the cause. In many cases of chronic alcoholism hypnotic treatment should be tried before people were sent to inebriate homes. In treating these people it was necessary to suggest to their subjective and unconscious mind that they must take a dislike to alcohol, or that its action would be that of an emetic. The lecturer illustrated his meaning by hypnotizing a male medium upon whom he said he had practiced in this way during the past ten years. With one wave of the hand the man entered a state of trance, and then drank some water which he believed to be whiskey and which he was told to dislike. The man's facial expression when he attempted to obey what seemed to him a repulsive request was quite startling.—London Daily News.

Dr. Richardson's Rules for Old Age.

To subsist on light but nutritious diet, with milk as the standard food, but varied according to season.

To take food in moderate quantity four times in the day, including a light meal before going to bed.

To clothe warmly but lightly, so that the body may, in all seasons, maintain its equal temperature.

To keep the body in fair exercise, and the mind active and cheerful.

To take plenty of sleep during sleeping hours.

To maintain an interest in what is going on in the world, and to take part in reasonable labors and pleasures, as though old age was not present.

To spend nine hours in bed at least, and to take care during cold weather that the temperature of the bedroom is maintained at 60 degrees Fahr.

To avoid passion, excitement and luxury.

A man cannot stoop to meanness without lowering himself in the eyes of his fellowmen.

Dropsy

Neuralgia of the Heart For Years.

Pain Went From Heart to Head.

Dr. Miles' Heart Cure and Nervine Cured.

"About three years ago my sister was so badly affected with heart trouble and neuralgia of the heart that we did not expect her to live. Although we had a first-class physician she grew worse under this treatment. She had a swollen dropsical look and had frequent spells of neuralgia pain at her heart when she would render the most heart-rending moans and shrieks. At times the pain would go from her heart to her head when a lump would appear on her temple half as large as an egg. One night she got up in bed and ran into the back yard crying with pain; she was not conscious of it, however, and was brought back to the house by neighbors. I bought for her a bottle each of Dr. Miles' Nervine and Heart Cure which helped her greatly. She afterward used some five or six bottles and has never had a spell since. I had used your medicine with great benefit myself. I know that Nervine and Heart Cure not only saved my sister's life but also saved me from insanity and death. I was so nervous I could not bear the slightest noise or movement around me and I suffered from palpitation and pain in the heart. I had choking sensations, dizzy and faint spells, smothering spells when I could scarcely get my breath; I was so nervous I was treated like a child and at one time it was thought I was losing my mind. Nervine saved me from insanity."—KATIE ACKES, Clover Creek, Pa.

All druggists sell and guarantee first bottle Dr. Miles' Remedies. Send for free book on Nervous and Heart Diseases. Address Dr. Miles Medical Co., Elkhart, Ind.

How Ghosts Vanish.

The majority of ghosts simply vanish, like breath into the wind. Others make their exits through bolted doors, slamming them loudly. Many of these doors are seen to open, but later prove to be securely locked on the inside. Numerous spooks have a habit of vanishing as soon as spoken to. One which haunts a lonely roadway fades away in broad daylight and in the presence of several witnesses closing in upon it from in front and behind. A number of ghosts make their retreat through the floor. One phantom walked up to a man's door and disappeared through it. Yet the door was shut and locked. The man and his wife, thinking the thing to be a visitor, were following it close in the rear. Other spectres disappear through solid walls, penetrating them as though they were atmosphere. Others, pursued in the open, retreat to fences or hedges and there fade from view. The shade of an old man, customarily seen in an arm chair of one haunted house, invariably rises from his seat and vanishes in the air as soon as the door to the chamber is opened.—Washington Star.

Digging in Greece.

While digging the foundation for the new statue of Kolokotrones, the famous "klepht and warrior," the workmen have discovered a fragment of the ancient wall of Athens and a tomb of the first century B. C., containing a number of valuable objects. Sixteen tombs of the Roman period, a wall covered with frescoes and an ancient inscription have been unearthed by the German excavators at Orehonienos which has now been completely excavated. The French are about to resume their excavations in the island of Tenos. — New York Commercial Advertiser.

A Curious Indian Custom.

A curious custom in India is that of "Ruk-sut hai" (You may go). In England it is etiquette for an afternoon caller to himself take the initiative in the matter of his departure. Indeed, it would be considered the height of ill-breeding if the hostess gave the slightest indication of any desire to be relieved of her caller's presence. In India the custom is reversed, and the native will never leave the white man's presence until told he may go.—London Express.

Massachusetts has 1800 prisoners per 1,000,000 population. N. Y.—25

Business Women Make Good Wives

By Harriet A. Armstrong.

WHILE it is the husband modeled on old-fashioned lines who prefers his wife to be a doll, the up-to-date suitor generally wants a good comrade as well as a wife, and he therefore searches for a mate, in every sense of the word, when he contemplates matrimony. He knows that though there are girls so badly balanced mentally as to fly from one extreme to another, and when interested in money-making to be unable to bend an appreciative eye upon clothes, to say nothing of such paltry details as food and the comforts of home, such anomolies are easily to be detected. Individuals so useless as they are, from his point of view, he avoids. The girl upon whom he concentrates his attention is the all-around intelligent, charming, industrious and capable kind of creature so common in these days of universal cultivation.

Women who were earning their own living were at one time considered to be placing themselves, without any hope of reinstallment, beyond the pale of matrimony.

Old-fashioned aunts were convinced that the strong-willed nieces who would not sit by the fire and spin in a state of miserable dependence upon an overworked father or a struggling young brother, but instead preferred to brave the world and do battle with it, to secure an honorable independence were never likely to attract husbands and homes.

And for a while these short-sighted croakers were right. Men did fight shy of girls in harness. They said they were sure not to be able to make the bread as mother made it or darn the socks so as to compete with her standard of perfection. Wherefore they concentrated their affection upon the fluffy-headed community, who either had to be obliged by circumstances to become bread-winners, or, naturally shy and retiring, to say nothing of being also indolent and lacking in persistency, made home their cloister. And the croakers, when they were snapped up and their more energetic sisters were left neglected, chorused, "I told you so!"

But now a reaction has set in, and the business girl who is attractive is not left long at the desk or in the shop. She is induced by some wise man to enter into a matrimonial partnership that shall wed to the vitally important duty of seeing that the potatoes are properly boiled and the newly washed shirts receive their full complement of buttons, a realization of her husband's affairs, with every encouragement to further his ambitions by all the means in her power. In some cases she takes an active share in the money-making scheme, while in others it is merely by her sagacity that her husband's cause benefits.

The Chinese in America.

By Sunyowe Pang.

GENERALLY it is the impression among Americans that the Chinese in this country are parsiminious. This is not the case. The Chinese have earned enormous amounts of money, to be sure, but they have also spent largely. Their savings may be estimated as not more than ten per cent. of what they earn, which is very often permanently invested in this country, and does not go to China. Laborers seldom save anything, and this is as true of the Chinese as of other nationalities. In the first, place, the Chinaman is usually charged more for what he buys than any one else, and again he is inclined to be a spendthrift when he can. He is an epicure in his own way. He is also fond of silk clothes and expensive shoes. Very often he is a gambler. The actual needs of the Chinaman are greater in this country than in China. The climate in the Kwang-Tung Provinces is so mild that all he requires at home is a thin cotton blouse and trousers, and two extra garments for winter. His hat is of roughly pleated straw, and he wears straw sandals. In this country he must wear woolen clothing, a felt hat, and leather boots, if a laborer. His boots in America cost four or five times as much as his whole outfiet in China.

The food bought by the Chinese is often quite as expensive as that of the whites. Instead of living almost altogether on rice and chop sooy, as is the general impression, Chinamen, being quite as fond of meat as Americans, buy pork, beef and chickens. Chop sooy is made to sell to curious white persons who visit Chinatown. In the vicinity of any large city where there is any considerable Chinese colony, there are truck gardens devoted to raising vegetables exclusively for Chinamen from seeds brought from their native land. These vegetables are unknown to Americans. But the Chinese also consume large quantities of the finer kinds of American vegetables. The Chinaman has a sweet tooth, also; and in the best Chinese restaurants in San Francisco, New York, Chicago, and other large cities, the best of wines are served to Chinese as well as American customers, together with the finest and most expensive foods. In the average Chinese restaurant in those cities good board can be had by the Chinese for from $15 to $20 a month, and these restaurants are largely patronized. As a rule, the Chinamen are compelled to lodge in mean quarters; but in New York and San Francisco there are a number of well-appointed homes, occupied by the families of well-to-do Chinese merchants, which the American seldom or never sees. In New York there is an apartment house, up-to-date in every respect, occupied by Chinese families. The Chinaman sticks as closely as he can to the traditions and customs of his country, which are strange to the Occidental, and, therefore, a subject for comment and often for derision.

May Old Men Lie to Get Work?

SOME months ago a capable man with a long and thorough experience in somewhat narrow lines found himself out of employment through the dissolution of the firm he had worked for. His health was good and his physical strength sufficient for the work he understood. He had a wife, a daughter and an aged mother dependent upon him for support. To remain long in idleness would entail the breaking up of his little home and dependence upon charity in one form or another.

He was forty-seven years old, and had begun to show his age in streaks of gray in hair and beard, as well as in gait and habits of dress. He made zealous efforts to obtain employment, but found that even for positions in which his experience would have made him valuable he was deemed ineligible by reason of age. Some establishments fixed the "dead line" at thirty-five, others at forty, a few at forty-five, but with hypercritical scrutiny of credentials. Non one cared to consider engaging a new man at the age of forty-seven. He was "too old." This condition lasted until he had reached the last dollar of his meagre savings and had consumed the surrender value of his life insurance policy.

Then a resolution took possession of him which was born of desperation. He shaved off his beard, had his mustache and hair trimmed and dyed, substituted a jaunty derby for his dignified silk hat, donned a necktie somewhat gayer than he had worn for years, left his overcoat at home, after the manner of imprudent young men, and started out to win by false pretenses, if necessary, what he had failed to secure by truthful representations.

Before night he had found temporary employment in a large store as an extra clerk to help out during the holiday rush. He gave his age as thirty-four and acted the part well enough to pass for a sedate and rather mature young man who seemed to know what he was about. He did so well and displayed so much intelligence and industry that after the New Year's stock taking he was offered employment as a regular clerk, in place of a less competent man of dissolute habits.

At the beginning of his second year he had won an important promotion with increased salary. He filled his new position with ability and profit to his employer. Two years later he was made the manager of the store, with a liberal salary and large responsibility. At the end of his fourth year his employer sent for him to discuss a proposition of mutual advantage, and in the course of the conversation incidentally asked him how old he was.

A rapid mental calculation showed that if he had been thirty-four when he entered the store he must now be thirty-eight. As a matter of fact he was fifty-one.

To tell the truth would reveal the deception he had practiced, his descriptive list being a matter of record. His thinking had to be done quickly and his decision reached without the appearance of hesitation. He gave the answer which seemed best to him at the moment, and has had no subsequent occasion to regret it.

The reader with a taste for problems in casuistry may find pleasure and profit in considering and answering, according to his light, certain questions which we assume will present themselves somewhat as follows:

Was this man justified in the circumstances, or in any circumstances, in telling a lie with deliberate intent to deceive, to secure employment, however much he might need it?

Having told a lie at the outset, was he justified in taking advantage of the opportunity of promotion to a confidential business relation, the chance for which he had earned by industry, capacity and fidelity to duty, without first putting himself on a solid basis by honest confession?

What answer should he have made to his employer when, enjoying his full confidence and respect and being on honor, he was unexpectedly called upon to tell his age?

A SERMON FOR SUNDAY

A DISCOURSE FOR GIRLS DELIVERED BY REV. DR. W. R. HUNTINGTON.

The Preacher Describes Under What Conditions It Is Possible For a Woman to Become, in Very Deed and Truth, a Lady Forever—Be Gentle and Dignified

NEW YORK CITY.—The Rev. Dr. William R. Huntington, rector of Grace Church, preached recently a sermon to a fashionable school for girls which has attracted much attention, and by request it is here given. The text was chosen from Isaiah xlvii: 7: "Thou saidst, I shall be a lady forever." Dr. Huntington said:

I quote our prophet in this fragmentary way for the sake of vividness. The briefer the text, the more likely it is to be remembered. But if, under present circumstances, we would do justice to the man and to his thought, some heed must be given to what has gone before and to what follows. Taken by themselves the words sound as if they must have been, in the first instance, addressed to a woman, but they were not. The aspirant after an everlasting ladyship was no woman at all, but a city—an ancient city, a city opulent, and superb, Babylon the great.

Emboldened like ancient Rome by its military conquests, intoxicated like mediæval Venice by its commercial prosperity, confident like modern London in the possession of resources which seemed measureless, this queen city of Chaldea had come to think of itself as invincible and indestructible. "House of Eternity" was the name it gave to one of its temples. "Foundation stone of heaven and earth" ran the vain-glorious appellation of another. Gardens and parks, the city had in abundance. A mighty bridge which crossed and a tunnel which underran the river Euphrates were among its engineering triumphs. The circuit of the walls, lofty and broad almost beyond belief, was between fifty and sixty miles.

But there was a man in Jerusalem whom none of these things greatly moved in the sense of stupefying or alarming him. The man's name was Isaiah and his father's name was Amoz. When people came to him with their panic talk about the bigness of Babylon and the littleness of Jerusalem, he betrayed no apprehensions on the contrary, he spoke up and harangued Babylon with much plainness of speech. "Sit thou silent," he cried, "and get thee into darkness, O daughter of the Chaldeans, for thou shalt no more be called the lady of kingdoms. Thou saidst I shall be a lady forever—therefore hear thou, thou that art given to pleasures, that dwellest carelessly—these two things shall come to thee in a moment, in one day, the loss of children and widowhood. They shall come upon thee in their perfection for the multitude of thy sorceries and for the great abundance of thine enchantments."

Thus sternly, almost fiercely, Isaiah, son of Amoz addresses mighty Babylon. He speaks of her as to a woman of rank whose pride and indocility are presently to prove her overthrow and to transform her pleasant palaces into ruinous heaps. She leans upon her advantage of high station all unaware that the staff is too brittle for the weight. Forgetful of the duties which condition privilege, she fancies that old time prerogative and the accumulated prestige of many generations will be her safety. God's prophet determines to shake her out of this illusion, to compel her to open her eyes to the hard fact and he does it, as we have seen.

With the text thus well in hand, we proceed. Under what conditions is it possible, either for a city or for a woman, to become, in very deed and truth, a lady forever?

This is the question to which I shall ask you to bend your thought to-night, and whether we have respect to the week which ended yesterday or to the week which has been entered upon to-day I cannot but account the topic a timely one. It may seem to be comparing small things with great to name the commencement week of a school for girls in the same breath with the commemorative week of a city which has lived through the fourth part of a thousand years, but, perhaps, before we are done, my boldness in venturing thus to couple the two may be forgiven me.

Of the sorts of ladyship of which I have made mention, that to which communities and that to which individuals may attain, we will look at civic ladyship first. With civic ladyship we associate those qualities which win for cities an admiring love. Physical strength, riches, commercial enterprise will give a city lordship. That is one thing; but ladyship is quite another. For the compelling of respect lordship may suffice a city, for the winning of affection something of ladyship is essential. How about the Lady of the Hudson? Has she any better ground for counting upon the perpetuity of her ladyship than had the Lady of the Euphrates? Can we trust her any more implicitly than Isaiah trusted Babylon when she says confidently "I shall be a lady forever." That depends upon the relative measure of importance which the city, in the long run, shall assign to the treasures of the market as compared with the treasures of the soul.

I am using the word "soul" in a large and comprehensive sense. Religion and religious interests are of course foremost in my thought, since, without a due regard to these no city can permanently live; but when I speak of the treasures of the soul as essential to the city that would adventure ladyship I have in mind all of those precious things that go to make up the idealistic as contrasted with the materialistic side of human life—Righteousness? Yes. Worship? Yes; but beside these, poetry, letters and whatever else there may be that ministers beauty to the eye of harmony and melody to the ear. These last are what make the treasures of the soul. These, mingled in due proportion, give to a municipality what silver and gold and negotiable securities of themselves can never give—that indescribable quality which I have ventured to call civic ladyship.

The prevailing note during the past week has been the note of self-congratulation. Whatever flags and flowers could do to convince people through the eye, or speech and song to persuade them through the ear has been attempted. It has been jubilate throughout, as was proper enough in connection with birthday festivities, and yet there is another side to it all. The statistics of the city's trade are marvelous, but what of the inventory of its spiritual possessions and the roster of its great men? How many poets and how many seers, how many composers and how many artists, how many scholars and divines, how many philosophers and statesmen has this community produced in the course of its two hundred and fifty years of organized existence? Nay, of those whom we recall as having come under one or another of these heads, how many have been of first rank, how many even of second rank, when the complete census of "the great of old" is taken into account? These, perhaps, are humbling reflections, but they are wholesome. It is by count of heroes, not by count of heads, that a city's place in the final list of honors is to be determined. Whether this city of magnificent opportunities is destined to accomplish ladyship remains to be seen. The balance trembles.

In what sense it is open to you girl graduates of this passing year, dreaming your early dreams of what success in life may signify, in what sense is it possible for you to attain ladyship forever? Before attempting to answer the question, let us clear our minds as completely as may be of prejudice and misapprehension.

The word "lady" has fallen of late years (the more's the pity) somewhat into disrepute. Claimed as a right by the many, the title has come to be lightly esteemed as a privilege by the few. In fact, so cheap is it accounted nowadays that to discard it altogether, carefully avoiding the use of it in common conversation, is not seldom taken to be a mark of good breeding. All do not go to this extreme and, yet the number of those who would prefer to be spoken of and addressed as "women," rather than as "ladies," has been steadily increasing for the past twenty years, and this increase, I think I am safe in saying, has been in fixed ratio to our progress as a people in cultivation and refinement. I venture to account this an unfortunate state of things, since "lady" is a word which the language cannot lose without sore impoverishment and one for which the vocabulary of every day intercourse has no synonyms.

"Lady," be it observed, is a title, not a generic word, necessarily covering all the members of one sex; and as a title it belongs only to those who have a right to claim it. Now, who are they who, in point of fact, have a right to claim it? In monarchial countries there is no difficulty in finding an answer to this question. In England, for example, the Heralds' Office, to which such matters are intrusted, can and will give you a definition in black and white, clear-cut and unmistakable. A "lady," by English law, may be the wife of a man above the rank of knight and below that of duke. The title also belongs to the daughters of noblemen not below the rank of earl and is given by courtesy to the wives of knights.

Let that pass for England, but what of ladyship in America, where no such sharp divisional lines are drawn by the pencil of authority? Here, thank God, we have a much worthier definition of the word and more satisfactory interpretation of the thing. Ladyship, under a democracy, means and can mean only one thing, womanhood at its best. Not all womanhood is womanhood at its best any more than all manhood is manhood at its best—would that it were. And what are the characteristics of womanhood at its best? What are the tc'tens by which it is authenticated? We cannot greatly differ in opinion upon this point. Surely of these characteristics dignity is one, gentleness is another, fortitude is a third and sympathy completes the cluster. It were unreasonable, of course, to expect the fullness of each one of these four traits in any single personality, no matter how richly endowed by inheritance or carefully matured by training. And yet it is beyond question that some tincture of each one must be found present in a woman before, under democratic conditions, her claim to ladyship can be accounted valid.

Dignity—there are a thousand imitations of it, counterfeits beyond number, but how wholly admirable is the genuine article, what "an excellent thing in woman!" Not by aping dignity do we become dignified. Aloofness is not dignity, hauteur is not dignity, stiffness is not dignity, a pompous manner and a brocaded style of speech—these are not dignity. True dignity is not of ice, it is of flame. A certain delicate and fiery nimbus which circles the sanctuary of personality to safeguard it from intrusion and encroachment. "Their dignity," exclaims an old Hebrew prophet, giving us the whole thing in a nutshell, "their dignity shall proceed of themselves." Dignity is reconcilable with all forms of occupation, even the most menial. It consorts with many qualities, although with vanity it is reluctant to walk, and with immodesty it will have nothing to do. Immodesty is the sin against proportion, its very name so signifying, and as the philosophic emperor remarks in his meditations, "There is a proper dignity and proportion to be observed in the performance of every act of life." Hence to do anything out of measure and in excess is undignified.

Then as to gentleness, our second attribute of womanhood at its best, what shall we say of gentleness? Can we say anything better or truer than that it is the child, the direct offspring of dignity. The truly dignified can scarcely be thought of as the ungentle, for here again that question of proportion comes in, and rough ways and boisterous talk stand self-condemned. Few things indeed can we so ill afford to spare out of the daily intercourse of life as woman's gentleness. And this is only the more true the noisier the world becomes. With life punctuated for us by the shrieks of steam whistles, the rattle of the chariots of iron and the strokes of all manner of gongs, how restful, how healthful, how reinvigorating are the accents of gentleness! Ah, my dear young friends, whatever else you forget to be, remember to be gentle. An anxious fear in the hearts of many thoughtful people, a fear which personally I do not share, but of which it is just as well to take note, is that out of all this contemporary struggle of woman for a complete independence, this duplication on her part of as much of man's work as is imitable, there may come eventually an impairment of the world's total stock of gentleness. Let us be misers here. The tide of this sweet grace is never at the flood. There is no peril of any overflow. We need to treasure every drop there is.

As to fortitude, I chose the word with care, wishing to mark off from courage in general that special form of this virtue which has found frequent and splendid illustration in the annals of womanhood. Courage of the sort which qualifies one "to drink delight of battle," to head storming parties and to volunteer on forlorn hopes is not expected of women, and, for that matter, is not so common among men as men would like to have it thought, but of that other and more praiseworthy fearlessness, which, without the excitement of conflict, is able patiently to suffer, persistently to endure, in this Christlike virtue, it is possible—it has ten thousand times been shown to be possible that women should excel. With the aroma of this virtue wholly absent no woman's character even so much as approximates perfection.

But it is not enough to be able uncomplainingly to suffer—have we learned to suffer with? That is what sympathy means —"suffering with"—remember that sympathy won the last of the four blossoms we set out to twine into our wreath. It does not matter how well bred a woman may be in other respects, it does not matter how varied her accomplishments, intellectual or artistic, if tender heartedness, the power to enter quickly and deeply into the feeling of others, if this be wholly absent, it is idle to talk about "charm," it simply is not there. It is this insistence upon sympathy, as a necessary ingredient of true womanhood that renders the Christian type so infinitely superior to the old classic type whether of maid or matron. That a woman can look on composedly at a bull fight is the opprobrium of Spanish civilization, but there was a time when not in one corner of the Mediterranean exclusively, but all over the Latin world women called ladies could both tolerate and even fiercely delight in the shedding of innocent blood.

What has changed all this? Only one answer to that question is possible. Jesus Christ has changed all this. To Him we owe it that to-day not only dignity and fortitude (stoic virtues as well as Christian) not only dignity and fortitude, but also gentleness and sympathy are recognized as necessary features of all true ladyship.

But who is sufficient for these things? With the standard set so high, the tests made so severe, who shall pass?

Ah, my young friends, how glad I am that this is Whitsunday, the feast day of the Holy Ghost, for Whitsunday points us to the secret of power, and hands over to us the talisman of success. It is by the strength of God that womanhood struggles upward to its perfection. The ages of chivalry gave to the Virgin Mary the title of "our lady." Judged by some standards of ladyship nothing could seem more inappropriate, but judged by the true standard nothing could be more just.

"And Mary said, Behold the handmaid of the Lord, be it unto me according to Thy word." Catch that spirit, and it shall be granted unto each one of you, young women, to become "a lady forever," yes, forever and ever.

Not to Be Caught.

An amusing incident occurred on a certain railway not long ago. "Professor" Debevoise, a well-known ventriloquist, was bidding adieu to some friends, when one of them presented him with a little fox terrier, to which he had taken a great fancy.

The train began to move, and there was no time to get a dog ticket; so Debevoise popped the dog into a small hamper which was labeled "Professor Debevoise, ventriloquist," in bold letters.

When the conductor came through the car the dog began barking, which drew his attention to the hamper. He looked at the hamper and then read the label. Turning to Debevoise with a knowing wink and a broad grin he said:

"All right, all right; I ain't taking any just now. I've been up against that before."

Luminous Ghosts.

Many ghosts are peculiarly luminous. One is especially so when the moon shines on it. Blue lights have often been seen after dark along the country haunts of a daylight ghost of black hue. Blue light surrounded also the ghost of a dead parent, who came to inform his daughter that she had lost a favorite aunt. The spook of a dead friend appearing to another woman illuminated her apartment at night until it was as bright as day.

The Birthplaces of Presidents.

The birthplaces of the Presidents of the United States are divided among the States as follows: Six have come from Virginia, five from Ohio, three from New York, two each from Massachusetts and North Carolina and one each from New Jersey, Kentucky, New Hampshire, Vermont, Pennsylvania and Tennessee.

There is no such word as fail. Price, 25c. and 50c.

DOAN'S GET BACK REST.

Aching backs are eased. Hip, back, and loin pains overcome. Swelling of the limbs and dropsy signs vanish.

They correct urine with brick dust sediment, high colored, pain in passing, dribbling, frequency, bed wetting. Doan's Kidney Pills remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness, dizziness.

Doan's Kidney Pills are now recognized as a known remedy for kidney, bladder, and urinary troubles. They bring relief and cure when despair shadows hope. The free trial is an open door to self proof.

DEERFIELD, IND.—"I was called rheumatism. I could get no relief from the doctors. I began to improve on taking Doan's sample and got two boxes at our druggists, and, although 68 years of age, I am almost a new man. I was troubled a good deal with my water—had to get up four and five times a night. That trouble is over with and once more I can rest the night through. My backache is all gone, and I thank you ever so much for the wonderful medicine, Doan's Kidney Pills."

JNO. H. HUBER, President Ridgeville, Indiana, State Bank.

BAXTER SPRINGS, KANSAS.—"I received the free sample of Doan's Kidney Pills. For five years I have had much pain in my back, which physicians said arose from my kidneys. Four boxes of Doan's Kidney Pills have entirely cured the trouble. I think I owe my life to these Pills, and I want others to know it." SADIE DAVIS, Baxter Springs, Kans.

FALMOUTH, VA.—"I suffered over twelve months with pain in the small of my back. Medicines and plasters gave only temporary relief. Doan's Kidney Pills cured me." F. S. BROWN, Falmouth, Va.

NEW IDEAS in TOILETTES

New York City.—Loose coats made with shoulder capes are much in vogue and are admirable for many purposes. Made of pongee, silk and the like, they

WOMAN'S COAT.

serve as warm weather wraps, and made from the heavier materials become suited to cold weather wear. This very stylish May Manton one is shown in pongee, with trimming of the same material embroidered in Chinese designs, but is adapted to all the materials mentioned and indeed to all light weight cloaking materials.

The coat is made with loose fronts and back and is shaped by means of shoulder, under-arm and centre back seams. The cape is arranged over the shoulders and can be turned back at the corners, as illustrated, or left plain, as preferred. At the neck is the stole trimming, which extends to the edges of the fronts. The sleeves are loose and ample, in bell shape, and admit of slipping over the gown with perfect ease.

The quantity of material required for the medium size is four and one-half yards twenty-seven inches wide, three yards forty-four inches wide, or two and one-half yards fifty-two inches wide.

Becoming to Young Girls.

Shirred waists always are becoming to young girls and are greatly in vogue at the present time. The very pretty and attractive May Manton one shown combines the broad shouldered effect with the shirrings at the waist line, which gives the effect of a belt, and is as new as it is attractive. As illustrated in the large drawing it is made of white mull with a yoke of lace, but soft wool and silk fabrics are appropriate as well as the cotton and linen ones.

The waist is made over a fitted foundation which closes with it at the back. The yoke is faced onto the lining and the waist proper is shirred and arranged over it. The sleeves are shirred at their upper portions to form continuous lines with the waist, and again between the shoulders and the elbows. They can be made in elbow length, as illustrated, or in the long bishop style, as shown in the small cut. If a transparent effect is desired the lining can be cut away beneath the yoke and beneath the full portions of the sleeves.

The quantity of material required for the medium size is three and one-fourth yards twenty-seven inches wide, three yards thirty-two inches wide, or two and one-eighth yards forty-four inches wide, with five-eighth yards of all-over lace.

Tuck shirrings are greatly in vogue and are peculiarly desirable for the gowns designed for young girls. The extremely graceful and pretty skirt shown in the large drawing includes a yoke and flounce effect, with additional shirrings midway between the two, and is eminently desirable. The original is made of dotted muslin, but the design suits all the soft, pliable fabrics of the season equally well.

The skirt consists of a three-piece foundation and the skirt proper, which is cut in one, slightly circular, piece. At the lower edge is a group of three tucks that makes a most satisfactory finish. The skirt is shirred on indicated lines and is drawn up to fit the foundation.

The quantity of material required for the medium size is six yards twenty-seven inches wide, four and three-fourth yards thirty-two inches wide, or four yards forty-four inches wide.

Traveling Gowns.

Gowns for traveling and street wear made of foulard (which is still in high vogue) are far ahead of those of brilliantine or mohair, as they are equally durable, more congenial to the touch, resist damp or salt air and shed dust as well. For ordinary wear they are cheaper than any of the dainty muslins, as they do not have to be laundered, and can be worn even on ceremonious occasions. They are, however, mostly made on the smart shirt waist model, and elaborated as desired by quantities of lace and ribbons, especially those in the light designs with plenty of white in the ground, the dark foulards being selected for traveling. The old or standard designs (which never go out of fashion) can be had cheaper than the new designs.

Woman's Blouse Waist.

Nothing marks the season more surely than the bertha effects that are to be noted in many of the fancy waists. This very stylish model shows one of

TUCKED SHIRRED WAIST AND SKIRT.

novel shape and combines with it sleeves that are among the latest shown. The original is made of shepherd's plaid louisine piped with black, novel shape and combines with it, but numberless other materials are equally appropriate, and many combinations might be suggested. A plain bertha on a figured material, or figured on plain is effective, lace, embroidery, applique and the like all can be used.

The waist is made over a fitted lining that is faced to form the yoke at the back. The fronts proper are tucked to form a yoke and fall in soft folds below that point, but the back is laid in pleats that extend to the belt and give a tapering effect to the figure. The lining and waist are closed separately at the centre front, but the bertha is hooked over into place at the left shoulder seam. The sleeves are new and are pleated to form full puffs above the narrow cuffs. At the neck is a regulation stock.

The quantity of material required for the medium size is five yards twenty-one inches wide, four and three-fourth

BLOUSE WAIST.

yards twenty-seven inches wide, four and three-fourth yards thirty-two inches wide, or two and one-fourth yards forty-four inches wide.

SCIENTIFIC & INDUSTRIAL

Comparative test in England of steam turbine and a Sulzer engine showed that below the three-quarter load the reciprocating engine "showed up" best in economy, at three-quarter load the two were equal, and above that the turbine had the advantage.

In an address to the St. Louis Medical Society, some interesting facts about the human heart were brought out. For instance, the mechanical energy expended by the heart in twenty-four hours equals 124 foot tons. A man, seventy years old, would have expended 3,124,800 foot tons of energy in his life, a force sufficient to move a train of fifty loaded cars (twenty tons each) half a mile.

Professor Muthmann, of the Polytechnical Academy of Munich, Bavaria, in a recent lecture before the Chemists' Association, of his city, stated that he had demonstrated that saltpeter can be produced from air by electricity at less than one-fourth its present cost. It has for some time been known to scientists, the professor continued, that nitric acid can be formed by passing high electric currents through moist air between two platinum poles, and suitable apparatus is all that is now needed for the manufacture of nitrates on a large scale.

No white pigments have been found in feathers, and the whiteness of white feathers is ascribed to total reflection of light from their exposed surfaces. Some have supposed the reflection to be from air spaces, or bubbles, in the feather structure, but R. M. Strong, of Haverford College, says that the white effect is mainly dependent, as in the case of snow or powdered glass, upon the small size of the structural elements. These have a large number of surfaces so placed for any position of the eye that there is a maximum reflection to the eye, and almost no absorption by the unpigmented feather surface.

A Scottish power scheme of great interest is that which has been recently approved by the British Parliament, and which will soon be under way. It is proposed to generate electricity in the vicinity of the coal mines, and to transmit it to the city of Glasgow and industrial establishments along the Clyde in the neighborhood of that city. Three generating plants will be established, located at Yoker, Motherwell and Crookston, and the ultimate capacity of this trio will be 25,000 horse power. The two first mentioned will be built at once, but the initial installation will be only about half of the total contemplated.

Bluejackets' Strange Pets.

At the review before the King at Malta the pet donkey of the Bacchante, we are told, marched in front of the men. A donkey is a rather bulky sort of pet, but probably no more troublesome than the pet deer of the Terrible. The privilege of keeping pets is very much appreciated by bluejackets, who lavish their spare time and some of their spare cash on strange animals. The Centurion (says the Court Circular) once had a monkey that used to eat with a spoon from a plate and drink from a glass, with a dinner napkin tucked under his chin the while. The Caesar had a pet goose some time back. Cats and dogs, of course, are common on board ship. The French warship Marceau had a bantam cock named Boulanger as pet, which crowed whenever the guns were fired. The German Prinz Wilhelm had a gray stork, and the United States Chicago had a pig. Doves, pigeons, blackbirds and peacocks are popular with Italian seamen, and the unfortunate Almirante Oquendo of Spain had a pair of cassowaries as pets.—St. James' Gazette.

A Norse Hat Saga.

A felt hat blew off a tourist's head last year as he was leaning out of a railway train window, in Sweden. Of the man himself nothing further is known, but the felt hat has become famous all over the north of Europe. An employe of the line picked up the hat where it lay, and, being an honest man, he tried high and low to find its owner. Finally, all local efforts failing, he ticketed it and sent to the next station, to be claimed by the owner. No such person appeared, and the hat was sent on from station to station, an additional ticket being stuck on each time it set out. Thus it has run through the whole of Sweden and Norway, has been at Upsala and Trondhjem, at Christiania and Goteborg and Malmo, has been sent on to Zealand and Finland, and is now being sent through the north of Germany, covered with labels inside and out. And if it is no longer a fit headgear it is at all events a remarkable monument of northern honesty and perseverance.—Westminster Gazette.

Oil Engines For Palestine.

The demand for oil engines in Palestine is steadily increasing. Last year ninety-four were imported. They are chiefly used for irrigating the orange gardens. Quite a number of oil engines are also used in flour mills. The majority of the engines imported into the Holy Land are of from three to four horse-power. They come chiefly from Germany.

Largest Cross in England.

The Church of St. Alban, in Holborn, has a cross over twenty-five feet in height, and supposed to be the largest in England. It was given by the Duke of Newcastle.

A SINKING CITY.

New York Will Some Day Be Entirely Submerged.

The geological history of New York and its vicinity is discussed at great length, illustrated by numerous maps and pictures in New York City Geologic Folio, recently issued by the United States Geological Survey. Tens of thousands of years ago the greater part of New York State was covered by an immense glacier, similar in character to those now found in Switzerland and Alaska, but immensely greater in area and thickness. This ice sheet gathered up in its course large quantities of sand, gravel and mud. Part of this burden was pushed before the ice mass, and as the front of the glacier came to rest in the latitude of the city, the material pushed ahead of it was deposited there. When the glacier disappeared, owing to the coming on of a warmer climate, the mass of material deposited along its front became the familiar rounded hills of Long Island.

After the disappearance of the ice sheet the land in the vicinity of the city sank, so that the sea covered points now 100 feet above tide level. During this period of submergence the great brick-clay beds along the Hudson River were deposited. The traveler on the railroad can now see these beds—near Croton Landing or Haverstraw, for example—far above the railroad tracks, but they were all formed under water.

The next event in the history was a gradual rising of the land until it stood considerably higher than at present. This was followed by a sinking just as gradual, which is still in progress. Along the coast tree stumps may be seen under water. It is known that they have been drowned in very recent times.

WISE WORDS.

Practice puts an edge on precept.

A miser is bound to be miserable.

Example succeeds where argument fails.

Zeal for the false will congest the true.

Life without toil would be without triumph.

To-day is but the shadow of to-morrow.

We owe to society all that we own in society.

Social salvation must have spiritual foundations.

Golden deeds do not rise from gold-loving hearts.

A very light fad may lead a man to a very dark fate.

There is no force in the fire that is nothing but feeling.

There is no saving leaven in the ferment of lazy discontent.

The consideration of consequences should control causes.—Ram's Horn.

The Birthplace of Liberty.

If the most sacred buildings in Boston and Philadelphia are properly rivals in claiming the title of the Cradle of our Liberty, then here in the Champlain Valley in Vermont is surely the scene of its birth. From this eyrie on Rochester Mountain one may see the great "lake that is the gate to the country," as the Indians named Lake Champlain; one may see the Otter up which the paint-smeared savages crept to make their murderous attacks deep in Connecticut and Massachusetts; one may scan where Ticonderoga lies in shameful abandonment, the spot where Champlain fought the red men 293 years ago, where the French built their most important fort in the chain that ran from Montreal to New Orleans, where Amherst took it from them, where our dashing friend and leader, young Lord Howe, fell and was secretly buried. It required but little imagination for the mind's eye to see the path that Ethan Allen and his band took to gain, at this fortress, our first great victory in the Revolutionary War. From where the white church-spires marked the seats of Rutland, Pittsford, Brandon, Whiting, Castleton and Middlebury, one fancied he might almost see again the tall, rugged "Mountain Boys" stalking the trail to the rendezvous with Allen at Shoreham—newly noted now as the birthplace of Levi P. Morton. All of these villages are prosperous and beautiful places today—the summer resorts of well-to-do folk from a score of distant cities. Even the edge of the rich valley, where the lake waters lap the Vermont shore, now shows the beginning of a movement to stud the lakeside and the islands in the lake with fine summer hotels and palatial mansions set in great estates.—Julian Ralph, in Harper's.

Chicago Imports Her Valets.

Employment agencies in Chicago say they have but little call for valets. There are a good many men in Chicago who have such luxuries as valets, but according to the managers of the employment agencies these valets are all imported either from abroad or down east.

The native-born Chicago valet or even one supplied by a Chicago agency, would be regarded as an imitation article. The good valet, like the good accent, is only acquired abroad.

The valet most in demand is the English one, and masters like it best if they can pick him for themselves in his native heath. Part of the joy of having a valet is saying: "Faithful fellow, that. Picked him up myself in England. Used to be valet for Lord Tuppenny. Very glad, though, of a chance to go with me. You couldn't tempt him away."—Chicago Tribune.

The Demand For Automobiles.

In America alone 30,000 automobiles will be placed on the market during the present year, which will only supply half the demand.

DOCTOR ADVOCATED OPERATION--- PE-RU-NA MADE KNIFE UNNECESSARY.

CATARRH is a very frequent cause of that class of diseases popularly known as female weakness.

Catarrh of the pelvic organs produces such a variety of disagreeable and irritating symptoms that many people—in fact, the majority of people—have no idea that they are caused by catarrh.

If all the women who are suffering with any form of female weakness would write to Dr. Hartman, Columbus, Ohio, and give him a complete description of their symptoms and the peculiarities of their troubles he will immediately reply with complete directions for treatment, free of charge.

Mrs. Eva Bartho, 133 East 12th street, N. Y. City, N. Y., writes:

"I suffered for three years with leucorrhea and ulceration of the womb. The doctor advocated an operation which I dreaded very much, and strongly objected to go under it. Now I am a changed woman. Peruna cured me; it took nine bottles, but I felt so much improved I kept taking it, as I dreaded an operation so much. I am to-day in perfect health and have not felt so well for fifteen years."—Mrs. Eva Bartho.

MRS. EVA BARTHO.

Miss Maud Steinbach, 1399 12th St., Milwaukee, Wis., writes:

"Last winter I felt sick most of the time, was irregular and suffered from nervous exhaustion and severe bearing down pains. I had so frequently heard of Peruna and what wonderful cures it performed, so I sent for a bottle, and in four weeks my health and strength were entirely restored to me."—Miss Maud Steinbach.

Everywhere the women are using Peruna and praising it. Peruna is not a palliative simply; it cures by removing the cause of female disease.

Dr. Hartman has probably cured more women of female ailments than any other living physician. He makes these cures simply by using and recommending Peruna.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

BEST FOR THE BOWELS

Cascarets

CANDY CATHARTIC

GUARANTEED CURE for all bowel troubles, appendicitis, biliousness, bad breath, bad blood, wind on the stomach, bloated bowels, foul mouth, headache, indigestion, pimples, pains after eating, liver trouble, sallow skin and dizziness. When your bowels don't move regularly you are sick. Constipation kills more people than all other diseases together. It starts chronic ailments and long years of suffering. No matter what ails you, start taking CASCARETS today, for you will never get well and stay well until you get your bowels right. Take our advice, start with Cascarets today under absolute guarantee to cure or money refunded. The genuine tablet stamped C C C. Never sold in bulk. Sample and booklet free. Address Sterling Remedy Company, Chicago or New York. 502

CHARLES E. HIRES CO. Malvern, Pa.

BABY'S FUTURE

Something for Mothers to Think About

Lives of Suffering and Sorrow Averted

And Happiness and Prosperity Assured by

Cuticura Soap, Ointment and Pills When All Else Fails.

Every child born into the world with an inherited or early developed tendency to distressing, disfiguring humours of the skin, scalp and blood, becomes an object of the most tender solicitude, not only because of its suffering, but because of the dreadful fear that the disfiguration is to be lifelong and mar its future happiness and prosperity. Hence, it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest and most effective treatment available, viz., The Cuticura Treatment.

Warm baths with Cuticura Soap, to cleanse the skin and scalp of crusts and scales, gentle applications of Cuticura Ointment, to allay itching, irritation and inflammation, and soothe and heal, and mild doses of Cuticura Resolvent, to cool the blood in the severer cases, are all that can be desired for the speedy relief and permanent cure of skin tortured infants and children, and the comfort of worn-out parents.

Millions of women use Cuticura Soap, assisted by Cuticura Ointment, for preserving, purifying and beautifying the skin, scalp, hair and hands, for annoying irritations and weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves.

Sold throughout the world. Cuticura Resolvent, Pills (in form of Chocolate Coated Pills, 25c. per vial of 60), Ointment, 50c., Soap, 25c. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Boston, 137 Columbus Ave. Potter Drug & Chem. Corp., Proprietors.

CLASS DAY EXERCISES.

Quipp to save a large portion of her brain, for her senior year, as something unexpected is always happening, which requires all of a senior's ingenuity to overcome.

Mr. Leonard Mantz and Mr. Ernest Powlison, were mentioned in the exclamation, "Then they will talk—Good Gods how they will talk." I mention this, because I myself have heard that these young men have been known to sit for hours together, carving wood and talking all the while, and as a teacher said, "Just like a couple of girls." I did not understand this comparison, but I think it must have meant, "Just like a couple of old maids," and I am sure Mr. Mantz and Mr. Powlison have higher aspirations.

"Her voice was ever soft, gentle and low—an excellent thing in women"—said the voice, I think Miss Daggett answers to this, and although a low sweet voice is an excellent thing in woman, it does not serve in school so I would advise that Miss Daggett during her senior year, go into the type-writing room and dictate for forty minutes each day, above the noisy pounding of the machines.

Miss Mabel Farlee and Miss Mamie Davenport were suggested in the statement, "Two heads are better than one." I wish simply to advise them not only to continue this partnership during their last year, but to harness together and drive a latin pony, so that they may ride right over the rest of the class.

When I heard that old rhyme being repeated, "She sent a letter to her love and on the way she dropped it"; I attributed it to Miss Lindsey, and her love letter writing. I think Miss Lindsey should be warned that seniors do not have time to waste on love-letters and that if she has any more to write, it would be well to finish them during vacation, not only because of the wasteful time, but also because she will have a better chance of getting them to their destination.

When I heard the exclamation, "Again I see a young woman who is not here," my thoughts quickly turned to Miss Gertrude Andrews, who is invariably "Conspicuous by her absence." We would advise Miss Andrews to make a New Year's resolve, to come to school more regularly, as it is very hard to remember to bring excuses, and if they are forgotten three times, one receives a very cordial invitation to call at Miss Glass's room on Free day and make an extended visit from eight till one.

Next I heard the following words,

"When bunting you buy
Choose a good dye
For when in the sun
The colors may run."

I think there was a rumor around about Mr. Leslie Backer and the class bunting, so I think that he will understand the drift of this spirit's advice without any further explanation.

When the spirit said, "Histories make men wise; poets witty; the mathematics subtle; natural philosophy deep; morals grave; logic and rhetoric, able to contend," I felt that it was speaking for the benefit of Miss Angelina Jackson, who is always very careful to ask her teachers, what possible good a certain subject will be to her, and object very strenuously if asked to commit to memory a poem, as she claims that it will be of no benefit to her. Now, as we do not like to think that such a wise person as Miss Jackson would doubt the excellence of any literature recommended by her teachers, we trust that she will lay aside her prejudices, in future, and try to believe that memorizing improves one's mind, as we were once told by a blind musician.

The voice now took up a commanding monotone, and I heard it say, "The three physicians, Dr. Quiet, next Dr. Mery-man, and Dr. Dyet." I am positive this was meant for Miss Florence White, who has complained so often to her teachers that long German translations gave her indigestion and the fumes from chemistry were ruining her health. Of course we appreciate Miss White's trouble but we feel that the use of these three physicians together, with patience needed during the senior year, will insure her perfect health and happiness.

And now Juniors, when you return to your studies next term, I trust you will remember the class of 1903 and the spirit of unity which prevailed throughout the year, in contra-distinction with the divided opinions of the class of 1904, and ask, are not we worthy of your emulation?

CLASS POEM, IRENE MILLER.

Where art thou Muse, come hither now
And aid me in this search for rhyme.
Come smooth the wrinkles from my brow
And bring me thoughts to fit the time.

The Class of Nineteen-three is here
A class with longing now for knowledge,
When first we started in this school
It seemed we'd ne'er prepare for college.

The last four years have sped away,
Have left small trace on us, that we
Can rightly count, as now we leave
But "Ethical Integrity."

The course is finished now, and see
Like beads from off a broken string
The class that is united now
Will scatter, and before next Spring

The Class of Nineteen-four will come
To take from us our places here.
While we'll be working somewhere else
With friends, perhaps not quite so dear.

We've spent our years in happiness
Within this bright and cheerful hall,
Not one but will be sorry, when
We must depart for good and all.

Only a little more to night,
The Senior spread is drawing nigh
Commencement comes, then all is done
And we must say our last "good-bye."

School will be over then, but some
Will hear again the Freshman name.
Whate'er our lot in life may be,
"Non nobis solum" be our aim.

CLASS PROPHECY, EDGAR GEORGE, JR.

The History of the Class of 1903 has been correctly given and it is left to my tender mercies to point out the future.

How I became your class prophet I know not. My mind has been disturbed greatly doing the past three or four months because of the mysterious action of this Noblest Senior Class that has ever thus far been graduated from the N. P. H. S., in choosing for its prohpet a person so matter of fact, one who had scarcely any imagination, was not versed in cards and knew nothing of the science of astrology.

However I at once began to make preparations for the trying ordeal. I arranged my office, began a scientific study of cards, learned what I could of palmistry, spent much time in prying into astrology and to clinch the whole matter took a course in Astronomy. A smattering of all these sciences put me in shape to begin practice.

It seemed to me I could handle love, marriage, divorce, illness and speculation with the utmost impunity.

So I sent invitations to the entire Senior Class to call at my headquarters on the afternoon of June 10th at two o'clock. On the above named date I saw them coming down the street headed by the Independent Fife and Drum Corps and followed by the police force. I meet them at the picket line and escorted them to the waiting room. The first to break the silence was our friend Mr. Armstrong. He addressed me thus: "Most erudite soothsayer, we appear before you as in days of old when men sought the oracles. We wish to have you rake up old personalities and pry into our future at cut rates. We desire to determine whether you can definitely enlighten us regarding the whenness of the hitherto and the henceforth on the vast arena of life wind we our ways in the ultimate time subsequent to the present. I motioned the group to be seated and to Mr. Armstrong said: "Sir, if you will follow me into my consultation room I will examine your head and try to locate your cerebrum and try to point out some of the dark spots in your future. After thorough examination I told him that not far in the future we would hear of him as F. K. Armstrong, Professor of Astronomy, who will be nightly in his open tower, watching, waiting, and taking notes. At last, by the aid of electricity, he is able to open communication with the moon and bring the gentlemen who reside there within hailing distance. He returned and was followed by Miss Coddington. "Aye," thought I, "here comes the future leader of New Jersey school workers." She approached me with haughty tread and with defiance in her eye. "Madan," said I, "I am aware of your great mental capacity. I see (on turning to the Queen of Clubs) it is you who will arrange our school system into one harmonious whole, and though many a hesitating pupil will be squelched by your chilling thrusts, yet all will love you because of your profound knowledge." She was satisfied and departed and was followed by Miss Hammond. "Young lady," said I, "I have not the courage to hold your hand. Your future must be told by other methods. I'll try cards. What! the Queen of Hearts? This I knew before proceeding, that eventually you will decide to go into partnership, and think no more of school. Your marriage line seems to stand for a clergyman."

Mr. Humble was then ushered into my presence. He wished me to tell his fortune for 25 cents. I told him did do the work that cheaply when the person had had other information before on his life, and had some knowledge to begin with, but when I filled a vacant mind and strewed it with facts of all kinds and stocked it up so that it could do business for itself, I charged $1.00. I told him I could not refit and refurnish a mental turnout from the ground up for 25 cents. His horoscope was too green for my dim vision.

Then in rapid succession came forward a number of young lady members.

Mrs. Jennie D. O. Smith—Bergman will be editor of the domestic department of the Ladies' Home Journal.

I learned that Miss Slater was to become the wife of a dark haired New York merchant.

Miss Nischwitz was to lead a life of ease. This she needs after spending many weary hours of study in this school especially in German in which she excelled.

Miss Krusen will soon go on the stage and will become a popular actress in our large American theatres.

It was plain to see that Miss Conroy would become an advocate of woman suffrage and no matter what her husband might say, will take the stump for protection and equal rights.

Next came Miss Martin. As she entered I was consulting my star map and when I turned to her expecting to tell her fortune by the stars, she blankly refused saying that nothing but the hand method would go with her. This was the first time I had been brought up standing, and alternately looking at the palm of her right hand and into her sparkling eyes said: "Fair lady your hand tells me you will be successful at whatever you may choose to do. Many positions will be open to you but the trouble is the marriage line seems to crop out every four or five years."

Miss Miller will become one of New York's most stylish milliners. She will have one of the largest establishments on Sixth avenue and will be patronized by the four hundred.

In the future will see Miss Williams presiding over a part of our school known as the kindergarten, at which she will be very successful, because the children will always be happy while she sits and smiles down upon them. She is already getting a little practice with the Freshmen.

Miss Vermule and Miss Seal will be known the world over as great musicians.

Miss Lewis is to become the wife of a prominent doctor and will spend much of her time traveling.

For Miss Engelhart I predict an early marriage informing her that there is no way of avoiding this unless she puts it off till later in life.

I learned that Mr. Martin was to have a bright and prosperous future. At no distant day I can see him on the lecture platform. Large crowds of people are jostling each other at the box office—trying to get their money back.

Mr. Adams came next and gave me a stipulated sum of "hush money" to keep mum as to his future.

The recorder of this prophecy has placed his own case in the hands of two experts well known to you. If anyone is dissatisfied with his future as foretold by me if he will go to Miss LaBoyteaux and Miss Winckler who have had much practice in palmistry in recent years he can get better satisfaction for his money.

Now if your curiosity as regards some individuals has not been satisfied just possess your soul in patience and time will tell the rest.

CLASS SONG, COMPOSED BY EDITH WINCKLER

Although many other classes
Have been famous in this school,
And the class that stands before you
Is no exception to the rule;
We have worked and been victorious
And now have our reward,
The finest class that ever came
Before the High School Board.

The teachers have been faithful,
And have done their duties well,
And our dear Superintendent
Has taught us how to spell.
We have waded through our Latin,
Our German and our French,
And now we take our leave
Of our dear and hard old bench.

The Juniors, young and wily,
Will now have a chance,
And we certainly do hope
They will, like us, advance.
They have always been dependent
Upon the Senior old,
And now we hope, on leaving,
That they won't become too bold.

Our High School days are over,
And we're starting out anew,
Upon life's ocean billows
Success we have in view.
When we think upon our motto
And times that used to be,
We'll not forget our High School
And the Class of Naughty Three.

Retrospection.

Could I still the thoughts within me,
Could I speak with fearless tongue:
Voice the deep uncertain yearnings
Of a soul with passion wrung:

Could I tear aside the curtain,
Show the image in my heart:
Loose the fetters from my spirit,
Bound by rule, of social art;

Thou wouldst deem me wild and foolish,
Some would think me but a knave
All would judge me by my folly,
Sneer and call me passion's slave.

Better keep those thoughts unspoken,
Smother feelings ere they rise
Better have the curtain's shadows
Darken 'tween me and your eyes.

Better have the spirit fettered,
Chained unto the bow of life,
Till the soul forget its passion,
And the heart forget its strife.

JESSIE M. HOLLAND.

North Plainfield Weekly Review.

VOL. 4—NO. 14. NORTH PLAINFIELD, N. J., SATURDAY, JUNE 27, 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

Maurice A. Audsley removed his family to 146 Westervelt avenue, last Monday.

Mrs. C. P. Adams and little daughter, accompanied by her son have returned to their home in Chicago.

The one hundredth and twenty-fifth anniversary of the Battle of Monmouth will be held at Freehold today.

Rev. J. S. Zelie, of Schenectady, has accepted a call recently made him by the Crescent Avenue Church, Plainfield.

Miss Margaret McCutchen, of this borough, was graduated this week at Smith College. Miss McCutchen was the ivy orator of the class.

The Knights of the Golden Eagle, of Somerville and New Brunswick, are arranging for a grand field day to be held Riverside park on July 41.

Harry D. Voorhees, of Tacoma, Washington, the oldest son of the late Peter Voorhees, a former resident of this county, was killed in a railroad accident.

Harry S. Fellow, of Brooklyn, has rented the house recently completed by W. C. Smith, corner Fairview and Watchung avenues, and will remove his family there next Wednesday.

Early Sunday morning burglars entered C. M. Nagle's pharmacy and McVey's restaurant, and Monday noon the store of E. S. F. Randolph was visited and $6 taken from the cash drawer.

A. V. D. Honeyman will accompany a party to the Adirondacks, leaving New York City September 3 and returning the 12th. The tour will include a visit to Lake Champlain, Lake George and Saratoga.

The Plainfield Friends' Sunday School will hold their annual picnic at Boynton Beach next Tuesday. They will start from the station, corner of North and Watchung avenues, in a special trolley car at 9 a. m.

Some of the work accomplished by the pupils of St. Gabriel's Academy, this borough, was shown at the academy last Monday and Tuesday. The work attracted much attention and drew forth words of praise and commendation.

Charles E. Buell, a former resident of this borough, passed away at Atlantic City Thursday night. Mr. Buell had been ill for sometime and had been taken from his home in Camden to the seashore hoping the change would prove beneficial.

Next month Fred Armstrong, Arthur Humble, Raymond Stevens, Stryker Hoagland, Edgar George, Jr., William Emmons, Arthur Jeffrey, Clarence Roeap and Robert Hand of this borough will leave for a three weeks' outing at a place about two miles from Norwich, Mass.

The bi-centenary celebration of John Wesley, the founder of Methodism was celebrated last Sunday at Grace M. E. Church this borough. Rev. Dr. William F. Anderson, of Ossining, N. Y. preached at both morning and evening services. Special music was rendered by the choir.

More building operations are under way in the vicinity of Mine Mountain, lying between Somerset and Morris counties, than ever before. New Yorkers are locating there as fast as possible and the country already represents more capitalistic wealth than any similar section in the state. Fabulous prices have been paid for farms the like of which could be purchased for one-tenth as much a few miles away. The mechanics employed on these buildings are receiving better wages than those of any other country section in this state.

Jersey Central's New Steamer.

By way of celebrating the occasion of the new steamboat just completed for the Sandy Hook Line, "The Asbury Park," many residents of Asbury Park, newspaper men from all over New Jersey, Pennsylvania and New York City were made the guests of the officials of the New Jersey Central Railroad on its initial trip Thursday up the Hudson River as far as Tarrytown and back.

From the time the Asbury Park left the Jersey City pier until its return, it received an almost continuous ovation by whistles from all sorts and conditions of boats from the large French "Man of War" down to the busy little tugs.

In the name of the Common Council and Board of Trade of Asbury Park, Bruce S. Keater, Mayor, presented a handsome solid silver loving cup as a token of the appreciation of the honor conferred on that city by naming the boat after it.

Vice President Besler, upon receiving the gift in behalf of the New Jersey Central Railroad thanked them and hoped that the token might be but the beginning of a friendship lasting—not only so long as the good ship "Asbury Park" plowed the briny waters of Old Ocean—but through all time.

The High School Orchestra of Ocean Grove rendered a very fine instrumental program.

Luncheon was served very soon after the start was made up the river.

The "Asbury Park" was built at Cramps, and is the finest local craft on New York Bay.

Vail—Emmons Marriage.

Miss Priscilla Beatrice Emmons, daughter of Mr. and Mrs. John P. Emmons, of Prospect place, this borough, and Arthur Wilbur Vail, of Plainfield, were married Thursday afternoon at the home of the bride's parents, by Rev. Dr. D. J. Yerkes.

Honeyman Party Sailed Yesterday.

Among the Honeyman party which sailed on the Friedrich der Grosse, yesterday, were Mr. and Mrs. Homer J. Wightman, Dr. W. H. Larrabee, of this borough, and Mrs. Charles W. Tennant, Miss Charlotte E. Tennant, Miss E. May Tennant, H. M. Estil and H. Baldwin, of Plainfield. The party will leave Naples for home August 19 and are due in New York City September 1.

Welcomed Home.

About fifty people gathered at the Shotwell home, 26 Fairview avenue, this borough, Monday night to welcome back Mr. and Mrs. William H. Shotwell, Mr. and Mrs. A. L. Cadmus, of Plainfield and Mr. and Mrs. Bodine, of Dunellen, who had just returned from Los Angeles, Cal., where they had been sent as delegates to the Presbyterian General Assembly.

North Plainfield Men Appointed.

President Burgess, of the Produce Exchange, New York City, has made the following appointments from this borough: John Valient, of Myrtle avenue, chairmen of committee on railroads; D. M. Van Vliet, of Washington avenue chairman of the grain commission committee and James F. Parker, of Grove street, a member of the committee on railroad affairs.

Retail Clerks Elect Officers.

At a meeting of the Retail Clerks' Association Monday evening, the following officers were elected: President, H. G. Greenwood; first vice president, Caspar Waglow; second vice president, William Bacon; financial secretary, C. H. Greer; recording secretary, Griffith Jenkins; treasurer, W. D. Williams; guide, George Ayers; guardian, Edward Baker; chaplain, John Sutton; trustee for eighteen months, J. Streubble.

Loyal Temperance Legion Exercises.

Notwithstanding the rain many members attended the closing exercises of the Loyal Temperance Legion held last Tuesday afternoon in the W. C. T. U. rooms. Music, recitations, an address by the President of the W. C. T. U., Mrs. E. A. Parse, and an illustrated talk by Robert Love completed an interesting program.

The annual picnic will be held at Dewey Park, July 7, if the weather is favorable.

Another Borough Bride This Month.

Miss Bessye Bird, daughter of Mr. and Mrs. William T. Bird, of Duer street, this borough, and Elmer Palmer Wheeler were married at the home of the bride Tuesday evening. Rev. Chas. E. Herring, pastor of the First Presbyterian Church, Plainfield officiated.

After the newly married couple return from their wedding tour they will make their home here.

Departed Pythians Remembered

Crescent Company No. 13, Uniformed Rank, Knights of Pythias, accompanied by Perseverance Lodge, delegates from Unity Lodge, Port Chester, N. Y., Rathborn Company, Brooklyn, Black Prince Company, of Newark, Ethic Company, of Harrison, and Calanthe Lodge, Newark, visited the different cemeteries in North Plainfield, Plainfield and Scotch Plains last Sunday afternoon, and held services in memory of their departed Pythian brethren. A flag and some flowers were placed on each grave and the pledge of the order recited.

Among the distinguished knights present were Colonel Frank Shanley, of Jersey City, grand chancellor of the State order; Brigadier General Hitchcock and Adjutant Hoffman, of Newark; Colonel Edward Howe, of Kearny, and Major Pfeiffer, of Jersey City.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Sarah J. French et al to Ottilie E. Heinold, $350.

James L. Love et ux to Margaret C. Love, $1.

Wm. R. Codington et ux to James E. Codington, $1.

James E. Codington to Thos. H. Morehouse, $1.

Henry D. Marrison et ux to Emma A. Chandler, $1.

HEPPNER CATASTROPHE

Truthful and Graphic Account by Eye Witnesses of the Awful Cloud Burst.

A copy of the Heppner (Oregon) Gazette, dated June 18, four days after the washout destroyed that little city, has been received by the REVIEW, from which the following graphic and truthful account is reproduced:

"Without a second's warning, a leaping, foaming wall of water, 40 feet in height, struck Heppner at 5 o'clock Sunday afternoon, sweeping everything before it and leaving only death and destruction in its wake.

"In the middle of the afternoon dark clouds commenced to appear in the south and a short time before the flood a heavy rain fall commenced with an electrical storm.

"The rainfall was not heavy enough here to cause any alarm, and as the rain came down thick and fast, the people were pleased to see a good soaking rain which was needed to help out the crops.

"Owing to the roar of thunder and the noise caused by the heavy rainfall, the roar of the awful torrent was not heard, and a great many people knew nothing of it until their houses commenced to move. There was a wild rush for the hills amid scenes that are indescribable.

"Words cannot express the horror, the awful destruction. Entirely helpless, from the hillsides, the survivors watched the terrible waters take their course. To attempt to battle the great waves meant only sucide without being able to accomplish anything.

"The first warning that the people in the business portion had was when the large two story residence building of T. W. Ayers left its foundation and swung around into May street and crashed into and lodged on some wooden building just back of the Palace hotel.

"By this time terrors of the flood could be realized. In the channel of the creek the wall of water was at least 40 feet deep and the crest of the stream seemed to be at least ten feet higher than the overflow on the sides. Dark and muddy, lashing like a storm at sea, houses were picked up like feathers. Up the buildings would go, spinning around like tops, crashing to pieces like they were made of glue.

"It is certainly wonderful that so many people escaped. It was only a matter of luck in getting onto drift that went to shore.

"The terrible scenes as viewed from the hill tops can be compared to a horrible night mare. Clinging to drift were the unfortunate victims, up and down in the unequal battle where they were swallowed up like rats in a cage.

"Poplar trees, over two feet in diameter were snapped off like cornstalks.

"Many were the thrilling and hair breadth escapes.

"Phil Cohn, whose family was out of town, was at home and asleep when the flood struck his house; he stayed with the building until it went to pieces and for a mile he clung to wreckage, going under a half dozen times or more, and finally was able to crawl out more dead than alive in W. O. Minor's alfalfa field.

"Mr. and Mrs. Geo. Conser escaped almost miraculously. When the water struck the house, Dr. McSwords, J. L. Apers, and a Japanese servant made a rush from the building and were all lost. Mr. and Mrs. Conser stayed with the building. They ran up stairs and the lowest part of the structure was soon carried away. Standing in water up to their necks in the upper part of the building they were lodged against another building, and Mr. Conser kicked out a window and both were saved.

"W. O. Minor's family had a thrilling experience. They ran to the upper story of their home and the building danced on the waves like a stick of cordwood until all the lower part was gone. The upper story was mashed to pieces, all but the room in which Mrs. Minor and daughter were in, when the wreck finally lodged near the M. E. church. They were taken out through a window and saved.

"Dan Stalter, who lost his wife and six children, escaped with one of his children by getting into a dry goods box that rode the waves and fortunately washed to the shore.

"The water was at its height for only about an hour, and while the waters were receding, the survivors were organizing and search was immediately commenced for the missing.

"Before the rushing torrent had reached the depot, Leslie Matlock and Bruce Kelly, two expert horsemen and old range riders, appeared.

"'My God! Lexington and lone! Can we beat the flood?' were the words of Matlock waving a wire cutter in his hand.

"Not a soul thought it could be done.

"'We will try,' and before the words were out of hearing, clash went the cruel

(Continued on Last Page.)

COMMENCEMENT, 1903.

Twenty Three Were Graduated From North Plainfield High School.

The commencement exercises of the North Plainfield High School were held at the Y. M. C. A. Hall Friday evening, June 20.

Dr. Jesse Lyman Hurlbut, of Morristown, the speaker of the evening, gave some very good advice to the graduates on making the right use of time.

The salutatory by Francis Ursula Krewson and the valedictory by Edgar Whittington Adams are given in full:

SALUTATORY.

To teachers, schoolmates and friends the Class of 1903 bids a hearty welcome.

Our school life has brought to us all in common the two great opportunities of student life—comradeship with our classmates and close contact with a strong body of instructors. To each we owe the tribute of our grateful acknowledgment of cordial goodwill.

We have longed for this day, but with all the hopes and anticipations of a joyous time, it has brought a sombre tinge mingled with its joy. In vain would we cry with the poet, "O Time suspend thy flight." And what day after all would we keep and hold—not only the happy day but the lost day? The first have left a pleasant memory behind them, the others naught but a regret. But as much as there is gone of life and its possibilities, much remains.

To-night we pause and think of the past, but turn again more resolutely to the future and

"Still we hope
That in a world of larger scope
What here is faithfully begun
Will be completed, not undone."

For four years we have been searchers after truth; gaining strength and power, mentally and morally; seeking to lay hold of the great truths in history and science; forming beautiful, lasting friendships with the great minds of literature, and above all a broader sympathy toward all the world. Life has grown broader, more full of meaning and now as we go forth into the broader walks of life may we keep in mind the thought embodied in our motto "Non nobis solum"—Not for ourselves alone.

In all material affairs the law is, "Save and ye shall have." Thrift, economy, saving; capital, investment, gains; interest, discount, income; these are the vocabulary of the business world. The whole process is centripetal. Such a course is not to be condemned but it is barren and unsatisfactory if it stops with this. On the other hand the principle of increase in moral life is beneficent. In all the richer life of the heart one profits by what one parts with. Wealth is here increased as it is shared. The older is centrifugal. We find abundant illustration of this in the intellectual life. Knowledge is always surer that has been shared. Retentiveness is made stronger through use. The book we have read, or the lecture we have heard, becomes fixed by repetition. To have in a true sense is to share with others.

"The world," says Emerson, "exists as a discipline." To live then for one's self alone affords a narrower discipline than if one be devoted to the good of one's city or one's political party; or one's neighborhood; or the dissemination of culture, or the enrichment of one's home life. The aggregate life converges in each individual in proportion as each makes the aggregate life his concern; seeks to promote it; finds himself reflected in it.

To live for one's commonwealth is to make every fellow-citizen one's neighbor. Verily, he that would save his life will lose it and he that would lose his life in the larger life of his family, his community, his state or his nation will find it returning to him a hundredfold. Churches, schools, and libraries exist because of men who have found the motive of life outside of themselves; who found their own lives enriched through their service.

To live, then in this better sense, means to serve, not to be served; to give if it be but a cup of cold water; to make easier and nobler the common path.

Readiness to lose the individual life that all life may be elevated thereby, is the one condition of saving one's own. "We live in deeds, not years; in thoughts, not breaths. We should count time by heart throbs. He most lives, who thinks most, feels the noblest, and acts the best."

As members of one's family we, the Class of 1903, now stand to-night upon the threshold of school life, ready and waiting to step over into a world of new duties. May we go forth ready to lose our individual life, that all life may be thereby elevated. Thoughts of separation come to us at this hour, but it is not mine to speak of this, it is only mine to welcome you and again to say in behalf of the Class of 1903 we offer you a most joyful greeting.

VALEDICTORY.

Carlyle says, "The centuries are all lineal descendants of one another" and bound by the same laws of heredity it becomes possible, in a measure to draw from the study of past experiences and present conditions, reasonable inferences concerning the future.

Looking back over the pages of history let us mark the rise of a great people, and from its past history predict its future. Let us go back about eleven centuries to that little island then called Britain, now known as England, whose people were destined to surpass in achievement and power every nation which came before or after it.

We find Britain at this time the scene of a conflict between the natives and foreign elements for possessions. There was no army or navy to protect the homes of the natives. Society was disorganized and a centralized government was unknown, each petty king striving with his neighbor for possession. Education and learning were at their lowest ebb. Owing to this state of affairs the invaders had little difficulty in overcoming the native. Several centuries elapsed, and the conquerors settling with the conquered became the germ of a mighty nation.

At the head of this new nation we find a man who was strong enough to resist all foes, and prudent enough to lead a divided people, and who saved from destruction a race that was destined for a great mission.—Alfred, the only English ruler to be honored with the title of "The Great," and who was the real founder of England and its nationality. Under his guidance a new government was organized and society set on a firmer basis. A great revival of learning took place, and Christianity took a lasting hold on the Anglo-Saxons. The influence of this great warrior, statesman, educator and scholar is felt even at the present day. His memory is still cherished by every Anglo-Saxon as was shown by the recent celebration of the thousandth anniversary of his death in 1901.

The next step in the development of the Anglo-Saxon was the Norman Conquest. Although of the same mother-stock as the Saxon, their association with the French had given the Norman a polish and refinement of manner, and several military accomplishments which were lacking in their Saxon brother. These qualities united with the Saxon's simplicity and strength of character, and his might of brawn and brain, have produced the man who has solved the greatest problems of political, social and religious freedom.

This nation which was formed on the isle of Britain, and which was born in an atmosphere of war and strife, now stands prominent among the mighty nations of the world.

The highest expression of the intellectual life of a people is found in their literature, and can anyone question the excellence of English and American literature? Not only is the literature of the Anglo-Saxons remarkable for its quality, but also for its quantity. During the whole of its existence the English-speaking people have thought and written. England has produced more great men of literary ability than any other nation. Speaking of the brightest lights of English literature Emerson says: "I find the great masters out of all rivalry, and reach." During the reign of Elizabeth no less than 233 English writers appeared, nearly all of whom possessed some unusual merit. For three hundred years following that age of unrivaled splendor a wonderful succession of poets, essayists, historians, novelists, philosophers, orators and scientists—thinkers of every description have enriched the language with a wealth that has made all latter generations their debtors. We do not forget the valuable contributions to letters, philosophy and science made by the Continental nations, but to the Anglo Saxons must be credited the greatest poet, the greatest cluster of poets, the greatest modern philosopher and the great scientists.

Another high expression of the intellectuality of a people is found in their statesmanship, crystallized in their laws and institutions. "The institutions of a people," says a noted writer, "are its solution of the problem of life." Surely their is no greater problem and the solution of the greatest problem implies the best powers of the mind. The growth of the English constitution is a living monument to the practical statesmanship of the Anglo-Saxon. The American constitution is doubtless the highest example of constructive statesmanship in the world. Gladstone pronounces it the most wonderful work ever struck off at a given time by the brain and purpose of man."

Another expression of the intellectual life of a people is inventive genius,

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

Some weeks ago Harry Bennett, of 35 East Fourteenth street, Bayonne, purchased a white Arabian horse from Barnum & Bailey's circus. The animal had outlived its usefulness for show purposes. Bennett is a peddler, and when he hitched the horse, which was named "Snowball," to his wagon the animal hung its head. It became sick and died yesterday. Bennett declared its death was due to shame and a broken heart.

A plumber's laborer, while working under the direction of John Smith, a contractor, in the rear of a house in McGonagle's row in Ridgway street, Gloucester City, struck something that gave forth a metallic ring. As he kept on digging his shovel gradually unearthed an old iron pot and the man's eyes bulged as he caught sight of glittering gold pieces. Excited and feverish, the laborer kept on digging till he had the pot out of the hole, but all the gold he found amounted to only $20. The pot had evidently been in the ground many years.

There was one continuous religious service in Camden Sunday night that extended at least a mile and a half. On every corner from Broadway and Ferry avenue to Broadway and Federal, down Federal to Third and from Third and Market to Seventh and Market streets, the services were simultaneously held under the direction of the various young people's societies of the evangelical churches. Several thousand persons participated in the prayers, singing and addresses.

Morristown, in addition to possessing sixty-two live millionaires, is growing decidedly Bostonesque, and 'tis said that a man must even possess a college degree before he is allowed to sweep the streets. At any rate the boot black at the railrod station has displayed some enterprise in knowledge of orthoepy. He has a sign over his "chair" which reads Notice -- "Pedal ligaments artistically lubricated and illuminated for the infinitesimal remuneration of ten cent per operation."

Charles Ferriss, sixteen years old, of Brookdale, N. J., fell thirty-five feet from the top of a cherry tree Monday and in his descent it, it is said by persons who saw him, he turned three complete somersaults, landing on his feet in a ploughed field, uninjured. A singular fact is that in his fall Ferriss held on to his pail of cherries and never spilled a single one. It was the lad's thirteenth fall and he declares it was the luckiest one of them all. On one occasion he broke his arm and the next time he fractured his leg. Then came several contusions, sprained wrists and ankles and injured hips, thighs and and ankles and breast. Ferriss was unconcerned after his latest fall.

Henry W. Verrington, of Oceanic, is the inventor of a device to be applied to gas burners, whereby, it is claimed, accidental asphyxiation will be rendered impossible. He utilizes the heat of the flame acting upon a metal rod to control the valve through which the gas flows. The rod has its ends rigidly fixed to prevent elongation. As the heat expands the metal, the rod is forced to bend, since it cannot expand in length. Attached to the centre of the bar is a rod connected with an auxiliary valve in the supply pipe. As there is no means of starting the gas flow except through the movement of this valve, it is necessary to store a small quantity of the gas in a chamber, which becomes available to heat the bar as soon as the main key is turned. By the time this supply is exhausted the bar has expanded, and permitted the spring-controlled auxiliary valve to open.

WATCHUNG.

Arrival and departure of mails at Watchung

Leave Plainfield	9 a. m.	3:35 p. m.
Arrive Watchung	9:30 a. m.	6:00 p. m.
Leave Watchung	12:50 p. m.	6:10 p. m.
Arrive Plainfield	1:00 p. m.	6:40 p. m.

*This mail makes connection for all outgoing mail from Plainfield the same evening.

Rev. E. A. Earp, pastor of the M. E. Church, North Plainfield, will review the Sunday School lesson tomorrow afternoon at 3 o'clock at the Wilson Memorial Chapel. The Watchung quartette will sing, and there will be other special music.

Miss M. Hildebrandt and Mrs. R. Heuer, of Spitga, Germany, have been visiting Mrs. J. H. Koch, for a week.

Mrs. Chas. Moldenke has returned from New Rochelle, N. Y., where she has been visiting her mother.

Mrs. Richard Moldenke was in Philadelphia this week to see her little daughter who is ill.

Miss Cora Meyer, of Bayonne, will spend the summer with the family of George A. Schmidt.

The regular school meeting was held last night.

CROPS IN BACKWARD STATE

The Latest Weekly Report Issued by the Weather Bureau.

WINTER WHEAT YIELD IS SHORT

The Harvests in the Centre of the Belt Are Disappointing—Hay Crop in the East Light—Reports From New England, New York, New Jersey and Pennsylvania—Spring Wheat Needs Rain.

Washington, D. C.—The latest weekly crop report, prepared by the Weather Bureau follows:

While still too cool in the districts east of the Rocky Mountains the temperature conditions of the week were somewhat more favorable in the central valleys and Southern States, but over portions of the lake region and middle Atlantic States and in New England it was colder than in the preceding week. Heavy rains in the two last-named districts interrupted farm work. Rain is now needed in the Dakotas, northern Minnesota, and in portions of the central and east Gulf districts.

A general improvement in the condition of corn in the central valleys is indicated especially over the western portions. In the lake region, New England and middle Atlantic States little or no improvement in this crop is noted. In all northern and central districts corn continues very late, but it is in good state of cultivation, except in the middle Atlantic States.

Winter wheat harvest has made favorable progress and is now general in the central portions of the winter wheat belt, while disappointing yields, especially in the southern portions of Missouri, Illinois and Indiana. In the middle Atlantic States a general improvement is indicated.

Spring wheat is suffering for rain in North Dakota and portions of South Dakota, and is affected by rust quite generally in Nebraska. In the two last-named States, however, the crop, as a rule, is doing well, and in Minnesota, Wisconsin and Iowa continues in promising condition.

The outlook for oats is less promising in the Dakotas, Nebraska, northern Minnesota, Missouri and southern Illinois. In Wisconsin, Kansas, uplands in Iowa, and in northern Illinois a good crop is promised. An improvement is reported from Michigan, the Ohio Valley and middle Atlantic States.

Recent rains have caused a marked improvement in grass in New England and the middle Atlantic States, but the crop will be light in these districts, and also in the upper Ohio Valley. A good crop is being secured in the central valleys.

In Missouri, Arkansas, Illinois, Indiana and Pennsylvania apples are unpromising, but the outlook continues favorable in Iowa, Wisconsin, Michigan and Kentucky.

The following statements have been telegraphed by State section directors of the Climate and Crop Service of the Weather Bureau:

New England—Cloudy, rainy weather; grass, grain and pastures benefited; potatoes uneven, but improving; apples uneven, growing well; corn poor, much replanted, some fields plowed up for forage crops; strawberries rotting; other small fruits improving; tobacco making slow growth, but improving; all crops need sunshine.

New York—Week cloudy, rainy and cold; ground too wet for work; marked improvement in wheat, rye, oats, barley, meadows, pastures, hops and tobacco; much too cold for corn and potatoes, which are uneven and backward and to be largely replanted; acreage of buckwheat will be large; apples vary, being estimated from light to heavy; other fruit light generally; grapes good.

New Jersey—Cool, cloudy weather, frequent rains, heavy in places, stimulated vegetation generally, but retarded farm work, which is at a standstill in places; wheat nearly ready to cut, heads large and well filled; corn yellow, needs sunshine; bush fruits very promising.

Pennsylvania—Continuous rains and low temperature; ground too wet for cultivation; wheat, rye, oats, grass, tobacco, potatoes and garden truck much improved; yield of hay will be light, but better than anticipated, cutting begun; clover very short; timothy improving; warmth and sunshine needed, particularly for corn; berries fairly plentiful, but other fruits generally short.

POPE CARRIED TO CONSISTORY.

Names New Cardinals and is Very Tired at the End of the Ceremony.

Rome.—A consistory was held a few days ago. The Pope was carried to Consistory Hall. He announced the new dignities that had been conferred and delivered an allocution.

The following were created Cardinals: Mgr. Nocella, secretary of the Consistorial Congregation; Mgr. Cavicchioni, secretary of the Congregation of the Council; Mgr. Fischer, the Archbishop of Cologne; Mgr. Taliani, the Papal Nuncio at Vienna; Mgr. Katschthaler, the Archbishop of Salzburg; Mgr. Aiuti, the Nuncio at Lisbon, and the Most Rev. Espinosa, the Archbishop of Valencia.

The Pope stood the fatigue better than had been expected.

The Pontiff read a brief allocution in Latin in a weak voice. He stopped frequently and looked very tired at the end. He said to Dr. Lapponi after it was over:

"Well, I held the Consistory, though the newspapers say I am dying."

PEOPLE TO VOTE FOR SENATOR.

Primary Election Ordered by the Mississippi State Board.

Jackson, Miss.—The State Board of Election Commissioners has ordered a State primary election to be held on August 6. This action means that the next United Senator from Mississippi will be chosen by popular ballot.

Senator Money, the present incumbent, and Governor Longino are candidates and are prosecuting an active canvass of the State.

KING PETER I. IN SERVIA

Diplomats Ignore Him, But People's Reception is Enthusiastic.

It is Said, Though, That Officers Goaded Them to Shout "Long Live the King"—Gayety in Belgrade.

Belgrade, Servia.—King Peter, on his arrival here, was received with great enthusiasm. The King, who wore the uniform of a Servian general and looked grave and almost nervous, descended from his car amid a fanfare of trumpets. He shook hands with Premier Avakumovitch, who ended a powerful speech of welcome with calling for cheers for King Peter, to which the crowd responded with enthusiasm. The King read his answer to the Premier's welcome in low tones, thanking him and promising to do his utmost for the good of the kingdom.

Replying to an address of welcome delivered by M. Paulovitch, a member of the Communal Council, King Peter said he would see to it that Belgrade became a worthy centre of Servian life.

The only foreign representative who participated in the reception were the Russian Minister, M. Tcharykoff, and the Austrian Minister, Herr Dumba.

After the mass the Metropolitan made a short address. He said God's guidance was evident in everything, and prayed God to grant King Peter the power to rule wisely and well. A special prayer for the King was offered, and the choir chanted the old Gregorian "Kyrie Eleison" ("Lord Have Mercy.")

The King approached the Metropolitan and kissed his hand as a tribute of the temporal to the spiritual power, and the congregation burst into hearty cries of "Long live the King!"

It was evident the new monarch was affected deeply by the ceremony, and his manner as he left the church conveyed the impression that he had come to some momentous resolution during his self-communing before the altar. The King's procession moved at a brisk trot to the new palace. The King entered the state ballroom, where the members of the Skupshtina presented him with an address of welcome. In reply King Peter remarked that he could only repeat what he had said at the railroad station that he would do his best to rule in accordance with the constitution.

King Peter advanced to the Deputies and shook hands with each of them, but he did not utter a word.

After luncheon the King held a conference with the Ministers and discussed the situation. He dined quietly and witnessed the torchlight procession in the evening.

There are no lack of persons conversant with the inner life of the Servian capital who say the apparently universal enthusiasm was a cleverly "stage managed" demonstration, and that many expressions of regret were uttered privately, and that except for the mounted officers who circulated among the crowds, commanding the people to cheer for King Peter, much of the outward signs of rejoicing would have been absent.

FORCED RELEASE OF CORWELL.

Five Thousand Delawareans Demanded Alleged Lyncher's Discharge.

Wilmington, Del.—An angry mob of 5000 persons, threatening to storm the city jail here, forced the authorities to release Arthur Corwell, who was under arrest charged with the leadership of the crowd which burned at the stake George White, the negro, who brutally assaulted and killed Helen Bishop on June 15.

The verdict of the Coroner's Jury, which found that White died at the hands of persons unknown, made possible this release, and just as soon as it was known that this verdict held no person responsible for White's death Attorney-General H. H. Ward caught at the straw and ordered Corwell's release on $5000 bail. It was immediately forthcoming, and Corwell was freed just as the mob began getting desperate.

This speedy action undoubtedly averted bloodshed, for the mob was growing more threatening each minute. As it was, there was great disorder and the Police Department had all it could do to preserve order. Crowds of men and boys numbering from fifty to 200 each marched here and there singing and cheering, celebrating the release of Corwell and the popular verdict of the Coroner's Jury.

The belief is growing here that no one will ever be punished for the lynching of White. Certain prominent citizens, although they deplore the occurrence, stand ready to raise a fund for the defense of any one who should be prosecuted for the offense.

Officials and leading citizens seem to be agreed that the best thing to be done in view of the volcanic condition of the public mind is to let the matter drop.

CHILDREN RIDE WITH DUMONT.

Young American First to Go Up From the Paris Play Ground.

Paris, France.—Santos Dumont made another ascent in his steerable airship and visited a polo club during a children's fete. He offered to give the children a ride in his balloon, but the mothers refused their permission. A ten-year-old American boy, however, begged so hard that his mother consented to allow him to ascend in the balloon, and Santos Dumont took the boy for an aerial trip above the trees in the Bois de Boulogne.

On their return several other children, encouraged by the young American's example, also claimed the privilege of a ride, and, with their mother's consent, Santos Dumont took two others in the balloon car and made another ascent, returning safely to the polo grounds.

FLEES FROM KENTUCKY FEUDISTS

Leading Witness For the Prosecution Warned of Assassination.

Lexington, Ky.—Captain B. J. Ewen, the leading witness in the trial of Jett and White for the murder of J. B. Marcum, at Jackson, left here for a secret destination.

This action was taken on the advice of friends after Captain Ewen had been informed by a man who came from Jackson of the existence of a plot to assassinate him.

MUST SPARE NO GUILTY MAN

President Orders the Vigorous Prosecution of Postal Offenders.

AN EX-CONGRESSMAN INDICTED

Edmund H. Driggs, of Brooklyn, Pleads Not Guilty to Two of Four True Bills—Attorney-General Announces the Appointment of Special Counsel to Assist in the Prosecution—Letter to Knox.

Washington, D. C.—President Roosevelt has sent the following letter to Attorney-General Knox:

"P. C. Knox, Attorney-General.

"Sir—As you know the charges in connection with the Postoffice Department are now being investigated by Fourth Assistant Postmaster-General Bristow, who has had placed at his disposal by the Postmaster-General every resource of the department, including the services of Mr. Robb, whom you detailed from the Department of Justice to the Postoffice Department immediately after the removal of Mr. Tyner. As a result of this investigation a number of indictments have already been had, and it is probable that other indictments will hereafter be asked for.

"There can be no greater offense against the Government than a breach of trust on the part of a public official or the dishonest management of his office, and, of course, every effort must be exerted to bring such offenders to punishment by the utmost rigor of the law.

"The District Attorney's office of the District of Columbia has faithfully and zealously seconded the efforts of the Postoffice Department in this matter, but the amount of work in the office is such as to make it difficult, without neglecting other important public duties, to devote all the time necessary to the prosecution of these cases. I suggest, therefore, that if you cannot detail some of your present staff, you appoint special assistants in these postoffice cases, not only to take up the cases in which indictments have been found, or hereafter may be found, but to examine into all charges that have been made against officials in the postal service, with a view to the removal and prosecution of all guilty men in the service, and the prosecution of guilty men, whether in the service or not, where the cases are not barred by the statute of limitations. Sincerely yours,

"THEODORE ROOSEVELT."

It was in consequence of these instructions that Attorney-General Knox designated Charles J. Bonaparte and Holmes Conrad as special counsel to assist in the postal prosecutions.

Brooklyn, N. Y.—To the surprise of Edmund H. Driggs, former Representative in Congress, and his personal and political friends, the Federal Grand Jury here returned four indictments against him in connection with his dealings with the Brandt-Dent Automatic Cashier Company when he was in Congress.

As soon as Mr. Driggs was informed the indictments had been found and a warrant issued for his arrest he surrendered, pleaded not guilty before Judge Thomas in the United States District Court and was admitted to $5000 bail.

IOWA DEMOCRATIC TICKET.

Reaffirmation of Silver Plank of Platform of 1900 Defeated.

Des Moines, Iowa.—The struggle for control of the Democratic State Convention ended in a victory for the anti-silver wing. The issue was the reaffirmation of the Kansas City platform. The Committee on Resolutions voted down the proposition seven to four, and the convention when its turn came stood by the committee voting 463 9-10 to 354 1-10 against adopting a minority report which recommended indorsement of the National platform of 1900.

The convention nominated a full State ticket as follows: Governor, J. B. Sullivan, Creston; Lieutenant-Governor, D. B. Butler, Iowa City; Judge of Supreme Court, John R. Caldwell, Tama; Superintendent of Public Instruction, R. McCook, Howard; Railroad Commissioner, W. S. Porter, Harding.

The fate of the silver forces was sealed at the district caucuses held in the forenoon, when the Committee on Resolutions was made up. Seven out of eleven districts chose gold men for the committee, the division standing:

Against reaffirmation: First, Second, Third, Fourth, Fifth, Ninth and Eleventh.

For reaffirmation: Sixth, Seventh, Eighth and Tenth.

The platform adopted demands tariff revision and the regulation of trusts and self-government for the peoples of the Philippine Islands and Porto Rico, calls for a thorough investigation of the Postoffice Department and a sufficient volume of money to meet all the requirements of the business of the country.

RAILROAD RAZING 400 BUILDINGS.

Work Started on the Site For a New York City Terminal.

New York City.—Pennsylvania Railroad men began to demolish buildings on $7,500,000 worth of property. The work will not stop until nearly four entire city blocks have been cleared. The wreckers will tear down 400 buildings, including three churches, a hospital and a home for boys.

The blocks to be razed are bounded by Seventh and Ninth avenues, Thirtieth and Thirty-third streets. They are the site of the projected railroad terminal station and the new uptown postoffice.

Find Bomb in State House Grounds.

Laborers raking over the State house yard at Montpelier, Vt., found a dynamite bomb. It had been lying in the grass apparently for a long time, as it showed marks of exposure to the weather.

No Welcome to King Edward.

At a private meeting of the Nationalist members of the Dublin corporation it was decided by 25 votes to 3 not to vote an address of welcome and loyalty to King Edward on the occasion of his coming visit to Ireland.

DOUGAL FOUND GUILTY

Sentenced to Death For the Moat House Murder.

The Body of Wealthy Miss Holland Was Discovered in a Ditch on Her Own Property.

London.—The Moat House murder trial, which has created more sensation than any in recent years in England, ended with the passing of the death sentence at the Chelmsford Assizes on Samuel Herbert Dougal for the murder of Miss Camille Cecile Holland, a woman with whom he lived at the Moat House, near Saffron-Walden, Essex. The prisoner maintained an immovable stoicism almost to the last stage of the proceedings, listening apparently unmoved to the accumulation of circumstantial evidence which was brought against him.

The evidence presented was simply a repetition of the testimony at the inquest, after the finding of the body of Miss Holland in a ditch near the moat four years after her mysterious disappearance.

To the surprise of everyone, counsel for the defense announced that he would not call any witnesses, not even Dougal, who had previously asserted that he intended to testify in his own behalf.

His counsel, in his address, dwelt upon the alleged inconclusiveness of the evidence, but the jury, after an absence of fifty-five minutes, brought in a verdict of guilty, and the judge, assuming the black cap, sentenced the prisoner to death by hanging without commenting on the verdict.

Dougal, who was pale, remained silent when asked if he had anything to say.

Miss Holland was the aged and wealthy owner of Moat House, Saffron-Walden, Essex. About four years ago Dougal, who was supposed to be her husband, appeared upon the scene accompanied by a woman whom he introduced as his sister, but who afterward proved to be his wife. Shortly afterward Miss Holland disappeared. Dougal was subsequently arrested for cashing a check purporting to have been signed by Miss Holland. This created suspicion, and a search was made for Miss Holland's body. It was found last April in a ditch on the grounds. A bullet wound in the head showed the cause of death.

DUMONT SAILS OVER PARIS.

Goes to Breakfast in Airship No. 9 and Returns to Longchamp.

Paris, France.—Santos-Dumont made his first appearance in airship "No. 9" over the centre of Paris. He maneuvred over the Arc de Triomphe and descended at his house in the Champs Elysee. The aeronaut started at 4.30 a. m. from Longchamp, going in the direction of the Place de l'Etoile, followed by many cyclists. He executed skilful maneuvres over the Place de l'Etoile, made a tour of the Arc de Triomphe, and, turning down the Champs Elysee, brought his airship down at the door of his house, No. 114, where he breakfasted.

In the meanwhile bystanders and mechanics held down the airship, which was surrounded by a curious crowd for half an hour. Santos-Dumont reappeared, smoking a cigarette. In order to avoid the trees the airship was towed to the centre of the Champs Elysee, where it rose and returned to Longchamp. There was little wind. The ship maintained an altitude of about 100 feet and answered its helm perfectly.

"No. 9" is the smallest airship Santos-Dumont has constructed. It measures about 8300 cubic feet, has a three-horse power engine and resembles an elongated egg.

SERVIAN CONSPIRATORS PROMOTED

King Peter Rewards Those Who Placed Him on the Throne.

Belgrade, Servia.—The promotions are announced of various members of the military deputation to King Peter at Geneva.

Colonel Popovics, of the late King Alexander's palace guard, is created a general and first aide-de-camp to King Peter; Captain Kostics, who opened the palace gates for the assassins, is promoted to be a major, and Lieutenant Gronica, on guard outside the palace on the night of the assassinations and a confidant of the conspirators, is made a captain.

DIAZ NOMINATED AGAIN.

President of Mexico Accepts Honor For Another Term.

Mexico City, Mexico.—The National Liberal Convention placed in the hands of General Diaz the nomination for the Presidency for the coming term.

The spokesman, Gabriel Mancer, made the presentation and dwelt on the hopes placed by the country on General Diaz. The President, in reply, said it is the duty of every citizen to serve his country for as long and in as many posts as his fellow citizens may desire.

HOUSE FLOATED TO HIM.

Missouri Farmer Finds a New Dwelling After a Flood.

Columbia, Mo.—The Missouri River flood has given P. C. Nuckles, of Rocheport, a new house, completely furnished. The high water drove Mr. Nuckles away from his farm, and when he returned to it he found on his land a comparatively new house, which was in good condition, despite its watery journey. There is nothing about it to indicate who the owner is.

Editors as Policemen.

In retaliation for criticism Mayor Sidney A. Vaughn, of Logansport, Ind., has appointed four editors of the local papers special policemen. Their duties are to guard the baseball park, which is out of the city limits and where Sunday baseball is played.

Wholesale Business Quiet.

Wholesale business generally is still seasonably quiet, but already an improvement in tone is noticeable as the result of the rather better outlook agriculturally.

BURNED AT THE STAKE

A Negro Lynched in Delaware For Murdering a Girl.

CONFESSED CRIME TO THE MOB

George White, the Victim, Had Assaulted Helen Bishop, Who Died—Two-Hour Fight to Get Murderer—Four Thousand Stormed the Prison Near Newcastle—Guards Shot Four Citizens.

Wilmington, Del.—Dragged shrieking from the workhouse near Newcastle at a late hour by 4000 furious men and youths, after a hot fusillade between mob and guards, George White, the negro who killed Helen Bishop, the pretty and modest seventeen-year-old daughter of the Rev. E. A. Bishop, was rushed to the place of his crime, where, having confessed his crime, he was lashed to a stake and burned to death, the body being riddled with bullets. The lynching, begun at 9.30 p. m. by an attack on the building, in which fifty horsemen wearing women's gowns over their own clothing played a conspicuous part, was not carried to its tragic end until nearly midnight.

It was 9.30 o'clock when Chief of Police Black, of this city, received a telephone message from Chief Warden Meserve that a mob was gathering about the workhouse, and asking that help be hurried from Wilmington.

Chief Black called in thirty men from their districts and sent them to the workhouse in a special trolley car. They found fully 2000 men congregated about the place. Many were armed, but they offered no violence.

To disperse such a body was out of the question, and the officers co-operated with the guards on duty about the grounds and awaited developments.

As on Sunday morning there were two distinct bodies of men.

The first, who came from the section surrounding the home of Miss Bishop, congregated at Price's corner, near the scene of the crime. Most of these were armed and several carried coils of rope. They were not masked, and on arriving at the place walked quietly about and made no demonstration.

The other mob congregated about the workhouse. Many of these were from Marshalltown and this city. In the main they were young men and boys, and nearly all were armed.

The first move made by the mob was about 10 o'clock, when the telephone wires between the workhouse and this city were cut.

It was shortly after that hour when about fifty horsemen, dressed in women's attire and wearing masks, rode up to within a stone's throw of the workhouse. This appeared to be a signal, and the mob made a rush for the building.

The men had nearly reached the porch when some one in the second story fired into the crowd. Chief of Police Black and several of the guards rushed out and tried to quiet the men, but they paid no heed to him. Rushing into the porch they crashed in a door and gained the first corridor, while others swarmed over an unfinished part of the building.

A second section of the mob waited until the first rush was over, and then ran to the front of the workhouse. They dragged a battering ram after them and crashed in the heavy doors leading to the rotunda.

The mob, seeing that the electric lights surrounding the workhouse were interfering with their work, shot out the lights with shotguns, leaving the grounds in total darkness. They then made another rush on the workhouse, and there was a lively fusillade between them and the guards.

Peter Smith, seventeen years old, was shot through the breast. Three other men were slightly wounded.

Five steel doors led from the main corridor to the cell in which White was locked, and these the mob battered down with railroad ties. Some of the mob crowded the handful of guards into a corner. Those who remained outside surged about the grounds, scattering the police aside like chaff.

When the main corridor had been gained a man who was said to be a Virginian, called for six men to "stick closer to him than a brother." This was hailed with cheers, and more than 100 men followed him down the corridor.

The leaders quickly smashed in the cell door, and White, begging in vain for mercy, was dragged out, pushed and hauled through the corridor and finally taken out of the building.

As the lynchers appeared with their prisoner the crowd outside howled with delight. A procession was formed, and, headed by the fifty mounted men, marched White to Price's Corners, near the scene of his assault upon Miss Bishop.

A stake was driven into the ground and the negro was bound to it with chains. Kerosene was poured over him and the match applied. As the flames started up White confessed his guilt.

The mob that lynched White was incited to do the deed by the sermon of a local minister. At a large open air meeting the Rev. Robert A. Elwood, pastor of the Olivet Presbyterian Church, displayed a cluster of leaves stained with the blood of Helen Bishop, and in a sermon entitled "Should the Murderer of Miss Bishop Be Lynched?" roundly denounced the judges for refusing to hold a special session of court for the trial of White.

The failure of the county court to give White a speedy trial is in a great measure responsible for the night's tragedy. The citizens of Wilmington wanted a speedy trial. The court, however, did not consider haste expedient.

Oregon Flood Victims Reach 167.

At Heppner, Ore., eight more bodies of flood victims were received at the morgue, making a total of 167 received. Several were found below Douglas, a distance of about thirty miles. Money and supplies are being sent in from all over the State and from neighboring States.

Robbers Loot Kansas Bank.

The State Bank, of Oakley, Kan., was robbed. The safe was blown open, and is a complete wreck. The robbers got between $4000 and $5000.

POST OFFICE SCANDALS

The Grand Jury at Washington Returns Five Indictments.

Mrs. Lorenz Arraigned With Machen and Groffs—Her Husband Also Charged With Bribery.

Washington, D. C.—All hope of one ring of postal grafters, headed by Machen, escaping the penitentiary, appears to have been lost when a second indictment was returned against them by the Federal Grand Jury, charging conspiracy to defraud the Government. It is understood that this indictment will take precedence of the first one found charging bribe taking, and it is generally admitted, even by Machen's friends, that conviction in the preferred instance will be more easily accomplished.

The first woman to be dragged into the postal scandals, except for the rifling of the Government safe by Mrs. Tyner and Mrs. Barrett, which act has gone unpunished thus far, was named in the omnibus indictment returned against Machen and his co-conspirators. She is Mrs. Lorenz, the wife of George E. Lorenz, of Toledo, Ohio, where Machen formerly was postmaster. The others are Lorenz himself and the Groffs, formerly indicted on another postal offense in Baltimore. The penalty in case of conviction on the charge of conspiracy would be a fine of $10,000 each or two years' imprisonment, or both. If found guilty, it is difficult to see what mitigating circumstances could be shown to save this alleged band of conspirators from prison.

Mrs. Lorenz, it is understood, is accused of having acted as an intermediary in handling the checks that passed between Machen and Lorenz in connection with the alleged "graft" in the contracts for the patent letter-box fasteners.

Since the beginning of the Postoffice scandal investigation these persons have been caught in the net:

Under Arrest and Indictment—August W. Machen, Superintendent of the Free Delivery Division, arrested and indicted on charge of bribery.

Thomas W. McGregor, clerk in the Free Delivery Division, arrested and indicted on charge of bribery.

C. Ellsworth Upton, clerk in the Free Delivery Division, arrested and indicted on charge of bribery.

Daniel A. Miller, Assistant Attorney for the Postoffice Department, arrested on charge of bribery.

Joseph M. Johns, Indiana lawyer, arrested on charge of conspiracy with Daniel A. Miller in bribery.

Diller B. Groff, Washington business man, arrested and indicted on charge of conspiracy with A. W. Machen in bribery.

Samuel A. Groff, Washington policeman, arrested and indicted on charge of conspiracy with A. W. Machen in bribery.

George E. Lorenz, former postmaster at Toledo, Ohio, [illegible] charge of conspiracy with A. W. Machen to defraud the Government.

Mrs. George E. Lorenz, of Toledo, Ohio, indicted on charge of conspiracy with A. W. Machen to defraud the Government.

Removed—James N. Tyner, Assistant District Attorney-General for the Postoffice Department.

James T. Metcalf, Superintendent of the Money Order Division.

Suspended—George A. C. Christiancy, Assistant Attorney for the Postoffice Department, pending investigation.

Resigned—George W. Beavers, Superintendent of the Division of Salaries and Allowances.

LOSES $12,000,000 IN TAXES.

Enormous Amount of New York City Property Exempt.

New York City.—President James L. Wells, of the Tax Board, announced that the amount of property in New York City on which no taxes will be paid this year is $798,524,339.

This is equivalent to a tax levy of about $12,000,000. Properties exempt by special legislation are those owned by the city, the Federal Government, church and charitable institutions and those exempt by special decree.

"If the city could collect taxes from itself and could force Uncle Sam to pay, as well as the churches and charitable institutions," said President Wells, "the tax rate would be brought down almost to nothing. Unfortunately in this respect New York is a very rich city."

RUNAWAY GIRL FOUND IN OVERALLS

Father Discovers Her in Male Attire Working as a Farmhand.

Carthage, Mo.—Miss Maude Gage, a pretty blonde school teacher, twenty-two years of age, disappeared from her home, ten miles northwest of here, the other day. Her father, a few days ago, found her at work as a farm hand on the farm of Ernest Peugnet. She was pitching hay in the hay in the field and was wearing blue overalls, jumper and a hickory hat. She had cut off her flowing hair, which reached to her waist.

She accompanied her father home and explained that she had run away because her father had opened a letter which she thought was from a lover who had incurred her father's disfavor. The letter, however, was one from a magazine in regard to some verses contributed by her.

Rich Gold Reef Discovered.

It is announced from Tomsk, West Siberia, that a rich gold reef has been discovered in the forests bordering the River Barikule. The trial workings yielded from six to fourteen pounds of pure gold for every forty pounds of material extracted.

Lough Foyle Treasure Trove.

In the suit involving the ownership of the ancient gold ornaments recently discovered in Lough Foyle the court, at Dublin, Ireland, decided that the relics are treasure trove and as such belong to the Crown.

6,000 Moors Slain.

A Tangier, Morocco, dispatch states that in a battle at Ainnieddinna the troops under the Moorish Minister of War lost 6000 men. The Minister of War represents the Sultan in the war against the Pretender.

GRIM OLD HEVER CASTLE, BOUGHT BY W. W. ASTOR, WAS ONCE THE HOME OF A MOST UNHAPPY ENGLISH QUEEN.

AMERICAN capital is stirring not only the present but also the ancient nobility of England. Rich men from the western shore of the Atlantic are purchasing estates that were once the domains of royalty, and causing the country-side to rake up many a tradition of their early glory. Within the last fortnight the descendant of a wealthy New York family bought what is reputed to be the birthplace of a queen, and about which, even as the ivy of its moated walls, clings the story of the hapless Anne Boleyn.

And so when William Waldorf Astor purchased Hever Castle, near Seven Oaks, Kent, for £37,000, some days ago, the good country folk started to tell again the romance of the woman because of whom it is chiefly famous. Though three places claim to be her birthplace, the people of Kent contend that Anne Boleyn was born at Hever in 1507, the favorite abode of her father, Sir Thomas Boleyn. Here, they say, she spent not only the first seven years of a happy childhood, but also a later period of exile from the court of Henry VIII., because she had dared love a younger and handsomer man than her monarch. Here, too, Queen Elizabeth is said to have visited years afterward to behold the home of her mother and do honor to her memory.

Despite the conflict of various traditions as to the place of her birth, it is known that the future wife of Henry VIII. lived at Hever Castle before she was sent to France to the court of Louis XII., when she was a seven-year-old girl. It was a venerable and imposing structure, which was built in the reign of Edward III. by a Norman baron, William de Hever, and embattled as to-day with moat, portcullis, drawbridge and round towers, after the fashion of a feudal fortress. The banquet hall, which in recent years has been used as a kitchen, was huge, for it had been built for baronial festivities, before the father and mother of Anne made it their home, with a less free purse for such extravagances. The windows of the long winding galleries bore the shields of many generations.

When Anne Boleyn came back to Hever in exile some years later, the joy of her early life had forever departed. She was already within the power of the fickle-hearted English sovereign, and was destined never to escape from him until at last she went to the scaffold in the Tower of London, at the age of twenty-nine. After spending eight years in France, she had exchanged the gay life of the French capital for the court of Henry, where her beauty, as one of the Queen's maids of honor, soon surrounded, her with a group of admirers. The King smiled at her, but she did not realize then what his smiles meant. Before long she had fallen in love with the gallant and dashing Sir Henry Percy, a Hotspur, son of the Earl of Northumberland.

Suddenly, the girl was banished from court and sent to the secluded walls of Hever. The King told her father that she could not marry Sir Percy, as he had chosen another husband for her. Even the Earl of Northumberland was summoned to court, and told he must terminate his son's courtship of Anne Boleyn. At the King's behest, the father soundly trounced his son, so far as words could secure such a chastisement, and to clinch things the young man was compelled to marry another.

The old gossips of Kent still tell stories of the exile of the beautiful Anne Boleyn, and how she was wont to wander up and down the windy gallery of Hever Castle moaning for her lover.

There was little at Hever to overcome the young girl's distraction. The dark moats with their stagnant waters, the foreboding shadows which lurked around the round towers, all tended to increase her melancholy.

The father is said to have misunderstood the motive of the King in sending his daughter home from court, until one night, when, according to a popular legend, the seneschal of the house announced that the King was without the moat. Hastily sending his daughter to her room, with the command to "get to bed in a trice," Sir Thomas ordered the drawbridge lowered and the portcullis raised. To the wonderment of its owner, the castle did not resound with the bugles of a cavalcade. The King had come almost alone. The royal visitor indeed seemed ill at ease, and after due refreshments he made some transparently feeble pretext for seeing the daughter Anne.

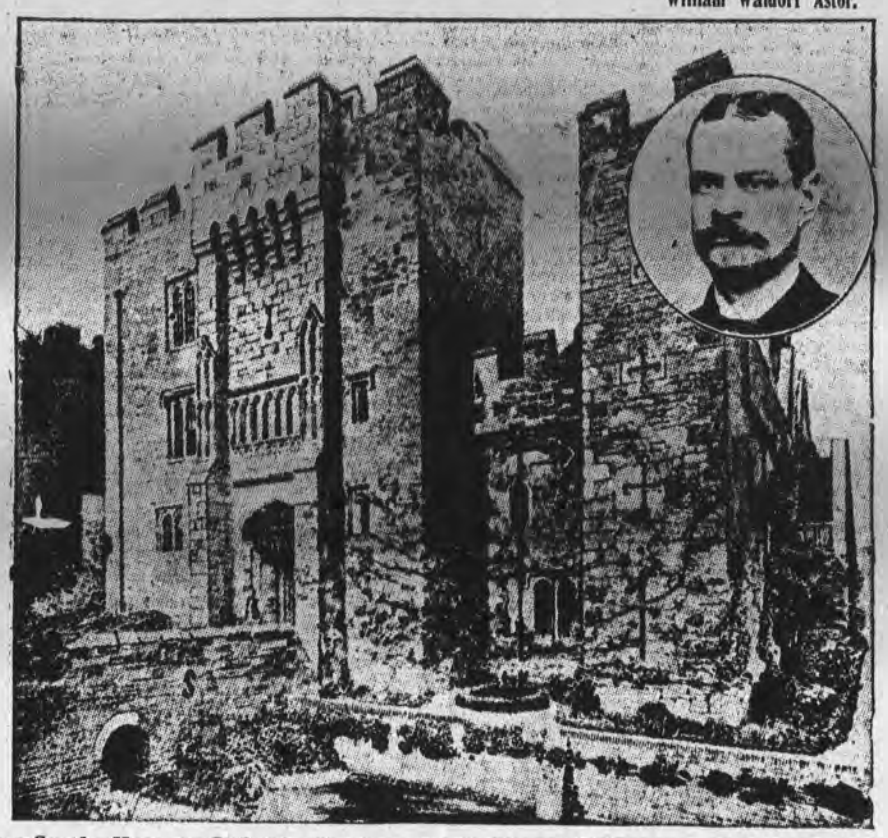
"Your Majesty," was the reply, "the girl is ill and cannot be disturbed. She is now asleep in her room."

When the news came that her lover had married another, Anne is said to have thrown off her sorrow, so far as it was visible, and attempted to enliven the gloomy halls of Hever with French songs and dances which she had learned at the court at Paris. Later when the word came from the King that she should return to court she is said to have expressed great delight, and on her return to have joined in the gayety of the palace with an abandon that was new to her. Her subsequent career, the machinations of the King, his advances and his repeated apologies, the divorce of Queen Catharine, the disruption of church and state in the King's attempt to obtain sanction for his act, his marriage to Anne Boleyn, the birth of the Princess Elizabeth, the usurpation of Anne's favor with the King by Jane Seymour, the charges brought against Anne, her beheading and the mysterious disappearance of her body are succeeding chapters of English history which would never have been enacted if Anne Boleyn had never left Hever Castle for a throne.

On the death of Sir Henry Boleyn, Hever Castle was seized by King Henry on the ground that it belonged to his former wife, even though he had divorced her and had had her beheaded. The castle still retains most of its mediaeval characteristics, and contains much of the furniture which was used there in the time of the Boleyns. The room that has always been most popular for visitors is the bedroom of Anne, which is beautifully panelled and contains Anne Boleyn's bed. Here there are still a massive pair of andirons bearing the royal initials, H. A., and surmounted with crowns.

Another room is said to have been used by Henry VIII. for a council chamber. The room has a curious stucco ceiling. Most of the windows bearing heraldic devices still exist. The secret passages, dungeons and blind closets of former days are also preserved as a reminder of the more dangerous days of King Edward III. and the fourteenth century, when the castle was built.—New York Tribune.

William Waldorf Astor.



Hever Castle, Kent, as It Looks To-Day---Little Changed From the Time of Henry VIII.

Double Claws on the Hammer.

Among the recently patented improvements is a hammer having a double claw, as shown in the accompanying illustration. In pulling nails of various sizes and conditions of rust the ordinary claw arrangement often

TWO CLAWS ON THE HAMMER.

meets its Waterloo, and is sometimes pulled from the handle in the effort to extricate the nail. The auxiliary claw is designed to meet such emergencies. It is revolvably mounted on the handle inside the head of the hammer, and, on account of the increased leverage, it will successfully pull an old nail, no matter how strongly it may be intrenched.

FORT PITT'S BLOCK HOUSE.

The block house was built as an outpost of old Fort Pitt, from which Pittsburg received its name, and which covered the ground previously occupied by Fort Duquesne. It is precious for its associations, not only to the city and State in which it rests, but to the whole nation. It stands on the point of land where the Allegheny and Monongahela rivers flow together to form the Ohio.

FORT PITT BLOCK HOUSE, PITTSBURG, PA.

This point, famous in history as "the Forks of the Ohio," was the spot for the possession of which the first blood was spilled in the French and Indian wars, and remained a strategic point of the greatest importance all through that long struggle of the Latin and Anglican races for the mastery of North America.

The importance of "the Forks of the Ohio" as a military basis was recognized first by Washington, when, a young man of twenty-one, he was sent by Governor Dinwiddie, of Virginia, to the commander of the French forces who had invaded the region of the Ohio River, "to know his reasons for invading the British dominions while a solid peace subsisted." It took Washington nine days to reach the "lonely spot where the rapid Allegheny met, nearly at right angles, the deep, silent Monongahela."

"I spent some time," writes Washington, "in viewing both rivers. The land in the fork has the absolute command of both. The flat, well timbered land all around the point lies very convenient for building."

So in imagination Washington built a fort and a city where the block house and Pittsburg now stand. When the French had declared their intention of taking possession of the Ohio, the first thing Washington called to the notice of Governor Dinwiddie was the necessity of building a fort at the "Forks," securing this important position. Dinwiddie at once despatched an officer with a small party of men to start the desired fortification, and gave Washington his commission as lieutenant-colonel and a body of 150 men in order that he might take command at the "Forks," finish the fort already begun there and hold the territory against the enemy.

Before Washington could carry out these plans, however, the French, led by Contrecoeur, came down from Venango and captured it from the little band of English then in possession. Contrecoeur completed the fortification of the post, and for the Governor of New France named it Duquesne.

Throughout the remainder of the war the efforts of the English were directed above all to the recapture of Fort Duquesne. It was in marching against it that Braddock met with his defeat and his death, and it was his heroic behavior during the terrible retreat from the Point that first brought Washington prominently before the notice of the colonies and won him his first laurels as a commander. Three years later Washington again led English troops against the French at Fort Duquesne, this time successfully. The French set fire to the fortifications and escaped down the river by the light of the flames. The immortal William Pitt ordered the rebuilding of the fort immediately, and from him it received its name. The recapture of Fort Duquesne had given the English undisputed possession of the Ohio and brought the French and Indian wars to a close.—New York Herald.

Clara Barton and Her Critics.

Considerable hesitancy is shown by the newspapers in their handling of the dissension of the Red Cross Society, evidently in the fear that the airing of the recriminations may impair confidence in the society and mar its usefulness; and all concerned are careful to explain that nobody has the slightest thought that a single dollar of the great sums handled by the society's officers has been misappropriated. What the critics of the society object to is the so-called autocratic rule of Miss Clara Barton, and the alleged lack of system in the handling of relief moneys.

MISS CLARA BARTON,

President of the American Red Cross Society. From a photograph taken in St. Petersburg last year, showing the decoration conferred on Miss Barton by the Czar and the Empress Dowager.

They sent memorials to the President and to Congress, early in the year, setting forth these complaints, and were conducting an aggressive campaign, when they suddenly found themselves suspended from membership by the Executive Committee, on the ground that they were attempting "to disrupt the organization of the American National Red Cross," and that in their memorial to Congress each of them "assumed an attitude unbecoming a member of the American Red Cross and hostile to the interests of that organization."

Insects Killed by Frost.

Katydids, grasshoppers, locusts, "walking sticks," crickets and beetles are killed by the frost. The eggs hidden in the ground or concealed in the bark of trees furnish the supply for the next year. The cold retards the development of the egg, which hatches in the warm days of spring. Sometimes an unusually cold winter plays havoc with the dormant insect life, but the cunning of nature strengthens the frail eggshell against the power of heat and cold alike, until the secret alchemy of the sun stirs the budding life and bids it come forth.

Why the Cat Washes.

"A cat caught a sparrow and was about to devour it, but the sparrow said: 'No gentleman eats until he washes his face.' The cat, struck by the remark, set the sparrow down and began to wash his face with his paw, but the sparrow flew away. This vexed puss extremely and he said: 'As long as I live I will eat first and wash my face afterward.' Which all cats do, even to this day."

ONE OF NATURE'S GREATEST VIEW POINTS,

On the Coast of Santa Barbara Islands, California.

GOOD ROADS
IF THEY ARE TO HAVE GOOD ROADS THEY ARE TO BUILD FOR THE ROAD IS THE CREATION OF MAN AND A TYPE OF CIVILIZED INDUSTRY

How to Procure Good Roads.

I have three plans to refer to the conference for your consideration; three plans for the purpose of determining how we shall get good roads. We are not going to discuss the need of these roads or what they will do for us. We are astonished in going into the different communities and into the cities to see the backward condition in street improvement as well as roads. We will not talk about that, but I want to impress upon your minds what to me seem the proper steps to take to secure better roads.

First, if you expect to proceed along the old lines of raising two, three or five mills on the one hundred dollar valuation, it will be another century before you have any considerable road improvement in your community. It will not do. There is something in it, but not enough. There are about 60,000 road officials or supervisors in the United States, and as they will not give their time for nothing, a two or three mill tax is eaten up for expenses. A very large part of this fund is consumed in this way. If it is wise to make a direct assessment, it seems to me you should assess at least seven to ten mills on the one hundred dollar valuation. Instead of having $10,000 to $15,000 in these counties get a fund of $50,000 or $100,000, or more.

If it is not agreeable to you to do that, if it is too much oppression upon the farmer, and we believe it is, then let us advise with you and suggest another plan, which is being adopted mostly in Eastern States. Massachusetts, New Jersey, New York, Connecticut, and those States down there have adopted the legislation called the "State aid plan." What is that? The State appropriates perhaps one-half of the money, and the county which gets the road pays one-quarter, and the township in which the road is located the other quarter. Pennsylvania, I believe, has adopted that law within the last two weeks. That brings all interests into it. It brings in the railroads, the corporations, and all great interests; and in these Eastern States a large part of the taxable revenues lie in cities and in corporations. Massachusetts only has about three-thirteenths of its wealth in the outlying districts. I believe many States will adopt that plan. All should. Missouri is one. Illinois is another. Iowa is another. These three States are very largely the bread baskets of the United States, and yet, each with nearly 200,000 miles of road, have not yet adopted any system to improve these primary arteries, common roads. It behooves you as men to think that if you do not improve your roads in Missouri, Illinois, and Iowa, the States that have improved roads (and I can show you improvements in the South largely in advance of the North) will go into the market and burn you up and freeze you out. You must build roads to compete in the avenues of social and commercial life.

The third proposition I want to speak of is "Government aid." I have heard it said all over this country that this convention is to be devoted almost entirely to Government aid. That is a mistake. This work will not be carried on entirely with Government aid. Unless you show in these different States and smaller rural communities that you will take hold of these matters and assist with your earnest endeavor, unless you raise local funds and organize the machinery with which to start this work, you cannot expect the Federal Government to come and dump a lot of money into your coffers and have it uselessly expended, as it has been all these years.

There is another very serious question which must be solved, and that is: Can we use the convicts of the several States and Territories in public improvements? If we do not devise some plan to utilize their labor in public improvements, we are toying with the greatest of all social propositions. We are bringing the labor of those men at forty or fifty cents per day into competition with the honest labor of this country. We do not dare to leave them in the penitentiary but a few years longer. We want to throw around them all the uplifting influences at the hands of the State. We want no dark dungeons. God's sunshine and God's pure air will benefit them. We want to do as twelve States of the South are doing to-day: take those men out in squads and put them to work on the roads. They have one guard to twenty men, and they go along building roads for $2000 per mile that in the North with similar conditions, soil, etc., are costing $5000 to $10,000 per mile.—Col. W. H. Moore, President National Good Roads Association.

The President's Plea.

President Roosevelt's plea for good roads is one that will fit every locality in which he makes speeches during this trip, and will find favor with every audience that gathers to hear him. For the last word will probably never be said on this important subject. There's no place on earth where some roads, if not all the roads, leading to it could not be improved and every one who has occasion to travel over them is convinced of the need. Legislatures, corporations and individuals are inclined to do what they can toward bettering highways, though the effort in many cases takes the shape of talk only. And when an eminent person like the President of the United States gets warmed up to talking on the subject he may always be counted on to commit himself on safe ground.

The Funny Side of Life.

LIFE'S ALGEBRA.

We figure some with a, b, c;
We also work with x, y, z.
But when we've serious sums to do
Too oft we call in I. O. U.
—Washington Star.

RUBBING IT IN.

Softleigh—"I—aw—never trouble myself to—aw—think, don'cher know."

Miss Cutting—"Well, I don't think that any one thinks you think."—Chicago News.

HER SWEET REPLY.

He—"Don't you know you're the first girl I ever loved?"

She—"So I judge, from the way you go at it?"—Illustrated Bits.

THEIR PRIVILEGE.

Applicant—"And if we want certain changes made in the flat——"

Janitor—"Well, when people want 'em very bad they generally move."—Brooklyn Life.

HIS POSITION.

"There must be a great deal of admiration for that author," said Miss Cayenne.

"Yes," answered the literary man, "but his books don't sell."

"I see. Admired, but not envied."—Washington Star.

AT DINNER.

"Say," whispered the hired girl, "the landlady thinks a great deal of you. She just said you were a 'bird.' "

"Then she must think I'm a humming bird," said the star boarder grimly. "I don't see anything on the table but flowers."—Chicago News.

LOVE GROWING COLD.

Mrs. Octopus—"I know that you don't care as much for me as you did before we were married."

Mr. Octopus—"What put that notion in your pretty head, my dear?"

Mrs. Octopus—"Why, you used to put a hundred arms around me, and now it is as much as you can do to use one."—Philadelphia Telegraph.

WITH THE EYE OF FAITH.

Wealthy American Father-in-Law (in disgust) — "So this is your 'ancestral chateau,' is it? Do you think I'm going to let my daughter live in such a tumbledown old shack as this?"

Count Boylon de Bakkovisnek (with alacrity)—"Ah! Zen you will r-repair ze chateau for your daughtare—ees it so?"—Chicago Tribune.

HIS SUGGESTION.

The directors had called a meeting of stockholders to devise ways and means of getting the company out of its difficulties.

"I think," said the President, "that a loan of $500,000 would bridge us over."

"How would it do," an unsophisticated young stockholder modestly suggested, "to draw off some of the water? Then, maybe, we could wade over without a bridge."—Magazine of Humor.

RECIPROCITY.

His Pop—"Bobby, I merely punish you to show my love for you, my boy."

Bobby—"If I was only bigger, pop, I'd return your love."—Detroit Free Press.

ONE POINT OF VIEW.

"I am very much afraid that you do not appreciate the spirit of a free country."

"Oh, yes, I do," answered the man who had recently landed in New York, in a dialect which it is needless to reproduce.

"What do you understand by a free country?"

"It is a place where you are free to do as you choose if you can manage to get on the police force."—Washington Star.

North Plainfield Weekly Review

ISSUED EVERY SATURDAY BY

HARRY H. WEBB

AT NORTH PLAINFIELD, N. J.

33 Somerset St. Telephone 217

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, JUNE 27 1903.

NECESSITIES FIRST.

In line with the policy of certain politicians to force North Plainfield into Union county by running up the tax rate, along comes this new scheme of an expensive race track called a boulevard to be located on the west side.

It is not necessary that this millstone should contain a hole through the middle of it in order to reveal to the people the true "inwardness" of the scheme, namely: To run the Borough more deeply into debt and to increase the value of certain property in which the promoters of the scheme are interested.

Boulevards, parks, etc., are desirable and commendable under certain conditions, but until the borough is practically free from debt and has a little cash in its treasury, such things should be classed as luxuries, and can be put off until Pearl street is macadamized and a few other such necessary improvements are made. In its present condition, Pearl street is a disgrace to our otherwise beautiful borough, and ought to be macadamized at once. Likewise are there other minor improvements which should be made before a $35,000 speedway is built, and which can only benefit a few for years to come.

Not only this, but a sewerage system should be considered before the boulevard, and while this too, can wait a while, we only mention it to show that actual necessities should have preference over luxuries in the improvements contemplated and now going forward.

NEW FIRE ARMS LAW.

A new law passed by the Legislature this year should result in greatly reducing the number of accidents which annually ensue from the careless handling of firearms by boys. The new law is known as Chapter *No. 169, and it makes* it unlawful to "sell, barter, exchange, hire or loan to any person under the age of 15 years, any gun, pistol, toy pistol, or other firearms," or for any person under that age to buy or exchange any such weapons, or to carry, fire or use the same. Dealers are required to register their sales of firearms, giving descriptions of articles sold, and name and address of purchaser. Violation of this act is made a misdemeanor, and as the maximum penalty for a misdemeanor is three years' imprisonment or $1,000 fine, it will be a risky venture for anyone to take chances on ignoring or defying the law.

OLD-AGE PENSIONS.

"Simply speaking, the payment of an old-age pension, say of $100 each to every citizen, male or female, who has passed the age of 70, does not involve a heavy burden to the State, says Edward Everett Hale, in the Cosmopolitan.

"Let us now consider the advantages which the State, as an organization, would receive from such a system. As matters stand, the managers of asylums, whether for the poor, or perhaps for the blind, or the insane, or other invalids, are always at their wits' end to know what they shall do with the aged people who are crowded upon them. The almshouses of towns and counties are filled in the same way.

"Now, all these old people are better cared for in the homes of old neighbors, or old friends, very possibly of sons or of daughters, who would receive them and take charge of them humanely if they could receive a little ready money for the extra expense. As society organizes itself, a very little money goes a great way in the average household of an American. The moment it appears that a grandfather or a grandmother has one hundred dollars a year to his good, that moment we shall find that the burden thrown upon the State and town in their asylums, is reduced by a larger proportion than by the charge made by the pensions upon the treasury. Thus the pension system has the great advantage that it maintains life in homes, and that it abates the necessity for great institutions or asylums."

PHILADELPHIA "CORRUPT AND CONTENTED"

Lincoln Steffens has at last tackled Philadelphia. In the July number of McClure's appears his story of municipal grafting in Philadelphia. "Philadelphia: Corrupt and Contented," is a pretty scathing title, but the writer justifies it. Mr. Steffens sees in Philadelphia "a city all through with reforms." Philadelphians, he says, are disfranchised like negroes in the south—dead dogs and children vote in their places. Nothing but a revolution, in Mr. Steffens's opinion, could overturn the Philadelphia ring, which is forged, not in city, or even state, but in the flame of national politics. This is the most outspoken, the most trenchant, and the most powerful of all Mr. Steffens's splendid city articles.

In view of the remarkable success which has crowned Mr. Cleveland's acts in private life, it would be too bad to remove him from it.

A snow squall at Asbury Park, Tuesday, was the unusual attraction not mentioned in any of the advertisements of that popular resort. But this is an unusual season, anyway.

The 125th anniversary of the battle of Monmouth will be celebrated today with fitting and imposing ceremonies. Bishop Scarborough, Governor Murphy and Will Carleton will be among the notables participating.

We are in receipt of a pamphlet entitled "The Explanation of the New Primary Law," issued by the State Republican Committee, which explains in detail the operation of the new law, and which should prove very useful.

J. S. Frelinghuysen, chairman of the Republican County Committee, has had two voting machines placed at his disposal for use in Somerset county. One will be placed here, the other at Somerville, and will probably be ready for use at the special election to be held in September next.

The California man who bequeatned a fortune to his son on condition that he should marry a New Jersey girl, paid our commonwealth a compliment of which we are proud. The father simply wanted his son to have as good a wife as his mother was, and knew the boy would take no chances if he came to New Jersey.

"All right-thinking men," says the Bayonne *Times*, "should co-operate in the movement which has for its object the purification of the municipal service, by the introduction of equity, honesty, and strictly business principles," to which we say amen, and advise our voters to cut this item out and paste it in their hats for use at the next election.

If the Rev. R. A. Elwood, of Wilmington, reads the newspapers, says the Philadelphia Press, he will see some pretty severe *condemnation* from clergymen as well as editors concerning his utterance from the pulpit favoring the lynching under certain circumstances of the negro White. There is justly great indignation that a minister of the Gospel should have given the slightest encouragement to such awful work.

Mose Meders—It seems ter me, Josh, that them twenty-story buildin's in *N'York must be dangerous!*

Josh Hayrick (just back)—They be, Mose! Why, a feller can't hardly stop an' look up at 'em without hevin' his pocket picked, or bein' knocked down an' stepped on!—Puck.

A woman is as happy as she looks pretty; a man as happy as he feels important.—Puck.

It Was a Vain Deception.

An eminent Episcopal bishop lately paid a visit of inspection to the State Hospital for the insane at Matteawan, N. Y. Before introducing the bishop to one of the inmates the physician in charge warned him not to cross or contradict the unfortunate man, but to agree with all he said.

"If you humor him," said the physician, "you will doubtless find him agreeable, intelligent and apparently sane, his only mania being that everybody is conspiring against him."

The bishop assented and was soon conversing amicably with the lunatic, who finally said:

"I see Queen Victoria is married again."

"Um—er—well—Oh! of course," assented the bishop, after some natural hesitation, in view of the Queen's death.

"So she's married President McKinley, has she?" queried the lunatic next.

This arbitrary mating of two of the world's illustrious dead was almost too much for the bishop to sanction, even in the interests of peace and harmony, but he finally managed to acquiesce with fairly good grace.

"Well, who are you, anyway?" blurted out the lunatic.

"I am a minister of the Gospel," replied the bishop.

"Humph!" retorted the lunatic, "you look like a parson and you dress like a parson, but you lie like a heathen."

The Merry Minstrel.

The merry minstrel suddenly glinted his eye and began as follows:

"I can always tell a married man from a single man. Do you know how, professor? Well, now, the single men sit up straight in their seats and the married men sit with their backs bent." The merry minstrel's eye apprehensively roved over the audience. "Ha, ha!" he laughed. "See 'em straighten up! See 'em straighten up!"

'Tis true. But there is this to be said about it. They straighten up only *that they might take better aim* with sundry small vegetables and antediluvian eggs. How the merry minstrel cursed the management for including that precious tit-bit of humor in the company's repertoire!

Why, man alive, Noah told that old gig in the ark!

Jane in a Stew.

The new servant-maid was helping her mistress to prepare dinner, and all went well until the macaroni for the pudding was produced.

The girl looked in surprise as her mistress untied the packet of long white sticks; but when she carefully placed them in water the girl gave a choking gasp.

"Did you say, mem," she said, in an awed voice, "that you was going to make a puddin' of that?"

"Yes, Jane," said her mistress, "that is so. But you seem surprised. Have you never seen macaroni cooked before?"

"No, mem," said the girl, "I ain't! The last place I was at we always used them things to light the gas with."

Assisting His Gloom.

"I'm going to wait," said the misanthrope, "until the trusts own everything, and *then I'm going to turn* hermit and live in a cave."

"No use," answered the semi serious friend. "You won't be able to find a cave on any property that hasn't a 'No trespassing' sign on it."—Washington Star.

Mutual Ignorance.

Teacher—Thomas, you are a hopeless ignoramus. You know no more about Lafayette than—than—

Thomas—Well, why should I? I'll bet he didn't know nutt'n about me.

The Point of View.

"Some folks are too mean to live," said Jones, gloomily.

"And some are too mean to die," *said a solemn-looking stranger.*

It turned out that the stranger was a sexton. You should have seen Jones scowl at him! Jones, it may be mentioned, was in the insurance business, and all his risks were dying off.

Museum Colloquy.

"Yes, when the stranger grew too familiar with the fat lady the manager called his bouncer."

"Big husky fellow, I s'pose?"

"Oh, no, merely the India rubber man."—Kansas City Journal.

Little Willie—Say, pa, what's a coquette?

Pa—A coquette, my son, is a woman who pretends to be indifferent about getting married.

The Exasperated One—I'm afraid, sir, this town isn't big enough to hold both of us!

The Imperturbable—H'm—why don't you start a suburb?

TOGETHER WITH THE TWO HEADED CALF

By CALEB BROWN

Copyright, 1902, by T. C. McClure

"What d'you think?" queried Job Parsons, hired man to the Widow Thompson, as he brought the foaming milk pails into the farmhouse kitchen one morning in May.

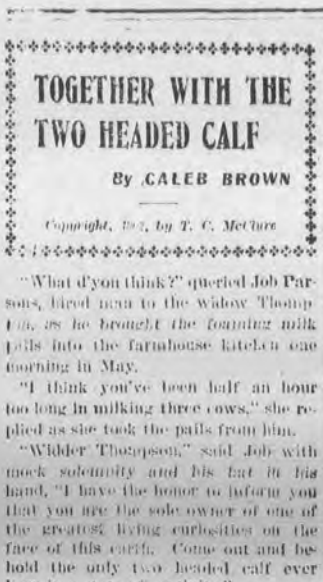
"I think you've been half an hour too long in milking three cows," she replied as she took the pails from him.

"Widder Thompson," said Job with mock solemnity and his hat in his hand, "I have the honor to inform you that you are the sole owner of one of the greatest living curiosities on the face of this earth. Come out and behold the only two headed calf ever born in a state of captivity."

It was true. The widow rushed down to the barnyard to find the old spotted cow chewing her cud in contentment, while frisking around her and looking at the world from two different standpoints was a two headed calf. Nature had produced a wonderful freak. There was only one body, supplied with the usual number of legs and a proper length of tail, but the neck was ornamented with two perfect heads, and two separate mouths bleated welcome to the woman who held up her hands in amazement.

"My stars, Job, but what is it?" she exclaimed as the hired man followed along.

"It's sunthin' to make you famous the world over," he replied. "It won't



HALF THE PEOPLE IN THE COUNTY HAD CONGRATULATED HER.

be a month before you will be better known than Queen Victoria. People will come a thousand miles to see this two headed calf, and you'll have at least five offers of marriage a day."

"I want no offers of marriage, and if this calf is to bring a lot of people around here asking questions I'll have you kill it right off."

But the widow wasn't in earnest in what she said. She had been looking out for an offer for the best five years, and she liked nothing better than half an hour's gossip with a tin peddler or a lightning rod man. As she gazed at that two headed calf, who tried to return her gaze with his four eyes at once, she saw possibilities in the future and returned to the house with a smiling countenance.

Before noon every farmer for five miles around had heard of the living curiosity and visited the farm; within two days half the people in the county had taken a view and congratulated the widow. The matter got into the local paper and was republished far and wide, and most of the papers wound up the two headed tale by saying:

"We understand that the widow Thompson is a well preserved, intelligent woman of forty, and there are rumors that she may assume the bonds of matrimony again at no distant date."

People came by the hundreds, as Job had predicted, and letters came by the score. But the offers of marriage didn't accompany them. In her secret heart the widow had determined that that calf should bring her a husband. Being a two headed calf he ought to bring her two offers, and she would take her choice.

Peddlers, lightning rod men, sewing machine agents and prospectors for natural gas looked over the fence at that calf and offered a price, but their figures were not accepted. Purchasing agents for sideshows, museums and circuses viewed the curiosity from every side and made liberal offers, but went away disappointed. None of them had the good luck to discover that the widow and the calf were one and indivisible, that where the two heads went the widow's hand and heart followed. If any of them had a dim suspicion, he was lured out by having a wife already on his hands.

But at the end of four weeks there came a solemn faced man. The widow's heart had begun to flutter with expectation when the stranger observed:

"My good woman, it may not be unknown to you that a camp meeting is to be held in Hickory grove, four miles away, next month. To be a success a camp meeting must have no competition, no rival. In this instance it is the general feeling that should your two headed calf continue on exhibition our labors in the vineyard will be brought to naught. In other words, idle curiosity will outweigh the services of the Lord's servants."

"And what do you want me to do?" asked the widow.

"Either sell the calf or temporarily remove it to some distant locality."

"I'll never do it," she bluntly replied as she swiftly realized the dangers that lurked in an interruption of the programme.

The calf remained, and the camp meeting was postponed to a more auspicious occasion. That meant to a date when two headed calves were no more in Sycamore county. The living curiosity was born in May, and September had come and the heart of Widow Thompson was weary with waiting. There had been cash offers galore, but no one had asked for the combination of calf and hand. "He cometh not," sighed the widow as she put her pies in the oven to bake, and "I'm durned if he does!" added Job as he dug Early Rose potatoes in the field.

But he was coming, and one day he arrived. He didn't even ask after the two headed calf, although he probably knew that it was well and thriving. He sat himself down in the house and talked to the widow, and this is the way he talked:

"I am a lone man. I have been a lone man ever since my wife died. She was the Wild Woman of Borneo, and I loved her from the bottom of my heart. I, as her husband and the proprietor of Oxford's Wonderful Aggregation of Living Curiosities, delivered the hourly lectures before her cage. When she had been laid away, I might have taken the Japan Giantess to my bosom, but I could not love her. I might have wedded Mme. Gossard, the snake charmer, but there was no affinity. I could have talked love to Zi-Zi, the tight rope performer and cannon ball tosser, but my heart was weary. I have carried my burden for years. I have looked for one to love, but looked in vain until this hour. Widow Thompson, fate has brought us together. I am worth $10,000 and am a hustler. You are the owner of a two headed calf and a loving heart. Shall we bring about a combination and travel life's road together and smash all rival exhibitions? Don't answer me right off quick. Take two minutes to think it over, while I make a note of the fact that my Cannibal Man from the Zulu islands must gnaw the bones closer with his teeth."

The widow took two minutes and then replied, and that evening, after she had had a talk with Job, that hired man went out and kicked himself around the barnyard and exclaimed:

"Durn all fool widders and two headed calves! I've got to look for another job!"

Blowing Off Steam.

Mr. Jenkins was spending a day at home battling with a toothache and making things generally animated for his family.

"Good gracious! How hot it is in this room, and what a noise that radiator is making!" he cried as he entered his wife's sewing room, to which she had retreated for a few moments' respite from the strenuous life in the library.

"I suppose this sort of thing goes on every day when I am not at home to attend to matters. No wonder you all feel cold when you go outdoors!" muttered the sufferer as he drew out the little plug cock and the steam escaped with a rush.

"Now you see how simple"— began Mr. Jenkins, but just then the rush of steam changed to a trickle of water, rapidly increasing in flow. He endeavored to replace the plug.

"Hang it!" he roared as he dropped the plug and assumed a variety of attitudes, nursing his fingers. "Here I've scalded myself to death, and the water is running over the floor, and nobody stirring! Run to the telephone, somebody, and call up the plumber and tell him to send a man here directly, and—in the name of common sense, Mary, why don't you get some cloths instead of— What are you laughing at?"

"Why don't you try turning off the steam?" she asked in a tremulous voice.

"As Stupid as a Donkey."

When one boy tells another not to make "an ass" of himself or says that the other is as stupid as "a donkey" or as obstinate as "a mule" he does not mean the remark for a compliment, and the other boy never accepts it for one. But is the donkey really a stupid animal? Is the ass anything like so great a fool as the human being who is supposed to behave like an ass, and is the mule only obstinate, or has he a "firm character?" Ask any one who associates with the donkey beast. He will tell you at once that the little animal is as intelligent a creature of its class as you can find.

There are donkeys that seem to show a contempt for the human understanding by not always caring to do what a human being asks of them, but make a donkey love you, and you will find him docile enough. There are stupid donkeys and intelligent donkeys, as there are stupid and intelligent horses, dogs and—persons. An ass has never been known to do anything so absolutely silly as to make it excusable to give the poor creature the bad name he has borne for ages. He is patient. He is long suffering. Much abuse makes him appear indifferent to the treatment he receives. It is, however, a little too unjust to suppose that he is originally stupid because his inhuman master is cruel.—Our Animal Friends.

Man's Future.

A man is a bundle of relations, a knot of roots, whose flower and fruitage is the world. All his faculties refer to natures out of him. All his faculties predict the world he is to inhabit, as the fins of the fish foretell that water exists or the wings of the eagle in the egg presuppose a medium of light air. Insulate and you destroy him. He cannot live without a world.—Emerson.

Sciatic

Trouble From Sprain of Back.

Dizzy, Dull, Nervous, Constipated.

Dr. Miles' Nervine Completely Cured Me.

A frequent complication of rheumatism and sciatica is constipation. The use of Dr. Miles' Nerve and Liver Pills in conjunction with Restorative Nervine makes an ideal treatment for such cases. The Nerve and Liver Pills, by their tonic influence upon the nerves of the stomach, liver and bowels, cause them to act naturally. Thus the system is readily cleansed of the impurities which cause the trouble and the nourishing and soothing effect of Nervine is allowed to do its wonderful work of restoration without hindrance from the complication.

"About ten months ago I sprained my back. This ran into sciatic trouble from which I have suffered more or less ever since. This was complicated by chronic indigestion. I had sick headache every day with a dizzy, dull feeling, also quite a little confusion. Was extremely nervous and suffered much from constipation. I was influenced to try Dr. Miles' Remedies and decided to give them a trial. I procured a bottle of the Restorative Nervine and a box of the Nerve and Liver Pills. I used them as per directions and received much relief. I continued the Nervine until I had used several bottles of the same and I am glad to state that it has cured me completely and permanently. I now enjoy good health, relish my meals and can eat any kind of food without fear. I take pleasure in recommending Dr. Miles' Remedies to the public."—REV. A. B. MOWERS, Taneytown, Md.

The Ills of Women Act upon the Nerves like a Firebrand.

The relation of woman's nerves and generative organs is very close; consequently nine tenths of the nervous prostration, nervous despondency, "the blues," sleeplessness, and nervous irritability of women arise from some derangement of the organism which makes her a woman. Herein we prove conclusively that **Lydia E. Pinkham's Vegetable Compound** will quickly relieve all this trouble.

Details of a Severe Case Cured in Eau Claire, Wis.

"DEAR MRS. PINKHAM: —I have been ailing from female trouble for the past five years. About a month ago I was taken with nervous prostration, accompanied at certain times before menstruation with fearful headaches. I read one of your books, and finding many testimonials of the beneficial effects of **Lydia E. Pinkham's Vegetable Compound**, experienced by lady sufferers, I commenced its use and am happy to state that after using a few bottles I feel like a new woman, aches and pains all gone.

"I am recommending your medicine to many of my friends, and I assure you that you have my hearty thanks for your valuable preparation which has done so much good. I trust all suffering women will use your Vegetable Compound."—MRS. MINNIE TIETZ, 620 First Ave., Eau Claire, Wis. (May 28, 1901).

Nothing will relieve this distressing condition so surely as Lydia E. Pinkham's Vegetable Compound; it soothes, strengthens, heals and tones up the delicate female organism. It is a positive cure for all kinds of female complaints; that bearing down feeling, backache, displacement of the womb, inflammation of the ovaries, and is invaluable during the change of life, all of which may help to cause nervous prostration.

Read what Mrs. Day says:

"DEAR MRS. PINKHAM: —I will write you a few lines to let you know of the benefit I have received from taking your remedies. I suffered for a long time with **nervous prostration**, backache, sick headache, painful menstruation, pain in the stomach after eating, and constipation. I often thought I would lose my mind. I began to take **Lydia E. Pinkham's Vegetable Compound** and was soon feeling like a new woman. I cannot praise it too highly. It does all that it is recommended to do, and more.

"I hope that every one who suffers as I did will give Lydia E. Pinkham's remedies a trial."—MRS. MABIE DAY, Eleanora, Pa. (March 25, 1901.)

Free Medical Advice to Women.

Mrs. Pinkham invites all women to write to her for advice. You need not be afraid to tell her the things you could not explain to the doctor—your letter will be seen only by women and is absolutely confidential. Mrs. Pinkham's vast experience with such troubles enables her to tell you just what is best for you, and she will charge you nothing for her advice.

Another Case of Nervous Prostration Cured.

"DEAR MRS. PINKHAM: —Allow me to express to you the benefit I have derived from taking **Lydia E. Pinkham's Vegetable Compound.** Before I started to take it I was on the verge of **nervous prostration.** Could not sleep nights, and I suffered dreadfully from indigestion and headache. I heard of Lydia E. Pinkham's wonderful medicine, and began its use, which immediately restored my health.

"I can heartily recommend it to all suffering women."—MRS. BERTHA E. DEIBKINS, 25½ Lagidge St., San Francisco, Cal. (May 21, 1901.)

$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness.

A good prescription
For mankind.

The 5-cent packet is enough for an ordinary occasion. The family bottle (price 60 cents) contains a supply for a year.

New Pine Forests in California.

For three months, beginning last November, a squad of from ten to fifteen men, under a competent leader, spent its time reseeding the mountain regions of Southern California, where fires had denuded the surface. The country, alarmed by the decreasing water supply, asked for this work, and assistance was given by the towns of the section visited in carrying on the replanting. Pine, in varieties suited to the moisture likely to be secured, was generally planted. On March 1, this year, it was announced that the seeds planted in November had begun to germinate, and that there was promise of a successful growth over the areas treated. In a few years the bare mountain sides will be clothed again with wood.—Review of Reviews.

Singular Geometry.

In the Alleynian, the school magazine of Dulwich, England, appears a witty paper on "Seaside Geometry," from which the following are taken:

Definitions: The landlady of a boarding house is a parallelogram, that is, an oblong angular figure which cannot be described, but which is equal to anything.

All the rooms being taken, a single room is said to be a double room.

Postulates: A pie may be produced any number of times.

The Kaiser as a Land Owner.

Kaiser Wilhelm owns eighty-three estates and fifty-three castles. These foot up a total of 300,000 acres and bring in an income of $160,000. He has as yet visited only thirty of his castles, but the total sum which goes to their support is enormous. He is building a fifty-fourth castle, a magnificent affair which will overlook Posen, in Prussian Poland.

All code books carried in warships have leaden backs, to make them sink should the vessel be wrecked.

IN EVERY WALK OF LIFE.

People in every walk of life have bad backs—kidneys go wrong and the back begins to ache. Cure sick *kidneys* and back ache quickly disappears.

Read this testimony and learn how it can be done.

A. A. Boyce, a farmer, living three and a half miles from Trenton, Mo., says: "A severe cold settled in my kidneys and developed so quickly that I was obliged to lay off work on account of the aching in my back and sides. For a time I was unable to walk at all, and every makeshift I tried and all the medicine I took had *not the slightest* effect. My back continued to grow weaker until I was unfit for anything. Mrs. Boyce noticed Doan's Kidney Pills advertised as a sure cure for just such conditions, and one day when in Trenton she brought a box home from Chas. A. Foster's drug store. I followed the directions carefully when taking them and I must say I was more than surprised and much more gratified to notice the back ache disappearing gradually until it finally stopped."

A FREE TRIAL of this great kidney medicine which cured Mr. Boyce will be mailed on application to any part of the United States. Address Foster-Milburn Co., Buffalo, N. Y. For sale by all druggists, price 50 cents per box.

Sunday in the Olden Time.

By J. T. Trowbridge.

THE mother, in her best black gown, and with her foot stove, if the weather was cold, the father, freshly shaved, in his high black stock and equally uncomfortable tall black hat, and such of the sisters as were at home, filled the two broad seats of our wagon, with perhaps one of us youngsters wedged in, though we preferred to walk in good weather; then the vehicle moved out of the front gate and joined the procession of carriages going in the same direction, impelled by the same pious duty. With the foot stove or without it, went luncheons for the noonday hour, for the religious exercises were an all-day affair, with forenoon and afternoon services, and the Bible class and Sunday-school in the interval which the minister took for rest between his sermons. It was not supposed that his hearers needed rest. There were sheds for the vehicles, and the man who was kind to his beasts usually put into his wagon with the family sandwiches a small bag of grain for his team. The services began at half past 10, and were over at half past 3, unless the afternoon sermon was "lengthy," as it was very apt to be; five hours of doctrine and edification on which Heaven was supposed to smile; five hours of light and sunshine and recreation stricken out of our lives on that so-called day of rest.—The Atlantic.

Many Responsibilities of the Secretary of the Treasury

By Frank A. Vanderlip.

THE SECRETARY of the Treasury will discover that there are almost as many vessels which would fly his official flag should he come on board as there are ships of war to fire salutes to the Secretary of the Navy. He has large fleets engaged in light-house and coast-survey work, while the revenue-cutter service, in which are many swift and modern vessels, does police duty at every port. He is the final authority in all official judgments relating to the more than 500,000 who land on our shores annually, and he is the responsible executive for carrying out the immigration laws and the Chinese Exclusion Act. He is the official head of the Bureau of Public Health and Marine Hospital Service, which guards our ports from contagious diseases, maintains quarantine service and stations, and a great system of hospitals for disabled seamen. The Government's Secret Service Bureau reports directly to him, and he watches day by day the unfolding of detective stories more interesting than the dime novels of his boyhood days, and there accumulate in his files packages of reports, tied with red tape, more thrilling than the choicest example of yellow-covered literature. Not only is the Secret Service Bureau devoted to the detection of counterfeiting, but its services are called into play in connection with any secret service work which the other departments may wish to have done. The Bureau of Standards, to which the question of weights and measures may be finally referred, is under his direction. No steamship may sail in American waters, nor leave an American port, the boiler of which does not bear the stamp of official inspection by one of his subordinates. He is the responsible head of a Life Saving Service, with 272 stations and a cordon of men patrolling 10,000 miles of coast; of a light-house system, marking the course of mariners with a chain of lights from Maine away around to Alaska.—From "The Treasury," in Scribner's.

Hypnotism a Cure For Inebriates

By J. D. Quackenbos.

BY means of the enlightened employment of hypno-suggestion, the subliminal self—that principle which dictates what is right and inclines to good—may be brought into active control. It happens to be a psychological fact that, in a state of sleep, either natural or induced by an intelligent physician through ordinary hypnotics, a human being is obnoxious to the insinuation of a belief, impulse or thought which may dominate the waking life.

Periodic drink storms are usually forecast by significant indications, well known to the family and friends of the victim—irritability of temper, unreasonable suspicions, so-described "cranky spells," abnormal restlessness, unaccountable depression. Immediately upon the appearance of these symptoms the patient should be treated by suggestion before opportunity is given for the craving. Such a subject frequently recognizes his danger and sincerely wishes to be cured. He is tactfully conducted into the subliminal sphere, and then assured that in accordance with his own desire and decree, he has lost all craving for beer, wine and whisky; that alcohol in any form will disgust him, and, as a safeguard, that he cannot swallow it, cannot carry the containing glass to his lips. The society of low companions is tabooed; the pleasures associated with drink and the glamor of the barroom are pictured as meretricious and placed in vivid antithesis to the chaste delights of home life.

The physical, mental, moral and economic bankruptcy that accompanies dipsomania is held up before the view of the sleeper, and he is forced to the conviction that begotten of this apprehension has come into his soul an abhorrence for drink and all that it stands for. He realizes the presence of efficiency within him adequate to the enforcement of radical abstinence as the principle of his life, and he is rendered insensible in the future to any such combination of passion and allurement as has usually constituted temptation. So he is led instantaneously to scorn recourse to alcoholic stimulants or to extrinsic exaltation of any kind either for convivial reasons, or in time of depression, misfortune or sorrow, and to depend exclusively, under any mental or physical strain, on the units of energy legitimately manufactured out of the nutritious food, non-intoxicating drinks, air, exercise and sleep. He will always act in response to that suggestional force when it is imparted by a pure minded "suggestionist" who is in genuine sympathy with the inebriate and operates with the courage of his convictions.

A Bird in the Bush Worth Two in the Hand

By Caspar Whitney

THE value of the bird to the farmer is as a destroyer of the insects which ravage his crops. Experience has suggested and experiment demonstrated that, in sections where bird life decreases, depredations to crops of fruit, grain and general garden truck increase, despite spraying and innumerable chemical devices to arrest the march of the destroying insect.

Now, insects and worms constitute practically the whole food of birds. Swallows and swifts course the upper air; fly-catchers lie in wait in the foliage; warblers explore the leaves and the blossoms, and the vireos carefully search the more secluded nooks, which perhaps the warblers overlook. The trunks and limbs of the trees are the feeding grounds of the woodpecker, nuthatch and the creeper. No inch of the tree bark is left unexamined by these industrious birds for insects' eggs and larvae or ants, or the boring worms which may be heard within the bark. On the ground the insect hunt is continued by the thrushes, sparrows and other birds; and at the close of day, the night hawks and whip-poor-wills, according to Mr. Frank Chapman, take up the chase, catching moths and other nocturnal insects which have escaped day-flying birds. Cranes, herons and bitterns feed on craw-fish, which do great damage to the planters in the South, by making holes in the embankments of their rice fields.

Thus, we see, that the hunting is wide and thorough. How successful it is, may be appreciated from the results of Professor Attwater's investigations. For example, the stomach of a single quail was found to contain 101 potato bugs; that of another quail, 500 cinch bugs; a cuckoo shot at 6 o'clock in the morning, contained forty-three caterpillars; another shot at the same time, 217 web worms; a robin, 175 caterpillars. The young of a pair of jays, observed by Dr. Brewer, were fed half a million caterpillars in a season. A young robin, kept in captivity, required sixty earth worms a day. A mother wren made 110 visits to her little ones in four hours and thirty-seven minutes, and fed them 111 insects and spiders.

Dr. Fisher relates that from the nest of a pair of barn owls he collected 675 pellets, of which he made a careful study, with the result of identifying the remains of 1787 small mammals, of which 1119 were common meadow mice, a most destructive enemy to young fruit trees and to the farmer's crops in general.

Few people have an adequate idea of the amount of food required by birds. It figures into a tremendous number of insects, as Professor Attwater's figures show. He says that, allowing twenty-five insects a day as an average diet for one bird, and estimating only one bird to every acre in Texas, where his investigations were made, the calculation would give 170,000,000 birds in Texas alone. This would require 4,250,000,000 insects for each day's rations. It has been estimated that it takes 120,000 insects to fill a bushel measure, therefore it would take 35,500 bushels of insects to feed the birds in Texas alone for a single day, and Professor Attwater says that this estimate is very low.—Outing.

HOUSEHOLD AFFAIRS

NEW USES OF SODA.

Soda is one of the least expensive and most indispensable articles in kitchen use. Acid fruits, such as gooseberries, rhubarb and plums, require less sugar if a little soda—half a teaspoonful to one quart of fruit—is put in before the sugar. Bathing a patient in hot soda water will reduce the fever. A little soda put in water in which meat and vegetables are boiled will make them tender and sweet, besides hastening the cooking, and thereby saving fuel. When added to dish-water no soap is needed, and there is no greasy rim around your dish pan. In warm weather meats may be freshened by washing in cold soda water before cooking.—Woman's Home Companion.

DAINTY LAMP SHADES.

Lamp shades grow lovely every season. When one looks back to the crude affairs of a few seasons ago we wonder how we ever could have thought them pretty.

Among the new and exquisite things brought out are shades of cut glass or glass beads. One really can get no idea of their dainty beauty until seen.

One had a top formed of glass beads, strung on wire, with a deep glass bead fringe. There is a purity, a brilliance about such a shade indescribably fascinating.

Another on the same lines had the top of cut glass, with the deep bead fringe. Of course, the lamps also are of glass with gilt finishings.—Philadelphia Telegraph.

FOR THE PASTRY COOK.

To get a fine grained cake, beat thoroughly after the flour is added. Sweet milk makes cake that cuts like pound cake. Sour milk makes spongy, light cake. Always sift flour before measuring, then it may be sifted again with the baking powder to insure their being thoroughly blended. In making fruit cakes add the fruit before putting in the flour, as this will prevent it falling to the bottom of the cake. Flouring the fruit is unnecessary, unless the fruit is damp.

If a cake cracks open while baking, the recipe contains too much flour. In creaming butter and sugar, when the butter is too hard to blend easily warm the bowl, and if necessary warm the sugar, but never warm the butter, as this will change both texture and flavor of the cake. The smaller the cake the hotter should be the oven. Large, rich cakes require very slow baking. Grease cake pans with lard or drippings, as butter will be likely to make the cake stick, owing to the salt in it.—Pittsburg Dispatch.

PACKING MEN'S CLOTHES.

In packing men's clothes, fold the trousers in the front and back creases, fit them in the length of the trunk, and turn up at the foot, placing tissue paper in the fold.

In folding any sort of coat first lay the coat on a table, then place the sleeves flat on the back pieces, and last turn the fronts over the sleeves, and pack the coat this width if possible. If too wide, then fold together down the middle of the back. No tissue paper is needed in the coat unless it is in this last fold, or unless a very little paper is needed at the top of the sleeves.

When there is no special tray in a man's trunk pack the shirts in the flat second tray, filling in the corners with socks and underwear. It is a dangerous experiment to try to pack a man's silk hat in a trunk. You see, it cannot be pinned in tight, and the least slipping about is ruinous. A hat box is almost indispensable with a dress hat.—Woman's Home Companion.

Cheese Custards—Grate three or four ounces of cheese; beat three level tablespoonfuls of butter to a cream; beat two eggs; mix the cheese and butter together, then add the beaten eggs and one tablespoonful of milk; beat all thoroughly; turn into a buttered dish and bake in a quick oven until firm in the centre. Serve as soon as removed from the oven.

Rhubarb Pie—Chop two teacupfuls of rhubarb, and let stand ten minutes in water poured over it boiling hot. Drain, and mix with the fruit, a large teacupful of sugar, the yolk of an egg, a tablespoonful of butter, and one of flour, moistening with three tablespoonfuls of water. Bake in one crust, covering the top with narrow strips of pastry crossed, or a meringue.

Velvet Shortcake—Add one teaspoonful of salt to one quart of flour; dissolve one teaspoonful of soda in one tablespoonful of boiling water; add this to two and a quarter cupfuls of sour cream; then add this to the flour; toss on a floured board; roll out half an inch thick; cut the size of a breakfast plate; place on a hot griddle; when brown on the under side turn and brown on the other; split, butter and serve hot.

Fruit Juice Pudding—Put one cupful of any fruit juice with one cupful of water over the fire; rub three level tablespoonfuls of corn starch in one-third cup of cold water; when the fruit juice and water boil add the corn starch, stirring until it thickens; add half a cup of sugar; beat the whites of two eggs and beat them into the pudding; turn into a jelly mold; place in the ice chest until serving; serve with cream whipped a little.

SCIENCE & MECHANICS

The frequent discovery of new diamond mines in the Transvaal and Orange River Colony is resulting in important orders being placed with British firms for diamond washing and other machinery.

It is likely that a system of power fans will be used to ventilate the New York subway when it is completed. The problem, however, of suitably ventilating the subway will not be formidable, for the reason that the stations are close to the surface of the ground. In this respect the New York system will differ widely from that of London, where the tubes are so far underground that the air quickly becomes vitiated.

The five species of Pacific salmon form a most remarkable group, says Country Life in America. They differ from all other salmon, and, indeed, from all other higher fishes, in the fact that they spawn once for all, and then die. They also furnish splendid sport to the fisherman, and their economic value is enormous. The yearly drain on these species exceeds two hundred and fifty million pounds, the market value of which is considerably over thirteen million dollars.

A muffler or silencer has been devised by an engineer named Henz, by means of which lost heat from a petrol motor is converted into electricity. Only eighteen per cent. of the heat units generated in a motor are transformed into power; seventeen per cent. escapes into the exhaust, while the remaining sixty-five per cent. is carried away by the cooling water. It is the seventeen per cent. of heat units lost through the exhaust that this inventor turns to profitable account, and for the purpose of converting this waste heat into electricity he has contrived a special apparatus. The current obtained from this source the inventor claims to be of sufficient potential to be utilized as a headlight to the vehicle, or to be stored away in an accumulator for use in connection with the electrical ignition.

Dr. Boccara, of the Technical College at Reggio, has been making some critical observations of the famous Fata Morgana of the Strait of Messina, between Italy and Sicily. He saw the apparitions under three forms—marine, aerial and multiple. The marine phenomenon showed the arches on a railway above Messina much magnified and more brilliant than the real arches. They appeared to be standing below the sea-line, with no apparent support. The aerial effect showed buildings of the Italian coast projected on the Sicilian coast beyond; and in the multiple effect, aerial and marine apparitions were visible simultaneously. The phenomenon is that generally known as a mirage, but it is more noticeable at the Strait of Messina than anywhere else in the world, owing to the peculiar variations of atmospheric density.

The Cooking Range's Inventor.

Josiah M. Read, the inventor of a cooking range and a manufacturer of stoves, died at Boston, Mass., not long ago, at the age of ninety-two years. Mr. Read began the manufacture of stoves in Boston in 1839, says Machinery, and invented his cooking range in 1846. It has been erroneously stated that he was the originator of the cooking stove or range, whereas he is, in all probability, only an improver of it. There appears to be no authentic record of who was the inventor of the portable air-tight stove for domestic use. Isaac Orr, who died in 1844, at the age of fifty years, is said to have been its inventor, but the claim is not well substantiated, and, in fact, is proved untrue by air-tight stoves built as early as 1767. The first cooking stoves were made by an adaptation of a baking oven to the box stove, such as formerly generally used in schools, churches, etc. Such a cooking stove was made in 1812 at Hudson, N. Y., by a Mr. Hoxie, but it appears that he was not the originator of the idea, as subsequent litigation developed the fact that his patent claim was based on the fire-box being above the oven, with a flue to carry the products of combustion downward around the oven.

Foot Rules Generally Wrong.

A civil engineer of long experience said the other day: "Most of the foot rules and tape lines used by machinists and mechanics are wrong. They do well enough for rough and ready work, but for nice measurements they are worthless. The reason is that the fine steel measuring devices on the market are too expensive for mechanics. The men who are obliged to measure things of necessity purchase inferior rules and tapes, and the consequence is that little of the work turned out nowadays by the average mechanic is made to an accurate measure in feet and inches. However, this makes little difference, for nowadays most work from machine shops is turned out according to templates and standards used in the shop. The mechanic has but to fit his work to the shop standard and it is all right."—Chicago Record-Herald.

Navel Orange's Popularity.

Nineteen-twentieths of all the oranges now grown in California and Florida are seedless navels, while four-fifths of all the old seedling groves have been by long and patient horticultural processes budded into seedless orange trees. The present market price for the seedless fruit in the orange growing localities show the demand for the fruit.

FOR THE FAIR

LATEST NEW YORK FASHIONS

New York City.—Shirt waists that mbine horizontal with vertical tucks e among the novelties of the season d are shown in a variety of styles.

TUCKED BLOUSE.

stylish May Manton one is th to washable fabrics and y waist cloths and silks. however, is made of and is held by four large the centre of the box

'a of the tucked with the fitted used or omitted s. The fronts al tucks that depth and in w, and are where they is smooth fulness is s at the uggest the Hun-

inches wide or two and three-quarter yards fifty-two inches wide.

A Smartly Trimmed Hat.

A white chiffon hat in the graceful shepherdess shape would be smart trimmed with straws of narrow black velvet ribbon radiating fan fashion over the crown, being caught together at the back under a cut steel crescent. Each little strap should be held at the front by a tiny cut steel buckle. Loops and ends of the velvet should fall over the hair, and a graceful, loose spray of black violets adds to the prettiness. Of course there should be some violets and ribbon tucked underneath on the left side.

Special Pins For Stoles and Collars.

The necessity for special pins to secure stoles and separate lace collars and ruches to gowns is causing many pretty new styles of brooches and pins to be seen in the leading jewelers' shops.—Philadelphia Record.

Motor Skirts.

The new pleated motor skirts are especially smart in all the dust-colored cloths, voiles and coarse alpacas, which latter material is, of course, ideal for the purpose.

Pretty and Simple.

A pretty and simple hat of dark blue straw is trimmed with a thin Persian gauze, a blue foundation, with the pattern in deep color tones. There is only a single feather used with this.

Barbaric in Bigness.

Really nice things, made smartly and in good materials, are almost barbaric this year. One handsome dark blue belt is set with big blue stones nearly as large as robin's eggs.

Misses' Tuck Pleated Skirt.

Pleated skirts of all sorts are much in vogue and are peculiarly well suited to young girls. This graceful and stylish May Manton model is adapted to all the suiting and skirting materials of the season, linen and cotton as well as wool, but, as shown, is of etamine in wool brown and is stitched with corticelli silk.

The skirt is cut in nine gores and is laid in somewhat deep backward turning pleats which conceal all seams.

WOMAN'S COAT.

in style and are made with snugly g upper portions, tucked on con- ines with the waist, and full that are laid in narrow vertical at their upper edges. A SERMON FOR SUNDAY

A BRILLIANT HISTORICAL DISCOURSE ON THE REFORMATION.

The Rev. J. C. Wilson Talks Instructively of That Period When the Foundations of True Religious Liberty Were Laid—Freeing the Mind From Tradition.

NEW YORK CITY.—In the South Congregational Church, Brooklyn, the Rev. J. C. Wilson, associate pastor, delivered a discourse on "The Struggle for Religious Liberty," the subject being "Europe on the Eve of the Reformation." The text was Acts v., 38 and 39: "And now I say unto you, Refrain from these men, and let them alone; for if this counsel or this work be of men, it will come to naught, but if it be of God, ye cannot overthrow it; lest haply ye be found even to fight against God." Mr. Wilson said:

Let me suggest at the outset that the struggle for religious liberty and what is known as the Reformation are not in all respects identical movements. The Reformation was a great tidal wave which swept over Europe in the sixteenth century, out of the vast and troubled sea of the centuries whose waters were greatly agitated by the struggle for religious liberty. It was the culmination of that struggle. It asserted the fundamental principles upon which it had proceeded, and succeeded in laying broad and secure foundations upon which true religious liberty could be built, but it left some of the higher standards and finer ideals unattained. In that respect there is much yet to be desired.

In view of the fact that the Reformation split Europe into two great warring religious camps, it is necessary to remind ourselves that up to that time there had been but one Christian church in Western Europe. And the struggle for religious liberty went on within that church and not outside of it, nor against it, after the first three centuries. Whatever glory and whatever shame attaches to that church during the first fifteen centuries is shared equally by us all, Protestants and Roman Catholic alike. The Reformation itself originated within the Roman Catholic Church, and was led by men bred in her schools and cloisters. We should also remember that the Roman Catholic Church of the fifteenth and sixteenth centuries is not the Roman Catholic Church of the twentieth century and in the United States.

From a very early age religious differences have engendered strife and stirred the most violent passions of men. Although the Jews tasted the bitterness of persecution, that did not prevent them from pressing the same cup to the lips of the early Christians and, with the aid of the Romans, making them drink it to its dregs.

Then were written the first pages in the most sanguinary and thrilling story—a story of unutterable suffering and grim endurance for conscience sake—which history's pages record. It can scarcely be called a struggle. It was as impossible for the obscure and defenseless sufferers to resist their enemies as for a fly to resist the hand that crushes it. Judged from appearances, it was a remorseless massacre, which crushed its victims into the earth. But the real forces that were working out the problem were not on the surface. The odds against which the early Christians were matched drove them to seek refuge in the mountain fastnesses and in the subterranean caverns, known as catacombs. Here they cherished their faith and worship until the violence of their enemies abated. After two centuries they came forth from their hiding places, disciplined by hardship, trained to prudence and foresight by the peril in which they had lived and with a compact and efficient organization. Their leaders had improved their long seclusion to cultivate letters and arts, and soon took leading places among scholars and men of affairs; so that when Constantine succeeded to the undivided possession of supreme power in the Roman Empire prudence, if not preference, moved him to an alliance with them.

Then began a new phase in the struggle for religious liberty. The despised and persecuted Christians, now risen to places of power and possessing the throne in the person of the Emperor, did not abuse their trust. Such was the spirit of sweet reasonableness which animated them that the first Christian Emperor issued an edict of religious toleration, known as the edict of Milan, which granted religious liberty within the empire, on the basis of the sacred rights of conscience; only those religious rites were prohibited which involved immorality, magic or sorcery. Not until the fatal passion for power had been aroused in them by its possession did the Christians resort to persecution. The organization of the Christian church kept pace with its spread in Europe. From Rome as a centre the missionaries penetrated to all parts of Europe. They carried with them the love of the mother church from which they went and bound the churches which they planted to her in gratitude and Christian fellowship. The confidence and affection which she won by her generosity and self-sacrifice in the gospel, she soon came to demand as her right, and when at length the Bishop of Rome secured the political power of his city he aspired to make the traditional capital of the world its ecclesiastical capital also; then, with the policy of military Rome the Christian church adopted, also, the ambitious and relentless spirit of the Caesars. Ecclesiastical Rome usurped the rights of mankind and perverted their liberties as ruthlessly as did political Rome.

Through successive stages the church mounted to the throne of its power until it was more absolute than the empire had ever essayed to be. Men like Gregory the Great, Leo III. and Hildebrand made the most astonishing claims, and absolute supremacy in all human affairs, and treated with the utmost severity all who withstood their claims. Unavailing protests to their astounding pretensions were raised by men like John Scotus, Abelard Arnold, of Brescia and Wickliff, and in the humbler walks of life opposition showed itself in such sects as the Albigenses and the Waldenses, neither of which desired to separate themselves from the Catholic Church, but both of them desired that its pretensions should be moderated and its abuses reformed according to the scriptural requirements of apostolic simplicity and purity. These men were simple minded and their lives were pure, but they were subjected to the most remorseless persecution. Their heroic endurance and unfaltering faith has covered their memory with a halo of glory like unto that which surrounds the early Christian martyrs. During the massacre of the Albigenses, was born the order of the Dominicans, into whose hands was intrusted the institution known as the Inquisition, the most diabolical engine of intolerance and persecution that human ingenuity ever devised.

It is the fate of all despotisms to work their own destruction by a fatal disregard of the limits of human endurance, and when the papacy added the horrors of the Inquisition to the usurpation of the most sacred of human rights, and aggravated her offenses by the flagrant immorality of the clergy, she transcended her limits and invoked the long slumbering and accumulated wrath of centuries, which burst forth in the Reformation, disrupted her solid empire, and caused her the loss of two-thirds of her spiritual children.

Two great movements in the Middle Ages contributed to hasten the triumph of religious liberty in Europe. They were the Crusades and the Renaissance. The religious enthusiasm of Europe, dormant for centuries, was kindled by the fiery eloquence of Peter the Hermit, as he preached a crusade against the "infidel Turks," for the purpose of rescuing the Holy Sepulcher from their hands. It was as when a door is suddenly opened into a house where a fire has been long smouldering, smothered in its own smoke, the whole building is wrapped in a sudden conflagration; or as when a volcano long extinct bursts into sudden activity. A spontaneous uprising, as of one man, unparalleled in history, took place among all classes of people. Kings and peasants, priests and lawyers, merchants and bankers were swept by the same mighty impulse and fired by the same zeal, which for the time burned alike in every breast and submerged calculations and self-interest. All alike were moved to venture life and fortune in the holy cause.

During the space of 200 years seven upheavals of the population took place known as the Crusades, five of them prodigious and two of them only relatively less, all of them mighty. Before the frenzy kindled by Peter the Hermit died out immense treasure was squandered, multitudes of lives were sacrificed and apparently nothing accomplished; total and disastrous failure seemed to attend it all.

But here again we are mistaken if we judge by appearances. For although the Crusaders whitened the plains of Asia Minor with their bones and dyed the grass of Northern Africa with their blood without achieving any permanent results in either Asia or Africa, their exodus from Europe and their return to their former homes were attended by consequences in Europe far greater than would have been the conquest of all the East and the rescue of the relics of all the saints. In the first place they had broken the power of the Saracens by successive inpacts upon them, by prolonged conflict with them.

They had fought fire with fire. Religious fanaticism was matched against religious fanaticism, and it inflicted such punishment upon the rapacious and cruel Mussulman that he has never been able to rally from it. Although he reached the shores of Europe later on, he was exhausted with the struggle, and has continued in a state of languishing impotency ever since. In the second place the Crusades had a marked and lasting effect upon the Crusaders themselves, and in spite of their suffering and losses the gain was greater than the loss, for it brought them into direct and immediate contact with the East, at that time the cultivated and refined portion of the world. Constantinople and Antioch, the two great storehouses of ancient art and learning, and the centres of the wealth and culture of the East, fell become familiar to them. Antioch was for a time in their hands. The splendid buildings, fine fabrics, beautiful statues, costly gems, were a revelation to the Crusaders, and served as object lessons, while the elegant refinements, splendid courtesy, magnificent manners and ancient learning of the East were not without their effect upon the coarse, rude and untamed barbarians of the West. Those who survived the conflict returned with new ideas of the character of the world in which they lived, of the meaning of civilization, of the magnificence of luxuries, and of the delights of Europe. They had been to school and had travelled. Their view of life had been broadened and their minds enriched by contact with superior conditions of life, and a great mental and moral revolution had been wrought in them.

But the Crusades had also an immediate and lasting effect upon Europe itself. For by enlisting in the Crusades the serf bought his freedom from the soil. The debtor was freed from his creditor. He that went out a slave came back a free man with gold coin in his pocket and some new ideas of the world in his head. Serfdom, villainage and slavery were practically abolished in Europe. The cities also had been able, by immense sums of money paid to the hereditary princes, who held lordship over them, to buy their freedom and secure charters for themselves which made them independent in the control of petty rulers, and by the long absence of the nobles in the East, the middle classes had learned to administer their own affairs, and so the backbone of the feudal system was broken and the period of freedom and enlightenment came in. Modern industrialism was inaugurated. New ideas sprang up and a redistribution of wealth and privileges took place, together with a new sense of their own place in the world and new wants and ambitions in the common people. The immediate results to Europe of the Crusades were incalculable. A new spirit of humanity and of enterprise, of hope and of ambition had sprung up, and the death warrant was signed of the ancient regime of ignorance, superstition and terror which had reigned for a thousand years.

The second great movement that hastened the final conflict for religious liberty was the Renaissance or revival of learning in Europe which followed upon the taking of Constantinople by the Turks in 1453. That was a momentous event for Western Europe. It sent hundreds of Greek scholars and literati to find refuge in the West. The learning and the MSS. which they brought with them created a great stir. Schools, academies and universities sprang up everywhere, and the church ceased to be the sole custodian of knowledge. It was as a part of that movement that the University of Wittenberg was established by the Elector of Saxony, to which one Martin Luther came in 1508 as preacher and professor of theology. A spirit of inquiry was awakened, investigations were instituted, and historical and scientific studies were taken up in real earnest. The cold and lifeless formalism that had characterized the logic of the school men disappeared. The study of the Greek and Roman classics became a passion. Princes and potentates vied with each other in securing eminent scholars and elegant literatti to adorn their courts, and the rich and the great became the profuse patrons of learning, and spared no pains and no expense in collecting MSS. and creating libraries and schools of learning. The minds of men already liberated from their ancient thralldom by the Crusades were quickened and enlightened by the new learning which soon spread among all classes of the people.

In addition to these great movements and perhaps as a consequence of them was the spirit of adventure which now broke out simultaneously in Italy and Spain, France and England, Germany and Holland. Inspired by Columbus, a native of Genoa, Italy, hundreds of adventurers braved the perils of the unpenetrated seas in search of new lands, or new passages to the East. New continents were discovered and the globe was circumnavigated. Invention also was quickened, printing by movable types and the manufacture of paper from rags had but recently been invented. The mariner's compass came into general use in navigation. The telescope was invented and the heavens explored for new worlds, as the seas for new lands. The whole period was one of unprecedented mental activity and ferment. Copernicus, by his new system of astronomy, and Kepler, by his laws, were soon revolutionizing astronomy. All of these things had their effects upon the minds of men. The discovery of the size and shape of the earth, of its relation to other bodies in space, of the immense distances in the heavens and the vast systems of worlds in space; the changes of men's ideas as to the centre of the universe and the revelation that it was not the earth, but that the earth was only an insignificant member of a system whose centre was the sun; all served to teach men the uncertainty and instability of things they had been accustomed to regard as established beyond the possibilities of doubt, and led them to expect and accept them to receive changes in other spheres of thought and realms of life. A spirit of skepticism became general and invaded even the church, and everything seemed to conspire upon and conspire to unsettle a single point, until nothing could withstand the combination of forces which worked to free the human mind from bondage and the human spirit from thralldom.

Beginning with the struggle for religious liberty, it ran on to compass the liberty of the whole man and was destined not to stop until he was every whit free. It has already secured for us the liberty of conscience, the right of private judgment, political and personal freedom. But the end is not yet, and what it shall be no man knoweth. But as great and good men as ever fought in any cause fight still in these ranks, which are constantly increasing in numbers, in power and in resoluteness.

The Evolution of Russell.

Until a short time ago F. W. Russell, the apostle of the new land movement in Ireland, was a very unpopular person. He is a man of intense conviction, a born fighter, giving no quarter and asking none. When he removed to Dublin from Cupar-Fife, in Scotland, where he was born in 1841, he became an officer of one of the temperance associations of the city. For twenty-eight strenuous years he was the unrelenting foe of the publicans or saloonkeepers.

At every licensing session there was Russell. What he didn't know about the liquor business wasn't worth knowing. The best lawyers that the trade could obtain might have as well butted their heads against stone walls as try to break him down when he appeared as a witness against applicants for new licenses or as an applicant to have old ones revoked. As he sat on the witness chair, alert, always ready with the right retort, always ready with the facts and figures, he went through a practical training that stood him in good stead when he went into politics later on.—Everybody's Magazine.

Two Death Certificates Required.

Before a body can be cremated in England—and much the same procedure is observed on the Continent—certificates of the cause of death are required from two medical men, one of whom must have attended the deceased. Besides giving general information as to the nature of the malady to which his patient succumbed, the first medical witness is requested to state definitely in writing whether he has any reason to believe that a further examination of the body might be desirable or necessary. The second doctor must conduct an independent investigation, and if the case seems at all doubtful the crematory authorities decline to deal with it. As, moreover, the presence of most mineral poisons may be traced in the ashes, the practicability of cremation assisting a murderer by removing all evidence of his crime is very slight.

Some people spend all their lives looking behind them. N. Y.—26

Gray?

"My hair was falling out and turning gray very fast. But your Hair Vigor stopped the falling and restored the natural color."—Mrs. E. Z. Benomme, Cohoes, N. Y.

It's impossible for you not to look old, with the color of seventy years in your hair! Perhaps you are seventy, and you like your gray hair! If not, use Ayer's Hair Vigor. In less than a month your gray hair will have all the dark, rich color of youth.

$1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

WORMS

"I write to let you know how I appreciate your Cascarets. I commenced taking them last November and took two ten cent boxes and passed a tapeworm 15 ft. long. Then I commenced taking them again and Wednesday, April 4th, I passed another tape worm 25 ft. long and over a thousand small worms. Previous to my taking Cascarets I didn't know I had a tape-worm. I always had a small appetite."—Wm. F. Brown, 194 Franklin St., Brooklyn, N. Y.

BUSY HOUSEWIVES.

Pe-ru-na a Prompt and Permanent Cure for Nervousness.

MRS. LULU LARMER.

Mrs. Lulu Larmer, Stoughton, Wis., says:

"For two years I suffered with nervous trouble and stomach disorders until it seemed that there was nothing to me but a bundle of nerves.

"I was very irritable, could not sleep, rest or compose myself, and was certainly unfit to take care of a household.

"I took nerve tonics and pills without benefit. When I began taking Peruna I grew steadily better, my nerves grew stronger, my rest was no longer fitful, and to-day I consider myself in perfect health and strength.

"My recovery was slow but sure, but I persevered and was rewarded by perfect health."—Mrs. Lulu Larmer.

Mrs. Anna B. Fleharty, recent Superintendent of the W. C. T. U. headquarters at Galesburg, Ill., was for ten years one of the leading women there. Her husband, when living, was first President of the Nebraska Wesleyan University at Lincoln, Neb.

In a letter written from 401 Sixty-seventh street, W., Chicago, Ill., she says:

"I would not be without Peruna for ten times its cost."—Mrs. Anna B. Fleharty.

"Health and Beauty," a book written by Dr. Hartman, on the phases of catarrh peculiar to women, will be sent free by The Peruna Medicine Co., Columbus, Ohio.

BLOOD HUMOURS

Skin Humours, Scalp Humours, Hair Humours,

Whether Simple Scrofulous or Hereditary

Speedily Cured by Cuticura Soap, Ointment and Pills.

Complete External and Internal Treatment, One Dollar.

In the treatment of torturing, disfiguring, itching, scaly, crusted, pimply, blotchy and scrofulous humours of the skin, scalp and blood, with loss of hair, Cuticura Soap, Ointment and Pills have been wonderfully successful. Even the most obstinate of constitutional humours, such as bad blood, scrofula, inherited and contagious humours, with loss of hair, glandular swellings, ulcerous patches in the throat and mouth, sore eyes, copper-coloured blotches, as well as boils, carbuncles, scurvy, sties, ulcers and sores arising from an impure or impoverished condition of the blood, yield to the Cuticura Treatment, when all other remedies fail.

And greater still, if possible, is the wonderful record of cures of torturing, disfiguring humours among infants and children. The suffering which Cuticura Remedies have alleviated among the young, and the comfort they have afforded worn-out and worried parents, have led to their adoption in countless homes as priceless curatives for the skin and blood. Infantile and birth humours, milk crust, scalled head, eczema, rashes and every form of itching, scaly, pimply skin and scalp humours, with loss of hair, of infancy and childhood, are speedily, permanently and economically cured when all other remedies suitable for children, and even the best physicians, fail.

Sold throughout the world. Cuticura Resolvent, 50c (in form of Chocolate Coated Pills, 25c. per vial of 60), Ointment, 50c., Soap, 25c. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Boston, 137 Columbus Ave. Potter Drug & Chem. Corp., Sole Props.

spurs and two horses tails that stuck straight out were soon out of sight. Over the hills and rocks, through barbed wire fences on they went in their wild ride for life. Twice Matlock's horse fell, the last time on the rider's leg, but undaunted he leaped into the saddle and was away. For nine miles to Lexington it was neck and neck and as the little town was reached. Matlock's horse dropped, sacrificed for human life. He secured a fresh horse and striking the road took even chances with the flood. From Lexington the valley widens and the fall decreases, and with the advantage of the road, the swift running horses soon distanced the flood. They beat it an hour to Ione.

"The people were just assembling for church. The whole town was alarmed and there was a wild panic in a rush for the hills, but the people were saved.

"Leslie Matlock and Bruce Kelly undoubtedly saved dozens of lives.

"Heppner was a city of beautiful homes and the main residence portion was located on the banks of the Willow creek for a distance of about two miles. Within an hour from the time the water struck all that was left of this beautiful residence portion were hundreds of piles of wreckage, and death and destruction on every hand.

"From the best information available at this time, the dead and missing will not be far from 250 people.

"While about 150 bodies have been recovered, there are many that never will be found. Alread bodies have been found 10 miles away and it is thought that many have been carried as far as the Columbia river, a distance of 45 miles.

"About 141 residence buildings were wrecked and carried away. With a great many of these buildings not a board remains to indicate that they had ever been built. In the city alone the property loss will probably reach $500,000, while along Willow creek to the Columbia river the loss will foot up many thousands more.

"Many ranches including buildings and crops have been ruined.

"The town is now in a deplorable condition; debris, slime and mud is piled up in great quantities, and it must be cleared away or the health of the people will be in great danger. The homeless and orphan children are being taken care of as well as possible under the existing conditions.

"Heppner's greatest need now is money. The people of the town and surrounding country are worn out under the awful strain and we need money to pay laborers to continue the work.

COMMENCEMENT 1903.

(*Continued from First Page.*)

which especially characterizes the Anglo-Saxon. The majority of the greatest inventions of the world originated in Anglo-Saxon brains. The English people are by far the most inventive people of the old world, and the United States issues four times as many patents as England. It is not strange that a race which has accomplished as much is the richest. The Anglo-Saxon race possesses two-thirds as much wealth as all Europe.

What is the significance of these facts: Do they not clearly indicate that this race of unequaled energy, with all the majesty of numbers and wealth behind it, the representative of the largest liberty and purest Christianity, is destined to become the ruling race in the worlds.

In fulfilment of its omission this race will carry its civilization around the globe, as one marked characteristic of the Anglo Saxon is his genius for colonizing. Glancing back over the history of our country the mind is forcibly struck with the unprecedented territorial expansion. From the original 13 colonies the Anglo-Saxon has radiated in all possible directions. Charles Dickens once said that "the typical American would hesitate to enter heaven unless assured he could go further west." The fortune of war demonstrated that we no more than other nations could live for and by ourselves only. Today we have an influence over the world that no other country ever possessed. We have entered upon a magnificent career, a career that will result in the transformation and Americanization of the world. By this we mean the acceptation of American ideas of personal freedom, political and religious liberty and the right of every man to make for himself his place in the world. In adopting "E Pluribus Unum" as the motto of the United States, our political forefathers unconsciously adopted what seems a fitting motto for the universe, the motto of a perfected civilization, toward which the world is moving and which is destined to be effected through the influence of the Anglo-Saxon race.

James R. Joy, president of the Board of Education, presented the graduates with their diplomas.

The prize winners were: E. W. Adams $15 in gold as first prize in mathematics, and Fred Kline Armstrong $10 in gold for second prize. Matilda Coddington, Ray Martin and E. D. George, Jr., received honorable mention. Leslie Backer, president of the Junior Class received $10 in gold for the greatest improvement in spelling during the year.

The graduates were:

Edgar Whittington Adams, Fred Kline Armstrong, Jennie D. O. Smith Bergman, Florence B. Conroy, Matilda T. Coddington, Marion Alberta Engelhart, Edward Dawson George, Jr., Leah Angela Hammond, Arthur Doland Humble, Frances Ursula Krewson, Agnes La Boyteaux, Edna Antoinette Lewis, Hattie R. McLaughlin, Raymond L. Martin, Mary Hazel Martin, Pope Irene Miller, Minnie Mae Nischwitz, Mary Agnes Seal, Clyde May Slater, Stella Parkins Vermeule, Isabelle Hurlbut Williams, Sadie Adele Winckler.

Samuel Taub, 60 Somerset street for footwear.

Herman Keller, 25 Somerset street, for everything in the tobacco line.

Lake Hopatcong

Lake Hopatcong has become justly famous for several reasons but chief of these is its location. High up in New Jersey's beautiful mountains, a thousand feet above the sea level, surrounded by verdant hills and charming landscape, it is the perfection of outing places. To reach it is a delightful journey through a series of picturesque valleys, and the time the traveler is so occupied feasting on the scenic sight that the few hours journey are like fleeting moments. For a Sunday excursion no place is more popular than Lake Hopatcong, and if you want a day of enjoyment take in the $1.00 excursion to Lake Hopatcong. The New Jersey Central is to run on June 28th. There will be a special train from Plainfield at 9.20 a. m., and the return train does not leave the lake until late afternoon. There is ample opportunity for a trip over the lake or such enjoyment as one may care to indulge in. 2 t

Concerning Proctor's Attractions.

Mr. Proctor's Fifth Avenue house is undergoing many changes for the somewhat erratic summer weather. New coverings are being placed on all the orchestra chairs, and in another week the entire house will be tranformed into a summer theatre. It might also be added that the furnaces were started a few days ago, to avoid the damp of the rainy weather.

To Mauch Chunk on the Fourth.

Everyone just now is making plans for some kind of an outing on the Fourth of July. Too often in the past has the day been followed by vain wishes that it had been spent in some other way than the one selected, but no such regrets ever attend the trip to Mauch Chunk. Many people travel half over Europe without viewing more romantic scenery than in this, the so-called "Switzerland of America." Rugged mountain peaks are in awe-inspiring contrast to deep chasms and gorges while there is hardly a spot in this section where the artist does not long to plant his easel or the amateur photographer to expose a plate. And the beauty of it is that the jaunt may be made at very moderate expense and within the limit of a day's outing. The New Jersey Central announces an excursion on July 4th to Mauch Chunk, Glen Onoko and the Switchback, the round-trip costing only $1.50 for adults and 75 cents for children. It is alone worth the trip to have experienced the novel ride of 14 miles over the gravity road known as the Switchback. There is nothing quite like it anywhere in the country. While it is exciting, the most timid have nothing to fear for the trip is quite safe. A fast special express train will leave Plainfield at 9.22 a. m. and arrive at Mauch Chunk about noon. There is ample opportunity to see and enjoy everything as the return train does not leave until 5.40. The nearest ticket agent will supply circulars giving full details. People who decide to make this excursion will have something to remember all their lives and much to tell their friends.

WANT TO SELL
YOUR PROPERTY?
If you do it'll certainly pay you to have your house painted. Then, too, papering and decorating will enhance the value greatly.
I do this sort of work carefully, attractively, stylishly. Prices not high, either.
Let me estimate on your next job.
JAMES C. HANSEN,
141 East Front Street.

ELECTRICAL INVENTIONS
for producing light and sound, and the burglar alarm to trap the midnight marauders, are only a few of the many devices to be found in our stock of
Electrical Goods.
It's a pleasure for us to show them and give you figures for putting them in. Every shoe fits not every foot, but we can fit everybody in matters Electrical.
WILLIAM H. POPE,
—Electrical Contractor—
116 North Ave. Tel. 2441

MEAT That Gives STRENGTH
may be hard to get, perhaps but we've got it! Plenty of it here, cut from young,
Plump, Tender Stock.
Every pound sold here is rich in nourishing juices, and so tender that it almost melts in your mouth, etc.
COME AND SEE US.
Fred Endress
131-135 W. Front Street.

SMALL ACCOUNTS
Accounts of $5.00 or more will be received in our Special Department. On such accounts 3 per cent interest will be paid on all sums deposited for a term of three months. This term begins on the first of every month and interest is compounded semi-annually.

The funeral services of Mrs. Mary Henry, widow of James Henry who passed away Thursday morning at her home on Linden avenue, this borough, after a long illness, were held yesterday afternoon at the residence of her stepdaughter, Mrs. Edward Winter, East Fifth street, Plainfield. Mrs. Henry was seventy-nine years old.

Comes Out Ahead of Time.

Publication day coming on the Fourth

A Large Society Wedding.

Miss Edith Hyde, only daughter of Mrs. Charles Hyde, of East Front street, and Everett Colby, of Orange, N. J., were married at the Crescent Avenue Presbyterian Church, Tuesday afternoon by Rev. W. R. Richards, D. D., a former pastor of the church.

The organist for the occasion was James M. Helfenstein, of Grace Church. A choir of nineteen boys, also from Grace Church, marched in the bridal procession singing, "O, Perfect Love."

The church was beautifully decorated. The color scheme carried out in green and white was made up of palms, white chrysanthemums, bride roses, smilax and white-fleur-de-lis.

A reception was held at the home of the bride's mother, from 5 to 7 o'clock, after which a wedding supper was served.

The newly wedded couple will go abroad on their wedding trip.

Sad Death of Mrs. T. E. Burroughs.

Mrs. T. E. Burroughs, daughter of A. V. Searing, Sr., of this borough, passed away yesterday afternoon at her late residence, 103 Somerset street. The deceased leaves a husband, and a little daughter one week old.

Notice of the funeral will be given out later.

Mrs. Clawson at Rest.

The funeral services of Mrs. Clawson, wife of Frank T. Clawson, of Plainfield, were held from the home on West Seventh street, Monday afternoon. Rev. Dr. W. R. Richards, of New York City, a former pastor of the deceased, officiated at the services. Interment was made in Hillside Cemetery.

Death of Mrs. Finger.

Mrs. Catherine M. Finger, wife of the late Peter Finger passed away at her home, Monday.

The funeral services were held from her late home on Pearl street, this borough, Wednesday afternoon. Rev. Dr. Charles Herring, pastor of the First Presbyterian Church, Plainfield, officiated. Interment was made in the New Market Cemetery.

A Desirable Home Location.

Anyone wishing pure mountain air, pure water, city conveniences and good schools, cannot make a mistake in locating in North Plainfield. It is a borough composed of handsome residences, with the Watchung mountains forming a beautiful and restful background.

To know that people appreciate the desirability of making a permanent home here, one has only to drive around the borough and note the many new residences being erected.

List of Teachers for North Plainfield Schools.

Band Concert Thursday Night.

The first of a series of band concerts to be given in the City Park, Plainfield, under the leadership of Benjamin La Vere, will take place next Thursday night.

The following program will be given: March, "My Own United States," Edwards; overture, "Der Tambour der Garde," Till; concert waltz, "Symphia," Holzman; cornet solo, selected, Albert C. Sweet; medley, "The Curtain Raiser," Smith; characteristic, "Dance of The Skeleton." Allen; intermezzo, "Cavallier Rusticana," Mascagni; idyl, "Hiawatha." Moret; a tone poem, "Sunbeams and Shadows," Heiser; final, "Victorious

has been continued during May and June at the Park Golf Club, closed Tuesday afternoon. Miss Helen Phillips won the cup with a total of 7 points. The other contestants scoring points were: Mrs. C. L. Goodrich, 6½; Miss May Shreve, 4½; Miss Jackson, 3½; Miss Wells, 3½; Miss Miller, 3; Miss Helen Shreve, 2½; Miss Loizeaux, 2½; Miss Clark, 2; Miss Saidee Mae Howell, 1½.

Golden Eagle Knights Elected.

Last Tuesday evening the following officers were elected for Freedom Castle, No. 41, K. G. E.: Noble Chief, C. T. Vail; vice chief, H. J. Martin; sir herald, W. J. Allen; high priest, C. M. Luckey; venerable hermit, L. A. Hummer; trustee, eighteen months, W. E. Cranston. Officers will be installed Tuesday evening.

Juniors Install Officers.

At a meeting of Franklin Council, Jr. O. A. M. Thursday night the following officers were installed:

Junior Past Councilor, Russell Hazard; councilor, Harry Winn; vice councilor, Harry De Hart; recording secretary, David Bodine; assistant, Foster Hartpense; financial secretary Ephraim Compton; treasurer, T. E. Currin; conductor, Clarence Bilyeu; warden, John Kleiner; inside sentinel, Sidney Winn; outside sentinel, B. F. Bennett; trustee, William Kriney.

The Somerset Courts.

In the Orphans' Court Friday Senator Van Cleef of New Brunswick said there were about 300 heirs-at-law in the estate of the late Richard H. Van Cleef of Millstone. The estate is worth about $16,000. Mr. Van Cleef was awarded a counsel fee of $500.

In the Isaiah Coriell estate argument was heard on the rule to show cause why counsel fees should not be paid. One of the lawyers was offered his fee, but refused it, claiming there was interest due on it.

The accounts in the Jacob J. Vreeland estate were passed. Bartime & Beekman were awarded a counsel fee of $450.

The hearing on the exceptions in the estate of Eugene Hoerster of North Plainfield was postponed until July 17.

In the Jacob Pantley estate the rule to show cause why the order to sell lands to pay debts should not be set aside was laid over until Oct. 30.

Let the Good Work Go On.

A much-needed street improvement has been made at the junction of Westervelt and Grandview avenues by putting in new drain pipes. Now if the authorities will only lay a cross-walk or two over Westervelt avenue, that end of town will be quite comfortable in that respect. Between the brook and the mountain there are only two crosswalks—one at the brook, the other at Jackson avenue. For a distance of five or six blocks there is no crosswalk at all, except a temporary board walk at Grandview avenue.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

The huckleberries are beginning to ripen in some sections of Salem county. The bushes are well filled and considering the drought the berries are of good size. The yield promises to be equally as large as last year.

The work of excavating for the house for Richard McCurdy, on South street, Morristown, started Tuesday. The building is to be 153 feet long, with driveways on both sides. It will be constructed of brick, with stone trimmings, and will be two stories high.

Another freak has been added to Peapack's rapidly growing list. The latest is said to be the most curious of all—a red squirrel with a pure white tail. It inhabits the grove in the vicinity of the residence of Professor C. L. Bockoven. Another white robin has also been seen there.

The Mercer County Fox Hunting Association, tired of the anise bag and unable to procure satisfactory foxes, has decided to attempt an innovation. To this end four cub wolves were purchased last week, and will be prepared for a grand run shortly. It is thought that the wolves will make satisfactory substitutes for the foxes.

Andrew Morton, a member of the Newark Bay volunteer Life-saving Corps, recovered on last Sunday from the mud at the bottom of Newark Bay a set of false teeth that fell overboard from the mouth of a young woman on board the vapor launch Sadie. He was rewarded with two crisp one dollar bills.

John R. Jordan, of Pedricktown, has a wonderful rosebush. None of the roses borne by the bush this season have [illegible] than thirteen inches in

the Paul Nerpo variety.

Mrs. Elizabeth Lance, of Cokesbury has a turkey hen which began hatching with nineteen eggs about five weeks ago, and within due time nineteen little turks appeared therefrom. All the while she was hatching the old hen laid an egg every second day, and laid twenty-nine eggs before she wanted to hatch. Her brood is growing nicely and she lays an egg every other day.

The infant child of Mr. and Mrs. Ernest Longstreet, of Keyport, has the unusual distinction of having eight grandparents living. They are Mr. and Mrs. A. P. Longstreet and Mr. and Mrs. W. S. Brower, grandparents; Mr. W. S. Brown, Sr., and Mr. and Mrs. Louis Rogers, great-grandparents, and Mrs. Elias Seabrook, Sr., a great great-grandmother. All of these are residents of Keyport.

A secret drawer, whose hidden spring was accidentally touched while a piece of furniture was being cleaned brought to light some interesting relics at Vineland. They were once the property of Henry Manley, who left them to his son, Henry T. Manley. One was a Tippecanoe medal. There were also 20 shilling notes, issued by Delaware in 1777, and various certificates of certificates of stock nearly seventy years old.

The peach growers of Sussex county have had their share of trouble this spring. The long spell of dry weather caused much of the fruit to drop, and then the wet weather caused a few peaches to rot. Twice the frosts nipped them and now has come the leaf curl, which attacks many varieties, but particularly the elbertas, causing the leaves of the trees to swell, curl up and die and then drop. Despite all these misfortunes the peach crop, especially in the Vernon Valley, the most prolific section in New Jersey, promises to be an average yield.

Enough money has been subscribed to insure the purchasing of the toll road between Seabright and the Highlands. Mayor George W. Elliott will appear before the Board of Freeholders next Wednesday, taking with him a certified check for $1,000, which will insure the passing of the road from one of toll taking to a free drive. The Freeholders at a recent meeting, appropriated $3,000 for the purchase of the road. The turnpike officials wanted $5,000, but agreed to compromise on $4,000. The cottagers have raised the $1,000, and the last toll road in existence in Monmouth county will be made free.

There is much mystery over the finding of a man's skeleton at Franklin Furnace a few days ago, in an old abandoned cellar, which the contractors were cleaning of rubbish, preparatory to erecting a new house on the foundation. It is the property of Peter Cummings. One or two of the oldest residents have a dim recollection of a house standing on the foundation more than fifty years ago, but nothing further can be definitely learned. The skeleton was found surrounded with lime, and six feet under the outside stone cellar steps. The bones will be buried by the county, and with them, in all probability, the mystery.

Benjamin Redfield, of Highland Park, and Miss Mary J. Cunningham were married Tuesday afternoon at the residence of the bride's aunt, Mrs. Jane Faulkner, 27 Dennis street, by Rev. E. B. Joyce. Following the ceremony the bridegroom's friends, members of Pheonix Engine Company No. 3 placed the newly married couple, the bridesmaid, Miss Kathryn Ryno, and best man, Walter Church, on one of the big trucks of the engine company and drove them around town, through all the principal streets of finally taking them to the Pennsylvania Railroad Station, where Mr. and Mrs. Redfield boarded a train for the South.

To Save Lives as Well as Souls.

Howard Roland Reiter, '98, of Philadelphia, Princeton's famous halfback of the '96 and '99 Yale championship football games, passed a brilliant examination at the New Brunswick Presbytery meeting, held at Ewing, N. J., and received a license to preach. Reiter will leave for Ocean Grove, where he will act as a life guard during the summer and preach on the Sabbath.

In Modern Athens.

No place is more renowned as a tourist resort than the glorious City of Boston. First as a seat of learning and second as an historical centre about which is gathered innumerable revolutionary associations than which none are more renowned or more interesting. The City is famed for its hospitality, and nothing is known as the "Cradle of Liberty"—The old State House, now a museum of revolutionary relics—The North and South Churches which figured prominently in the early struggle—Bunker Hill and its interesting surroundings—The scene of the Boston Massacre and the location of the Boston Tea Party, while within a short distance by rail are the historic spots of Plymouth, Salem of witchcraft fame, Lexington and Concord, where that most eventful fray occurred, while Medford, Cambridge, Hudson, Lynn, Marblehead, teem with the memories of events well known in history.

The Parks in Boston are grand productions of the landscape artist, and these reservation covers hundreds of acres all easily accessible. Cambridge, close to Boston is the seat of famous Harvard while Concord treasures memories of Hawthorne, Emerson, Alcott, Thoreau and others, fully illustrous. The National Educational Association meets in Boston July 6th to 10th, and the New Jersey Central is prepared to furnish reduced rate tickets for this occasion from all points on its line. For information write W. C. Walsh, Jr., D. P. A., Newark, N. J. J. E. Whyte, D. P. A. Asbury Park, N. J. H. E Ruhe, D. P. A., Allentown, Pa., J. S. Swisher, D. P. A., Scranton, Pa., or C. M. Burt, G. P. A., New York City.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Anna C. De Klyn et al to Percival S Browne, et al $1.

George Hummer et ux to Jane B. De Mott, $1.

Marion C. West to Ogden M. Hetfield, $1500.

Nelson W. French et ux to C. Frank French, $250

M. Carrie Hart and husband to C. Frank French, $1.

Tickets to New Jersey's Popular Shore Resorts.

The Ticket Agent at Broad Street Station, C. R. R. of N. J. is now supplied with a full line of commutation, 50 trip, 109 trip and season tickets to all Seashore points, Matawan to Pount Pleasant inclusive. Pamphlet containing information regarding rates, hotel accommodation, &c., on application to Mr. W. C. Walsh, Jr., D. P. A., 838 Broad Street, or Mr. C. M. Burt, Gen'l Pass'r Agt., New York City.

In another column will be found the advertisement of Carl Silbert, 15 Somerset street. Mr. Silbert has been engaged in the general jewelry and watch repairing business for over twelve years, and has by his perseverance built up a fine trade.

New Boardwalk Dedicated.

A big parade will be held on the new boardwalk this (Saturday) afternoon.

The procession, headed by Vought Burke, the Englishtown giant, dressed as Uncle Sam" will be composed of a battalion of Ocean Grove's youthful rough riders, the various secret orders, the Grand Army, the local militia, citizens and officials of the resort.

The boardwalk dedication will occur soon after noon. Tali Esen Morgan's Ocean Grove Orchestra and choir will sing and play, the Declaration of Independence will be read and Rev. Dr. William R. Wedderspoon will deliver an oration. Governor Murphy and Court Justice J. Franklin Fort, of Newark will deliver brief addresses.

The occasion promises to be one of unusual interest.

July Book News.

"Book News" for July is a "Summer reading" number. A descriptive list of fiction appropriate to the vacation and summer months has been carefully compiled, together with a full list of the latest, most useful and interesting nature books and works on sports. The remainder of the number is devoted to its usual pursuits, the review columns being surprisingly full for this time of the year.

Concerning Proctor's Attractions.

An interesting fact to note in glancing ahead at the next theatric season is what might be termed "the survival of the fittest." Of the many stock companies in existence during the past few years the last formed and newest—Proctor's Big Stock Company—is the only one remaining. When Mr. Proctor announced his intention of changing his policy from vaudeville to stock, it seemed to be the general impression that success lay, if at all, in the dim distant future. The present wonderful prosperity bears out the acumen of his judgment. Not only did the new plan acquire instant recognition from the theatrical world at large, but the New York public seemed delighted at [illegible] coming season the company will even surpass in general excellence that of last; and this, it must be acknowledged, is saying much, for the salary lists of the various Proctor Stock Companies excel those of any other stock companies in America, by a big margin.

Notwithstanding the fact that Summer is here to stay, the quality and quantity of the high class vaudeville that has been characteristic of Proctor's Twenty-third Street for so many years will remain the same. The change of seasons is not feared by Mr. Proctor, and Summer weather sees the ideal show afternoon and evening as those booked during the Winter months. Many new novelties have been "searched out" during the last few months, and will be produced in rapid succession at this model playhouse during the season.

The "shoppers' district" can boast of a most pleasant theatrical retreat in Mr. Proctor's well known Twenty-third street house. A lady shopping in this fashionable district can always find at Proctor's a comfortable seat in which to rest, a good show to please the eye and ear, and most courteous attendance to her every want.

Over in Newark, at Proctor's, during the summer season the business has been enormous, owing to the general good shows, beautiful playhouse and rapidly increasing patronage. This theatre, in the short time it has been in existence, has pushed its way in front, and is now termed the only vaudeville retreat in New Jersey.

Have you seen one of those daintily illustrated souvenirs of the F. F. Proctor Theatres? A two cent stamp sent to the Advertising Agent at Proctor's Fifth Avenue Theatre, New York City, will secure one, and it is well worth sending for. It is handsomely printed by the famous Van Fleet Art Printery, and, with its fifty half tone photographs of the favorite members of the Proctor stock, it is certainly a valuable brochure.

At Proctor's Fifty-eighth Street Theatre, the handsomest and most spacious playhouse on the Middle East Side, a supplementary summer season of light comedies, interpreted in a capable and careful manner by a thoroughly clever company, has been most successfully inaugurated. This house is always cool and comfortable, even in the most sultry weather.

Warren Chapel Pulpit Supplied.

The following ministers will occupy the pulpit of Warren Chapel during the absence of the pastor, Rev. J. O. McKelvey: Rev. Frank McDonald, of Bucknell University, July 5, 12 and 19; Rev. Alexander Irvin, of New Haven, Conn., July 26; Rev. G. M. Conover, of West Nyack, N. Y., August 2, 9, 16 and Rev. Fred Newman, of Trenton, N. J., August 30.

KAISER AMERICA'S GUEST

He Has Luncheon on the Warship Kearsarge at Kiel.

HIS PRESENT TO THE FLAGSHIP

Emperor William Expresses the Hope That the American and German Flags Will Meet Only in Friendly Rivalry — Offers Gifts to Marines Which, Are Declined—Our Tars Ride in Carriages.

Kiel, Prussia.—When Emperor William was congratulated at the launching of the German armored cruiser Roon, on his yacht Meteor winning the American cup, he replied:

"The American skippers brought me luck. I would not have won if they had not been with me."

The Roon is the eleventh of Germany's armored cruisers. She was christened by Countess von Waldersee. The American squadron saluted the new cruiser.

Emperor William and Prince Henry of Prussia took breakfast with Admiral Cotton on board the Kearsarge. In the party also were the German Admirals, Ambassador Tower, Chancellor von Buelow, Admiral von Tirpitz, Imperial Secretary of the Navy; the principal members of the Emperor's household, all the members of the United States Embassy, Mr. Meyer, the American Ambassador to Italy, all the captains and executive officers of the American war ships and Admiral Cotton's staff, Cornelius Vanderbilt, R. W. Goelet, J. H. Smith, James Lawrence and Edmund Bayles.

Admiral Cotton referred to the large-hearted hospitality that had made every hour of the Americans' presence in German waters pleasant. Since he had met the Emperor he understood why his subjects were so devoted to him. The Admiral then proposed the health of the Emperor.

Replying, Emperor William said he hoped, whatever impressions the Admiral and his officers had received, they had been no more than they had expected. The only thing was the visits were too far apart. He was convinced that whenever the Stars and Stripes and the royal standard met they would together symbolize peace and civilization.

The Emperor then called for three cheers for the President and the people of the United States.

At the conclusion of the breakfast the Emperor informed Ambassador Tower that he wished to give a medal to each of the three marines who had stood behind his chair.

"I am sorry to say that our regulations do not permit it," replied Mr. Tower.

"Then," replied the Emperor, "I would like to give them watches, just as souvenirs."

[illegible] answered the Ambassador, [illegible] They greatly [illegible] presents at the opera, and could not accept."

"Then," said Emperor William, "tell them that I have the disposition to do so."

The Emperor has presented the Kearsarge with a silver punch bowl and cover, about sixteen inches high and more than two feet wide.

There was nothing whatever to complain of regarding the behavior of the American sailors who were allowed ashore. They were welcomed along the water front, and the shops and restaurants engaged interpreters for their convenience. Signs were displayed everywhere: "Americans are welcome to Kiel." The American tars caused wonderment to the Germans by driving around in carriages and cabs. At least half of Kiel's limited supply of these vehicles was thus nightly employed.

MEXICAN MINE DISASTER.

Twenty-four Killed in an Explosion and About Fifty Others Injured.

Barratoeran, Coahuila, Mexico.—Twenty-four miners were killed and about fifty others injured in an explosion of gas that occurred in Las Esperanzas coal mines, the property of the Mexican Coal and Coke Company. The disaster was caused by the ignition of the gas by the flame from a defective lamp.

After the shock of the explosion those who were able to move rushed for the exits, but the falling earth and debris carried many down to death. Of those who got out of the mine few escaped without injury.

SERVIAN ASSASSINS' ODD PLEA.

Claim They Were Incited to Murder by King Alexander's Secretary.

Belgrade, Servia.—King Peter attended the services at the Cathedral without any escort. The official account of the recent assassinations, based on an investigation made by the War Minister, is expected to be published shortly. It is understood that it will say the conspirators did not intend to kill their Majesties, but only to deport them; but they were incited to the murder by the attack of Lieutenant Petrovics, the King's Secretary, who fired the fish shot.

$400 Damages For Being Called a Jackass

It is expensive to call a man a jackass in Kansas. Robert Sands, a Marion County farmer, applied this epithet to his neighbor, Wert Sanders. Sanders sued him for slander and $2500, and secured a verdict of $400. Sands has appealed the case to the Supreme Court. Now that tribunal will have to fix the proper punishment for calling a Kansan a jackass.

Three Negroes Lynched in Georgia.

Three negroes, Garfield McCoy, Geo. McKinney and Wiley, were taken from jail at Newton, Baker County, Ga., and lynched. The three men killed F. S. Bullard, a white man, who was called to stop a quarrel at a negro dance. The negroes were hanged to a tree and riddled with bullets.

Postmaster-General Will Not Resign.

At Washington it was authoritatively announced that Postmaster-General Payne will not resign unless his health breaks down.

TRAIN PLUNGES INTO RIVER

Nearly 200 Passengers Killed in Spanish Railway Wreck.

SCORES OF VICTIMS DROWNED

Some Cars Shattered on the River Bank by a Fifty-Foot Fall From a Bridge—Worst Disaster in Spanish Railroad History—Only Six of All the Passengers Escape Injury.

Madrid, Spain.—A shocking accident occurred on the railway between Bilbao and Saragossa. A heavily laden train was being drawn by two engines when the coupling between them broke.

One of the engines escaped, but the other was derailed on a bridge and fell over the edge, dragging with it the entire train to the river below. The train consisted of sixteen coaches, all of which were destroyed.

The accident occurred on a bridge over the Najerilla River. The train plunged fifty feet. Some of the coaches did not go into the water, owing to the river being low.

They fell on the bank and were shattered into splinters. Many of the passengers were caught under the debris, and some of the killed were in these cars.

The scene was one of the wildest confusion, which was added to by the cries of the injured.

Some of the foremost cars were completely submerged and their occupants were drowned, not having any chance of escape. The river was tinged red with the blood of the injured. The river runs through a ravine of wild picturesqueness. The engineer and fireman were scalded to death.

It is believed that 170 passengers were victims of the disaster; only six escaped without injury. It is the worst disaster known in the history of Spanish railroading. Among those on the train were a party of wealthy mine owners, who were going from Bilbao to Teruel to purchase mines. One of the railway guards was caught robbing a dead passenger of a pocketbook containing $400.

Differences between the civil and military authorities rendered the work of rescue more difficult. That many prosperous persons are among the victims is shown by the great quantity of money and jewelry collected by the gendarmes.

HIS WIFE HIS SURGEON.

Mrs. Logan Operates on Her Husband, a Missionary in China.

Bethany, Ill.—Advices from China say that Dr. W. H. Logan, formerly of this city, has entirely recovered from an attack of appendicitis. The Logans have been missionaries in China for a number of years. Their station is 800 miles from the [illegible]

[illegible] moval of the organ, he called his wife and imparted a diagnosis of his own case.

Mrs. Logan, unassisted, but guided by the instructions given before her husband's relapse into unconsciousness under anaesthetics, performed the operation. Under skilful ministration of the wife-nurse, such favorable progress was made toward recovery in a short time that Mrs. Logan determined to remove him where he could have the benefit of skilled surgeons. She, her husband, and a young baby undertook the journey of 800 miles by rail and wagon, where attention could be secured.

Dr. Logan had to submit only to a superficial treatment, and was confined to the hospital but a few days.

The same advices that tell of the heroic work of Mrs. Logan state that they have resumed missionary work among the Celestials.

SCIENTISTS SEE "MOTHER" EDDY.

They of the Christian Cult Visit Founder's Concord Home in Thousands.

Concord, N. H.—The hundreds of Christian Scientists who have been visiting this city were swelled to thousands by those who came here in response to an invitation of Mrs. Mary Baker Eddy to visit her home.

This invitation was received by the communicants of the mother church in Boston at the annual communion service. It is estimated that from 12,000 to 15,000 Scientists have responded to the invitation. Appearing on the balcony, Mrs. Eddy spoke to the assembled throng, bidding them welcome to Concord and to Pleasant View and wishing them a safe journey to their homes. As she retired the visitors sang two hymns composed by Mrs. Eddy and she appeared at a window and waved her handkerchief in final farewell.

NEW KENTUCKY FEUD MURDER.

Discussion of the Jett-White Trial Leads to a Killing.

Jackson, Ky. — In a feud fight in Daisy Dell, Breathitt County, Hiram Bartell was killed and John Henry Hecker and Joseph Hecker were wounded seriously. The men, with Samuel and Silas Barnett, met in the home of Miss Lelia Burns, niece of Burns Fitzpatrick, who was the only juror against the conviction of Curtis Jett.

While discussing the course of Juror Fitzpatrick, John Henry Hecker, the friend of Miss Burns, resented what was said, and all soon began shooting. No one can tell who fired the shots.

For the first time in months evening church services were held. The citizens have been afraid to leave their homes after dark.

"Franklin Syndicate's" Lawyer Sentenced

Colonel Robert A. Ammon, convicted of receiving $20,000 of "Franklin Syndicate" funds, at New York City, was sentenced to Sing Sing for not less than four years. His counsel applied to Justice Truax for a certificate of reasonable doubt.

Will Be No Financial Legislation.

Representative Cannon, who is to be Speaker of the next House, at Washington, has declared that there shall be no financial legislation, saying it is demanded only by Wall Street.

THE PRESIDENT AT HOME

Oyster Bay Citizens Give Him a Rousing Welcome.

UNVEILS A TROPHY CANNON

The Warm Welcome Made More Demonstrative by Rival Committees—Roosevelt, in a Speech, Says He is Just a Neighbor, and Alludes to His Trip Across the Continent.

Oyster Bay, N. Y.—President Roosevelt returned to Oyster Bay, amid intense enthusiasm, and the "summer capital" of the United States is now established at Sagamore Hill.

Two rival sets of citizens of this ordinarily quiet village vied for the honor of first greeting him. There were two bands, which sometimes played different tunes at the same time; two marshals, two well-defined parts in the parade, and two baseball games.

The Presidential special got in at 4.30 o'clock, five minutes late. The station platform and the space for a considerable distance near it were packed with people. When Secret Service men and detectives piled off and got busy with the crowd, the President, accompanied by Secretary Loeb, appeared on the rear platform of the train. A mighty shout went up and the air was filled with fluttering handkerchiefs and swinging hats.

More than 600 children from the Cove school, which President Roosevelt's children attend, and from the High School here were drawn up before the train arrived in two lines along the avenue. The girls were all dressed in white and each carried an American flag. The two brass bands also were there. One in military uniform played for the Board of Trade, the school teachers and the school trustees. The other band belonged to Maurice E. Townsend's staff.

Townsend announced a few days ago that the Board of Trade committee for the celebration did not contain representative men. He proposed, he said to get up a celebration that would be of the people. He had seven colored veterans of the Civil War and about as many old white soldiers, besides himself, backed up in front of his band at the entrance to the station as the President, flanked by the Secret Service men and the detectives, started off on foot through sand several inches deep up Andria avenue. Townsend's tooters didn't toot, and the Board of Trade's uniformed musicians fell in behind the President in the place of honor.

But they didn't play, either, and it was said that this was a part of the compromise effected between the factions—that the Board of Trade's band should lead the way up to the Town [illegible] after the exercises.

The President and his escort had not gone far between the lines of cheering school children when a short, thickset man, without hat or coat, rushed out and made for the President with outstretched arms. The Secret Service men sprang at him. One landed with his fist on the man's jaw and knocked him completely over the rope at the side of the road. As the intruder fell his shoulder struck a little girl in the chest and she went down, too. The breath was knocked out of her, and it took several minutes to bring her around. The man who ran into the road said he only wanted to shake hands with the President.

Mrs. Roosevelt and five of her children, Quentin, Kermit, Archie, Ethel and Theodore, Jr., with Mrs. J. West Roosevelt, were at the Town Clerk's office waiting for the President. The President waved to them as he came up. There he stepped over quickly to the old Civil War cannon which the Navy Department recently presented to the Oyster Bay Board of Education and unveiled it. Turning, he greeted his family and then called loudly for a chair to stand on. Everybody was cheering when he began to speak and he had to make two or three starts before he could make himself heard.

President Roosevelt began by saying that he thanked his friends and neighbors more heartily than he could express for coming out to greet him. He referred to his recent trip across the continent, and what impressed him most on that journey, he said, was the essential unity of the American people. He was glad to be back among those whom he knew so well, and to whom he is not the President, but their old neighbor and friend. He was particularly pleased to see the children, in whom he believes, and those of Oyster Bay seemed to be all right in both quality and quantity. In closing he said he was deeply touched by the warm greeting which he had received.

The President and his family started for Sagamore Hill in two open carriages. Immediately after the exercises Townsend and his band started right in behind the President's carriage. "Marty" tried to shake hands with the President over the carriage wheel. A Secret Service man connected with him and Townsend went to the roadside. The President saw him, beckoned to him and "Marty" got his shake.

On Sunday the President and his family attended the Christ Episcopal Church, of which the Rev. Dr. Washburn is pastor. The President spent the greater part of the afternoon strolling about the grounds of his home. He sat on the piazza and later took a short drive. The President will spend much of his time driving with his family.

BIG IRRIGRATION SCHEME.

Nearly 3,000,000 Acres Set Aside in the State of Washington.

Washington, D. C.—The Interior Department has withdrawn from all forms of settlement except homestead entry 127 townships in the Walla Walla, Waterville and Yakima land district, in Washington State, under the Reclamation act. This withdrawal, involving almost 3,000,000 acres, is the largest in the recollection of officials here, and is for irrigation purposes in what is known as the Big Bend project.

KILLED IN MINE DISASTER

Only Forty-six Men Rescued at Hanna, Wyo.

SCORES ARE BURIED ALIVE

An Explosion Blocks Exits and Entombs All Not Instantly Killed—Many of Those Rescued Unconscious—Special Train Bears Relief—Number of Dead Estimated at 234.

Hanna, Wyo.—Hanna was the scene of a terrible disaster when an explosion of fire damp in Mine No. 1 of the Union Pacific Coal Company snuffed out the lives of 234 men, injured scores of others and caused the destruction of a vast amount of property.

The mine was not fired, as was stated in the earlier reports, but the explosion was terrific and completely shattered the timbers of the main shaft and numerous entrances, filling the workings with debris, and those of the miners that were not killed outright by the explosion were buried alive.

The explosion was heard for many miles around and attracted people from the adjoining settlements. Huge timbers and railroad iron were hurled 300 feet from the mouth of the shaft.

Superintendent E. S. Brooks and a large force of men began the work of removing the debris from the shaft that they might reach the entombed miners. Their progress into the mine was blocked by the foul gases and several times they were forced to return to the surface.

All day the rescuing party worked, the force being increased from time to time by the arrival of ranchmen and others from nearby settlements and by that of a relief train sent out from Rawlings, which arrived at 2 o'clock in the afternoon. About 1 o'clock four men were taken out alive, and a half hour later they were followed by forty-two others. Many were unconscious and had to be carried from the workings.

Two hundred and eighty-two men went down into the mine at 7 o'clock a. m., and up to a late hour at night only forty-eight had been accounted for. Of this number two were dead.

Some of the miners who escaped say they saw twenty dead bodies in entry No. 17. They reported that many of the men were crazed by the explosion and ran hither and thither in the mine.

Many of these could have escaped, but they lay down, buried their faces in their hands and gave up the fight. Of the 234 dead about 175 were married and leave large families. About 100 were Finlanders, fifty were colored and the rest were Americans.

The Havana mines are the best on the Union Pacific system, having been [illegible] new property. It has twenty-six entries, fifteen miles of workings, and a main incline shaft of one and one-half miles in length.

The mine has been recognized as a dangerous property for some time on account of the large amount of gas, but the system of ventilation has been so good that an accident was not anticipated.

TEXAS OFFICIAL MURDERED.

State Controller Love Shot by Man He Had Discharged.

Austin, Texas.—Frenzied by supposed wrongs, W. G. Hill, a former attache of the State Controller's office, entered the private office of Controller R. M. Love and shot him to death.

As Hill turned to flee he was intercepted by Chief Clerk Stevens of the department, and in the scuffle Hill's revolver was accidentally exploded. The bullet entered Hill's abdomen and he died three hours later.

Hill had been an employe of the office for ten years preceding Mr. Love's term. He was discharged by Mr. Love when the latter took charge, and it is presumed that this preyed on his mind until he went insane.

When Hill entered Mr. Love's office he spoke to him cheerfully, shook hands and handing him a letter to read, sat down at the invitation of the Controller.

No sooner had Mr. Love begun to read the letter than Hill sprang to his feet and fired two shots. Mr. Love screamed, dropped the letter, sprang half forward toward his assassin, then gasped and fell forward dead.

TO PROTECT PAPAL CONCLAVE.

Italian Government Preparing For the Death of Pope Leo.

Rome, Italy.—Although the health of the Pope is much improved, the Italian Government so as to be prepared for any eventuality has ordered two regiments in the provinces to be kept ready to come to Rome and reinforce the garrison in the city so that the authorities will have a sufficient force to maintain order and insure the liberty of the conclave should it become necessary to hold one.

If the Cardinals, as after the death of Pius IX., decide to meet at the Vatican the Government will surround the palace with a cordon of troops to prevent any attempt against the freedom of the conclave and also the removal of valuables from the Vatican during the interregnum, as was customary before 1870.

Irish Land Bill Advanced.

The British House of Commons advanced the Irish Land bill, accepting several clauses with little alteration.

Will Nominate Presidential Ticket.

The United Christian party has called a national convention for May 1, 1904, at St. Louis, Mo., to nominate a Presidential ticket, with the suggestion that the Vice-Presidential candidate be a woman.

Scientific Publication Endowed.

A Journal of Infectious Diseases, to be the only endowed publication of the kind in the world, will be issued in the fall through Mr. and Mrs. Harold McCormick, of Chicago, Ill., giving $125,000.

TO SEND JEWS' PETITION

President Decides Upon Bold Course With the Russian Government.

CASSINI PROTESTS IN VAIN

An Appeal For Better Treatment of the Russian Hebrews to Be Made Directly to the Czar Through the United States Diplomatic Representative — Roosevelt's Decision a Surprise.

Washington, D. C.—President Roosevelt has determined upon a bold course toward Russia with regard to the Kishineff massacre. In spite of the utterances of Count Cassini, the Russian Ambassador, that the empire would not receive any diplomatic protests, the President has decided to transmit the petition to the Czar asking better treatment for Russian Jews directly through the United States representative at St. Petersburg.

Count Cassini, the Russian Ambassador, went to the State Department as soon as he heard that the President had determined to take this action, and said what he had said before, that it would not be agreeable to the Russian Government. It is not expected, however, that it will lead to any rupture in the diplomatic relations of the United States and Russia. If the Russian Government should refuse to receive it or, receiving it, should officially criticise our Government for sending it, disagreeable consequences might follow, but such a result is not anticipated.

The determination of the President to send the petition to St. Petersburg was an agreeable surprise to those who had made the request, because they had thought that all that our Government would be able to do had been done in publishing the report of what was said at the conference between the President and Secretary Hay and the Executive Council of the B'nai B'rith. As Secretary Hay says in his letter, the President hesitated to send this petition because he feared that it might do the Jews in Russia more harm than good, but he has finally concluded that this is not the case, and that it will do no harm, even if it does no good.

The Russian Ambassador, when he goes to St. Petersburg will be able to explain to his Government what is back of all that has been done officially and unofficially in this matter, and his representation of American opinion may have some effect.

The petition which will be transmitted to the Russian Government is the one which the Executive Council of the B'nai B'rith handed to the President as a tentative document to be signed by leading citizens of the United States outside of Federal office-[illegible] It is expected that it will be presented by [illegible]

Secretary Hay formally notified Simon Wolf, of Washington, and Leo N. Levi, of New York City, members of the Executive Committee of the B'nai B'rith of the President's intentions.

REUNITED AFTER FIFTY YEARS.

Fiction Surpassed in the Homecoming of an Aged Miner.

Indianapolis, Ind.—Romantic as the wildest fiction was the homecoming of Thomas Noe, who left Indianapolis for the gold fields of California fifty years ago, and who has been mourned as dead for thirty years by his daughter, Mrs. Margaret Darrow. His wife was dead.

No one was home when he arrived, but he went in and took a seat. When the daughter bustled into the room she saw the quiet figure in the corner, and, following the natural tendency of a woman she screamed for help, but the only answer to her cry was a sob from the intruder. She rushed forward, and her surprise can only be imagined when she saw that the man was old and decrepid, and as harmless as an infant.

"What are you doing here?" she asked.

"My little one," the figure answered, in tremulous tones, "I have a perfect right here. I am your father."

Then he told the story of his wanderings and there was a tearful reunion.

ANARCHISTS FLEE FROM JUSTICE.

Failed to Appear in Court and Bondsman Must Pay $13,000.

Paterson, N. J.—William MacQueen and Rudolph Grossman, the Anarchists convicted of having taken part in the labor riot here last June, failed to appear in court and their bail bonds of $6500 each were forfeited. The bondsman is Philip Geyer, a wealthy resident of Haledon. His son, Robert Geyer, is counsel for the two Anarchists.

The men were sentenced last July to five years' imprisonment. They took an appeal to the Supreme Court, which decided against them three weeks ago. It is thought they have fled the country.

ROASTED A GIRL TO DEATH.

Stepmother Built a Fire and Suspended the Child Above It.

New Orleans, La.—Mrs. Mary Patterson is under arrest in New Iberia, charged with murder. The woman became enraged at her stepchild, a girl of ten years, and after beating her tied her in a corn sack and suspended her to a limb of a tree.

She made a fire beneath the tree and piled on a lot of paper to intensify the heat and smoke and went away. The sack caught fire, and the body, falling out, was burned beyond recognition.

Preached, Then Tried to Drown.

Crazed and imbued with religious fever, Fred Jennings, aged thirty-eight, preached on the street at Bangor, Pa., and then jumped into Martin's Creek and came near being drowned. He was finally captured and locked up.

New Acre Trouble Feared.

At Rio Janeiro, Brazil, the news that Placido Castro had started in haste to the Territory of Acre caused much surprise. New complications were feared.

Dark Hair

"I have used Ayer's Hair Vigor for a great many years, and although I am past eighty years of age, yet I have not a gray hair in my head."
Geo. Yellott, Towson, Md.

We mean all that rich, dark color your hair used to have. If it's gray now, no matter; for Ayer's Hair Vigor always restores color to gray hair. Sometimes it makes the hair grow very heavy and long; and it stops falling of the hair, too.

$1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

FOR WOMEN

Much That Every Woman Desires to Know

About Sanative Antiseptic Cleansing

And about the Care of the Skin, Scalp, Hair and Hands.

Too much stress cannot be placed on the great value of Cuticura Soap, Ointment and Resolvent in the antiseptic cleansing of the mucous surfaces and of the blood and circulating fluids, thus affording pure, sweet and economical local and constitutional treatment for weakening ulcerations, inflammations, itchings, irritations, relaxations, displacements, pains and irregularities peculiar to females. Hence the Cuticura remedies have a wonderful influence in restoring health, strength and beauty to weary women, who have been prematurely aged and invalided by these distressing ailments, as well as such sympathetic afflictions as anæmia, chlorosis, hysteria, nervousness and debility.

[illegible] cure, the absolute safety and great economy which have made the Cuticura remedies the standard skin cures and humour remedies of the civilized world.

Millions of the women use Cuticura Soap, assisted by Cuticura Ointment, for preserving, purifying and beautifying the skin, for cleansing the scalp of crusts, scales and dandruff, and the stopping of falling hair, for softening, whitening and soothing red, rough and sore hands, for annoying irritations, and ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet, bath and nursery.

Sold throughout the world. Cuticura Resolvent, 50c. (in form of Chocolate Coated Pills, 50c. per vial of 60). Cuticura Soap, 25c. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Boston, 137 Columbus Ave. Potter Drug & Chem. Corp., Sole Proprietors.

NEW IDEAS IN TOILETTES

New York City.—Broad shouldered effects are among the most notable features of the season's styles and are never more attractive than when pro-

FANCY WAIST.

duced by means of the drop yoke and attached bertha cut on graceful lines. The very stylish May Manton waist illustrated combines these features with entirely novel sleeves, that can be made with the puff under-sleeves or without as may be preferred. As illustrated the waist is made of white batiste, with yoke and trimmings of antique lace, but the design suits all the cotton and linen fabrics of the season as well as soft woods and silks.

The waist is made over a fitted foundation, that can be cut away at yoke depth when a transparent effect is desired, and on it are arranged the full portions of the waist. The yoke drops over the sleeves and to its edges the circular bertha is joined. The sleeves consist of the tucked upper ones and the full puffed under-sleeves which are attached invisibly at elbow length.

The quantity of material required for the medium size is four and three-quarter yards twenty-one inches wide, four yards twenty-seven inches wide, four yards thirty-two inches wide or two and three-quarter yards forty-four inches wide, with a half yard of yoking material eighteen inches wide.

Woman's Shirred Waist.

Soft materials shirred make one of the most attractive features of the season's styles and are exceedingly becoming to slender figures. The very stylish waist illustrated in the large drawing shows them used after a novel fashion and can be made with a low round neck, or high neck finished with stock collar as may be preferred. The model is made of cream-colored silk mull and is trimmed with lace at the edges of the sleeves, but very soft and pliable material is appropriate.

The waist consists of a fitted lining on which the shirred portions are arranged. The waist proper is shirred to yoke depth, then falls in soft full folds to the belt. The sleeves are shirred from shoulders to elbows and are arranged over a lining which serves to keep the shirrings in place, but fall in drooping frills below that point.

The quantity of material required for the medium size is five and a half yards twenty-one inches wide, four yards twenty-seven inches wide, three and a half yards thirty-two inches wide or two yards forty-four inches wide.

Popularity of Shirring.

The popularity of shirring amounts to a fad. It is used on coats and pelerines to as great an extent as on gowns. Shirred strapping, says Toilettes, is the latest form the craze has taken, straight pieces of the material of the gown, with edges turned under, are shirred in three or four rows over soft cord to cover the seams of gored skirts. Everything shirred or gathered into ruffles or ruchings is in high vogue, even the lace edgings on the borders of handkerchiefs, ties, transparent stocks and various articles of lingerie is invariably gathered quite full in the sewing on.

Walking Suits of Silk.

Shepherd's plaid in black or blue with white, and in louisine or taffeta is grande mode for short morning suits in shirt-waist style. Shot taffetas are still modish for the purpose, and the gun-metal effects are quite as popular as they were last year. Satin foulards are no longer ultra-fashionable, but have much to recommend them for summer morning and shopping suits, and for traveling as well. They shed the dust and are decidedly cooler than any other fabric except sheer cotton or linen.

Shawl Points on Ribbon.

Usually the black taffeta hair ribbons used by school girls are clipped with deep swallow-tail indentations. The exact reverse of this cut is seen in the new fashion of clipping the ends of ribbon used in rosettes or crown bands or simple bows and loops in millinery. The deep, sharp and narrowly pointed centre of the middle ribbon is shaped as a "shawl point." You can scarcely help noticing them on the new straw walking hats. It is particularly striking where two shades of ribbon are used, and the "shawl points" are spaced like shingles on a roof.

Wraps For the Summer.

Three-quarter and full-length wraps of black silk in loose styles will be worn through the summer, to cover up light gowns. Long loose wraps of pongee, both lined and unlined, are fashionable. These will be used for dust coats and for traveling generally.

Irish Crochet Lace.

Irish crochet lace has a silk braid woven in with the lace, which is a novelty at least. It would seem, however, that lace in itself is handsome enough without the addition of much trimming.

Woman's Blouse.

Broad collars are becoming to the greater number of womankind and are exceedingly effective on the dainty blouses now in vogue. The very pretty May Manton waist illustrated shows one of a novel sort and is made of pale blue louisine silk with trimming of ecru lace. The design, however, suits thin cotton and linen fabrics as well as those of silk and wool. The original is made over the fitted lining, but this last can be omitted when washable fabrics are used.

The blouse is made with a fitted foundation and consists of a plain back, and fronts that are tucked at their upper portions and joined to a round yoke. This big collar lies flat and is cut in wedge-shaped pieces at its inner edge, the points of which are attached to the shield and under which the ribbon is passed. The shield and stock are separate and are attached to the waist beneath the collar. When desired they can be omitted and the waist worn with an open neck. The sleeves are tucked above the elbows and form the fashionable puffs at the wrists, where they are gathered into pointed cuffs.

The quantity of material required for the medium size is four and three-quarter yards twenty-one inches wide, four yards twenty-seven inches wide,

WOMAN'S BLOUSE.

four yards thirty-two inches wide or two yards forty-four inches wide, with three-quarter yards of tucking for shield, collar and cuffs.

"Ah, yes," replied the man who knew, "I guess there are certain patients who, if you quit them, get well the first thing you know."—Catholic Standard and Times.

SCIENTIFIC & INDUSTRIAL

The shell of the crab is mostly composed of carbonate of lime; and the coloring of the shell depends on a pigment which pervades different parts of the substance. This lime and earthy matter is drawn from the sea by an organized membrane, and is at the will of the creature.

Filters made so that the water passes through unglazed porcelain or stone of proper fineness will prevent disease germs from passing through the water. However, the germs go through in time by growing from space to space, and not only fill the porous stone, but also grow on the inside. A filter is valueless unless properly cared for.

While the motion of the earth is continuous, as compared with any other celestial body, it is rhythmic. Compared with a fixed star, it gives us the siderial day, with the sun, the solar day, nearly four minutes longer, with the moon, the lunar day, longer still by forty-nine minutes. The siderial day is reckoned only by astronomers. The lunar day finds expression in the tides. Besides the day, there are two other natural time limits, the month, or rhythmic period of the moon regarded as a luminary, and the year, or rhythm of the earth's orbit. The generation and the dynasty are two time measures of waning importance.

Almost every day brings forth some evidence of the extreme durability of the pressed steel car. Recently in Pittsburg, one of these cars while being shifted was sent down a track which ran close to a stone wall of very substantial construction in the Panhandle freight yards. The brakes failed to work at the proper time and the car crashed into the bumper with terrible force. The upper part of the car was forced over the bumper against the stone wall, which was cracked in four places and which had every appearance of being ready to fall when it was taken down. The car was not seriously damaged, and on being placed on the tracks again was able to resume its trip without any attention whatever.

Dr. T. Eastham in a paper recently read before the Bournemouth Medical Society in England described his experience with a new anaesthetic, a bichloride of methylethilyne called narcotile, which he believes has some important advantages over those now in use, for short anaesthesia. It acts rapidly and effectually, and produces no troublesome after effects. In its administration the same way, so that the occasion is nothing more or less than a State housecleaning.—New York Press.

tue, and the air in its passage becomes saturated with the vapor. It is also necessary for the same reason to keep the bottle in tepid water to maintain the requisite warmth. It resembles ether in its physiological action, but is rarely followed by the distressing sickness which accompanies and follows the administration of the latter. Owing to its extreme volatility, the patient rapidly recovers from it.

English Harvest Home.

Machinery, model farms and the spread of education, which has tended to make farm laborers' children intent on "bettering" themselves, have dealt a serious blow to the old-fashioned festivities which a few years ago marked the end of the harvest.

Then, when the sheaves of golden corn had been safely garnered and the "last load home" was the occasion for mild al fresco merrymaking, the farmer, his wife and daughters, with every man, woman and child on the farm, looked eagerly forward to the harvest supper and dance which should mark the farmer's gratitude for the good things a bright harvest had promised.

Little by little this old custom has died out, and one finds but few places in England nowadays where master and man give themselves up to pleasure for one night in the year, at least, together.—London Mail.

Bee Plants.

There have been some attempts at the cultivation of plants especially adapted to honey productions, but they have been abandoned as unprofitable. A small patch of bloom does not amount to a great deal in the way of honey production—there must be acres and acres of bloom. The raising of crops that produce honey in addition to something else (buckwheat and alsike clover, for instance), and the scattering of sweet clover or catnip seed, and the like, in waste places, seems to be the most that can be done profitably in this direction.—Country Life in America.

Even a civil engineer may be gruff in his manners. N. Y.—27

A PROMINENT COLLEGE MAN.

One of Indiana's Useful Educators Says: "I Feel Like a New Man."

MR. JOHN W. MENG.

Mr. John W. Meng, 54 Jefferson Ave., Indianapolis, Ind., State Representative of Indianapolis Business College, writes:

"I firmly believe that I owe my fine health to Peruna. Constant travel and change of food and water wrought havoc with my stomach, and for months I suffered with indigestion and catarrh of the stomach. I felt that the only thing to do was to give up my occupation, which I felt very reluctant to do. Seeing an ad. of Peruna as a specific for catarrh I decided to give it a trial, and used it faithfully for six weeks, when I found that my troubles had all disappeared and I seemed like a new man. I have a bottle of Peruna in my grip all the time, and occasionally take a few doses which keeps me in excellent health."—John W. Meng.

THE most common phases of summer catarrh are catarrh of the stomach and bowels. Peruna is a specific for summer catarrh.

Hon. Willis Brewer, Representative in Congress from Alabama, writes the following letter to Dr. Hartman:

House of Representatives,
Washington, D. C.

The Peruna Medicine Co., Columbus, O.:

Gentlemen—"I have used one bottle of Peruna for lassitude, and I take pleasure in recommending it to those who need a good remedy. As a tonic it is excellent. In the short time I have used it it has done me a great deal of good."—Willis Brewer.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Utah's House Cleaning Day.

North Plainfield Weekly Review

ISSUED EVERY SATURDAY BY

HARRY H. WEBB

AT NORTH PLAINFIELD, N. J.

33 Somerset St. Telephone 217

SUBSCRIPTION.—One year $1.25; if paid in advance $1.00.

Entered at the Plainfield, N. J., Postoffice as second class mail matter.

SATURDAY, JULY 4, 1903.

A WARNING.

Too much care cannot be exercised to prevent accidents with blank cartridges. The slightest abrasion made by this dangerous toy may prove fatal.

Dr. Richard V. Connolly, bacteriologist of the Newark Board of Health, reported at a special meeting of that body Thursday, at Newark, that he had examined a number of blank cartridges offered for sale in that city and had found in practically all of them large numbers of tetanus germs. President Herold announced that he had called the special meeting to act on the report. He said he had instructed Dr. Connolly to make the tests, because of an outbreak in Pittsburg, where fifty cases of lockjaw were reported, following a recent celebration in which firearms were used.

INDEPENDENCE DAY THOUGHTS.

The voter who stands by his party, no matter what the character of the candidate may be, is next door neighbor to the "boss"—an unto'd power for evil. The only voter the politician respects and fears is the one who votes as his conscience dictates. Young men who have not yet reached their majority, and older men who value their self-respect and manhood, would do well to ponder deeply over these self-evident facts, especially on this the anniversary of our nation's independence, when we are supposed to be carrying out the principles laid down by our forefathers in 1776. If the American idea is to prove a success we must be just as patriotic and loyal as those strenuous days so long ago called for, but it cannot be done by playing into the hands of designing politicians.

ESCAPES BY TECHNICALITY.

A. L. Kean, of Livingston, who was recently arrested for docking the tail of a horse, escaped punishment by means of a technicality. The judge decided that inasmuch as Kean's coachman had been fined for the act, it was not legal to impose a penalty on Kean also; and it was intimated that the two men should have been tried jointly. The Society for Prevention of Cruelty to Animals tried a joint case of a similar nature sometime ago and the defendant escaped for the very reason that the case was a joint one.

In any event the Society has gained a great moral victory, and it is only a question of time until the laws will be so amended that it will be impossible for any man, however rich or influential he may be, to escape punishment for this inhuman offense.

FIRST NEW JERSEY BRIGADE.

The legislature did well, when last winter it appropriated $7,500 for the expense of taking the survivors of the famous First New Jersey Brigade to Antietam, September 17, when there will be unveiled a monument erected to the memory of the New Jersey veterans who there gave up their lives. Of the 4,000 men who served in the brigade fewer than 500 will make the journey. Three thousand are dead, and more than half of the survivors have removed to other parts of the country, to points where they cannot be reached at this time. From the quartermaster-general's office in the State House, there will be taken the saddle used by General Phil Kearny, who was in command of the brigade, but who was killed before the battle of Antietam, falling on September 1, 1862, at Chantilly, second battle of Bull Run.—*Elizabeth Journal.*

THE CANAL TREATY.

Those intimations from Washington that the president's patience was well-nigh exhausted as a result of Colombia's haggling over the canal treaty seem to have had their effect at Bogota. Latest reports from there indicate that the treaty will be ratified "without any unusual delay." The United States will build the canal, and Colombia might as well qualify for that ten million dollars while she can.

THE CUBAN TREATY.

Advices from Cuba lately have tended to strengthen the belief that the Cubans are anxious to see a conclusion of the treaty negotiations which have been so long pending. There is one unfavorable element in the situation, namely, the feeling aroused by indications of renewed opposition to reciprocity at Washington. It is felt that this feeling may complicate the situation as regards the treaties, and that some of the opposition senators may make the rumored antagonism to reciprocity a pretext for deferring the ratification of the other treaties until the winter session of the Cuban congress. As things are at present, it would seem as if another period of delay were in prospect, though of course under the Platt amendment the treaties must be carried into effect.

ZINC MINING.

The story of zinc mining in southwest Missouri, the greatest zinc-producing district in the world, possesses many of the interesting features of romance, and in the rapid rise of this important American industry some facts seem strangely like fiction. For many years miners were groveling in the shallow diggings of southwest Missouri, taking out lead ore. Occasionally they encountered a peculiar dark, hard and brittle substance which they threw away as worthless not appreciating its value, and never dreaming that the time would come when this seemingly worthless substance would yield millions of dollars, and great zinc mines would take the place of the "gopher" made in digging for lead. It was thus by chance, says the National Magazine, that zinc ore was discovered in what is now known as the Missouri-Kansas mining district, which embraces the richest zinc-producing mines in the world. In 1872 several hundred pounds of this unknown stuff, which was neither lead nor rock nor dirt, was sent to an Illinois smelter to be tested. It was pronounced zinc ore of the highest grade, and a new American industry was inaugurated. Its rise has been sure and steady. From an insignificant output of ore, netting but meager returns, this industry has advanced until zinc mining has become one of the great wealth producers of the age in America as in Europe.

It is reported that Chairman Frelinghuysen, of the Somerset County Republican executive committee, proposes to allow North Plainfield to have one of the two voting machines donated the county. There's already a voting machine in North Plainfield which knocks the automatic device all hollow.—Plainfield *Daily Press.*

The *Press* ought to know.

Tariff changes should not be considered at the next sesion of Congress. Any change in tariff schedules should wait until after the Presidential election, which of itself is a sufficient disturbing factor to business, to say nothing of the uncertainty as to tariff schedules.

The Baptists of the United States, according to the latest official returns, number 4,330,462. They are gathered in 44,829 churches and are served by 30,809 ministers. The gains last year were 376 churches, 648 ministers and 61,399 members.

The *Suburbanite* is a monthly magazine published by the passenger department of the Central Railroad of New Jersey, the July number of which is just out. It contains many interesting articles and illustrations.

The fellow was right who said "fortune seldom knocks at the door of the knocker."

The beef combine is again putting up prices. This time it is on account of the floods in the west or the drought in the east, it hasn't yet decided which.

Hon. Charles N. Fowler contributed an excellent article in last Sunday's New York *Tribune* on "Careers for the Coming Man."

The number of irrigating ditches and canals in operation in the United States exceeds 20,000, and their combined length is not less than 50,000 miles.

An exchange remarks: "If the 'Iowa idea' is right, all wool and a yard wide, why is President Roosevelt against it, and 'Billy' yelling himself hoarse in favor of it?"

SEARCHING THE RIVER BOTTOM.

Strange Way of Making a Living Adopted by Two New Yorkers.

There are many peculiar occupations followed by those engaged in gaining a livelihood in and around New York.

Things which the majority of people throw away as rubbish are gathered up by Italians and other foreigners and sold. A look into the junk shops along the river front will give one a little idea of the thousand and one things that have found their way thither after being discarded by their owners. The junkmen do a thriving business and often make fortunes out of the stuff they handle.

Among the many unknown ways by which a subsistence is gained is one followed by two men, who, year in and year out, in sunshine or in rain, can be seen rowing on the East or North River. While one keeps the small boat in position the other, with grappling hook and poles, drags the bottom of the streams for whatever of value may be pulled from the depths. Pieces of rope or machinery and a variety of stuff, good or bad, is grist to them. Nothing is too small to be rejected, and it must indeed be worthless if, after examination, it is returned to the water. The men have been at the business for many years, and long practice has made them experts at handling the discarded article that former owners had consigned to the river's depths.

The "finds are sometimes quite valuable. Several years ago they came across a water-tight box containing valuable papers and jewelry which had been lost overboard in a collision between two steamers. On returning it to the owner they received a handsome reward. The recovery of the papers put a sudden end to [illegible] things than those they seek. Not infrequently they have brought to the surface the bodies of drowned persons, who have either committed suicide or met their deaths through accident.

In some cases the bodies indicate that murder has been committed.—N. Y. News.

American Nerves.

A German physician who once came to this country to practice was soon so bewildered by various nervous ailments he came in contact with that he bunched them all together, and called Americanitis.

It is commonly said that Americans overwork their brains and bodies, but it would be truer to say they misuse their bodies. If they run to catch a train; if they start out for healthful exercise; even if they lie down to sleep, they throw so much wasteful energy into these acts that they actually impede the muscles. This is pre-eminently true of American women, and of American women of leisure, at that. Generally a working woman learns some economy of energy because she realizes that she cannot go on by waste.

In the matter of lying down to rest, how rarely you see a woman who lies supine like a little child, who allows the bed to take the responsibility of holding her up. Instead she holds on to the bed, she grips the pillow, draws up her knees, tightly clenches her teeth. In her busy brain she goes over and over again the little round of her day, or she tastes in anticipation the troubles of to-morrow.

Rapid Stenography.

At a meeting of the Incorporated Phonographic Society the other day it was stated that to write stenographically a the rate of 150 words a minute involves hearing on an average 750 distinct sounds — consonants and vowels—in the course of every minute, and managing to represent or indicate 12 1-2 of them every second. Writing at 200 words per minute means hearing about 1,000 sounds in sixty seconds and representing or indicating rather more than sixteen of them in every single second.

The Goose Hangs High.

An old friend says of this: "A girl had an admirer she did not like. But he was persistent, and insisted on sending her a picture of himself handsomely framed, and with it a note saying he would call that evening. When he came she was at the piano. 'How are you this evening?' he said. She replied, still playing, and looking up at his picture, which had been 'skied': 'Everything is lovely and the goose hangs high.' She was rid of him in short order after that."

He who knows not that he is victimized and knows not that he knows not, needs a guardian.—Adapted.

THAT SWEETHEART OF MINE

By VIVIAN CLARE HOWARD.

They were not a romantic looking couple, both approaching the mark which the world unfeelingly calls middle age. Both were slightly inclined to embonpoint.

They were traveling between Little Rock and Fort Smith. She was thinking busily of the number of pounds of sugar necessary to a given number of baskets of cherries awaiting her housewifely care, and he—well, his mind was concerned with cherries, too, but they were cherries in the blossom, the snowy boughs of the trees that had shaded a little village lane.

Underneath the boughs stood a girl and a boy—how well he remembers the face of the girl, the pink of her cheeks, the blue in her eyes, the brown of her hair he could feel yet the sting of that braid of hair as she switched it roughly in his face when he tried to steal a kiss.

He stole a side look at his wife's plain, wholesome features, and sighed. He even wondered why his dream of the cherry tree lane had never come true—why he had—— Just then the train slowed up at a little side station and he became aware of an unusual bustle on the platform. His wife said, with some little excitement in her voice:

"John, I do believe a theatrical troupe is getting on here."

John dimly remembered that Flora had always called him "Jack" as he answered lazily:

"Well, my dear what of it? There is plenty of room, isn't there? I don't see any immediate need for my being interested," and relapsed into the region of past delights again—"what a mischief Flora had been." He was rudely jolted back to the present again by a severe pinch from Mrs. John.

"For goodness sake, John, did you ever see such a get up?"

"Eh—what did you say, Margaret? Get up where?" and following the direction of her eyes he looked down the aisle.

Ye gods, was he dreaming? It was Flora, *Flora in the flesh; in fact, more* so than when they had last met; not quite the Flora of the cherry tree, but unmistakably his early sweetheart—the star of a barnstorming troupe.

She came up the aisle talking loudly to a dejected looking individual whom she addressed as "Tommy." Her dress was brown, and the feather in her hat—a hat too large for travelling—was green as a Brazilian parrot's wing.

The pink was in her cheeks as in the days of the cherry tree, but it had a sugg[illegible] eye, memory unlike the bewilderingly momentous question rais[illegible] us into the presence of the whirling ra[illegible] Watts was when he wrote, 200 years ago:

"Lord, on a narrow
'Twixt two infini'

And so far as we can tell from what he us, we must stand there for a little time be[illegible] ...ize him, ...oped she wouldn't—but it mattered little, she did.

In a moment she was bearing down upon them like a ship of Tarshish in full sail and was shaking him warmly by the hand and talking as only Flora could do.

"Surely this is Jack Benton? I couldn't be mistaken, though you h[illegible] grown a lot stouter since we l[illegible] Don't you remember Flora Marcey? If you don't, then a man's memory for an old sweetheart is a pretty thin thing."

Poor John could feel Margaret stiffen at the last sentence, and groaning in spirit he introduced his wife to Miss Marcey whose volubility made up for any awkwardness that Mrs. Benton's manner might have caused.

"Jack and I were old sweethearts at Fort Smith. Lord, what larks we used to have in the old days after school and coming home from choir practice. I never thought of going on the stage in those days, but talent will not be suppressed—and here I am. It looks like fate, our meeting like this, doesn't it?"

John shuffled nervously and cursed fate inwardly and presently the chatter went on again.

"Where are you living? Still at Fort Smith. Well, I never; our circuit closed fifteen miles from there and I'm [illegible] to take a holiday. I believe I'll [illegible]rop down on you folks for a [illegible]'s change. If the old place is as slow as it used to be, it will make an elegant place to rest."

Benton looked beseechingly at his wife, but she appeared oblivious to the fact that he was still on the face of the globe. He hesitated a minute and then, remembering the boy and girl friendship he glanced at his wife and said defiantly:

"We *should be awfully pleased to* have you."

And Mrs. Benton astonished him by adding with suspicious friendliness:

"Yes, do come; we shall be perfectly delighted."

With more astuteness than her husband would have given her credit for Mrs. B. had come to the conclusion that a dose of an old sweetheart—when she is as impossible as Flora—is almost as good for a man as an occasional dose of rhubarb.

Flora came—John Benton saw—but Mrs. Benton conquered.

Forth from Flora's voluminous baggage came gowns fearfully and wonderfully constructed from materials which might just have arrived from an Italian bazaar. The hat with the green feather was not a circumstance in the creations which crowned Flora's yellow pompadour when she impersonated the heroine in some glowing melodrama—and she wore them all at Fort Smith.

On Sundays Mrs. Benton systematically manufactured excuses to remain away from service, and John, who liked to see women garbed as soberly as Quakers, was compelled to slink down the aisle in the wake of a purple gown and a green and purple velvet Gainsborough hat.

Four weeks went by and still Flora showed no signs of an early flitting. Mrs. Benton absolutely refused to offer suggestions, so in a moment of desperation Benton bethought himself of an old-time feud between his mother and Flora, which dated back to his and Flora's school days. He wired his mother at *once*, "Need you here immediately; do not fail me," and well did he know that the first available train would bring the faithful soul. At dinner that day he casually announced that he expected his mother that night, or the next morning, at least.

In the afternoon Flora received a mysterious message—presumably Marco—which demanded her immediate presence elsewhere, and by 5.30 the Benton household knew her no more.

The next morning found John in bed with a racking nervous headache. As Mrs. Benton waited upon him in her quiet, restful way he wondered how he could ever have been fool enough to fancy himself tired of such a woman. Catching her hand and pressing his cheek against it boyishly, he said reproachfully:

"Margaret, how could you—what made you act so, and try to keep her?"

With a spice of mischief in her calm gray eyes she smoothed his head and answered:

"Well, you see, John, dear, I had *noticed in you a growing tendency of* talking in your sleep—you seemed to have restless dreams about a mysterious 'Flora,' who was connected in an odd way with cherry trees and equally youthful things. So when I met Flora, it occurred to me that at last I saw a way to restore your dreamless sleep and my own peace of mind, which—I don't mind telling you now—was fast slipping away. I'm a homeopathist, you know—and—well, some poisons are their own antidotes, when given in proper quantities. Was I right, John?"

He kissed her hand and said:

"As you always are, darling; but don't you think you gave me an unnecessarily large dose?"

She shook her head laughingly.

"You see, I didn't want to risk a repetition."

The Cost of Census-Taking.

The differences between the cost of securing the returns from the six simple questions asked in 1790, and that of the extended inquiry made a century later, is illustrated by the per capita cost, which in 1790 was 1.13 cents, and in 1900, 15.5 cents. In 1790 Virginia was the most populous State in the Union, having 747,610 inhabitants. The records of the Treasury Department show that at the first census the cost of making the enumeration in that State was $7,553.90. Moreover, at that enumeration the underpaid assistant marshals supplied their own blanks, an item which was of considerable importance in the days when all paper was made laboriously by hand. In 1900 the population of Maine—about 700,000—most nearly approximated that of Virginia in 1790.

At the twelfth census the cost of actual enumeration in Maine, including the pay of supervisors, was $34,-560.90, or more than three-fourths of the amount expended for the enumeration of the entire United States in 1790, though the pay of an enumerator in 1900 did not exceed the wages of an intelligent day laborer.—From the Century.

Taking Life Seriously.

Taking life too seriously is said to be an especially American failing. This may be true, but, judging from appearances, it would seem to be world-wide, for, go where one may, he will find the proportion of serious, not to say anxious, faces ten to one as compared with the merry or happy ones. If "the outer is always the form and shadow of the inner," and if "the present is the fullness of the past, and the herald of the future" (and how can we doubt it?), how many sad histories can be read in the faces of those we meet every day. The pity of it is, too, that the sadness is a self-woven garment, even as is the joy with which it might be replaced. Ruskin says, "Girls should be sunbeams, not only to members of their own circle, but to everybody with whom they come in contact. Every room they enter should be brighter for their present." Why shouldn't all of us be sunbeams, boys as well as girls, all along the way from twenty-five years and under to *eighty-five years and over?*—April Success.

A Dread Ordeal.

The Rev. Mr. Inch of Dumbarton tells how on one occasion in his old church in Dundee a brother minister had preached a rather long sermon, and he (Mr. Inch) had occasion later on to enter the pulpit to make an intimation, whereupon a "Wee Macgreegor," who was in the gallery with his mother and the rest of the family, took fright and exclaimed very loudly: "Come awa', maw, there's anither man guan tae begin."—Glasgow Evening Times.

He who kicks mildly may get something; he who kicks persistently will.—Arabian Proverb.

For the year 1901 the mineral products of the Southwest were valued at $70,000,000. It is estimated by the Southwest Miners' Association that various businesses connected with the mining industry have grown 300 per cent. during the past two years.

The man who puts up with imposition invites it.—Confucius.

Relief

From Headache and Neuralgia

In a Few Minutes After Taking

Dr. Miles Anti-Pain Pills. Chronic Case Cured.

"I cannot speak to highly of your remedies and I will always tell my friends how much they have done for my husband and myself for sudden attacks of headaches, neuralgia and rheumatic pains. There is nothing equal to Dr. Miles' Anti-Pain Pills. They are simply splendid and give relief in fifteen or twenty minutes. I used to be subject to attacks of headache, which had become chronic, and I took a course of Nervine and Nerve and Liver Pills in connection with the Anti-Pain Pills. The result is I now have very little trouble in that way. My husband has also taken these remedies and praises them very highly. We always have some of both kinds of pills in the house, and do not feel that we could get along without them.—MRS. KATE K. JOHNSON, McClellandsville, Delaware.

There are many reasons why you should take Dr. Miles' Anti-Pain Pills, but the best reason is that they will give you almost instant relief from headache or other pain. In cases of chronic headache, when the sufferer knows an attack is coming on, a Pain Pill will usually prevent it entirely. In cases of extreme nervous exhaustion, when the brain is too tired and the body too nervous to rest, an Anti-Pain Pill will sooth the nerves so that sleep may come. They never fail, yet contain no opiates and are non-laxative.

All druggists sell and guarantee Dr. Miles' Anti-Pain Pills. They are non-laxative; contain no opiates, never sold in bulk, 25 doses, 25 cents. Dr. Miles Medical Co., Elkhart, Ind.

A FINDING THE FOURTH OF JULY.

Three elfins who live in a fairylike nook,
And never had seen any boys,
Once read of our Fourth of July in a book,
And promptly their own quiet woodlands forsook,
To share in the fun and the noise.

By the light of the moon they crept out on the sky
And merrily sang on their way,
Asking politely of each passerby
How far they must go to meet Fourth of July,
Till they came to the dawn of day.

What a different song these three elfins sang
As they limped their way homeward that night!
They had heard how the bells in the steeples go "Clang!"
Torpedoes and crackers go "Rattlety bang!"
And the rockets go up out of sight.

For one little elfin by chance got astride
Of a giant torpedo nearby;
On a huge cannon cracker the next took a ride;
Number three to the tail of a rocket was tied,
And all three were blown up there sky high.

On the way coming down each elfin declared
He had seen quite enough of the sky,
And promised himself, if he lived to be spared,
He would stay there on Fourth of July.

Yet this was not all, for they met on the road
Three cripples in pitiful plight.
They also had been there to see things explode—
A tailless young squirrel, a three-legged toad
And a crow with tail feather turned white.

A very wise owl was scowling close by
As the woebegone party drew near
Remarked, while winking and blinking one eye:
"Didn't I tell you so, that the Fourth of July
Is the fooly fool day of the year?"

But an eagle swooped down from a towering pine
And said with talons uncurled:
"The day is all right, this country is mine;
'Tis said to be crippled, but sadden to whine;
The Fourth of July leads the world.

"And now, my young friends, allow me to state
That the flag you saw borne on the breeze
Is the flag of the free, and we celebrate
The Fourth of July, while the crackers debate,
With just as much fun as we please.

"Be careful, old owl, lest my temper you stir;
This country cost more than one eye,
And is worth all it cost, though owls may demur,
We invite everything in horns, feathers or fur
To share in our Fourth of July."

OUR OWN GREAT DAY.

Some Noteworthy Celebrations of the Fourth of July.

WHEN IT WAS FIRST OBSERVED.

THE first Fourth of July celebration took place in Philadelphia four days after the adoption of the Declaration of Independence, on July 8, 1776. One of the unpublished letters of John Adams gives the following description: "The thought of taking any notice of this day was not conceived until the 2d of the month and was not mentioned until the 3d. It was too late to have a sermon, as every one wished, so this must be deferred to another year. Congress determined to adjourn over that day and to dine together. The general officers and others in town were invited, after the President and Council and Board of War of this State. In the morning the Delaware frigate, several large galleys and other Continental armed vessels, the Pennsylvania ship and row galleys and guard boats were all hauled off into the river, and several of them were dressed in the colors of all nations displayed above the masts, yards and rigging. At 1 o'clock the ships were all manned; that is, the men were all ordered aloft and arranged upon the top yards and shrouds, making a striking appearance of men drawn up in order in the air. Then I went on board the Delaware with the President and several gentlemen of the marine committee, soon after which we were saluted with a discharge by thirteen guns, which was followed by thirteen others from each of the armed vessels in the river, then the galleys followed the fire and after them the gunboats. Then the President and the company returned in the barges to the shore, and were saluted by three cheers from every ship, galley and boat in the river. The wharves and shores were lined with a vast concourse of people, all shouting and huzzaing. * * * At 3 we went to dinner, and were very agreeably entertained with excellent company, good cheer and music from the band of Hessians captured at Trenton and by continual volleys between every toast from a company of soldiers."

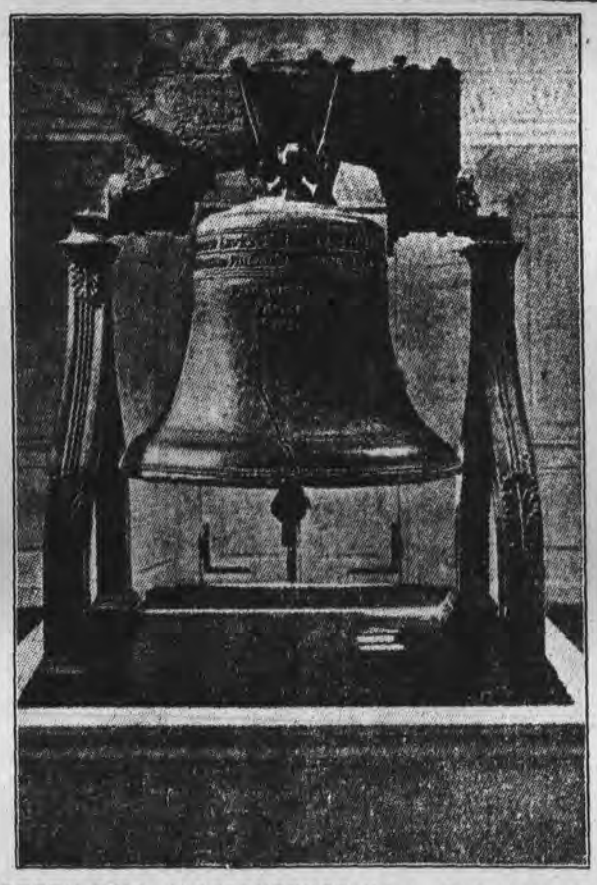
The letter then goes on to describe the processions and salutes of the soldiers, and expresses the surprise of the writer in the evening to behold almost every house lighted by candles in the windows, "though a few surly houses were dark. I had forgot," he continues, "the ringing of bells all day and evening, and the bonfires in the streets, and the fireworks played off. Had General Howe been here in disguise, or his master, this show would have given them the headache."

WHEN PEACE WAS RESTORED.

The anniversaries had been celebrated in the army by the discharge of guns, the setting free of prisoners, and festivities in which the wives of the generals had been very active, Mrs. Knox and Mrs. Greene being especially interested. The year when peace was declared witnessed the introduction of the oration. Guns and bells, of course, continued to be very much in evidence, and toasts were drunk and responded to at the dinners which were provided on every village green or city common. "George Washington," "The Constitution," "The United States" and "The daughters of America" came in for a goodly share of attention in oration and in toast. "Squirrels, chickens, green corn and vegetables of the season" were piled upon the tables, and were free to all, while firewater as well as fireworks abounded. The introduction of the "oration," however, chiefly distinguishes the celebration of 1783, and dates from that time.

The fiftieth anniversary was the "jubilee," and was the most elaborate of all celebrations up to that time. Three of the signers of the declaration were still living, although the weakness of old age prevented them from taking an active part in the festivities. The struggle of the South American countries to throw off the yoke of Spain and the popular sympathy with Greece helped to inspire the American people. Bands, bells, cannon and processions abounded, and the oration held a conspicuous part. Josiah Quincy was the orator in Boston, Edward Everett in Cambridge, while in Washington an "honorable member" delivered a great speech before a greater crowd from the steps of the Capitol. New York had not yet made so much of the oration as had some of the other cities, but did not lack in enthusiasm. A long procession marched from the Battery to Washington Square, and was there reviewed by De Witt Clinton, the Governor of the State. Ten thousand people were in the assembly and aided in disposing of the "ox feast" which had been provided. The enthusiasm throughout the land was intense. The "Monroe doctrine," the "liberty of man," "the oppression of effete monarchies," were expressions used not only by the orators, but by all men. Doubtless the "jubilee" provided a mighty impulse for the nation, then just passing out from its childhood.

THE DAY WE CELEBRATE



LIBERTY BELL, INDEPENDENCE HALL, PHILADELPHIA.

Carpenters' Hall, Philadelphia, Pa.

Even Bonbons Affected by the Day We Celebrate.

IF you desire to make a Fourth of July remembrance take the box of candy under consideration. It may make the happy recipient sick, but it's safe not to cost a finger, an arm, a leg or a life, as do some of those things that the careless always find loaded too late. A number of the good stores have sweets packed away in suitably patriotic receptacles.

As a rule, though, you must select your box and then have it filled with your favorite sweets. All the boxes are catchy, a number are very cheap, while, of course, others run up as high as one desires. And whatever the shape, red, white and blue is the color scheme. Any and every possible patriotic emblem figures. How the designers must rack their brains to be forever presenting novelties!

Old Glory is served up in as many ways as the candy which it cloaks.

FOURTH OF JULY NOVELTIES.

It is done in water colors on satin and silk, it is printed on cotton and paper. An example in crepe paper figures in the centre of the cut. This is a large box (two-pound), and a layer of cotton under the paper gives a richness that would otherwise be wanting. This is well, as the silk flag boxes cost fifty cents each. Small, plain paper flag boxes may be had as low as eight cents.

The silk flag also figures on a tiny pate cup which costs a quarter, and is tied on with ribbon after it is filled. A flag is on the top of some little cigarette boxes which are filled with candy torpedoes, and cost a dime complete. The same may be said of some catchy little bonbonnieres that look like ammunition.

Lest you think the Stars and Stripes have it all their own way, we'll take a look at other more warlike specimens. Naturally, the firecracker takes first place. The giants figure as full-fledged candy boxes, but those upon economy bent may have just as patriotic sweets for five cents. These are in the shape of tiny vanilla stick candy, strings being inserted so that the bunch is braided together in real Chinese firecracker fashion.

Boxes in drum shape—indeed, like real drums—are to be had as low as twenty cents, while a little roll labeled Declaration of Independence tops some simpler affairs.

Chocolate figures in a number of ways. A good-sized square of this favorite flavor is in the knapsack. Tiny chocolates are also in the little dime packages of torpedoes.

Ices For the Fourth.

Fourth of July dinner will be twice as delicious if the dainty cold finish be in some suggestive shape. Purveyors of fine ices have taken this under consideration, and here are two of the results. The chocolate soldier speaks for himself, and in the language of the sex (according to its traducers) is just too sweet! This brave boy is not necessarily in brown. If you prefer he will don strawberry breeches and a bisque blouse. Indeed, he is so accommodating as to adapt himself to any color scheme, even if it be far from a la malitaire.

ICES FOR THE FOURTH.

Slangy ones refer to the torpedo ice as hot stuff. It is desirable for those who don't care to have the things they eat too highly colored. Yet it boasts the colors. The delicious sphere itself is first done up in wax paper. Then comes this petticoat-upside-down effect called the torpedo. It is of crimpled tissue paper, ribbon-tied as a matter of course.

Never to Be Popular.

There are some things that will never become popular. A noiseless Fourth of July is one of them—Golden Days.

The Man of the House.

"Did you have a good Fourth, Jimmie?"

"Yes-siree; pa wuzn't home—an' I had t' fire off firecrackers for ma an' gran'ma an' my three aunts."

After the Racket.

It was, indeed, a glorious Fourth—so all the patriots say!
While some declare its special worth the quiet of next day.

Concise Description.

"Well, Tommy," said Mr. Tenspot, at the close of the day, "what did you think of the Fourth of July fireworks I got for you?"

"They are an all-fired lot, papa," replied Tommy.

A Defensive Measure.

"Marietta, you had better write your Aunt Jane that we are coming out there on the Fourth."

"Why?"

"If you don't she will be writing us that she is coming here."—Chicago Record-Herald.

Minute Man Statue, Concord, Mass.

A Roysterer.

First Firecracker—"Where's William?"

Second Firecracker—"Oh, he just went off with that noisy crowd of his."—New York Journal.

THE LITTLE CONTINENTAL.

Wants Better Roads.

IOWA is rapidly coming to the front in the campaign of education and organization for road improvement. A State good roads convention was held recently at Des Moines. The attendance, the enthusiasm and the ability and prominence of the speakers indicated the importance of the gathering. Among the speakers were President Moore and Secretary Richardson, of the National Good Roads Association; Mr. M. O. Eldridge, of the United States Department of Agriculture; Hon. Lafe Young, of the Daily Capital; Colonel J. B. Killebrew, of Nashville, and Judge A. H. McVey, of Iowa. The two last named speakers devoted special attention to the question of National aid, which proved to be the most popular idea presented to the convention.

A permanent organization was formed and five delegates from each Congressional district were selected to attend the National Good Roads Convention at St. Louis. The resolutions adopted favor National aid in co-operation with States, counties and municipalities in a general scheme for road improvement, and Iowa's Senators and Representatives in Congress are requested to work for such a law.

One of the arguments advanced in favor of the National aid plan is that it will tend to equalize the distribution of the funds appropriated by Congress. It is pointed out that, while a large part of the revenues collected by the Federal Government come directly or indirectly from the farming population, only a very small per cent. of the appropriations are spent in the rural districts. The spending of National funds for building and improving highways would relieve this injustice to some extent, and would tend to stimulate the farmers' interest in public affairs more than almost anything the Government could do.

An object lesson road is now under construction at Russell Centre, in Geauga County, Ohio, and a very successful road convention has just been held at that place addressed by Hon. Martin Dodge, of the United States Department of Agriculture, and other speakers of local prominence. There is a great interest in road improvement throughout Northern Ohio. The Cleveland Leader in its report of this convention says:

"A feature of the meeting was the fact that a line of [illegible] telephones were [illegible]

MANUFACTURER OF
—Union-Made Cigars—
Wholesale and Retail 25 Somerset St.
Dealer in Smokers' Articles, Tobaccos, Pipes, Etc.

[illegible] very definite results may be pointed out. There are 415 miles of completed State road out of a total of 1566 miles for which petitions have been received. These petitions come from 281 towns and twenty-five cities, showing that the country districts are after their share.

The counties are obliged to pay one-quarter the expense of construction, and the amount assessed on the counties during 1902 was $126,000, while about fifty-seven miles of road were built. These fifty-seven miles cost the State about $500,000 and the counties $126,000, or a total well over $10,000 per mile. In considering the enormous cost, however, it should be remembered that difficult and costly sections are usually selected, where expensive grading or drainage are necessary.

The repair bills, which it was at first supposed would be light, are fast becoming an important item. The towns pay $50 per year toward repairing each mile of State road and the State does the rest. In 1902 the total cost of repairs was about $60,000, of which the towns paid about $17,000. Hence the cost per mile is nearly $150 per year, although some of the roads are new and none have been made many years. It is already evident that in this climate no road will take care of itself, however well built, and maintenance as well as first cost must be reckoned in figuring out the burden of a complete system. No doubt the road building idea is immensely popular, especially in the smaller towns. It is felt that the improvement must come, and taxpayers do not find fault except, perhaps, in large cities, where not much is practically known of country road problems. Yet any plan that makes communication easy between country and city is a help to all classes, and the fact is becoming more fully realized yearly as the plan of the State roads gradually approaches completion.

Using Steel Road Workers.

It is reported from Wilkes County, Georgia, that on account of the shrinkage in the number of convicts available for road work the commissioners have purchased some $600 worth of steel road workers, which are said to do the work of twenty-five men. With these machines and sufficient mule power to manipulate them, the commissioners hope to make up the deficit in convict labor.

Narrow Tires Displaced.

The wide tires seem to be gradually displacing the narrow, especially for farm work. They should take the place of the narrow tire on the highways, as the roads can be kept in condition with much less expense where heavy loads are drawn upon broad tires than when narrow tires are used. It is not only for the sake of the highway, but there is a saving in draft upon almost all kinds of roads.

College Amusements.

By John Bascom.

AMUSEMENTS of college life have undergone a change akin to the division of intellectual interests. They have become professional amusements, like those of the circus of theatre; something to be seen rather than to be shared, something labored for on the one side and paid for on the other. Crowded life, the life of cities, which is at once near and remote, inevitably tends to professional amusements. They call for no participation in the spectators, and no social sympathy between them. Those idly waiting to be amused become ever more critical and exacting, less resourceful in themselves and more dependent on others. They must be pleased, and the task becomes an increasingly difficult one. The commands of the amphitheatre lay as an absolute law on those whose lives were held cheap in ministering to popular pleasure. A scrub game of ball, no matter how recreative to the participants, gives no satisfaction as a spectacle. Football demands severe training, a sacrifice of every competing purpose, and incurs serious risk, simply that those who play may give sufficient excitement to those who do not play.

Young men have only about so much enthusiasm to spend, and if it is squandered in amusement, it is necessarily lost to productive labor. Enthusiasm ought to run in the channels of their own lives, and so buoy up and bear forward their own achievements, like well freighted vessels. If this enthusiasm makes its claims on others, it leaves those who generate it, like the Roman youth who crowded the coliseum, an ignoble band. Professional amusements mean the breaking up of free, personal, communal effort, and putting in its place the strained efforts and strong passions which sway men backward and forward as mobs. The passion for sport which prevails in our universities is to be explained, in part, as an effort to regain that unity which has been lost in the dispersion of academic work.—The Atlantic.

Mysteries of the Atom.

By the Editor of the Mail and Express.

CHEMISTS from all over the world, assembled at an international congress at Berlin, gathered to see a German professor reveal, in a darkened room, particles of various metals shining weirdly in the light cast by a tiny speck of dark powder on a piece of paper. This powder, which weighed but 15-100 of a grain, was of the lately discovered element and metal, polonium, the companion of radium as an object of the world's astonishment. It gives out light and heat, "miraculously," those say who have not yet found out what the miracle is.

Light-bearing as they are, these substances had to be chased for centuries through the darkest corners of the earth before they were found. Polonium, like radium, is derived from uranium, where it is so thinly distributed that its presence has to be imagined with a great effort; and uranium itself is derived ordinarily from pitchblende, which, in turn, is something that the ordinary person knows nothing about. Somewhere on a lonely spot on the northern shore of Lake Superior the observant scientist may stumble on a little of it. Yet wherever uranium exists it will turn a bit of colorless glass, thrown on the earth, to a green tint.

Mystery still resides, not only for the lay mind, but for the chemists themselves, in these strange new radiant metals. They bring us to the threshold of the infinite—but do not let us in. At the same time that they promise new and wonderful knowledge, they upset most of the theories that we have been going on. They seem to conduct us into the presence and power of an agency in nature that transcends all the accepted rules and necessitates new explanations. There are emanations from matter which we know nothing about. Are these emanations in themselves a special kind of matter, or are they merely vibrations in a passive medium? And is the atom really an "atom," an uncut little particle, or is it a whirling vortex, possessing all sorts of strange powers and properties?

These are questions that the chemists are trying to find the answer to while they chase these radio-active elements through the dark corners of the earth—through its uraniums and thoriums and heliums and radiums. Between the bewilderingly vast and lofty problems presented by Dr. Alfred Russel Wallace and others in their speculations and disputes about the starry universe, and the bewilderingly momentous question raised by these chemists who are conducting us into the presence of the whirling, radiant atom, we are just where Isaac Watts was when he wrote, 200 years ago:

"Lord, on a narrow neck of land,
'Twixt two infinities, I stand."

And so far as we can tell from what the scientists have so far revealed to us, we must stand there for a little time yet.

Fishermen Should Be Classified

By Former President Grover Cleveland.

MOST of us who fish in a fair, well-bred and reasonable way, for the purpose of recreation and as a means of increasing the table pleasures of ourselves or our friends, may well regret the apparently unalterable decree which gives to all those who fish, under the spur of any motive—good, bad or indifferent—the name of fisherman. We certainly have nothing in common with those who fish for a livelihood, unless it be a desire to catch fish. We have, in point of fact, no closer relationship than this, with the murderously inclined, whose only motive in fishing is to make large catches, and whose sole pleasure in the pursuit is the gratification of a greedy propensity. Nevertheless, we, and those with whom we have so little sympathy, are, by a sort of unavoidable law of gravitation, classed together in the same fraternity, and called fishermen. Occasionally weak attempts have been made to classify the best of this fraternity under the name of anglers, or by some title of that kind, but such efforts have always failed. Even Isaak Walton could not change the current of human thought by calling his immortal book "The Compleat Angler." So it seems, however much those who fish may differ in social standing, in disposition and character, in motive and ambition, and even in mode of operation, all must abide, to the end of the chapter, in the contemplation of the outside world, within the brotherhood called "Fishermen." Happily, however, this grouping of incongruous elements under a common name does not prevent those of us who properly appreciate the importance of upholding the respectability of decent fishing from coming to an agreement concerning certain causes of congratulation and certain rules of conduct.

At this season, when the activities of genteel fishing usually begin, it is fitting that a word should be spoken that may not only redound to our comfort and satisfaction, but may guard us against temptations that easily beset even the best of fishermen.

We who claim to represent the highest fishing aspirations are sometimes inclined to complain on days when the fish refuse to bite. There can be no worse exhibition that this of an entire misconception of a wise arrangement for our benefit. We should always remember that we have about us on every side thousands of those who claim membership in the fishing fraternity, because, in a way, they love to fish, when the fish bite—and only then. These are contented only when capture is constant, and their only conception of the pleasures of fishing rests upon uninterrupted slaughter. If we reflect for a moment upon the consequences of turning an army of fishermen like these loose upon fish that would bite every day and every hour, we shall see how nicely the vicissitudes of fishing have been adjusted, and how precisely and carefully the fatal attack of discouraging bad luck selects its victims. If on days when we catch few or no fish we feel symptoms of disappointment, these would immediately give way to satisfaction when we remember how many anxious and discouraged fishermen are spending their time in hammocks or under trees or on golf fields, instead of with fishing outfits, solely on account of just such unfavorable days. We have no assurance that if fish could be easily taken at all times the fishing waters within our reach would not be depopulated, a horrible thing to contemplate. Let it not be said that such considerations as these savor of uncharitableness and selfishness on our part. We are only recognizing the doctrine of the survival of the fittest as applied to fishermen, and claiming that these "fittest" should have the best chance.

What has been said naturally leads to the suggestion that consistency requires those of us who are right minded fishermen to reasonably limit ourselves as to the number of fish we should take on favorable days. On no account should edible fish be caught in such quantities as to be wasted. By restraining ourselves in this matter we discourage in our own natures the growth of greed, we prevent wicked waste, we make it easier for us to bear the fall between what we may determine upon as decent good luck and bad luck, or no luck, and we make ourselves at all points better men and better fishermen.

We ought not to forget these things as we enter upon the pleasure of our summer's fishing. But in any event let us take with us when we go out good tackle, good bait and plenty of patience. If the wind is in the south or west, so much the better, but let's go, wherever the wind may be. If we catch fish, we shall add zest to our recreation. If we catch none, we shall still have the outing and the recreation—more healthful and more enjoyable than can be gained in any other way.—The Independent.

Black Adventure.

SINGLE-HANDED RESCUES.

IT was one morning in September last that a fire broke out with terrible suddenness in the engine house of the Rodringailt colliery, near Rhodda. At the moment a cage with eleven men in it was slowly descending the shaft. The flames spread rapidly and the heat became almost unbearable. But even Lloyd, the engine man, never dreamed of quitting his post. Catching up a sheet of metal he propped it in front of his face, and grimly held on to his winding lever until the indicator showed that the cage was safe at the bottom of the shaft. Then, and not till then, scorched and blackened, he staggered out into the open air.

A few moments later the wire rods attached to the cage snapped with the heat, but by that time ten of the men were in safety. Only one was injured by the falling metal, and he not mortally.

An English railwayman the other day saved an express train full of passengers bound from Liverpool to London. A Glasgow goods train was shunting on the L. and N. W. Railway, near Tamworth, to make way for the express train to pass. The signal fell for the express to pass, but the driver of the goods, under some misapprehension, imagined that it was for him to leave the siding. The points being against him he was derailed.

Eight trucks left the rails and lay about, utterly blocking the main line. Both driver and fireman were badly hurt; but the latter, a Swansea man, by the name of Frederick Davis, realizing the danger to the oncoming express, picked himself up, and, though in terrible pain, crawled slowly toward the nearest signal box. As he went he laid danger signals on the line. When he reached the box he had just strength enough left to tell what had happened. Then he fell unconscious and was carried to a hospital.

In the two desperate battles of Rorke's Drift and Isandlwhana the gallant Twenty-fourth lost twenty-one officers and 587 men, and the survivors received no fewer than eight Victoria crosses. Of these the most magnificently won is that which Sergeant Hook, now employed at the British Museum, still wears. For four long hours Hook and two other men held the hospital at Rorke's Drift against a host of huge Zulus. At last his two companions fell, and the survivor ran short of ammunition. He found he was [illegible] high.

Then the Zulus gave up the attempt to rush and set the place on fire. The sole survivor seized a pick and broke through three successive walls of sun-dried clay to get at the hospital behind. There lay eight men too badly hurt to move. And already the flames were bursting in upon them. Hook picked up the nearest and staggered away with him to the other building behind. Then Lance Corporal Williams came to the rescue, and with his help all the sufferers were carried into safety. Before rescue came Hook had been fighting eighteen hours.

One of the heroes of the world is a Chinaman. His story was recently told by Mr. Granville Sharp, of Hong Kong. Mr. Sharp was on a French steamship on its way from Hong Kong to Touron on the Chinese coast. The steamship ran on a rock and was beached to save her. Her captain hired two Chinese junks to take the crew and passengers back to Hong Kong, and Mr. Sharp went with the captain in the smaller one. A typhoon swept down upon them. Masts, bulwarks and rudder were swept away in an instant. The Chinese captain, believing all was over, went below and drugged himself with opium.

Three Chinese fishermen, who had been firemen on the steamship, were aboard, and they knew the coast. They managed to repair the rudder, but only one could steer well enough to save it from being again broken. He had to watch every wave and be ready to ease her off each sea. With no one to relieve him, this man stood at his post in torrents of rain, in wind and darkness, and endured the awful strain for thirty-six hours. He never once let go his hold. A boy stood by him and put food between his lips at intervals to give him strength for his all but hopeless task. He saved the junk and all aboard her.

What threatened to be one of the worst disasters in the history of shipping was the burning of the Ocean Monarch. Fire was discovered in her forehold an hour or two only after she had left the Mersey. There was a strong wind breeze and she was headed for the Welsh coast.

By some unlucky accident an anchor was dropped, and the big ship was brought up all standing, head to the wind. The flames came roaring aft, where 600 passengers and crew were crowded.

A Brazilian frigate, a yacht and a pilot boat were near, but they only attempted to pick up those who jumped and swam. Suddenly up came the American clipper New World, and rounded into the wind barely 200 yards away. In her first boat was Frederick Jerome, only an able seaman, but one of the bravest men that ever lived. In a flash his boat was alongside the burning ship, and he climbed on deck amid the scorch and smother. There he stayed until the last soul of all the 600 were saved. His clothes were on fire seven times, and he was scorched almost beyond recognition. His only reward was the medal of the American Humane Society.—Pearson's Weekly.

A GIRL'S WILD RIDE ON AN ELK.

A fearless Colorado Diana, famed for her many thrilling adventures with wild animals, her splendid horsemanship, and her knowledge of woodcraft, is seeking appointment as Game Warden of Routt and Rio Blanco counties.

Miss Emma Kellogg is this remarkable young woman. Her home is in Routt County, one of the best game sections in the State. If she secures the appointment she will be the only woman game warden in the United States.

Miss Kellogg's most thrilling adventure was a wild ride on the back of an elk. While out in the hills one day she came suddenly on an angry bull elk. She had leaned her gun against a tree and before she could get it the elk was upon her.

She took refuge in a sapling and tried to hold the animal's antlers around it, but her strength was not sufficient and the elk broke away. Miss Kellogg took advantage of a moment's respite to climb a tree and sat on the first limb. This angered the elk more than ever, and he gave the tree such a bump that Miss Kellogg fell off.

She would have been stamped to death by the animal's sharp hoofs had it not been that luckily she fell on the elk's back. Then, with great presence of mind she grasped the antlers and held on for dear life.

The elk was not expecting a development of this kind, and it tore off through the woods, terror-stricken, endeavoring to shake off its burden. Miss Kellogg, however, did not propose to be shaken, and she only clung the tighter.

Away they went, the crazed animal dashing through the trees with the velocity of an express train. Up hills and across valleys the animal sped, jumping over the rocks with tremendous leaps that almost unseated the frightened rider.

Miss Kellogg was becoming weak from the terrible strain and felt that she must soon release her hold, when an unexpected incident proved her deliverance. The elk had made violent efforts to dislodge the girl, and it was one of the animal's tricks to accomplish this which saved Miss Kellogg's life.

The elk darted through some thick brush where overhanging branches came low down, in order to brush the rider off. But the terrified animal miscalculated about its antlers and got caught in the branches. It struggled and struggled, but could not get loose, and it was but the work of a moment for the intrepid mountain girl to kill the captive animal, by cutting its throat with her hunting knife.

Then she had to make her way home, but she got help and returned to claim the animal. Its branching antlers now ornament her home.

She says she would have entered the bronco-busting contest last fall had her parents not dissuaded her on the ground that she would be the only lady entered. She lassooed a young bear once and took it home alive by giving her pony rein whenever it tried to attack her.

HUNTERS SURPRISED BY BEARS.

Bears are very numerous in Orange and Sullivan counties, New York. A party of three well-known sportsmen were attacked by two ferocious beasts and had a narrow escape after a desperate fight. Joshua Sands and F. W. Low, of New York, with Gustavis Schneider, of Nyack, had been stopping with David D. Hall at Claraville. They had spent the morning in hunting for partridge and at about noon sat down to lunch under the lee of an overhanging ridge of rock. Suddenly a good sized bear cub fell into their dinner party from the rocks above their head. The hunters sprang to their feet, but no sooner had they done so than the mother bear and a cub nearly grown tore down the ledge of rocks and attacked them.

Low's gun was ready to his hand. He dropped upon one knee and sent a charge of birdshot into the old bear's left eye. It went down and over, but was up and at him in a moment. He had replaced the empty shell and once again he fired, this time blinding the other eye. Still the bear came on, growling fiercely and staggering from side to side. With the muzzle of his gun two feet from the bear's throat he fired, and the animal fell at his feet and died to death.

The other bear, by far the fiercest of the two, pursued Sands and Schneider as they sped off to a sapling, against which their shotguns leaned. Sands seized his weapon and fired at the bear when it was ten feet distant, the scattering charge striking it on the nose. He fired again almost instantly, this time tearing off part of the young bear's front leg. It never faltered and when almost upon him rose upon its hind feet. Sands gamely clubbed his weapon and struck with all his might. As he did so Schneider rushed up, and poking the barrel of his gun over his comrade's shoulder, sent a load of heavy shot full into the forehead of the enraged brute. Fortunately for both hunters it toppled backward. It struggled fiercely to regain its feet, but the crippled foreleg prevented. Sands hastily slipped two more shells in his gun and taking careful aim at close range fired both charges into the bear's body, and it died. No one thought of the cub that had spoiled the lunch until an hour later.

The fellow who makes a fool of himself is seldom satisfied unless he works overtime at the job.

A SERMON FOR SUNDAY

A BRILLIANT DISCOURSE BY THE REV. DAVID JAMES BURRELL, D. D., LL.D.

Subject: The Wireless Messages of God—A Man Who Would Hear the Word Through the Scriptures Must Divest Himself of Prejudice.

NEW YORK CITY.—"The Wireless Messages of God" was the subject of the sermon preached by the Rev. David James Burrell, D. D., LL.D., in the Marble Collegiate Church, Sunday. He took his text from I Corinthians ii:14: "The natural man receiveth not the things of the Spirit of God, for they are foolishness unto him; neither can he know them, because they are spiritually discerned." Dr. Burrell said:

A great principle is here laid down which governs in the universal realm of truth, to wit, the principle of mutual adjustment. If you strike a tuning fork which is keyed to middle C it will awaken a response in another it keyed to the same pitch, but not otherwise. This is the basic fact in wireless telegraphy. On Cape Cod there is a transmitting station, consisting of four steel towers with a bunch of wires suspended from the top and meeting at a common point like an inverted cone. If the power be applied to the apex of this cone, the wires begin to tremble, and this current, oscillating at a rate of, say, 999,999 vibrations per second, create a series of corresponding vibrations in the surrounding ether; just as a stone cast into a pond sends out concentric circles of water. This ether wave speeds outward with incalculable rapidity in search of its receiver. Now, there is such a receiver at Pol Dhu, in Cornwall, and the wires at Pol Dhu are precisely attuned to the transmitter, that is, adjusted to an oscillation of 999,999 per second, so that the message sent from the station at Cape Cod meets no response until it finds its sympathetic station at Pol Dhu, and this welcomes it.

The system of wireless telegraphy which is justly credited to Marconi is not an invention, but a discovery. He has simply lighted upon a process which has been going on perpetually in space. The sun as the great source and centre of energy in our solar universe is constantly sending out messages of light. It is a scientifically demonstrated fact that a beam of light is simply an electric message; that is, a vibration of ether. And here the principle holds that no message can be received except by some object which is sympathetically attuned to welcome it. Let us suppose, as Professor Pupin suggests, that a beam of light intended to convey the color red is sent out from the sun. It goes forth representing a certain number of ether waves per second and speeds through space until it reaches the earth and here, intent upon its errand, it passes without pausing through all the meadows, since no grass blade is adjusted to receive it; passes over all gardens, no daisy or buttercup, no marigold or hollyrose being disposed to welcome it, until it finds a rose, and here it pauses and finds welcome, because the rose has been precisely coördinated with it.

Let us go a little further now, and we shall find a spiritual analogy. For this process, which has been discovered to be so prevalent in nature, has infinite field and scope of operation in the province of spiritual things. God, as the great transmitter of truth, bears to the spiritual world a relation corresponding with that of the sun in the natural world. Let us assume that there is a God, and that we are created in His image and after His likeness; it follows, as an inevitable conclusion, that He will somehow reveal Himself to His children and hold converse with them. But here is the application of the principle referred to. The man who would hear the [illegible] communicate with the children of men. Now there are some who look through nature to nature's God and hear Him speaking in everything about them, as it is written, "There are so many voices and none of them is without signification." Such persons, though they dwell in the desert of Midian, find "every common bush afire with God." At night the heavens declare His glory to them and the firmament showeth His handiwork. This was in Bryant's mind when he wrote:

"To him who in the love of nature holds
Communion with her visible forms, she speaks
A various language."

But there are others who hear no voices, and see nothing that is not visible to fleshy eyes, like Peter Bell, of whom Wordsworth says:

"A primrose by the river's brim
A yellow primrose was to him
And it was nothing more."

Whence this difference? It arises from the fact that some souls are sympathetic with God and others are not. There was Coleridge, who was so devoutly inclined, so open to the reception of spiritual truth, that, walking in the vale of Chamounix, he heard the snow capped mountains and ice falls echoing His name:

"God! Let the torrents like a shout of nations
Answer, and let the ice plains echo, God!
God! Sing ye meadow streams with gladsome voice;
Ye pine groves with your soft and soulike sounds;
Ye living flowers that skirt the eternal forest;
Ye wild goats sporting round the eagle's nest;
Ye eagles, playmates of the mountain stream;
Ye lightnings, the dread arrows of the winds;
Ye sounds and wonders of the elements
Utter forth God, and fill the hills with praise!"

The wisest Man that ever lived got lessons in theology from the ravens, the lilies of the field, the growing wheat. But, alas! there are those who have no ears to hear the song which is within the song of birds and the visions which are within the beauty of the natural world. They are bound down to things material, dreaming no dreams and seeing no visions; of the earth, earthy.

"Great God, I'd rather be
A pagan, suckled in a creed outworn;
So might I, standing on this pleasant lea,
Have glimpses that would make me less forlorn,
Have sight of Proteus rising from the sea,
Or hear old Triton blow his wreathed horn!"

It is the misfortune of all misfortunes to be thus bond slave to the five senses; to see nothing beyond the range of physical vision and the circumspection of the finger tips. This is to be agnostics, indeed; to have no clairvoyance, no spiritual apprehension, no second sight, no faith. It is an eternal and immeasureable calamity to stand in the midst of a universe where the ether is vibrant with messages of truth and be so deeply absorbed in our little plans and pursuits and "physical sciences" that we hear no voice of God.

Let us turn now to the Scriptures which claim to be a divine revelation. There is an attempt in some quarters to reduce them to the level of other literature, and those who approach them in this attitude will find precisely what they find in other books and no more. Here, as elsewhere, we find what we are looking for, and hear what we are listening for. The mere student of literature finds in the Bible myths and parables, songs and chronicles of surpassing beauty, but there are others who listen as at divine oracles and hear the very voice of God.

How are we to account for this difference of estimate as to spiritual value and veracious integrity of the Scriptures? It is due, as before, to a difference of relation with God. In some cases men hold themselves in readiness to hear, as Samuel did in the early watches of the morning, when in answer to the heavenly voice he said, "Speak, Lord, for Thy servant heareth!" In other cases they stand in a critical or skeptical attitude, as Theodore Parker did when he remarked, "I am not willing to receive this statement upon the authority of any such person as God." There is nothing in the world that can so destroy the receptivity of the soul as this pride of worldly wisdom. No man can hear a heavenly message who is not instantly willing to admit that God is wiser than he.

The fact that a man is liberally educated in certain directions does not argue that he is competent to receive a divine communication. In the middle of the seventeenth century there were two men living in England whose names are equally historic and illustrious for broad culture. One of these was Sir Isaac Newton and the other John Milton. Now it is a singular fact that Sir Isaac Newton could not appreciate "Paradise Lost," and equally singular that John Milton could see nothing in "The Principia." Obviously this was not to the discredit of either "Paradise Lost" or "The Principia," nor was it a reflection upon the learning of either man. It simply indicates that in order to apprehend truth in any quarter a man must be sympathetically disposed toward it. Milton had no mind for mathematics, nor Newton for poetry. So the wisest of men, as the world holds wisdom, may come to the Scriptures and find nothing there; as the soldiers of Titus, at the taking of Jerusalem threw open the ark of the covenant and found it empty. It is a proverb that none are so blind as those who will not see; wherefore a man who would hear God speaking through the Scriptures must divest himself of prejudice and be willing to hear Him.

And at this point, again, we discover why Christ is so often rejected as the incarnate "word." There are multitudes who regard Him as chiefest among ten thousand and altogether lovely, but there are many others who see in Him nothing but "a root out of a dry ground, who hath no form nor comeliness that they should receive Him."

Why this wide difference of view? It is due to the same difference in receptivity. There are some who profoundly feel the need of Christ; the sense of sin lies heavily upon them, and they would fain be delivered from it. They wait, like aged Simeon in the temple, for the coming of the mighty One, and, beholding Him, they instantly receive Him as the God-sent Word, saying, "Now lettest Thou Thy servant depart in peace, for mine eyes have seen Thy salvation!" They welcome the message because they were waiting for it. Others, like Nathaniel, cry, "Can any good thing come out of Nazareth?" And prejudice must be overcome before they can receive Him. Thus it is written, "He came unto His own, and His own received Him not; but to as many as received Him to them gave He power to become the sons of God." Prejudice is grounded in pride of worldly wisdom, and this is the great obstacle between the soul and Christ as the "Word" or message from God.

Thus it has come to pass that some who have been distinguished for their attainments in certain provinces of knowledge have been wholly blind on the godward side. One cannot forget how Charles Darwin, after spending his life in experimenting along the lines of physical science, died lamenting that his spiritual nature had been starved. In his childhood he had been deeply religious, as he said, but he had dwelt so long amid an environment of purely material things that God and immortality had become empty dreams to him. He called it "atrophy"—that is, a wasting away for want of nourishment. All through his life he had fostered the natural man, or, as Paul calls it, psuchikos, the psychical man. He could reason indefinitely in the realm of material things, but the supernatural was wholly ruled out.

And the principle referred to will account, also, for the fact that the Holy [illegible] Kingdom on earth, and those who are in the kingdom have to do officially with Him. Yet there are many who characterize the third person of the godhead by a neuter pronoun and regard Him merely as an affluence or effluence, bearing no vital or personal relation to them.

There is obviously a great difference of opinion here. Is the Holy Spirit the personal director of our life and service, or is He not "He" at all, but merely "it?" If He sustains the former relation to us, it is because our souls are in harmony with His great purposes concerning us and adjusted to receive communications from Him. In this case we stand as Elijah did on Horeb, his face wrapped in his mantle, while he harkened to "the still small Voice." And living thus we follow His guidance, as did Abraham on his journey from Ur of the Chaldees along the windings of the Great River, ever heeding the direction of the Voice, pitching his tent or moving on as the Spirit bade him. Otherwise we are like the multitudes at Pentecost, who, despite the manifestations of divine power in the sound of the rushing mighty wind and the miracle of tongues, looked on in doubt and bewilderment, saying: "These men are full of new wine." In a recent book on religious experience the manifestations of pagan frenzy are collated with the feelings and convictions of Christian believers, and all alike are subjected to analysis by the so-called "scientific method." Thus judged, there is nothing in regeneration, nothing in sanctification, nothing but infatuation in the uplifting and transporting influence of the Spirit of God.

In view of such considerations is it not apparent that the soul is blind and deaf to heavenly visions and revelations, unless it is attuned to them? And what solemn significance there is in the words of Jesus: "He that hath ears to hear let him hear." There are, indeed, "so many voices and none of them without signification," but the people standing by say: "It thundereth!" O for the hearing ear and the understanding heart! What avails it to call a commission of blind men to pass judgment on the art of Titian or Raphael? What avails it to bid a jury of deaf men sit in judgment on the oratorio of the "Creation." Thus when the philosophers of Athens heard Paul preaching on Mars Hill "some mocked and others said: We will hear thee again concerning this matter." The gospel is "foolishness to the Greek, and to the Jews a stumbling block, but to them that are saved it is the wisdom and power of God." Men sit like blind Bartimaeus in the Valley of Palms; and its beauty is unknown to them until the Lord of truth, passing by, says: "Receive thy sight!" The five physical senses are as five gates open to physical truth, but faith is the sixth gate, at which alone spiritual verities can enter. Wherefore it is written: "He that cometh to God must believe that He is and that He is a rewarder of them that diligently seek Him."

The Best Yet to Come.

God's best gifts are always before us, never behind. Pleasures of memory are sometimes delightful, but pleasures of hope are ever yet richer and brighter, especially to the eye and thought of faith. Says one of God's dear ones, referring to a fresh blessing from God: "This sudden coming of a long-expected blessing is the sweetest thing that ever came into my life. How good God is and how tenderly He leads us! He changes always a great good into a greater. I have been happy all along, but now, since this experience, my heart keeps singing:

"Rest, peace and life, the flowers of fadeless bloom,
The Saviour gives us not beyond the tomb,
But here and now, on earth, some glimpse is given
Of joys which wait us through the gates of heaven."

And thus it ever is in youth, in maturity, in age and yet beyond—the best is yet to come. Let us look forward and upward, and ever hope and trust and praise.—Sunday-School Times.

THE MATE'S CONSCIENCE.

The Ready Answer of a Passenger on a Coastwise Vessel Was Grateful to the Seafarer.

"Coming up from New Orleans to New York on one of the fast freighters that carry passengers," said a man at the Astor House, "I got on pretty good terms with the first mate—which is something of an achievement, by the way, as the average seafaring man has even a greater contempt for the landlubber than the cowboy has for the tenderfoot. Perhaps it was because he took me for a physician. One of the passengers had been amusing himself by trying to guess the occupations of the others through their casual remarks in the course of conversation, and on the strength of something I had said the word was passed around that I was a doctor of medicine.

"The mate had something on his mind, and one day he took me into his confidence. 'On our last trip to New York,' he said, 'there was a chap from Cincinnati in a pretty bad way with booze. He began to see spiders and things, and it made me sort of uneasy, as there wasn't a doctor on board. Pretty soon he got violent, and I had to do something. So I got the irons on him, and gave him a good big dose of morphine to kind of soothe him, and then locked him up in my own stateroom. I couldn't have done more for my own brother, could I?'

"I silently assented.

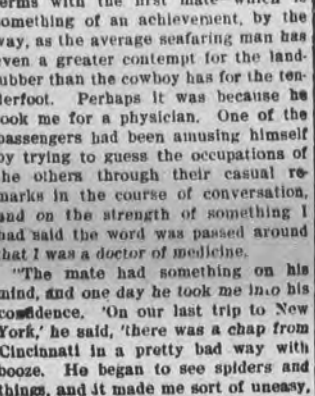
"'Well, would you believe it?' said the mate, in an injured tone, 'when I went to get him up, the chap was dead.'

"'Dear me! what did you do?' I asked.

"'Do,' echoed the mate. 'There wasn't but the one thing to do. We sewed him up in tarpaulin and sank him. Kind of a wet grave, too, for a chap that had been so set against water when he was a-living. But, say, doctor, I want your honest opinion. Do you think that I did all that I could do in reason for that man?'

"'Of course,' I assured him, 'of course. The orthodox treatment for a man with delirium tremens is irons and morphine.'

"Then the mate left me with a clear conscience."



He—Could you learn to love me if I were a millionaire?

She—I certainly would like you better were you well off—say a thousand miles or more.

Oh! Boston.

An Oklahoma paper prints this story: She was from Boston, he from Oklahoma. "You have traveled a good deal in the West, have you not, Miss Beacon?"

"Oh, yes, indeed—in California and Arizona, and even in New Mexico."

"Did you ever see the Cherokee Strip?"

There was a painful silence, but finally she looked over her glasses at him and said: "In the first place, sir, I deem your question exceedingly rude; and, in the second, you might have been more refined in your language by asking me if I had ever seen the Cherokee disrobe."—Exchange.

She Carried the Argument.

"Do you mean to tell me," he said to the little wife at the breakfast table, "that you really believe in a personal devil?"

"Yes, dear," was the confident reply; "I've always had supreme faith in you!"

And then he said that he'd better be going, for he was ten minutes late, anyhow.—Atlanta Constitution.

Sorry He Spoke.

"Oh, we have some very strong men in England," boasted the new arrival from London.

"How strong are they?" queried the American citizen.

"Oh, I've seen them lift cannons, trucks, and even cars."

"Indeed! Then it is strange that none of them can life such a small object as the yacht cup."—Chicago News.

Woman's Narrowness.

Mrs. Buttercup—I wish I had a million dollars.

Mr. Buttercup—Thunderation, woman, haven't you any business acumen? What do you want to stop at a paltry million for, when you can wish for a hundred millions just as easily and with just as much prospect of getting it? No wonder we are poor!—Kansas City Journal.

Could Move.

He (at an art exhibition)—Well, how do you like Brown's picture?

She—That one? Why, I thought it was yours! Very bad, isn't it?—Punch.

"Mamma," queried small Bobby, "may I have another piece of pie."

"But you have some on your plate yet," replied his mother.

"That ain't pie," answered Bobby scornfully, "that's crust."

OUT OF THE MOUTHS OF BABES.

First Little Girl—My papa's a broker.

Second Little Girl—Huh, that's nothin'! My papa's always broke.

Little Nellie was out riding one day with her mother, and as they passed a cemetery, she asked: "Mamma, how long does it take for the tombstones to come up after they plant people?"

"Bessie," said the teacher to a small pupil, "can you tell me what memory is?"

After a moment's reflection the little one replied: "Memory is the thing people use to forget things with."

A pupil in a village school who had been requested to write an essay on the human body handed in the following:

"The human body consists of the head, throax, abdomen and legs. The head contains the brains in case there are any. The thorax contains the heart and lungs also the liver and lights. The abdomen contains the bowels of which there are five—a, e, i, o, u, and sometimes w and y. The legs extend from the abdomen to the floor and have hinges at the top and midute to enable a fellow to sit when standing or to stand when sitting."—Chicago Tribune.

Manners for Musical "At Homes."

Don't, when asking any one to sing or play, casually close the piano while so doing. It is a simple act, but one most discouraging in its effect.

Don't, upon hearing some one consent to perform, throw yourself back in your chair, after the manner of one about to have a tooth extracted; and don't, during the progress of a song, glare at the carpet, or keep clenching your hands. Neither should you draw in a sharp hissing breath when the accompanist mislays his fingers.

Don't, when asked to oblige with a selection, go through your entire repertoire. Even a cornet gets wearisome if played badly and a great deal.

Don't, when accompanying, try to cover the defects of the voice by crashing out big chords of your own invention, and never, under any circumstances, grind your teeth audibly during a singer's inadvertent wanderings from the key.

Don't whistle while a song is being rendered. Even if you whistle the same melody and in a similar key, the effect is irritating to those around you. —Punch.

The Victim Knew.

"Tell me what people read and I will tell you what they are," said the self-confessed philosopher. "Well, there's my wife," rejoined the dyspeptic party. "She's forever reading cook books. Now, what is she?" "Why a cook, of course," replied the philosophy dispenser. "That's where the rocks rattle in your wheels," said the other. "She only thinks she is."—Chicago Daily News.

The Rain Leaked Through.

Landlady—I'll have you understand, Mr. Boarden, that there is not water in that milk. It comes direct from our own farm.

Mr. Boarden—It that's the case, ma'am, I strongly advise you to have your own cows shingled.

Took Toll for Himself.

The provost of the University of Pennsylvania, Charles Curtis Harrison, knew in his boyhood an eccentric old man named Herbert Ling.

Mr. Harrison said recently that a wag once told Ling that if he would get himself appointed to the office of taking up the collection on Sunday in the church he would be paid a quarter a Sunday, and would also have a turkey every Christmas.

Ling accordingly secured the place of collector, and waited patiently for Christmas to come around. It came, but the expected turkey did not come with it. Therefore the old man called upon the pastor.

He explained his grievance—how he was to have had the Sunday quarter and the Christmas turkey—but the pastor could only smile, and shake his head, and say:

"Herbert, I fear you have been hoaxed."

"Maybe I have, sir," returned the other, "in the matter of the turkey, but not in the matter of the quarter. I have been taking care of that myself."

Departed Glories.

The family is feelin' blue
  Sence Silas cut his hair.
Our hopes have grown distressin' few
  Sence Silas cut his hair.
We used to think that he would play
The fiddle extry fine some day;
Sech dreams have faded clean away
  Sence Silas cut his hair.

Nobody asks him to recite
  Sence Silas cut his hair;
Nor read the pomes he used to write
  Sence Silas cut his hair.
His head's an ordinary dome,
Ambition now has ceased to roam.
There ain't no genius in our home
  Sence Silas cut his hair.
—Washington Star.

Song of the Daisy.

Ev'rywhere are pretty daisies
  Scatter'd over the meadow land;
Countless, like the stars above us,
  Or the pebbles on the strand.

Like a host of little angels,
  In their spotless dress of white;
Day and night they stand sentinel;
  What a grand, a glorious, sight!

They're not troubled 'bout the fashion,
  Never bloom or pose for show;
Modest in their way and manner
  In God's sunshine live and grow.

Like an army of soldiers,
  Proud before their Captain stand;
Bowing when some gentle breezes
  Sweep by at God's command.

Glad to please and praise their Maker,
  In their simple style and way;
Glad to beautify and brighten
  Some forgotten grave today.

SOPHIE STAHL.

To Mauch Chunk on the Fourth.

Everyone just now is making plans for some kind of an outing on the Fourth of July. Too often in the past has the day been followed by vain wishes that it had been spent in some other way than the one selected, but no such regrets ever attend the trip to Mauch Chunk. Many people travel half over Europe without viewing more romantic scenery than in this, the so-called "Switzerland of America." Rugged mountain peaks are in awe-inspiring contrast to deep chasms and gorges while there is hardly a spot in this section where the artist does not long to plant his easel or the amateur photographer to expose a plate. And the beauty of it is that the jaunt may be made at very moderate expense and within the limit of a day's outing. The New Jersey Central announces an excursion on July 4th to Mauch Chunk, Glen Onoko and the Switchback, the round-trip costing only $1.50 for adults and 75 cents for children. It is alone worth the trip to have experienced the novel ride of 14 miles over the gravity road known as the Switchback. There is nothing quite like it anywhere in the country. While it is exciting, the most timid have nothing to fear for the trip is quite safe. A fast special express train will leave Plainfield at 9.22 a. m. and arrive at Mauch Chunk about noon. There is ample opportunity to see and enjoy everything as the return train does not leave until 5.40. The nearest ticket agent will supply circulars giving full details. People who decide to make this excursion will have something to remember all their lives and much to tell their friends.

FOR SALE OR EXCHANGE.

Useful Articles of Daily Need for Sale or Exchange for Other Articles.

in reply to ads, where explicit directions will be given regarding same.

WANTED one thousand dollars on first bond and mortgage; good loan. Address B 7 Review.

North Plainfield Weekly Review.

VOL. 4—NO. 16 NORTH PLAINFIELD, N. J., SATURDAY, JULY 11, 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

Macadamizing the upper end of Duer street commenced yesterday.

The North Plainfield Board of Health is after one of the ice companies for failure to take out license.

Charles W. McCutchen and family left this week for their summer home in the Adirondacks.

The annual outing of members of the Retail Clerks' Mutual Aid Association will occur Thursday, July 16.

The annual field day of the New Jersey Knights Templar will be held at Atlantic City, Wednesday, October 14.

W. J. Buttfield and family left for the Adirondack mountains this week where they will remain for the summer.

Fred Hansen, 11 years old, son of Mr. and Mrs. Jacob Hansen, of Webster place, Plainfield, died yesterday at Muhlenburg Hospital from lockjaw caused by an injury from shooting a blank cartridge on July Fourth.

Eighteen members of the Loyal Temperance Legion enjoyed their annual picnic Tuesday which was spent at Dewey Park.

The first excursion this season to Asbury Park from Plainfield was that of the First Baptist Church, the Mt. Olive and East Third Street Chapel, Thursday.

Washington Rock, since the trees at the base have been removed and a fresh coat of white wash has been applied to it, is plainly visible for many miles.

Rev. George B. Shaw, pastor of the Seventh Day Baptist Church, Plainfield, will preach in Wilson Memorial Chapel, Watchung, tomorrow evening at 8 p. m.

S. S. Swackhamer, of Summit avenue, this borough, and Assemblyman from Somerset county, was the guest Saturday of Senator S. S. Childs, of Bernardsville.

In spite of mosquitoes and heat a large crowd assembled at City Park Thursday evening to listen to the band concert. The selections were popular and well rendered.

Just take a look at the advertisements scattered throughout these columns, and remember that they are representative merchants who thus appeal to you for your patronage.

The wife of John L. Blackford has obtained an absolute decree of divorce from her husband. The courts also allow her to take her maiden name which is Clara E. Ulrick. She is the daughter of C. W. Ulrick of East Fifth Street, Plainfield.

Thursday afternoon while little Margaret Kiederling, of Harmony street, this borough, was playing, her dress caught on fire and she was cruelly burned. Her condition is considered very serious by the attending physician.

Under the auspices of the Ladies' Aid Society of St. Peter's German Lutheran Church of Grove street, this borough, a picnic will be held at Mrs. J. H. Koch's Park, Watchung, next Thursday from 8 a. m. to 8 p. m. for the benefit of the Sunday School. Refreshments can be had on the grounds, where all are welcome.

During the thunder shower last Friday evening, a bolt of lightning struck the south-easterly corner of John Cary's house, situated at the lower end of Westervelt avenue, completely tearing out the corner of the house from top to bottom for a space of about two feet in width. None of the family was hurt. A fire alarm was sent in but no blaze resulted.

Baby Camp Opened Last Tuesday.

Under the auspices of the City Union King's Daughters, the baby camp on the mountain was opened Tuesday.

Yesterday afternoon a reception was held there from 2 to 5 o'clock to which the public had been invited ,for the purpose of inspecting the camp.

Mrs. Burroughs Buried.

The funeral services over the remains of Mrs. Evalene Burroughs, of this borough, who passed away last Friday afternoon, were held from her late home, Somerset street, Monday afternoon. Rev. Charles E. Herring, pastor of the First Presbyterian Church, of which church the deceased was an active member, officiated, assisted by the church choir.

The deceased was a daughter of A. V. Searing, Sr., of Plainfield, and a sister of A. V. Searing, Jr., of Westervelt avenue, this borough.

Interment was made at Westfield in Fairview cemetery.

Pioneer Business Man of Somerville Dead.

Robert L. Day, of Somerville, aged 59 years, died Monday afternoon, in a Trenton hospital.

Mr. Day started in the drug business at Somerville when quite a young man, and was one of the pioneer business men there.

His death was due to apoplexy.

ALMOST A CENTURY OLD.

Dr. Charles Lancaster Succumbs to Old Age.

Dr. Charles Lancaster, 95 years of age, died at the home of his son, F. L. Lancaster, Norwood avenue, this borough, last Saturday afternoon. Rev. Dr. Yerkes officiated at the funeral services which were held Monday morning.

Dr. Lancaster in spite of his many years was a wonderfully well-preserved man and looked to be no older than many men seventy years of age.

The doctor in giving many reminiscences of his life to his friends once related that he plainly remembered when his father was called upon to fight in the Revolutionary War for the independence of the United States.

The doctor has been a firm believer in electricity for curing many diseases and complaints that flesh is heir to and successfully used it in his practice as a physician for many years, and up to the time of his decease fully believed tuberculosis could be cured by it.

Doctor Lancaster was greatly interested in the young boys and girls and during the past two years has written several articles and a grammar hoping thereby not only to interest but to help them.

He leaves two sons, F. L. Lancaster, of this borough, and Charles Edward Lancaster, of Oakland, California.

His remains was interred in the Plainfield avenue cemetery.

Borough Council Met.

A meeting of the Borough Council was held Tuesday night.

The opinion of Corporation Counsel Reed regarding the claim of the Board of Education for $2,450 for back taxes stated among other things that the Board was entitled to the amount claimed. His report was ordered to be placed on file and a copy sent to the said Board.

The sidewalk ordinance which provides flagging for Brook Avenue from Franklin to Pleasant avenue; Norwood avenue from Brook avenue to Mountain avenue; Manning avenue from Franklin avenue to Belmont; Belmont avenue from Boyce avenue to Mountain avenue; Howard street from Somerset street to Grove street, and Somerset place was passed on its third reading and will become operation the 27 inst. A communication was received asking that Norwood avenue be properly graded and macadamized.

A petition was received from citizens on Duer street asking that the street be macadmized between Linden avenue and Greenbrook Road, which was granted.

The collector's report was as follows: Receipts, taxes and interest, $422.62; Board of Health. $4.56; fines, $7; stone, $10; licenses, $5. Balance on hand June 1, $13,559.63 Total receipts, $14,008.81. Disbursements, $3,733.52. Balance on hand July 1, $10,275.29

Chief Marshal Sebring Dead

John W. Sebing, who has been chief marshal of the borough of Bound Brook since its incorporation fifteen years ago, died Wednesday night in the Somerset Hopital after an illness of several weeks from cancer He was a veteran of the War of the Rebellion and was well know in New Jersey police circles.

Weather and Crop Bulletins.

Atlantic City, July 9.—The climate and crop correspondents report for the week ending Monday July 6, that the heavy rain on the 29th was quite general but more copious in nothern and central than in southern section. It was followed by much warmer, sunshiny weather, that greatly stimulated all growth, a marked improvement in all crops being reported. Oats are filling out well and the yield, both in grain grain and straw, is promising. The harvesting of wheat and rye has been delayed in some districts by frequent showers. A heavy thunderstorm on 2d and 3d, accompanied by high wind and hail, did considerable damage to orchard fruit in portions of Mercer county, and has retarded cultivation in many places. In southern section all tender truck crops are growing rapidly, and the harvesting of wheat and grass is progressing; some housed in good condition.

The temperature and sunshine have generally been above the daily average, and the precipitation excessive in northern and southern sections, and slightly deficient in the southern. The following are the largest amounts reported for the week, in inches: Bergen Point, 2.48; Newark, 3.29 (2.89 falling on the 29); Pittstown, 2.50; Lambertville, 2.79; Cantoni 1.11; Beverly, 1.10.

The report from Union county follows:

Plainfield—Good growing weather during the week; all crops now in fine condition; hay crop will be larger than expected. Rainfall, 1.25 inches.

JOHN NEAGLE.

Fred Ivamy has purchased the Rogers' Sea Food business at 232 West Second street and will be untiring in his efforts to supply his customers with the best the market affords. Rarities and delicacies will be on hand, or within reach.

A LIVELY MEETING.

Board of Health Meet and Transact Much Important Business.

The regular monthly meeting of the North Plainfield Board of Health was held Monday evening. There were present, Andrew Love, president, Rev. W. B. Honeyman, secretary, Dr. D. C. Adams, J. O. Osgood, John McLoughlin, Counsel Swackhammer and Inspector Pangborn.

Complaint was formally made against Samuel M. Titus, of Howard street, for draining a cess pool into the street. Because Mr. Titus had denied this, and the Board upon investigation found out that he was doing so, it was decided to enter suit against Titus, which was accordingly done. On Thursday Titus came before the President and Secretary and admitted the charge, which he claimed he did without knowing it was against rules, and paid his fine.

Complaint was filed against the unsanitary condition of the old race way between the Johnston and Hyde properties. Inspector Pangborn was instructed to investigate and report.

The old drain from Mercer and Sycamore avennes was thoroughly discussed.

A formal complaint was made against ex-Mayor W. L. Saunders for polluting Stony brook by allowing cow manure to be deposited near the brook so that rains would wash it into the water. He was also charged with allowing garbage and swill to be thrown on or near the heap. It was also stated that his chickens were allowed to run near the brook so that their droppings would go into the water in time of rain. The Secretary was instructed to send him a formal notice to abate the nuisance, and also to write him a personal letter.

Undertaker Walter G. Runyon, of Dunellen, appeared before the Board to answer to a charge of irregularity in burying the late Mrs. Finger, of Pearl street. Runyon failed to get a permit from the Board as the law directs. The penalty for failure is $50, and while the Board felt that Runyon should be punished, they did not like to inflict so heavy a fine. It was therefore decided to let him off this time with a reprimand.

Concerning Proctor's Theatres.

The souvenir season is "on." The waning summer theatrical days are not without their compensation for the ladies, after all. The season of souvenirs comes with the roses of June, and the female bargain hunter is happy, or ought to be. Mr. F. F. Proctor, who knows to a nicety the art of pleasing the feminine contingent of his patrons, is first in the souvenir field this year. At his spacious Fifty-eighth Street house, every afternoon, save Saturday, he will give to each lady in the audience a handsome souvenir coffee spoon, appropriately inscribed, and really worth quite the price of admission alone. The initial order for these spoons, by the way, was up in the thousands, but there will be mighty few left when the East Side shopper completes her round and finishes it at Proctor's. Meanwhile, the announcement is made that the Fifty-eighth Street house is to remain open all Summer—another proof of Mr. Proctor's indomitable pluck and irrepressible energy.

The summer term at Proctor's Fifth Avenue Theatre has been most successful so far. The stock company has been improved, and a purely comedy contingent now holds the helm. Miss Florence Reed, as vivacious as she is clever, has assumed the cares and worries of the leading lady, as becomes an excellent actress. Mr. Charles S. Abbe, the comedian, is rapidly working his way into the hearts of Mr. Proctor's patrons. Mr. Wallace Erskius, Miss Eva Vincent, Mr. George Friend, Miss Loretta Healy, Mr. Paul McAllister and many others make the weekly comedy shows a treat to any playgoer.

Proctor's Newark Theatre, the cosiest and coolest house in New Jersey, is having a splendid season. Up to date vaudeville reigns supreme twice daily at this theatre.

Icemen Accused of Giving Short Weight

Charges are constantly coming in that ice dealers are giving short weight this summer.

Not only has the price of ice doubled, but as one driver admitted, he was forced to weigh the tongs with every piece of ice, and sometimes the ax also.

One family reported that they weighed the ice for several days and in each instance it fell short from five to ten pounds.

Unfortunately there is no law to reach this kind of business, but there is one thing ice dealers, guilty of this unjust dealing, can be sure of and that is that sooner or later, if this practice is continued, it will react against them, for when once the PEOPLE are aroused on this or any other question something is sure to happen.

LAST CHAPTER OF DRAIN.

Pipes Dug Up, Carefully Examined, and no Sewage Discovered.

Under the superintendence of A. I. Smalley, a brother of Mayor Smalley, a new storm sewer from the corner of Sycamore and Mercer avenues to Greenbrook, has been completed and is a decided success, as was evidenced by the recent heavy rains, the sewer carrying off all the surface water in a satisfactory manner.

On the completion of this work Mr. Smalley, had the old drain at the intersection of Mercer and Sycamore avenues sealed up so that not a drop of water could enter it at any place, and about ten days after this, he had his men dig up the old drain in the vacant lot on the White property back of Mr. Curtis' house, in order to see if any sewage had been entering the drain. This is the drain that has caused so much controversy recently.

As no water had been allowed to pass through this drain for ten days, it is reasonable to suppose that had any sewage passed through the pipe, either from seepage or direct connection, it would betray itself by adhering more or less to the pipe, but when the pipe was reached there was no indication whatever of sludge, greasy matter or sewage.

Mr. Smalley broke some of the pipe in pieces, in the presence of President Love of the Board of Health, and Rev. W. B. Honeyman, Secretary of the Board, D. N. Groendyke, and others, and these gentlemen were all of the same opinion, that no sewage was present in this drain pipe. Neither was it possible for sewage to seep into the drain, as the joints were tighly cemented together.

Contractor Smalley said, of the drain: "It is as clean as a pin. There is nothing foul in the pipe" and all of those present agreed with him.

The President and Secretary of the Board took some of the bottom pieces of the pipe away with them, and examined same under a magnifying glass, but could discover no traces of anything like sewage.

The Board has felt from the begining that the Rockview avenue catch basin was responsible for any odor claimed to emimate from the drain, and as it is now proven beyond a doubt that the Board was right, they are naturally jubilant over the result of this investigation, and feel that it has been fully vindicated from the charges which were made against that body several weeks ago.

The drain was sealed up where it was broken into and also at the catch basin at Rockview avenue, so that it will be simply impossible for anything to flow into or from it in the future.

M. E. Church Adopts New Liturgy.

At a conference held at Ocean Grove by the representatives of the Methodist Episcopal Church North and the Methodist Episcopal Church South, a new liturgy was adopted last Wednesday. The revised form is similar to that which has been in use in the churches north of Mason and Dixon line for years and is as follows:

(Let all our services begin exactly at the time appointed, and let all our people kneel in silent prayer on entering the sanctuary.)

1. Voluntary, instrumental or vocal.
2. Singing from the common hymnal, the people standing.
3. The Apostles' Creed, recited by all, still standing.
4. Prayer, concluding with the Lord's Prayer repeated audibly by all, both minister and people kneeling, (a)
5. Anthem or voluntary.
6. Lesson from the old Testament which, if from the Psalms, may be read responsively. (b)
7. The Gloria Patri.
8. Lesson from the New Testament.
9. Notices, followed by the collection, during offertory.
10. Singing from the common hymnal, the people standing.
11. The Sermon.
12. Prayer, the people kneeling.
13. Singing from the common hymnal, the people standing. (The order of prayer and singing may be reversed.
14. Doxology and the Apostolic benediction, (2d Cor. xiii. 14.)

(a) Let all our people be exhorted to kneel in prayer, keeping their faces toward the minister.

(b) In the afternoon or evening the lesson from the Old Testament may be ommitted.

(c) An invitation to come to Christ or to unite with the church shall be given when this hymn is announced.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Agnes F. Bird and husband to M. Carrie Hurt, $1.

Mary R. Loomis to Francis L. Runyon, $1.

Catherine Obitz to Caroline Ross Rogers, $6,800

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

While bathing in Shrewsbury River, near Newman Springs, Monday night, Jesse Chrisfield, sixteen years old, of Red Bank, ventured into a place abounding in whirlpools He was quickly dragged under and drowned.

E. H. Williamson of Rahway is in danger of losing his hand from blood poisoning caused by a mosquito bite. His arm is swollen to the shoulder and almost constant applications are necessary on the inflamed member.

The committee appointed by the Ocean Grove Camp-meeting Association to arrange for the monument to be erected in memory of its first president and famous leader, Rev. E. H. Stokes, has decided to erect a bronze statue on the grounds of the association. The committee has already obtained $3,300, and are desirous of getting $2,700 more.

A swindler with a new game has been operating successfully in some of the towns near Oxford. He calls upon a dealer, exhibits a government secret service detective badge, and explains that he is on track of a gang of counterfeiters in the neighborhood. He then demands to to see the contents of the money drawer and safe, and after making a long and careful examination selects several genuine bills that he declares are counterfeit and departs.

Frederick Carlyle, of John street, Nutley, has a grape vine of the Concord variety that is arousing the curiosity of himself and his neighbors, who are inclined to think it is going to bear more than grapes this year. On one of the shoots is a curious growth, about one inch long, shaped on the ends like a pineapple, but of a reddish color resembling a cherry. The vine grows under a cherry tree. The owner is awaiting developments, and when the curious growth has reached maturity he will send a specimen of it to the State Horticultural Society.

The love of a mother cow for its offspring was demonstrated in a pathetic way last week when a cow belonging to Peter Hagon, a Camden shipbuilder, which had been kept at pasture with her calf on Petty's Island until a week ago, was taken alone to the Hagon farm, at North Cramer Hill. Twice the cow was driven from the wharf of the old Pavonia Water Works, but the third time she managed to get into the river and start to swim to the island and her offspring. When about 200 feet out in the river the motherly beast became entangled in an anchor rope and would have drowned had not two men gone to her assistance in a row boat and towed her ashore by placing a rope around her horns.

Never in the recollection of the oldest residents has there been such a plague of mosquitoes in Elizabeth as during the past week. Clouds of the pests descended after sunset, July 4 and the air on the outskirts of the city literally darkened with the swarms, which ascended in spiral columns away up above the tops of the tallest trees. The pests swarmed into trolley cars and kept the passengers busy battling with them. The people on the cars declared they never witnessed anything like it in that vicinity. It was next to impossible to walk along the path beside the trolley track from Elizabeth's city line to Trowbridge's Hotel in Clinton township. At Elizabethport the remarkable spectacle could be seen of the sides of houses literally covered with the insects.

There is much indignation in the North Bergen section of Hudson county because of the transformation of a church into a saloon and dance hall. The old church building of the Presbyterians was sold not long ago, and it was supposed it would be changed either into a dwelling house or used for business purpose. No one seemed to have thought that the building, being on the Hudson boulevard, would make an excellent roadhouse except men in that line of business, so there was no restriction to the use of the building, and now it is to be a place of merry making. It is said persons having tender feelings for the old building would like to buy it back to prevent its being put to such a use, but the new owners will not sell, saying they have a good location.

Thomas Thompson, a negro, known throughout Hudson County as "Black Tom" died last Tuesday at his home, on the Hackensack Meadows, near Snake Hill, at the age of 102. He had been ailing for about a year, but until Friday was able to sit at a window and look out on the meadows County Medical Superintendent George W. King, who had been the old man's medical attendant for fifteen years, had visited him daily since Friday. Thomas was born in Moonachie, N. J. He was a slave and was sold to Abel I. Smith, a former District Court Judge of Hoboken. He bought his freedom many years ago, and Judge Smith who was a large property owner, gave him a life grant of the land and cottage where he lived. Thompson raised enough produce on the land for himself and family, and added to his resources by trapping muskrats. His wife died at the age of ninety and his eldest daughter at seventy-three. His great-grand daughter, who is forty one years old, lived with him. He leaves a hundred descendants in Hudson County, and members of four generations were at the bedside when he died.

There is now conclusive proof that Charles A. Tatum's saddle horse was not shot in E. J. Lacey's stables, as the owner requested, for he has recovered the horse after paying $135 for it. Mr. Tatum is a wealthy glassware dealer, at 46 Barclay street, Manhattan, and supplied his son with the horse while the latter was attending a private school at Englewood. Rather than sell or give the horse away, fearful that the animal would fall into bad hands, Mr. Tatum told the coachman, John Ficken, to have the animal killed. The coachman later showed a receipt for $5 from Dr. Treadwell, a local veterinarian, for shooting the horse. Mr. Tatum caused the arrest of the doctor, the coachman and livery stable keeper for the sale of a horse that did not belong to them.

Bound Brook Church Extends Call.

Rev. J. B. Hogan, Pomton of Plains has been called to the pastorate of the Presbyterian Church, Bound Brook.

Lots of Fish at Perth Amboy.

Bluefish and weakfish made their appearance in the waters of Raritan Bay and Raritan River Tuesday. The largest catch of [illegible] were caught in less than four hours. Fishermen say that the run of fish will last.

BECAME LAWS LAST SATURDAY.

Twenty one Acts of Legislature Now in Force—Had No Time Specifications.

The laws passed by the last Legislature in which the date when they were to go into effect was not specified became operative last Saturday. There were a number of such among the laws, and a list is given below:

Amendment to the act authorizing foreign corporations to acquire, own and dispose of real estate in this State.

Amendment to the act regulating insurance companies and authorizing those to do business in this State which had not less than $500,000 paid-up capital stock upon compliance with the requirements of the act.

Amendment to the act to authorize the sale of land limited over to infants.

Amendment to the act providing for divorces and for service upon absent defendant by leaving order to answer at house or publish.

Amendment to district court act doing away with necessity of proving the incorporation of a defendant sued as a corporation, except where it is denied.

The act requiring trained nurses to have licenses from county clerk.

An act to enable towns in this State to sell lands heretofore or hereafter acquired for municipal purposes, but which have proved unsuitable or are no longer needed for such purposes.

An act providing for the establishing of a Chancery-room in Passaic.

An act to validate certain sales of lands by order of the Court of Chancery.

Amendment to the act to prevent riots.

An act constituting courts for the trial of small causes.

An act relative to the writ of certiorari. (Revision of 1903.)

Amendment of the act concerning trespassing on private lands.

An act relative to writs of mandamus.

Amendment to crimes act for the punishment of any person caught cutting or tapping water or gas pipes or electric wires fraudently.

Amendment to the act concerning trust companies. (Revision of 1899.)

An act concerning building and loan associations.

Amendment to the act providing for the repavement of paved streets.

Amendment to the act regulating the practice of medicine and surgery and requiring applicants for licenses to present certificates of four years' high course, or its equivalent.

An act to regulate the practice of courts of law. (Revision of 1903.)

An act concerning railroads. (Revision of 1903.)

FATAL RACE RIOT

Militia and Mob Have a Battle in Evansville, Ind., During a Negro Lynching.

SOLDIERS SHOOT TO KILL

Hardware Stores Broken Into---Arms and Ammunition Taken From Them---Martial Law.

Evansville, Ind. — Following four days of rioting and general lawlessness, this city on the fourth night saw the most terrible of its experiences with rioters. Seven persons are dead and fourteen are known to be injured seriously with at least that number more thought to be hurt.

At 10.30 o'clock the members of Company A, First Regiment, Indiana National Guard, after a day's vigilance guarding the County Jail, and 100 Deputy Sheriffs, under Sheriff Chris. Kratz, fired point blank into a mob of 1000 gathered on Fourth, Division and Vine streets, surrounding the Vanderburg County Jail, and attempting its capture. From 7 o'clock a. m. until the hour of the night's catastrophe the crowd surged about the jail calling the militiamen vile names, assailing them with stones and berating the deputy sheriffs who guarded the jail.

At 9 o'clock the mob gradually became more and more excited, its manifestations of uneasiness more frequent, and at 10 o'clock it was seen that nothing could prevent an assault on the jail. At 10:30 the rioters pressed slowly forward and innocent onlookers followed. Slowly they forced the militiamen back toward the jail, until the alley between Division street and the stone building was reached. Then the leaders, with a bicycle in their front as a shield to the bayonets of the soldiers, attempted to enter the alley and storm the alleyway entrance. Captain Blum, of the National Guard, ordered a charge on the rioters.

Gradually the crowd was forced back, the soldiers using their bayonets and butts of guns. Suddenly a rioter fell. A soldier tried to drag him to his feet, but before he could, was assaulted by a rioter. Stones and boulders began to fly through the air. A soldier was struck with a rock and fell. A rioter was knocked down with a gun butt and then a shot was fired. The immediately [illegible] from defenders.

The dead are:

Edward Schiffman, painter; top of head blown off with rifle.

Hazel Allman, fifteen years old, daughter of Joseph H. Allman; shot in breast with shotgun.

John Barrett, shot in the right lung.

August Jordan, nineteen, musician; bullet wound through heart.

Edward Rule, twenty-three years old, laborer; shot through body and head; killed instantly.

Two men lying in front of the jail.

Fourteen other men were dangerously wounded.

Six other rioters were seen to fall, but got away before their names were learned. At least that number were suspected of being hurt.

Four members of Company A, First Regiment, bullet and light gunshot wounds on the body; one of them shot through shoulder; another through the ankle and other two slight scratches.

Two deputy sheriffs were slightly wounded.

All this time Robert Lee Brown, the negro whose life the lynchers were eager to take, was in jail at Vincennes. He shot and killed Policeman Massey. As Massey lay on the pavement dying he raised himself on his elbow and sent a bullet through the negro's left lung, inflicting a fatal wound.

While the attack of the mob was not unexpected it was supposed that assurances that Robert Brown, the colored murderer of Patrolman Massey, was not in the jail would again be accepted by the mob and that trouble would thus be avoided, but the mob refused to believe the Sheriff's statements and advanced upon the jail with battering-rams cut from telegraph poles.

The mob, which had been hunting all the evening for a chance to vent its wrath on some negro, found one about 11.30 p. m. and promptly lynched him.

The troops hurried to the scene and tried by argument and by threats to induce the rioters to permit the black man to go free. The mob would not listen, however, and its leaders declared there should be a lynching then and there. The members of the mob clamored for the work to begin and despite all the efforts of the troops the work of hanging was commenced.

When the officers of the militia saw how determined the crowd was and that it would be impossible to save the negro they reluctantly ordered their men to prepare to shoot to kill.

The victim had been swung off when the firing actually began, and as soon as the soldiers shot into the mob its members returned the fire. The great number of casualties among the rioters rendered them furious.

The friends of the dead and injured paraded the streets and threatened to burn the jail and the crowd increased to 20,000 people, many of the women of the city whose sons or husbands were in the mob having joined in the throng in search for them.

Everywhere throughout the city the tragedy caused the most intense feeling and many who had taken no part in the rioting armed themselves and appeared on the scene, swearing vengeance against the men who fired with such deadly effect into the crowd.

Governor Durbin was informed of the killing of members of the mob by long-distance telephone and was implored to order an additional militia company out, as it was feared that the shooting would so exasperate the citizens that the local company would not be able to master the situation.

The Governor at once ordered the company at Vincennes and the company at Terre Haute to go to Evansville, and special trains were hastily made up at both places to transport them.

Notice that they were coming was received by the mob in some way almost at the time the orders were given and the train yards were taken possession of by members of the mob, and it was declared that neither company should enter the city.

In the meantime thousands of people were parading the streets, condemning Sheriff Kratz and Capt. Blum on account of the shooting, and doing everything to intensify a feeling which was already intense.

In order to provide themselves with additional arms, the mob entered the hardware stores again, and took everything in the way of guns or missiles that could be found. Bonfires were lighted on the principal streets from boxes secured from stores into which the mob forced their way, and inflammatory speeches were made upon every street corner.

The Mayor of Evansville issued the following proclamation:

"The condition of anarchy and lawlessness that prevailed in this community last night was a disgrace to civilized people, and a repetition of its scandalous proceedings will not be tolerated. It is hereby ordered that all saloonkeepers in the city close their respective places of business at 6 o'clock p.m., and keep them closed until 6 a. m. Tuesday.

"All congregations of people, either on street corners or in other public places, are hereby prohibited.

"All persons carrying arms, or any other kind of weapons for attack or defense, or anything with which an attack or defense could be conducted, shall be arrested.

"Any boisterous or incendiary talk will constitute sufficient ground for arrest.

"The Chief of Police is hereby intrusted with the faithful performance of this order, and if it shall require a special force of 500 men to restore peace and quiet, he is authorized to furnish the same."

Baptist Town is depopulated. Negro families by the dozens left there, some of them taking refuge in the open country. Newburg Road, leading west, is lined with negroes, some in wagons, and some camped by the roadside. Nearly all are armed.

Patrolman Massey was buried by the Knights Templar. There was a large attendance, the funeral procession being headed by a platoon of police.

The last work of the mob was to destroy Blue Goose saloon, a negro resort in Baptist Town. The windows and doors were demolished, and a hundred shots were fired. There was a circus in town, which brought additional crowds of sympathizers with the different races, and the police were kept hard at work preventing crowds from gathering.

CULTIVATING BACKYARDS.

Government Introduces Pingree's Plan to Washington Children.

Washington, D. C.—Professor Galloway, of the Agricultural Department, now has nine "demonstration gardens" in operation here, teaching children to cultivate back yards and vacant lots. Fully 500 children are cultivating such gardens, using seed furnished by the Agricultural Department. Each garden is in charge of a Government expert, who directs the children how to make the most of soil, seed and sunshine.

Professor Galloway's work is based on the plan adopted by Mayor Pingree, of Detroit, to utilize vacant lots for raising potatoes. In addition, Professor Galloway is encouraging poor girls to raise flowers, supplying them with seed. Not only have children vegetables to sell, but flowers as well, and poor girls, instead of gazing longingly in at florists' windows, now wear as fine violets and pansies as any in the city.

Children who had no land to cultivate have been given the use of small plots on the grounds of the Agricultural Department.

HARRIET LANE JOHNSON DEAD.

Niece of Buchanan, Who Entertained Prince of Wales at White House.

Pittsburg, Pa.—Word was received here of the death of Mrs. Harriet Lane Johnson, niece of President Buchanan, at Narragansett Pier. Her body was taken to Baltimore and buried beside her husband and children.

Mrs. Johnson was mistress of the White House when the Prince of Wales visited America as "Lord Renfrew," and was invited by President Buchanan to be his guest.

At that time she was Harriet Lane. She arranged several pleasant trips for the Prince, and accompanied the party down the Potomac on the cutter named after her to Mount Vernon, where the Prince planted a tree at the tomb of Washington.

Two years prior to the death of President Buchanan Miss Lane was married to Henry Elliott Johnson, of Baltimore.

Judge Parker in Georgia.

Chief Judge Alton B. Parker, of the New York Court of Appeals, addressed the Bar Association of Georgia in Tallulah Falls, Ga.

Dies Trying to Save a Boy.

Ellis D. Trimble, an old and well-known resident of West Nanticoke, Pa., and a boy named Kyttle were drowned in the canal near Harvey's Creek. Mr. Trimble made an attempt to rescue [illegible] both were caught in an [illegible] and drowned.

The Jeanette Disaster.

The number of lives lost in the flood at Jeanette, Pa., according to the latest estimate was seventy-five; the property loss is estimated at $1,500,000.

American Sailors Desert.

The Kleiner Journal in a dispatch from Kiel, Germany, says since the departure of the American fleet it has been ascertained that 105 American sailors failed to report for duty and it is supposed that they have deserted.

Fire Wrecks a College.

Elliot Hall, of the Wesleyan University, Delaware, Ohio, and which contained the laboratory, library and gymnasium of the institution, was destroyed by fire caused by fireworks.

KILLED BY BURSTING DAM

Oakford Park, Pa., Swept Away an Scores of Victims Perish.

WALL OF WATER 40 FEET HIGH

Fleeing Victims Are Caught in Narrow Ravine—Men, Women and Children Are Drowned, Crushed and Electrocuted in the Disaster—Car With Passengers Washed From Bridge.

Pittsburg, Pa.—Another horror similar to that of the great Johnstown flood occurred at Oakford Park, half a mile from Jeanette and between this place and Johnstown, when, by the breaking of a dam scores of pleasure-seekers out for a holiday were drowned.

The exact number of fatalities is not known, and perhaps never will be known. Many bodies were swept away, while others were found crushed and unrecognizable, the victims having taken refuge in a building which collapsed. Still others were burned and blackened from having come in contact with live electric wires.

The accident came so suddenly that the people were caught penned in a small space, and were unable to escape. The dam which burst was known as Oakford Park Lane dam. It was a forty-foot embankment, damming a number of small streams. Four hundred people had assembled at the resort. The day had been a beautiful one, but warm and sultry. Suddenly the skies darkened, and a severe storm swept over the park. The rain fell in torrents. It was the worst cloudburst ever known in this part of the country.

Many of those at the park sought shelter in the car barns, while others huddled in a small building occupied by a restaurant. While the storm was at its worst there was a crash like thunder. Forty feet of the dam had given away, and a wall of water forty feet high swept down on the pleasure seekers, who were caught in the little valley which forms the park. There is sloping land on either side of a small stream known as Brush Creek, and to this higher land the terror stricken people fled. Many of them, however, could not get away.

When the wall of water was seen approaching there was a panic in the restaurant building. The forty people who had taken refuge there made a frantic effort to escape, which resulted in the frail building collapsing. Some were trampled to death in the excitement which followed. While others were hurrying across the street car tracks the trolley wire fell and caught them. How many were killed by it will never be known.

A trolley car which contained from fifty to seventy-five people was crossing the bridge over Brush Creek. The motorman saw the great wave of water coming, and put on all the power. It was another race for life, but the wave ran the faster, and when the car reached the centre of the bridge the water struck it. The bridge was swept aside as though it had been a log, taking the car with it.

A number of bodies have been taken from the car but many others were washed down the valley. A volume of water about forty feet high and between 300 and 500 feet wide swept through the narrow valley north of Jeanette, washing everything before it. West Penn Station, Jeanette Manor and as far as Pitcairn are a scene of ruin. Hundreds of houses have been washed away along the banks of the creek which parallels the Pennsylvania Railroad, and has its outlet at the mouth of Turtle Creek into the Monongahela River.

George Wilhelm, of West Jeanette, thirteen years old, was with eight boys playing cards in a stable. The other seven floated away on the roof and were rescued, but Wilhelm was drowned. James Westwood, thirty-five years old, of Penn Station, was drowned. His wife and three children were rescued. Mrs. Levi Baker, of Penn Station, was sick in bed. Her house was carried away and she was drowned. John Machinsky, forty years old, was drowned. George Williams, thirty-five years old, was drowned. His wife was saved. Alex Victor was dashed against a tree and died from his injuries. Mrs. Nigga and her four children were drowned.

Three members of a family were rescued on a house floating past Jeanette Manor. An unknown woman was drowned at the Manor. John Sowers and wife, of Greenburg, were rescued, but in a serious condition. An unknown man, about fifty years old, was found drowned at Penn Station.

M. A. Coffee, the superintendent of the traction line, estimated the loss at the park at about forty. Walter Hawthorne, twenty-one years old, of Scottdale, saw the flood coming. He caught a telegraph pole floating by and was rescued. He estimated that of forty people caught by the flood only five were rescued. All the places of amusement in the park were washed away.

The dam at Jeanette was, like the one which broke at Johnstown, at a pleasure resort. Several years ago a resort was established about half a mile from Jeanette and called Oakford Park. Several small streams run through the valley close to the park, and it was decided to make a miniature lake. A dam some forty feet high was built, creating a lake about half a mile long, a quarter of a mile wide, and fifty-five feet deep. It was known as Oakford Park Lake.

The resort is on the line of the Pennsylvania Railroad and receives its patronage from Greensburg, Manor, Irwin, Derry and other small towns in the vicinity.

Professional High Diver Killed.

Before a crowd of 3000 persons T. R. Bergquist, of Rock Island, a professional high diver, was dashed to death at Grand Lake, two miles below Davenport, Iowa, in the Mississippi River by the breaking of a ladder.

Senator Quay's Prediction.

Senator Quay says President Roosevelt will be nominated by acclamation, and names Senators Fairbanks, Hanna and Foraker, Governor Taft General Grant and U. S. Grant as among the Vice-Presidential possibilities.

NEW PACIFIC CABLE OPEN

Roosevelt and Taft Exchange Greetings Under the Sea.

An Electrical Girdle Put Around the Earth in Twelve Minutes—An Epoch-Making Event.

New York City.—At last Puck's much talked of girdle around the world has been completed. That this was true was demonstrated at Oyster Bay when Clarence H. Mackay, President of the Commercial Pacific Cable Company, received from President Roosevelt at 11.35 p. m. a message directed to him and dispatched from the same office at 11.23 p. m. The world had been circled in twelve minutes, and all records had been broken. This was not the first message sent over the new Pacific cable, however, for one sent by President Roosevelt was dispatched to Governor Taft at Manila at 10.50 p. m., and a reply received at 11.13 p. m. President Roosevelt was not at the dispatching office, but was in telephonic communication with it at his Sagamore Hill home.

The best previous time made in sending a message around the world was on May 16, 1896, when Chauncey M. Depew sent a message from the National Electric Exposition, at the Grand Central Palace in this city—time, fifty minutes. The message was sent to San Francisco, then back to New York, then by Atlantic around the world to Tokio, and the same way back to New York. It was the best way a message could be sent at that time.

There had been some delay in landing the cable at Honolulu because of the surf resulting from a storm off the Hawaiian group, and as the hours passed it looked as if the cable might not be opened on July 4, as planned. About 10 o'clock, however, Mr. Mackay was informed that the cable had at last successfully been landed at Honolulu at 9.30 p. m., New York time; that trial messages had been exchanged between that point and the Midway Islands, the last points remaining to be connected.

Already President Roosevelt's message to Governor Taft had been sent, and preparations were made for sending President Roosevelt's message to Mr. Mackay. This was dispatched at 11.23 p. m., from the executive offices in Moore's Block, Oyster Bay. Those present when this epochmaking message was sent, besides Mr. Mackay, were Secretary and Mrs. Loeb, and Assistant Secretary D. J. Barnes. Mr. Mackay received the message at 11.35 p. m. He filed a reply to President Roosevelt, which was received within the space of nine minutes, breaking the record just made. The message from the President went westward over the Pacific, returning by the Atlantic, while the reply from Mr. Mackay went over the Atlantic, returning by the Pacific. This evened matters, for the day which had been lost in sending the message in one direction had been counterbalanced by the day gained in sending the other in the opposite direction.

SHOT WIFE AND SELF.

Dahlem, Since His Marriage to Rich Woman, Had Done Little But Drink.

Philadelphia. — As all the circumstances surrounding the murder of Mrs. Sophia Dahlem by her husband, Adolph Dahlem, at their country home in Byberry, followed by his suicide, are brought to light, they indicate that it was the act of a man whom drink had all but ruined morally, and that the double tragedy followed a quarrel between the two that began at their home in this city and continued until after they had reached their Byberry home.

Mrs. Dahlem, who was a sister of Gustavus A. Muller, President of the Bergener Engel Brewing Company, was a rich woman in her own right, and since her marriage to Dahlem, eight years ago, he is said to have lived practically on her income. An architect by profession, he worked very little at that, and for some years had done practically nothing.

OFFICIAL KILLED BY HIS SON.

City Secretary Moore, of Dallas, Shot to Protect One of the Family.

Dallas, Texas.—Intense excitement was caused in City Hall circles by a tragedy in which one of the best known municipal officials lost his life.

City Secretary S. A. Moore was shot through the heart and killed almost instantly by his son, Ernest Moore, who until recently was an assistant to his father. The tragedy took place in the family home.

For several days Secretary Moore had been under the influence of liquor. He became violent toward his family and threatened to kill one of his sons, who is about nineteen years old.

Moore was powerfully built and he seized the youth. Ernest, who is about twenty-two years old, fearing his brother would be killed, fired on his father, sending one bullet through his head. Ernest Moore is under nominal arrest.

Left Church For Wheat Field.

The burring of harvesting machines made music in a thousand Kansas wheat fields Sunday last, and 25,000 men and a number of women abandoned their accustomed places of worship to save the over-ripened wheat. Church services were abandoned in many rural districts. The people believed it right to utilize a perfect day for saving the wheat.

Favor Historical Sabbath.

The Conference of American Rabbis in Detroit, Mich., declared in favor of "maintaining the historical Sabbath as a fundamental institution of Judaism."

To Prison For Peonage.

At Montgomery, Ala., in the United States Court, George D. Cosby and Baraneas F. Cosby, farmers of Talladega County, pleaded guilty to the charge of peonage and were sentenced to serve one year and a day in the Atlanta Penitentiary.

A Senseless Hoax.

Enticed to Cincinnati by letters announcing a prospective gift from Andrew Carnegie, representatives of seven Kentucky colleges found the offer was a hoax.

HARVEST HANDS AT AUCTION

Kansas Farmers Bid For Men to Save the Wheat Crop.

GOOD WORKER GETS $6 A DAY

Trains Held Up at Small Stations and High Wages Offered to Passengers to Stop Off and Go to Work in the Fields—Three Dollars a Day Offered For Stackers.

Topeka, Kan.—The call for laborers to help save the wheat crop continues to come from the wheat belt, but I. B. Gerow, free employment agent, says he has exhausted his resources and that the extra laborers must be found in the State.

The wages in the wheat belt are increasing and the farmers are now offering $2.50 and $3 a day for help and are unable to get the men. Many calls came to the employment offices, but Mr. Gerow says that only a few men are willing to respond. Mr. Jones, Division Superintendent of the Rock Island, telephoned to Mr. Gerow that 1000 men are needed along his road in the wheat belt. The farmers in Pratt County have asked for 3000 more men. Mays City asks for fifty-five and Jewell City wants twenty-five. All of the farmers who are wiring for help are offering the highest wages.

Beloit, Kan.—Wheat harvesting in the district of Beloit is now in full blast, but is being retarded some by scarcity of hands. The prevailing wages paid here are from $2 to $2.50 a day. The weather for harvesting is fine, and the quality of the grain is perfect. Conservative estimates put the average yield for this section at nineteen bushels an acre.

Salina, Kan.—Councilman Taylor Miller has received word from La Crosse, Rush County, that 500 or 600 harvest hands are needed in that county. The wages are $2.50 for common harvest hands and $3 for stackers.

Russell, Kan.—Two negroes were bid off on the auction block for harvest hands. They were John and Harper Porter and known as good workers. The bidding was spirited, starting with $2.50 a day. August Reinhart finally secured them on a bid of $3.21 a day.

At Victoria, just over the line in Ellis County, another negro asked for bids for a hand who would pitch to the stack all of the grain one header could cut. On this condition the negro brought a six-dollar-a-day bid.

Forty farmers of Rush County congregated at the station at Bison and "held up" the west-bound Missouri Pacific passenger train in search for harvest hands. A red bandana handkerchief was wrapped around a lantern and the fast west-bound train, which never stops at the station of Bison, was brought to a halt. The trainmen were much surprised when they found the cause of the stop. They supposed that there was some passenger to go west or some accident ahead. As the train came to a standstill the farmers swarmed on to it and, approaching all passengers having the appearance of laborers, offered them $2.50 and $3 a day to stop and help in the harvest.

In a few instances even a greater amount was offered, and at least three weeks' work guaranteed, as most of the farmers will thresh immediately following the harvest. A dispatch from Bison says that at least 100 men are wanted in the immediate locality and 500 can be used in the county.

HARRIET LANE JOHNSTON'S WILL.

$300,000 For a School For Choir Boys in Memory of Her Sons—Other Bequests.

Washington, D. C.—The will of the late Harriet Lane Johnston, niece of President Buchanan and mistress of the White House during his administration, who died recently at Narragansett Pier, was filed here. It bequeaths $300,000 in memory of the sons of the testatrix and to be known as the "Lane-Johnston fund" to the corporation of the Protestant Episcopal Cathedral Foundation of Washington, for the establishment and maintenance of a school for choir boys.

To Johns Hopkins University of Baltimore $30,000 is left for the endowment of three scholarships to be awarded to poor youths.

One hundred thousand dollars is left in trust as the "James Buchanan fund" for the erection of a suitable monument to the memory of President Buchanan at his birthplace near Mercersburg, Pa. A number of other bequests are made.

GYPSY PRINCESS DEAD.

Lola Barry, Counted as the Handsomest of Her Race, Dies Suddenly.

Mahanoy City, Pa.—Princess Lola Barry, who was regarded as the prettiest gypsy woman in the country, and who was the daughter of King Barry, one of the oldest nomads in America, died while part of her tribe were encamped near here. She was taken violently ill suddenly, and some mystery surrounds her death.

Princess Lola was twenty-one years old, and her beauty was striking. She received many offers from artists to sit for them, but always declined. She was educated by her father, who is a linguist and well read, and she spoke several languages fluently.

Killed by an Auto.

Captain Harry Hanson, the commander of Harry Harkness's yacht, while being instructed in running his employer's automobile on Putnam Hill, Greenwich, Conn., dashed the machine against a mass of rocks, and was hurled 200 feet and instantly killed.

Durant Obeyed in Court's Decree.

In a decision that contained a rebuke for William West Durant, yachtsman, member of several clubs and sportsman generally, the Appellate Division of the Supreme Court, New York City, declared that he has been for years withholding from his sister, Mrs. Helen Durant Rose, nearly $754,080, her share of her father's estate. It also declared he allowed his mother, now dead, to become destitute while he "reveled in luxury," although she, too, was entitled to a portion of the millions left by her husband.

KILLED IN A COLLISION

Accident on the Southern Railway Caused by Ignoring Orders.

Passenger Train Runs Into an Open Switch at Rockfish, Va., Striking Sidetracked Freight.

Charlottesville, Va.—Southern Railway passenger train No. 35, southbound, ran into an open switch at Rockfish depot, twenty miles south of this city, smashing into a local freight on a siding. The passenger engine and express coaches were demolished, and the baggage coach telescoped through the second class passenger coach in the rear.

In the latter was a party of immigrants, all of whom were killed or injured. The dead number twenty-four and the injured twelve.

Identified dead: James McCormick, engine driver, of Charlottesville; Charles Davis, engine driver, of Alexandria, Va.; Thomas Sheppard, of Charlottesville, brakeman on freight; Charles T. Coy, of Charlottesville, fireman on freight; J. E. Lowe, negro, of Baltimore; Charles T. Litch, negro, dining car waiter; C. C. Owen, of Philadelphia, boiler inspector; Adam Vucosavlevich, Austrian boy; Barliani Guglielmo, Austrian woman; two unknown Austrian women; unknown mulatto woman.

The work of rescuing the injured began immediately.

Dr. William A. Lambeth, of the University of Virginia, was on the train, and at once organized measures of relief. The trainmen, under the doctor's direction, cut through the panels of the baggage and express car and took out twenty of the dead. Probably a score of injured were removed.

W. A. Ward, the Union News agent on the train, was in the fatal coach, but escaped. The shock of the collision threw him through the window, breaking his left arm.

The special train which went from here to the scene of the wreck returned to the city about 8 o'clock, bringing some of the dead and most of the wounded. Thirteen of the injured were taken to the University Hospital, where their wounds were dressed.

Most of the immigrants were Austrians and were bound for points as far distant as California.

H. A. Sharpe, of Knoxville, Tenn., narrowly escaped death. He and Mrs. Sharpe were returning from their bridal trip, having spent their honeymoon in Washington. Mr. Sharpe was in the smoker engaged in conversation with C. C. Owen when the collision occurred. Owen was killed instantly, his body falling on Sharpe.

W. B. Brubeck, of this city, conductor of the local freight, is reported in a critical condition. After witnessing the awful sight, it is said, he became suddenly insane, and when found was five miles from the wreck.

ENGLISH WELCOME OUR FLEET.

The Greeting at Portsmouth Harbor is Very Enthusiastic.

Portsmouth, England.—For the first time in English history a foreign squadron is lying in Portsmouth harbor.

The American squadron, fresh from its peaceful victories at Kiel, has found here a welcome which for cordiality could not be surpassed. The latch-string is outside.

The squadron came right in to occupy the place of honor just off the dockyard. In fact, the Kearsarge, Admiral Cotton's flagship, lies at the railroad jetty in the dockyard sacred to the use of the royal yacht and the reception of royal visitors.

The channel squadron, composed of the pick of the British Navy, consisting of six battleships and four cruisers, under command of Vice Admiral Lord Charles Beresford, was assembled in its honor. In the brilliant sunshine the contrast between the gleaming white bodies and yellow upper work of the American ships and the grim gray which is now the regulation color of British war vessels was vivid.

The battleship Kearsarge made the fastest transatlantic cruise ever recorded by any vessel of her class.

MILITARY RULES EVANSVILLE.

Governor Durbin, of Indiana, Rushes Troops There to Restore Order.

Evansville, Ind.—Eight dead, two wounded mortally and at least thirty-five either seriously or slightly wounded, is the canvass of the battle between militia and rioters at the court house and county jail. Most of the dead are young men. A girl, Hazel Allman, aged fifteen, was shot through the heart while fleeing from the scene with her parents in a buggy.

Military rule is enforced. The city is guarded by the entire First Infantry of the Indiana National Guard under command of General W. J. McKee, of Indianapolis. An artillery squad is also present.

Three companies are at the county jail and the court house opposite, and the remainder of the city is patrolled by 100 civilian and special police.

The negroes are extremely quiet and every sign of a race war has disappeared. Hundreds of negroes have left the city and those who are brave enough to remain sleep in companies of from fifty to 200. They are in a state of nervous fright.

"Goat Hinch" Electrocuted.

William O'Connor, better known as "Goat" Hinch, was electrocuted in Clinton Prison, Dannemora, N. Y., for the murder of Night Watchman Mathew Wilson, at Cobleskill, N. Y., in November, 1900. This is the twelfth electrocution at Dannemora. The current was turned on at 11.58 a. m., and one minute and fifteen seconds later O'Connor was declared dead.

Murderer Penitent at Scaffold.

David Shand, who shot and killed Mrs. Ida Becker and Policeman Cyrus Shaeffer, was hanged in the jail yard at Lebanon, Pa. Before going to the scaffold Shand said he was sorry for his crime.

Estate of Arthur B. Pennell.

J. Fred Pennell, administrator of the estate of Arthur B. Pennell, who was killed in the Cegres stone quarry, Buffalo, filed an accounting of the estate. It shows Pennell had property worth $221,108, including his insurance.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa

The tubes in the boilers of a large ship would reach ten miles if placed end to end.

Use Allen's Foot-Ease.

It is the only cure for Swollen, Smarting, Tired, Aching, Hot, Sweating Feet, Corns and Bunions. Ask for Allen's Foot-Ease, a powder to be shaken into the shoes. Cures while you walk. At all Druggists and Shoe Stores, 25c. Don't accept any substitute. Sample sent FREE. Address, Allen S. Olmsted, LeRoy, N.Y.

Some people laugh and grow fat over their own jokes.

Piso's Cure cannot be too highly spoken of as a cough cure.—J. W. O'BRIEN, 322 Third Avenue, S., Minneapolis, Minn., Jan. 6, 1900.

Petroleum is the fuel of all the locomotives in Asia.

Your Hair

"Two years ago my hair was falling out badly. I purchased a bottle of Ayer's Hair Vigor, and soon my hair stopped coming out." Miss Minnie Hoover, Paris, Ill.

Perhaps your mother had thin hair, but that is no reason why you must go through life with half-starved hair. If you want long, thick hair, feed it with Ayer's Hair Vigor, and make it rich, dark, and heavy.

$1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

CUTICURA OINTMENT

Purest of Emollients and Greatest of Skin Cures.

The Most Wonderful Curative of All Time

For Torturing, Disfiguring Skin Humours

And Purest and Sweetest of Toilet Emollients.

Cuticura Ointment is beyond question the most successful curative for torturing, disfiguring humours of the skin and scalp, including loss of hair, ever compounded, in proof of which a single anointing preceded by a hot bath with Cuticura Soap, and followed in the severer cases, by a dose of Cuticura Resolvent, is often sufficient to afford immediate relief in the most distressing forms of itching, burning and scaly humours, permit rest and sleep, and point to a speedy cure when all other remedies fail. It is especially so in the treatment of infants and children, cleansing, soothing and healing the most distressing of infantile humours, and preserving, purifying and beautifying the skin, scalp and hair.

Cuticura Ointment possesses, at the same time, the charm of satisfying the simple wants of the toilet, in caring for the skin, scalp, hair, hands and feet, from infancy to age, far more effectually, agreeably and economically than the most expensive of toilet emollients. Its "Instant relief for skin-tortured babies," or "Sanative, antiseptic cleansing," or "One-night treatment of the hands or feet," or "Single treatment of the hair," or "Use after athletics," cycling, golf, tennis, riding, sparring, or any sport, each in connection with the use of Cuticura Soap, is sufficient evidence of this.

Sold throughout the world. Cuticura Resolvent, Me (in form of Chocolate Coated Pills), 25c per vial of 60). Ointment, 50c., Soap, 25c. Depots: London, 17 Charterhouse Sq.; Paris, 5 Rue de la Paix; Boston, 137 Columbus Ave. Potter Drug & Chem. Corp., Sole Proprietors.

Send for "The Cuticura Skin Book."

"The Greatest thing on Ice"

Hires

Rootbeer

The coolest drink for hot weather. A package makes five gallons. Sold everywhere, or by mail for 25c.

CHARLES E. HIRES CO., Malvern, Pa.

PIMPLES

Tried all kinds of blood remedies which failed to do me any good but I have found the right thing at last. My face was full of pimples and blackheads. After taking Cascarets they all left. I am continuing the use of them and recommending them to my friends. I feel fine when I rise in the morning. Hope to have a chance to recommend Cascarets."

Fred C. Witten, 16 Elm St., Newark, N. J.

Best For The Bowels

Cascarets

CANDY CATHARTIC

THEY WORK WHILE YOU SLEEP

Pleasant. Palatable. Potent. Taste Good. Do Good. Never Sicken, Weaken or Gripe. 10c, 25c, 50c. Never sold in bulk. The genuine tablet stamped CCC. Guaranteed to cure or your money back.

Sterling Remedy Co., Chicago or N.Y. 595

ANNUAL SALE, TEN MILLION BOXES

A SERMON FOR SUNDAY

AN ELOQUENT AND HELPFUL DISCOURSE ENTITLED "LOST AT HOME."

The Rev. Francis J. McConnell Preaches Instructively on the Parable in Luke, Which Deals With the Grace of God Toward the Lost.

NEW YORK CITY.—"Lost At Home" was the subject of the sermon preached Sunday evening by the Rev. Francis J. McConnell, pastor of the New York Avenue M. E. Church. The sermon was based on Luke xv. Mr. McConnell said:

All the parables of this fifteenth chapter of Luke deal with the grace of God toward the lost. There is the story of a sheep lost, another of a coin lost and another of two sons lost. The parable from which the text of the evening is taken is not the parable of the lost son, but the parable of the lost sons. A great many of us stop at the twenty-fifth verse. We rejoice in the sound of music and dancing which welcomes home the prodigal, and prefer that the story should end with the happiness of the banquet. The remaining verses, perhaps, seem to us somewhat out of place. The beautiful narrative is marred by reference to the ugliness of the elder brother, but if we leave the elder brother out of the parable we have lost in large part the Master's point. Remember that Jesus is speaking of the lost; He is justifying His dealing with publicans and sinners. These are lost sheep which have wandered away from the shepherd; lost coins which have eluded the fingers of the housekeeper and fallen into the cracks; lost sons who have wandered far from home to spend all in riotous living. The parable was spoken in response to the murmurs of Pharisees and Scribes. With wonderful exquisiteness Jesus puts the Pharisees and Scribes into the parable. The elder brother is the Scribe, who cannot understand the love of the Master for publicans and sinners. It requires but a moment's glance to see that in the Master's thought the Pharisee is lost—lost not in open prodigality and outbreaking vice, but lost in false conceptions and false feelings. Jesus does not say, indeed, that the Pharisee is lost, but He implies as much. When we look at the parable in the light of the whole teaching of Jesus, we can see clearly the "lostness" of the elder brother.

Possibly it would be well to say just a word about the sense in which the word "lost" is here used. "Lost" in the gospel means not that destruction has already come upon the soul, but that the soul is in the grip of forces which, if left to themselves, will sooner or later bring disaster. If the steeple-climber loses his hold the onlookers cry out "Lost," not because the death-dealing shock has already come, but because the steeple-climber is in the grasp of a force which will inevitably bring him to destruction. If a ship falls into the clutches of an irresistible current running upon the rocks the watchers upon the shore cry "Lost." At the moment of the cry the ship is as staunch as ever. The "lostness" consists in her being in the grasp of a force that must, if left to itself, bring her to doom. The sheep out in the wilderness had not been killed when the shepherd found it. It, however, was lost because wandering aimlessly in the presence of danger that must, sooner or later, bring the end. The coin in the dust was as good as ever, but in danger of being swept out upon the rubbish heap, where it might never be found. The younger son had not yet lost his life, but his days were short if they were to be left to the forces preying upon them. Now, in this sense of the word, in the sense of being in the grasp of death-bringing forces, the elder brother was lost as truly as the younger.

Of course, there may be degrees in "lostness." One man may be further from the right road than another, though any man off the road is lost. A respectable-looking Pharisee certainly does not seem so bad as a dissolute spendthrift reduced to the company of swine. But when lostness is under consideration, nothing is so deceptive as outward appearances. Physical vices that manifest themselves in outward signs are no more deadly than some subtle spiritual vices that work quietly within. Not all vices are rough and boisterous. Again, in the parable before us we may fail to see the lostness of the elder brother because he remained at home. We are very apt to think of lostness as spatial. The younger son was in a far country, and whether we realize it or not, something of our thought of his lostness has to do with his geographical position. The elder son was at home and, therefore, safe; but the lostness of the parable has very little to do with spatial relations. The father could not have saved the younger son by fastening chains upon him and keeping him at home. The son was already far away when he clasped his father's hand to say goodby. Nearness in a spiritual sense is not at all a matter of physical distance. The son who remained at home was in a spiritual sense as truly lost as the son who wandered into the far country. Spiritual lostness consists in false ways of looking at and feeling about spiritual things.

It may be that some will object that the Pharisees were a particular class of people living at a particular date in the world's history; that they have long since passed on, carrying all their frailties with them. Of what use to speak of Pharisees to-day? It must be responded that this view is wholly superficial—that Jesus spoke for all ages; that in Pharisaism were certain fundamental traits that appear over and over again. Pharisaism is not yet dead; the name is changed, but the characteristics reappear. Few men are far enough beyond Pharisaism to make a protest against the discussion of the lostness of Pharisaism especially relevant.

First of all, the stay-at-home was lost in his thought of himself. "Lo, these many years do I serve thee." The word "serve" is not at all accidental; it is a very essential part of the picture; it strikes at one deep faults of Pharisaism—the inability of the Pharisee to rise above the idea of servantship in his thought of man's relation to God. The elder brother did not take himself as a son, but as a servant, and therefore was lost in his thought of himself. After the prodigal among the swine came to himself he said, "I am no more worthy to be called thy son; make me as one of thy hired servants." The prodigal thought of himself as lost forever to sonship and hoped only for servantship; and yet the great redeeming fact in the reckless sinner's case was that he had come to the point where he could appreciate sonship. Upon that fact the father restored him. The prodigal had learned something in his disgrace. He had learned to think of himself as one who had sinned against sonship. With that lesson there followed "I will arise and go to my father." So far as this essential realization of sonship was concerned the elder brother was as lost as the wanderer who had gone to the far country.

Looking at the parable in the light of its eternal spiritual significance, this must be said, the man who strives to serve God as a servant and not as a son is lost. Not that he is a villain or given to outbreaking transgression, but so long as he merely serves God he is lost to all joy for himself and is a dead loss to God. I say lost to joy, because there is no joy in merely serving God—that is, if we take the work seriously. If we look upon God as a great taskmaster, a great lord over servants, we are lost in misery; for we make so many mistakes and we leave so much undone and we absolutely fail so many times that we get but little satisfaction out of the work itself. If we really look upon God as a taskmaster we must honestly confess that we can never please Him. With our limited insight and our blundering faculties we are lost to the happiness of successful service. The more we strive the more we blunder, and the more we blunder the more lost we feel. As evening comes on and the hour draws near when we shall face the taskmaster, we look back upon all the pitiful failures of the day and cry out in woe. But, looking upon God as a father, see how quickly and surely all this is changed! The father is not a taskmaster, but a father. He takes the will for the deed; He looks upon all our doings as the expression of a filial spirit and is satisfied. But if the work be done slavishly we have no joy in service and are a dead loss to God; for, looked upon merely as servants, after we have done all we are unprofitable. True, we look upon some things we have accomplished and we pronounce them great. We talk about our bringing in the material kingdom of God—about our inventions—steam, the telegraph, the mighty railroads and the steel monsters that trample down the waves of the sea. If these are done as works of sons; if they show the wish of the sons to struggle up to the immensity of the Father's thought, God must take supreme delight in them. They are creations of His children; they take value from the fact that the children's fingers have toiled lovingly upon them. God values our doings because we are His children. If we come, however, claiming to be servants and pointing to the great things that we have done, the only response is that we are unprofitable servants.

The stay-at-home was lost so long as he looked upon himself as a servant. The first step towards recovery was for him to take himself as a son. The first step out of the lostness of the servant life is to take sonship for granted and to act upon the assumption.

Again, the lostness of the stay-at-home appears from his thought of service. "And I never transgressed a commandant of thine." These words are no more accidental than the others. The Master is cutting close to the essential weaknesses in the creed and practice of Pharisaism. The two weak words here are "never" and "commandment." The elder's son's thought of service was partly negative, and for the rest consisted in keeping commandments. The Pharisee habitually thanked God that he "was not as other men, extortioners, unjust, adulterers, or even as the publican, but fasted twice in the week and gave tithes of all that he possessed."

First, the negative aspect of the Pharisaic creed. According to Pharisaism religion consists largely in not doing. "Never" is the blessed word. Adherence to the "never" creed causes the inert and passionless worshiper to mistake the listlessness of death for the peace that passeth understanding. Negative piety is often sheer lifelessness; there is not vitality enough to break forth in sin; there is not strength or spirit enough to make temptation possible. How exasperating it is to hear a dry, withered soul declaim on the follies of youth, or a mind sluggish with stupidity boast its freedom from doubt! There is a long-lived heresy to the effect that the heart of religion is repression. No longer do this, or that, or the other! Drive out the devils, sweep the house, set the furniture in order, board up the windows, lock up the doors and hide the keys! This, as of old, overlooks something—the skill of devils as key-finders. Back they come with others worse than themselves; or, if they do not come back, the house stands empty, which is about as bad. Redemption really means abundant life. The lifeless and inert seriously starting toward redemption may possibly make more mistakes in the first six months of activity than in all the previous years of listlessness, but they are better nevertheless. One of the most disagreeable features of this elder brother is hinted at in this word "never." It suggests a staid, lifeless, ploddingness beside which the rollicking prodigality of the younger brother seems almost a relief. It is almost a relief, too, to find that the elder brother becomes angry, for anger is sometimes a sign of awakening life.

The more of the merely "never" there is in a man's religion, the more completely lost the man is.

And then the other part of the creed—the word "commandment." What the Master had in mind was the Pharisee's living by rule. He is exposing the woodenness and mechanicalness of Pharisaic piety; He is showing us the lostness of living by rule. With the Pharisee life had become a round of ceremonial observances and Pharisaism was lost in the abundance of its rules. Any man is lost who tries to be good merely by rule. Of course, many of the great principles of the Christian religion can be brought down to the compendious statement of rules, but in these the principle is kept in mind. I am speaking of Pharisaism as the system which slavishly learns the rules and follows them. Such a course leads inevitably to the wilderness. If we lose sight of the spirit and principle, we must have a rule for everything. This Pharisaism strove for and was lost in its own cumbersomeness. If the system is not complete, if there are spheres of conduct for which the Pharisee has no rule, then in those spheres he is apt to feel free to do his worst.

Living the good life is the finest of the fine arts. Fine art is not a mechanical observance of rules—it is an absorption of spirit. In the religious life it is being filled with the spirit; and he who has not the spirit of life is lost.

The lostness of the stay-at-home still further appears from his unnatural heartlessness. "Thy son!" These words are doubly heartless, they repudiate brotherhood with the returning prodigal and they reproach the father for not looking upon such a son as his own. Heartlessness almost inevitably follows mechanicalism. It is natural that it should be so. There is no heart in a cumbersome set of commandments. Commandments having to deal simply with doings and not with feelings are in the nature of the case wooden and lifeless. If life be looked upon as something to be fitted into a scheme of commandments, all the fragrance of fine feeling evaporates. This picture of the elder brother is the perfect setting forth of the heartlessness of developed Pharisaism. The heartlessness came not out of deliberate diabolism, but out of mechanical legalism. In the end, however, these two are not far apart.

It would seem quite the fashion in these matter of fact days to ridicule emotionalism. There is instead a kind of emotionalism that deserves ridicule. The piety that consists only in being happy is a poor piety. But strike emotionalism out of religion and religion is not religion. In John's wonderful epistle of love much is said about the presence of God in the life, and that presence manifests itself in various forms of feeling. Do you love the brethren? That is to say, do you feel the force and power of friendship? A part of the witness of God's spirit is to be found just here, in the quickening of those fine feelings of friendship and love which seem to come so naturally as we relate ourselves to one another. Is the feeling for brothers and sisters becoming more kindly? Is the attitude towards fathers and mothers and children more affectionate? Is the circle of loving interest widening? This is the mark of the presence of God—this and that other feeling like unto it, the affectionate going forth of the heart in the cry of "Abba, Father." Remove emotionalism of this kind and you take the substances out of life as well as out of religion. Life is a matter of feeling. All values are realized in feeling, and the feelingless mortal is an unnatural monstrosity. Any system of religious thought or practice that makes men feelingless is to be condemned. Pharisaism was feelingless; its lostness was set on high before the gaze of all the world by its failure to feel the greatness of Jesus. It was as if the light of the rising sun played upon dead eyeballs. A feelingless life! These words seem contradictory. A feelingless religion! These words are contradictory and absurd, as absurd as unseeing seeing or unhearing hearing.

Still further, the stay-at-home reveals his lost condition in his tendency to put the worst construction possible upon the life of his brother. "Thy son, which hath devoured thy living with harlots." The elder son had no way of knowing this to be true. He judged that this must be the truth because it was about the worst thing his brother could do.

In this world of ours we are compelled to make assumptions, to choose between views either of which may be correct. So far as the great mass of things is concerned, there is no way of getting absolute proof beforehand. We must assume and see. Now, concerning men and things, good assumptions and bad assumptions are possible; but as a matter of general attitude of mind and heart toward things only one way is safe. That is, to put the very best possible construction on the lives of men and the working of things. This, in a word, is Christian faith. Christian faith does not start by proving things. It assumes the best. If a man is actually bad it looks hopefully toward the better manhood which is, in almost every case, a possibility. Jesus called Judas "friend," and accepted his kiss even on the night of his betrayal. Christian faith looks out upon the working of the entire universe and assumes that they are righteous. In that trust is found peace.

Suppose one were to assume in dealing with men that all men are liars. It cannot be proved beforehand that all men are not liars or even that any one man is absolutely truthful; but how hopelessly lost in his dealings with men would be the one who should start with the assumption that all men are liars! The safe path in the long run is the assumption that there is good in all men and that the good can be reached and made better. In particular cases this may fail, but it is in general the only Christian view. He who, like the elder brother, holds to the idea that the returning prodigal is hopelessly and irretrievably lost, is himself wandering in the wilderness far from safety.

Lastly, the lostness of the stay-at-home appears from his thought of reward. "Thou never gavest me a kid." The elder brother seems to have been serving with the thought of material pay. He was doing the work for what he could get out of it. His thought of reward moves along a low plane. Jesus condemned Pharisaism because of its low view of reward. The taskmaster was to pay at the close of the day. Similarly some of us seem at times to think of heaven as a place of material and rather earthly prizes. And again, the elder brother was lost in placing emphasis upon an extraordinary forgiveness and welcome as of more than the favor of the father's continued and ever present affection. It is sometimes suggested that one of the important lessons of this parable is its rebuke of the Christian who complains because the contrition of the returning penitent sometimes is rewarded by more of ecstatic blessing than is his own long continued service of God. However this may be as a matter of street experience, it is perfectly clear that the thought which raises the exceptional manifestation of interest as of more value than the continued favor of the father's presence wanders far astray. "Son, thou are ever with me, and all that is mine is thine." This is the great reward, the favor of companionship and partnership with the Father—a spiritual benefit and blessing, beside which all material things fall into nothingness. The principal reward is spiritual. We are not to think of pay but of companionship with the blessed God! Any thought of reward lower than this is lost. There is a sense in which the stay-at-home was as prodigal as his brother. With his niggardly thought of lower reward, he recklessly overlooked and wasted the companionship and love which were poured out around him. There were two prodigals in the family. It would be rather a difficult task to decide which was the worse.

Resurrection of Christ.

The resurrection of Christ was absolutely necessary as a proof that His life and teachings were divine. It was not merely required as a fulfillment of prophecy, and especially of the prophecy of Christ Himself, though it was needed for this, but it was also demanded as an inspirer of hope, because no hope of life beyond the tomb could have sprung out of the grave of a Saviour who Himself was held as its victim. Paul clearly saw this, for he wrote: "If Christ be not risen, then is our preaching vain, and your faith is also vain; ye are yet in your sins. If in this life only we have hope in Christ, we are of all men most miserable;" no hope of a future life through Christ if Christ did not rise from the grave. The doctrine then, also, that the soul of the believer after death is in bliss is without any solid foundation, for if Christ's declaration concerning the raising up of the temple of His body was false, who will dare say that His declaration to the dying thief, "To-day thou shalt be with Me in paradise," was not also false? No resurrection of Christ, no hope of a blessed future life; for such a hope springs out of the resurrection gospel. The disciples had no hope until they saw their risen Lord, then they were glad.—The Rev. Samuel Schwarm.

Critical Spirit.

The critical spirit eats out, like a burning acid, the very sweetness of spiritual life. There is a mysterious quality of heart gentleness in a truly crucified believer which cannot be defined. It is a thousand times beyond mere sanctification orthodoxy; it is far more than outward correctness of life; it is fathoms deeper down than the exact proprieties of behavior; it is more than a profession, and infinitely more mighty than holiness, preaching or correct doctrine. It is the breath of Jesus in the heart, the vapor from the river of life, the perfume of the rose of Sharon, the elixir of prayer, the marrow in the bone of truth, which is far more in the sight of God than all the outward hulls of religious form and teaching, which only serve as the alabaster box to this divine spikenard of heavenly love. But one severe utterance in a critical spirit will strike through this inward purity and sweetness like a touch of gall. And because the spirit of criticism is so universal among Christians is the reason why it is so rare to find a real saintly soul who is charged with divine sweetness of spirit.—The Evangelist.

Tell-Tale Affiliations.

Surface indications are sometimes a better guide in morals than the deeps of ethical philosophy. One man will tell you why the theatre, for instance, is indispensable; another will tell you, no less logically, why it ought to be dispensed with. The deeper the argument goes into foundation principles, the surer each becomes of his position. But here is a programme of a pure play, from one of the best class of theatres. At the end of the bill are several heavy-type advertisements, one of an "ale-house," one of a "saloon," one of a "bar," etc.—all in the neighborhood. These advertisements are not so likely to be found on the programme of a symphony concert, an oratorio, or an illustrated lecture. Why not? Never mind the reason. Two things, the stage and the bar, are associated, and openly proclaimed to the audience. The fact ought to count, if arguments do not. Tendencies tell their own tale.

Daily Praise.

The entire Christian life must bear the character of a daily renewed thank-offering to the glory of Him who in grace bestowed a perfect atonement in Christ Jesus; a thank offering of willing, undivided devotion of ourselves, with all that is ours, to Him. For what other purpose is man, as head of earthly creatures, placed below in such a temple, save that he, as priest, should offer such a sacrifice, daily consecrating to Him the spiritual offerings of self denial, love and obedience?—F. F. Van Oosterzee.

God's Miracles.

It is wonderful what miracles God works in wills that are utterly surrendered to Him. He turns hard things into easy, and bitter things into sweet. It is not that He puts easy things in the place of the hard, but He actually changes the hard thing into an easy one.—Hannah Whitall Smith.

Free Medical Advice to Women.

Every sick and ailing woman,
Every young girl who suffers monthly,
Every woman who is approaching maternity,
Every woman who feels that life is a burden,
Every woman who has tried all other means to regain health without success,
Every woman who is going through that critical time — the change of life — is invited to write to Mrs. Pinkham, Lynn, Mass., in regard to her trouble, and the most expert advice telling exactly how to obtain a CURE will be sent absolutely free of cost.

The one thing that qualifies a person to give advice on any subject is experience — experience creates knowledge.

No other person has so wide an experience with female ills nor such a record of success as Mrs. Pinkham has had.

Over a hundred thousand cases come before her each year. Some personally, others by mail. And this has been going on for twenty years, day after day, and day after day.

Twenty years of constant success — think of the knowledge thus gained! Surely women are wise in seeking advice from a woman with such an experience, especially when it is free.

Mrs. Hayes, of Boston, wrote to Mrs. Pinkham when she was in great trouble. Her letter shows the result. There are actually thousands of such letters in Mrs. Pinkham's possession.

"DEAR MRS. PINKHAM:—I have been under doctors' treatment for female troubles for some time, but without any relief. They now tell me I have a fibroid tumor. I cannot sit down without great pain, and the soreness extends up my spine. I have bearing down pains both back and front. My abdomen is swollen, I cannot wear my clothes with any comfort. Womb is dreadfully swollen, and I have had flowing spells for three years. My appetite is no good. I cannot walk or be on my feet for any length of time. The symptoms of Fibroid Tumor, given in Ayer's Almanac, describe my case, so I write to you for advice." — MRS. E. F. HAYES, 252 Dudley St. (Boston), Roxbury, Mass.

"DEAR MRS. PINKHAM:—I wrote to you describing my symptoms, and asked your advice. You replied, and I followed all your directions carefully for several months, and to-day I am a well woman.

"The use of **Lydia E. Pinkham's Vegetable Compound**, together with your advice, carefully followed, entirely expelled the tumor, and strengthened the whole system. I can walk miles now.

"Your Vegetable Compound is worth five dollars a drop. I advise all women who are afflicted with tumors, or any female trouble, to write you for advice, and give it a faithful trial." — MRS. E. F. HAYES, 252 Dudley St. (Boston), Roxbury, Mass.

Mrs. Hayes will gladly answer any and all letters that may be addressed to her asking about her illness, and how Mrs. Pinkham helped her.

$5000 FORFEIT if we cannot forthwith produce the original letter and signature of above testimonial, which will prove its absolute genuineness.
Lydia E. Pinkham Medicine Co., Lynn, Mass.

The Durability of Aluminum.

According to a German patent the toughness and durability of aluminum can be much increased by the addition of phosphorous. The addition of seven to fifteen per cent. makes the metal extremely hard and tough and well adapted for forgings. Three per cent. produces a good horseshoe metal, and with a two per cent. addition it can be easily rolled.

As candy eaters and water drinkers Americans rank first.

Shooting is the most popular method of suicide. N. Y.—28

H. H. GREEN'S SONS, of Atlanta, Ga., are the only successful Leprosy Specialists in the world. See their liberal offer in advertisement in another column of this paper.

A damaged footballer has just been fitted at a London hospital with a celluloid nose.

Let this Coupon be your Messenger of Deliverance from Kidney, Bladder, and Urinary Troubles.

It's the people who doubt and become cured while they doubt who praise Doan's Pills the highest.

Aching backs are eased. Hip, back, and loin pains overcome. Swelling of the limbs and dropsy signs vanish.

They correct urine with brick dust sediment, high colored, pain in passing, dribbling, frequency, bed wetting. Doan's Kidney Pills remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness, dizziness.

TAYLORSVILLE, MISS. — "I tried everything for a weak back and got no relief until I used Doan's Pills."

J. N. LEWIS.

For free trial box, mail this coupon to Foster-Milburn Co., Buffalo, N. Y. If above space is insufficient, write address on separate slip.

The reason you can get this trial free is because they cure Kidney Ills and will prove it to you.

WEST BRANCH, MICH.—Doan's Kidney Pills hit the case, which was an unusual desire to urinate—had to get up five or six times of a night. I think diabetes was well under way, the feet and ankles swelled. There was an intense pain in the back, the heat of which would feel like putting one's hand up to a lamp chimney. I have used the free trial and two full boxes of Doan's Pills with the satisfaction of feeling that I am cured. They are the remedy par excellence."

North Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Publisher.

TERMS OF SUBSCRIPTION:

If paid in advance $1 per year; if not paid in advance $1.25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands

Long distance and local telephone : : 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, JULY 11, 1903.

Subscribers of the Review who change their address for the summer, or for a shorter period, can have the Review sent to their vacation address without additional cost, by notifying the office to that effect. Addresses may be changed as often as desired.

A GOOD INDICATION.

At West Orange there has recently been formed a Citizen's League, composed of some of the best-known men in the world, and headed by Thomas A. Edison.

The object of this league is to promote good government, following the example of the citizens' Union of East Orange. Partisan politics form no part of these organizations but all efforts are centered on municipal improvements, and to this end the league proposes to have representatives present at every meeting of the town council.

It is with considerable satisfaction that we note this indication to divorce national and state politics from local politics, and to note the interest which the commuter element is taking in local affairs.

Necessarily a large proportion of our population is composed of commuters, and it is a fact that as a rule commuters heretofore have paid but little attention to local government. The Republican portion vote the Republican ticket without a question, and the Democrats vote the Democratic ticket, when they vote at all, and consider their duty ended when that is done.

But more and more are these people awakening to the fact that if they would have honest men in office —men who would have the interest of the community at heart, and not politicians who are in politics only for the spoils, they must do something more than merely cast a ballot on election day, and hence citizens' leagues and associations are springing up all over the state.

Irvington has two organizations, and will soon have a third; Hilton has one, and so has Belleville, and we could name many others—some near by.

There is not one good reason why local governments should be dominated by politicians, while on the other hand there is every reason why they should not, and anything which tends to separate the two elements should be encouraged. For these reasons we are pleased to see the formation of the leagues, and to see that men in all classes of life are taking active and prominent part in them, and especially pleased are we to see the large number of commuters who belong to these leagues and who are serving as officers and in committees, proving that the commuters realize the importance of their duties as citizens in the community in which they live and have their home.

A NEW ASSESSMENT LAW.

An important law was passed by the last legislature affecting the assessment of real and personal property, which differs radically from the present law.

The law provides for a separate assessment of land and of the buildings erected thereon, establishing a distinction between land that is valuable and productive and that which is comparatively valueless or inactive, and a detailed description of such lands must be made for the use of the State Board of Taxation in equalizing assessments. After December next no mortgage on real property is to be listed for taxation and no deduction from the assessed value of land is to be made on account of any mortgage; but the owner of the property, who pays the tax is entitled to credit upon the interest for such portion of the tax as would be equivalent to the tax rate applied to the amount due on the mortgage, except where the parties have otherwise agreed. Only the land is thus held for the full amount of the tax, the division between the mortgagor and mortgagee being left to the control of those parties. Tangible personal property is to be assessed where found, as before, and other personal property in the district where the owner resides. Personal property of non-residents is to be assessed where found, as before, and other personal property in the district where the owner resides. Personal property of non-residents of New Jersey are allowed as before, but are carefully guarded. Corporations are to be regarded as residents of the taxing district where their chief office is located and their personal property taxed as that of an individual, except that foreign corporations doing business here are to be taxed in accordance with the amount of business transacted in the State. Bank stock is to be assessed against the stockholders in the taxing district where they reside, and if they reside out of the State, then in the taxing district where the bank is located. The commissioners of appeal may raise or lower assessments, and an appeal may be taken to the State Board of Taxation, the board having the power to raise or decrease assessments for the same causes as hitherto.

FREE RURAL DELIVERY.

Nothing in the machinery of the government since its foundation has grown so rapidly as the rural free delivery of mails. It is but six years old, the first appropriation of $40,000 having been made in McKinley's first year as President. That year 44 routes were established. It has grown steadily, and from the time the people on the farms understood its value the applications for the establishment of new routes have been far in excess of the annual appropriation. In 1902 there were 8,466 routes and an expenditure of $3,993,740. For the fiscal year beginning on July 1 last, an appropriation of $12,621,700 is available. Today there are 12,000 routes, on which carriers travel 275,000 miles daily, serving 7,000,000 people. It is strange that so valuable an improvement in the postoffice service was not begun many years ago.

WHERE IS THE WATER PLANT?

The Hackettstown water commissioners report that the water plant of that place earned nearly $7,000 net for the town during the year ending May 8th.

Fortunate Hackettstown; unfortunate North Plainfield! When we think how near we came to having a municipal plant here in the borough —test well driven and pronounced a success; committee appointed with power to draw expense money; free site granted for a reservoir; and "progress" reported by the committee; and all at once, without any explanation, to have the whole scheme fall through—strange, was it not? Why did the matter take such a sudden drop? Do you know?

JULY 4, 1903, will be notable in history as the date on which a telegraphic message was first sent entirely around the globe. On that day President Roosevelt dispatched a message to himself, which was flashed westward across the continent, thence by the Pacific cable it went to Queenstown, Ireland, thence under the Atlantic to its starting point. It was the first regular message to traverse the new Pacific cable—and the latter supplies the "missing link" which has hitherto prevented circumtelegraphing the world.

IF ANY of our readers run across that man Smith, of "death to mosquitoes" fame, please arrest him on the spot and send him here by first train. We certainly need an expert in his line right now if we ever did.

IN NEW YORK Thursday the thermometer registered 94 degrees at 4 p. m. It was the hottest day of the year, and eleven deaths and fifty prostrations were caused thereby. The city has its advantages, but for a permanent, all-round residence, North Plainfield is preferable, and fortunate is he who can leave the city when his day's work is over, and come here and enjoy his needed rest.

IT would appear from an article in one of the Plainfield dailies that the borough boulevard is going to be built regardless of an overwhelming public sentiment against the scheme. One of many arguments against this luxury is that Pearl and Race streets should first be macadamized; much needed cross walks laid in several localities, and several other actual necessities provided, before an expensive speedway is constructed for the benefit of a favored few to exercise their horses on.

THE Trenton *Times* says "it seems almost as impossible to seriously think of ex-Senator C. Asa Francis, of Monmouth county, as the Republican candidate for Governor of New Jersey as of Senator Gebhardt, of Hunterdon county, as the Democratic candidate." Why not practice a little trying to think of Charles A. Reed, of Somerset, as a candidate. Francis might come a trifle easier after such vigorous mental exercise. —*Newark Evening News.*

ENGLISH bacteriologists have taken a small piece from a woman's skirt which had been trailed through London streets, and after washing it in distilled water, have examined the offscourings under a microscope. One hundred and fifty drops of the water contained more than twenty-five thousand germs of such diseases as consumption, diphtheria and typhoid fever. A train of misfortunes seems to attend the woman with a dragging skirt.

HIS BAGGAGE WAS AFIRE.

A Trolley Car Wouldn't Let the Tinker Aboard, but a Horse Car Took Him.

An itinerant tinker with an armful of soldering irons and his little portable furnace full of live coals created so much diversion at the bridge entrance the other day that a lot of folks didn't care whether they caught the next car or not. The tinker wanted to go uptown on a Second avenue car. The conductor did'nt think that a glowing fire was proper hand baggage under the rules and would'nt let the tinker get aboard. There was a scrap on the step of the rear platform in which the conductor got a hard jab with a stick of solder. The tinker one sleeve torn out of his coat, retreated in good order without dropping an iron or spilling a single coal. The conductor cussed and rang for full speed ahead. The tinker did'nt say a word, not even the proverbial "dam," which his trade entitled him to.

The old man who mends things tried the next car with no better results. He swung his fire pot and caught one conductor on the shin, and got away without a scratch. Then he got abroad an E. Broadway horse car, where he conductor wasn't so particular.

Rejected.

"Gwendoline!" he implored, raising his voice in tremulous pleading. "Dearest love! I did not mean—I only meant —I"—

But she had arisen from the ottoman and stood before him, imperious, haughty, scintillating, with all the arrogant beauty of a proud belle of the upper West Side. Stretching herself to her fullest extent of four feet six, and casting a withering glance upon the trembling wight, she pointed to the door.

"Go, George W. Vanderscoot!" she cried. "Go, before I call the butler and have you removed by force. I have given to you, freely, a young girl's first love, a young girl's tender initial passion, a young girl's trust and confidence. Despite your wealth of billions I have consented to wear your name and sport your ermine, and would have adorned your palace in West End avenue as never palace was adorned before. But this ends it all. Never—oh! never—will Gwendoline McMutt consent to wed a man who had presumed to ask her what may be—nay, is—her age!"—Harold Wilder, in New York Herald.

Bismarck and the Bore.

A long-winded visitor once asked Bismarck how he got rid of visitors who bored him.

"Why," said the chancellor, smiling, "I have an arrangement with my wife. When people stay too long she sends a servant to say she needs me."

At that moment entered a servant, saying that the princess would speak with the chancellor. Bismarck gravely made his excuses, and the bore made his exit.—Illustrated Bits.

An Unlucky Lapse.

"I had a good job last summer, but lost it on account of my fool absent-mindedness," said poor old Seldum Fedd, pessimistically. "I was acting as de echo fer a mountain hotel, an' I done all right till one moonlight night, when a smart guy from de city hollered 'Hello, Smith!' Durn me! I fergot meself, an' answered back, 'Which Smith do you mean.'"—Judge.

FOR YOUR BREAKFAST.

After all what's so good as eggs—boiled, poached, or fried—the morning.

But, when you buy eggs, see that you get the best.

The eggs we sell are fresh—and after you once try them, you'll wonder why you haven't bought here before.

Let us sell you some eggs today.

WHY SHE GAVE HIM UP

By BARRY PAIN.

I.

"Well," said the young man, irritably, "what's your explanation?"

The pretty girl shrugged her shoulders slightly and looked out of the window. This was another way of saying that she had a perfect explanation, but that he had no right to demand it and had not a fine enough soul to understand it.

"For a week you put up with me willingly enough; I thought we were friends; now you tell me I bore you. Why?"

"Why?" she echoed; "perhaps because I've put up with you for a week. Why do you ask questions and bother? You say that you see that I don't want you any more—I don't deny it. Then there's only one decent course for you to take." She turned back to her window again, as if the scene were finished.

But it was not finished. The young man rose and his face darkenened.

"This being of importance," he said, slowly, "I don't care much about the decencies and conventionalities. I'm not going to leave you. I shall not let you go until you are once more as kind to me as you were a few weeks ago—yes, and kinder still."

At this point she lost her temper and said things that were not clever nor suited to her purpose.

"Very well," he said. "When a man wants one thing—and only one thing—in the world, he gets its. I want you, and you alone. I may have to wait long, but I sha'n't let go. Try me, and you will find it so."

That was the man to whom, a week later, she became engaged. The engagement was broken off by mutual consent some six months afterward.

II.

"Yes," said the placid old gentleman, "I think you were quite right to give him up, my dear."

"O, thank you!" said the pretty girl, impulsively. "I was so afraid you would think badly of me. I tried to act for the best. Our temperaments were not suited to each other; marriage would have meant a life-long misery. My own conscience acquits me, but I wondered what others would think, especially you."

"Your impulsive and impetuous nature should be linked to its opposite—to gentleness and experience."

"I am quite sure of it," she said.

"Q[illegible]ities in which he was altog[illegible]r lacking."

"Totally," she agreed.

"Ah, me!" sighed the old man.

Pressed to give the reason for that sigh, he confessed that he was thinking about himself. His was a lonely life; wealth did not make happiness—he had found that. On whom could he spend his money and to whom could he leave it at his death? He could never hope to win the love of a woman, old as he was.

"You are not to call yourself old," she cried; "I never think of you as an old man."

There was a long pause, and when he spoke again it was to some considerable purpose. That was the man whom in the course of that year she married; and the more worldly of her friends were in the habit of remarking to one another that, all things considered, she had done extremely well for herself; so, from that point of view, she had.

III.

After dinner the white-haired old gentleman dropped asleep in the drawing-room. These little infirmities should be forgiven to old age. But the girl—who had grown prettier than ever—looked at her husband with frank disgust. She turned to the handsome young man at the piano apologetically.

"He's always like that, you know. I can understand it when we are alone—no doubt I bore him—but I don't understand how he can sleep through such music as that. It will take away my sleep for all the night."

"No," said the player, briefly. "Listen; I will give your sleep back again."

As he played, his dark eyes sought hers and found strange things in them. Each knew what was in the other's heart. His eyes looked down again at the keys. His face wore the look of endurance. Suddenly he stopped, and went across the room to the corner where she was sitting.

"Why are you crying? What is the matter?" he asked.

"It is too beautiful . . . and I am so unhappy. If you knew what my life was!"

The white-haired old gentleman was still sleeping peacefully, but both had lowered their voices.

"I know," said the musician, "and you know now that I love you."

She bowed her head.

"Yes, you were sure to know. I must say good-bye to you, dear. It was all right until you knew, but now"——

He held out his hands, and she took it. She was really annoyed with her husband—that was the extent of her sorrow. As for the musician, he was merely one more scalp for her waist-belt. He played divinely, and he loved her; it was something of a triump, and she said good-bye to him very sweetly.

And that was the man whom she killed—quite indirectly, of course. She sent a twenty-five shilling wreath to the funeral; she had won as much at bridge the night before.—From Black and White.

May and December.

Our great-grandfathers had a way of announcing marriage ceremonies which would hardly find favor nowadays. The following cases in point have been unearthed:

MILITIA TRAINING.

Its Value Will Be Recognized in the Wars of the Future.

Since the Spanish-American war much thought has been given by those directly interested to the training of our citizens in the militia. This awakening of interest on the part of the public as well as of the military authorities has probably been greater on account of the war in South Africa, which demonstrated clearly that citizen troops, with the right sort of training, and on the defensive, could hold their own against a vastly superior attacking force for a long time.

It proved also that the war of the future is likely to bear a much stronger resemblance to guerrilla or frontier conflict than to the great wars of the past. True, nobody can tell what the erratic course of history may be, but this much seems certain, that if the United States should at any future time become involved in war, the training of the militia will be an important factor in the outcome. The cowboys, ranchmen and scouts of the West could without much trouble be mobilized into an effective fighting force, though their discipline from a military point of view might be defective. But the conditions which produced this race of fighting men are already of the past, and in another generation there will be only heredity to count on in making up Western troops.

These will no longer consist of veterans in frontier warfare, men who are accustomed to find their lives depending on their skill with the rifle. The Westerners of the future will be only the sons and grandsons of such men. It follows, therefore, that to be effective the militia of the future must be taught to shoot.

They must, so far as possible, be sharpshooters, active, practical, resourceful. Drill and discipline come second. The spirit of discipline is essential, but not its form. If the men are the right sort, and are trained to shoot, our citizen soldiery ought to stand even against a drilled and disciplined army.—N. Y. News.

What to Teach the Boys.

A philosopher has said that true education of boys is to "teach them what they ought to know when they become men."

1. To be true and to be genuine. No education is worth anything that does not include this. A man had better not know how to read, and be true and genuine in action, rather than be learned in all sciences and in all languages, and be at the same time false in heart and counterfeit in life. Above all things, teach the boys that truth is more than riches, power or possessions.

2. To be pure in thought, language and life—pure in mind and body.

3. To be unselfish. To care for the feelings and comforts of others. To be generous, noble and manly. This will include a genuine reverence for the aged and for things sacred.

4. To be self-reliant and self-helpful, even from childhood. To be industrious always, and self-supporting at the earliest possible age. Teach them that all honest work is honorable; that an idle life of dependence on others is disgraceful.

When a boy has learned these things, when he has made these ideas part of him—however poor or however rich—he has learned the most important things he ought to know.

Precipitation Cycles in the United States.

In the Monthly Weather Review Mr. L. H. Murdoch, Section Director of Weather Bureau at Salt Lake City, considers the cycles of precipitation at that station and at other places. He finds for Salt Lake City a dry cycle between 1827 and 1864, during which the average annual rainfall was about 15 inches; a wet cycle from 1865 to 1886, with an average anual precipitation of 18.42 inches, and from 1887 to the present time a dry cycle, the average annual precipitation from 1887 to 1902 being 15 inches. From the records for San Francisco, Sacramento, Denver, Omaha, St. Louis, Cincinnati and Baltimore, it appears that the country west of the Rocky Mountains had its wettest cycle from 1861 to 1887, while the middle Mississippi and Ohio valleys received their heaviest precipitation from 1840 to 1859. The present dry cycle is general from San Francisco to Baltimore. Mr. Murdoch finds no relation between his rainfall curves and Wolfer's sunspot tables, and concludes "that there is no known natural law by which we can predict the length of the present dry circle."

A new Japanese Buddhist paper has made a "thundering good start." It is called "The Thundering Dawn," and this is how the editor breaks the news to the public: "This paper has come from the womb of eternity, just as we all came. It starts its circulation with millions and millions of numbers. The rays of the sun, the beams of the stars, the leaves of trees, the blades of grass, the grains of sand, the hearts of tigers, elephants, lamps, ants, men and women are its subscribers. This journal will henceforth flow in the universe as the rivers flow, and the oceans surge."

Most Costly Warship.

The King Edward VII. will be the most costly warship that has ever been constructed. The original estimates were for $7,500,000, and although they have been cut down, it is authoritatively stated that the total expenditure will amount to well over $7,000,000. This outlay on a fabric which a well-directed torpedo might annihilate makes one realize how costly the game of modern naval war would prove.

Relief

From Headache and Neuralgia

In a Few Minutes After Taking

Dr. Miles Anti-Pain Pills. Chronic Case Cured.

"I cannot speak to highly of your remedies and I will always tell my friends how much they have done for my husband and myself for sudden attacks of headaches, neuralgia and rheumatic pains. There is nothing equal to Dr. Miles' Anti-Pain Pills. They are simply splendid and give relief in fifteen or twenty minutes. I used to be subject to attacks of headache, which had become chronic, and I took a course of Nervine and Nerve and Liver Pills in connection with the Anti-Pain Pills. The result is I now have very little trouble in that way. My husband has also taken these remedies and praises them very highly. We always have some of both kinds of pills in the house, and do not feel that we could get along without them.—MRS. KATE K. JOHNSON, McClellandsville, Delaware.

There are many reasons why you should take Dr. Miles' Anti-Pain Pills, but the best reason is that they will give you almost instant relief from headache or other pain. In cases of chronic headache, when the sufferer knows an attack is coming on, a Pain Pill will usually prevent it entirely. In cases of extreme nervous exhaustion, when the brain is too tired and the body too nervous to rest, an Anti-Pain Pill will sooth the nerves so that sleep may come. They never fail, yet contain no opiates and are non-laxative.

All druggists sell and guarantee Dr. Miles' Anti-Pain Pills. They are non-laxative; contain no opiates, never sold in bulk, 25 doses, 25 cents. Dr. Miles Medical Co., Elkhart, Ind.

The Art of Being Happy.

By Hon. Chauncey M. Depew, LL.D., United States Senator From New York.

OLD Epictetus, the stoic philosopher, has laid the world under the deepest obligations. A man of genius, cultured and educated, the fortunes of war had made him a slave to a brutal Roman. It irritated the Roman that a man in such condition still could get vastly more pleasure out of life than he did, with all his wealth, and the opportunities given him by being a favorite at the court of Nero. Seizing the philosopher and slave by the leg one day, he commenced twisting it, when Epictetus said: "Stop. You will break that leg and injure your property."

The leg of Epictetus was broken, but his cheerful stoicism conquered. His liberty was given to him and he founded one of the great schools of antiquity. The underlying principle of his faith and teaching is that God knows what is good for us better than we do. Therefore, doing the best we can to attain our end, let us accept His disposition as the wisest, and be cheerful and happy whatever our lot. Certainly my own career is rich in great disappointments which have proved significant blessings.

The best informed, all-round man, and the most contented I ever knew, was a barber. He was a success as a barber; he would have failed as a merchant. His shop kept him comfortably and furnished a surplus which, with great discrimination, he invested in a library, every book of which and every author of which was his intimate and familiar friend. He was the encyclopedia of his neighborhood to the preachers, the lawyers and the students; and instead of wearying his customers with voluble suggestions as to his patent for restoring their hair on the outside of their heads, no customer ever left the chair without getting something of value lodged inside of his head.

Marriage a Turning Point.

By Winifred Oliver.

THERE is little doubt that marriage generally proves the turning point in the road of life which separates a man almost entirely from the friends of his bachelordom. An indifferent kind of friendship may possibly survive the marriage, but as a rule when a man falls in love mere friends and acquaintances are regarded from a totally different point of view than heretofore. Solid friendships founded on mutual esteem and regard do not, of course, end abruptly. The cooling process is naturallly slow and often reluctant. Its beginning, though, can always be traced back to the time when a man becomes engaged.

The well-known saying, "There are no friends like old friends," is very true; but few people there are who, after marriage, make the most of their old friends, and take the trouble to do all which they really might do to retain them. At any rate, it will hardly be denied that few Benedicts who do not neglect their wives manage to keep up the intimate companionships of their bachelor days. For this, of course, there are various reasons.

For instance, marriage is often the occasion for removal to a distant neighborhood. Nothing, perhaps, tends to cut short old friendships quicker than this. The young couple probably depart for their new home with the good wishes, presents, and even love of a great number of friends, most of whom in a few weeks will have almost forgotten the existence of the happy pair, so completely will they have dropped out of the old circle.

In cases where the bride or bridegroom, or both, happen to settle in their native place, the moulting process is more gradual; but though it is slow it is none the less sure.

Then there is the financial aspect of the question. Unless a man is well off he cannot afford to do much visiting on account of the expenses of traveling, and so forth. Well, if the average man cannot afford to visit much, it is fairly certain that he can still less afford to entertain very freely.

Then, again, old friends who visit one's house are sometimes apt to be rather over-critical; though, of course, while the visit lasts this is more or less effectually concealed. The element of jealousy, too, sometimes creeps in and is terribly effective as a pre-marriage-friend destroyer.

It is only in exceptional cases that young men who were friends of the wife in her girlish days are exactly the pink of perfection, or the most desirable friends possible in the eyes of the husband. Still less welcome are the visits of the husband's girl friends (possible sweethearts, perhaps) to the wife. Few women care to entertain old rivals. But apart from any feeling of jealousy, it is seldom that a man's friends are exactly to his wife's taste, while hers do not often please him.

The Benedict and bachelor stand on a different footing. When a man is single, if he wants society and friends he must go out and find them; after marriage, if he wants friends (unless he neglects his home) he must entertain them, and in the latter case he must, of necessity, be far more critical in his choice than in the days of single blessedness.

All this may be obvious enough to the "old married man" or woman, but it does not enter much, as a rule, into the calculatons of young people who contemplate matrimony.—New York Journal.

Where There's a Will There's a Way

By Margaret Stowe.

OFTEN it is said that "the most prolific school in the world is the school of difficulty." That is, when we are surrounded by difficulties the desperateness of the situation compels us to think, and so often in that way we make opportunities, when before we could see none.

If you are determined to find a way for yourself, opportunities can always be made.

It is not accident that helps us in the world so much as purpose and persistent industry.

To a man whose mind is feeble, sluggish and purposeless, the happiest accidents will pass before him without attracting his attention—he sees no meaning in them.

But the man whose mind is filled with determination and perseverance, seeing those same accidents, will seize and make opportunities out of the slightest openings.

Take the case of Dr. Priestly, the discoverer of many gases. He lived in the neighborhood of a brewery. His attention was accidentally drawn to the subject of chemistry through this fact.

During one of his visits to the place he noticed the peculiar appearances attending the extinction of lighted chips in the gas floating over the fermental liquor.

At that time he was forty years of age and knew nothing of chemistry. He took up the study, but found little upon that particular branch, as but little at that time was known.

He then began experiments with crude contrivances of his own making, and the results led to other experiments, which became the science of pneumatic chemistry.

You know that Edmund Stone said to the Duke of Argyle, when His Grace inquired how he, a poor gardener's son, was able to read Newton's "Principia" in Latin, "One needs only to know the twenty-four letters of the alphabet in order to learn everything else one wishes."

In speaking of noted scientists, Mr. Smiles tells us of an interesting fact in connection with Professor Farraday, who made his first experiments in electricity by means of an old bottle, while he held the position of bookbinder.

He says: "It is a curious fact that Farraday was first attracted to the study of chemistry by hearing one of Sir Humphrey Davy's lectures on the subject at the Royal Institution."

A gentleman who was a member, calling one day at the shop where Farraday was employed in binding books, found him poring over the article "Electricity" in an encyclopaedia placed in his hands to bind.

The gentleman, having made inquiries, found that the young bookbinder was curious about such subjects, and gave him an order of admission to the Royal Institution, where he attended a course of four lectures delivered by Sir Humphrey.

He took notes on them, which he showed the lecturer, who acknowledged their scientific accuracy, and was surprised when informed of the humble position of the reporter.

Farraday then expressed his desire to devote himself to the prosecution of chemical studies, from which Sir Humphrey at first endeavored to dissuade him; but the young man, persisting, was at length taken into the Royal Institution as an assistant; and eventually the mantle of the brilliant apothecary's boy fell upon the worthy shoulders of the equally brilliant bookbinder's apprentice.

So you see how, with determination and perseverance, the very odds and ends of time may be worked up into results of the greatest value.—New York American.

FOR THE FAIR

LATEST NEW YORK FASHIONS

New York City.—Combinations of tucks and shirring are notable in many of the latest gowns and waists and are exceedingly effective in the fashionable soft materials. The very smart May Manton waist illustrated is shown in white crepe de Chine with yoke and trimming of Venetian lace, but is suited to washable fabrics as well as to silks and woools, and to the odd waist as well as to the entire gown.

FANCY WAIST AND SHIRRED FLOUNCE SKIRT.

The waist consists of the fitted lining, with fronts and back of the waist proper. The lining is faced to form the yoke and the waist is shirred at the upper edge and tucked above the belt. It is gathered at the waist line and is slightly full over the belt. The closing is effected invisibly at the centre back. The sleeves are shirred at the shoulders where they form continuous lines with the waist, so giving the desired broad effect, and the fulness is gathered to form soft full puffs at the wrists.

The quantity of material required for the medium size is five and three-quarter yards twenty-one inches wide, four yards twenty-seven inches wide, three and a half yards thirty-two inches wide, or two and seven-eighth yards forty-four inches wide, with seven-eighth yards of all-over lace and two and one-eighth yards of applique to make as illustrated.

Shirred skirts are in the height of style and are exceedingly graceful and effective made of the fashionable soft and clinging materials. The very stylish model shown is adapted to all of these, the silk and wool fabrics as well as to those of cotton and linen, but in the case of the original is made of mercerized batiste. The shirrings are arranged to give the best possible results with the least amount of bulk and the flounce falls in the soft and graceful folds that are always so desirable.

The quantity of material required for the medium size is ten and three-quarter yards twenty-seven inches wide, eight and a half yards thirty-two inches wide or six and a half yards forty-four inches wide.

Woman's Blouse and Bolero.

Fancy boleros of all sorts are much in vogue and make charming bodices over the soft full blouses with which they are worn. The stylish May Manton one is shown in the large drawing in moss green velvet ribbon, piped with white and held by fancy stitching, over a blouse of white pongee with embroidered dots of green, but it is equally well suited to a variety of materials. Strips of material or of lace can be substituted for the velvet or the jacket can be made of one material, plain silk, brocade, lace, linen or anything pretty and attractive that may be preferred, while the blouse is suited to all soft and pliable materials.

The waist consists of the blouse, that is made with full fronts and back, and the bolero. The blouse is gathered at both upper and lower edges and is joined to a plain collar at the neck and to a basque portion at the lower edge and closes invisibly at the centre front. A fancy collar, plain or draped, is arranged over the foundation one and is closed at the back. The sleeves are full and ample and are gathered into straight cuffs. The bolero is made with fronts and back and fitted by means of shoulder and under-arm seams. When, as in the case of the model, it is made from ribbon the strips are arranged over indicated lines and joined by fagoting or other fancy stitches. The sleeves are cut in one piece each.

BLOUSE AND BOLERO.

The quantity of material required for the medium size is six and a half yards twenty-seven inches wide, three and a half yards forty-four inches wide or three and a quarter yards fifty-two inches wide.

The quantity of material required for the medium size is five and a half yards twenty-one inches wide, three yards thirty-two inches wide or two yards forty-four inches wide; for bolero one and a half yards twenty-one inches wide, one and a quarter yards thirty-two inches wide, or seven-eighth yards forty-four inches wide, or fourteen and a half yards of ribbon one and a quarter inches wide.

A New Stock.

One of the newest stocks for negligee wear is a very soft silk handkerchief of unusually large size. This comes in five or six colors, navy blue, dark green, black, and a lovely shade of crimson. The handkerchiefs are are dyed batik fashion; that is, by having small stones tied in the silk in an irregular pattern before being dyed. The parts covered by the thread are left white, and the effect is a design of small sketchy circles or wheels. The handkerchiefs are folded three times on the bias, wound twice around the neck, and tied in what children call a hard knot. They are very good.—Philadelphia Telegraph.

Woman's Tucked Jacket.

Tucked jackets in half length are exceedingly smart and are shown much favor both for suits and odd wraps. Those for warm weather use are made of taffeta, of etamine and linen, those to be worn when greater protection is needed of cloth, peau de soie and all seasonable jacket materials. This stylish May Manton one is shown in black taffeta stitched with corticelli silk, but is adapted to all the materials mentioned. The full length tucks are a feature and give just the effect of slender height demanded by fashion and the simple coat finish at the neck renders it peculiarly smart.

The jacket is made with a body portion, that is extended at the fronts to include the tucked portions of the tunic, and a skirt that is seamed to it beneath the tucks and belt. The right front laps over the left and the closing is made invisibly beneath its edge. The sleeves are ample and full below the elbows, tucked above, and are gathered into flare cuffs. The flat collar is seamed to the neck and joins the fronts that are faced and turned back to form lapels.

TUCKED JACKET.

The number of leaves on a large sixty-foot-high oak tree has been counted and found to exceed 6,000,000.

SCIENCE & MECHANICS

It is said by the Electrician that low tension electrical currents, say under 120 volts, are more deadly than those having ten times the voltage. Dr. Bertelli and Professor Prevost have made the remarkable discovery that high tension currents are capable of restoring the action of a heart that has been arrested by a low tension current.

The floral world has been finally shown to owe its beauty and magnificence to cross fertilization; the animal world might likewise be shown to be indebted for its vigor and variety to intercrossing. So might it be proved that most great advances in civilization have been originated by the blending of two stocks, the immigration of individuals from one society to another.

Lake Superior iron ore is taken from the mines, all of which are on the surface, by steam shovels, and is handled exclusively, in masses of a ton or more, by cranes until it reaches the cupola of the American furnace or the hold of a ship in the foreign trade. Some of the steel tow barges on the lakes carry 3,000,000 tons of ore, and cargoes of 250,000 bushels of wheat have ceased to attract notice.

Briquettes made with such cements as dextrin molasses, lixiviated cellulose or resinate of ammonia have the fault of dissolving in water. A plan of making them waterproof has been devised by Richard Bock, a Saxon engineer, who simply heats the finished briquettes until carbonized, when they become quite insoluble. If the cement is liable to ignite the heating must take place in an airtight case or by means of hot gases.

Professor J. J. Thomson's latest suggestion on the subject of the source of the energy emanating from radium is that there are a few atoms in each mass "in a condition in which stability ceases, and which pass into some other configuration, giving out as they do very large quantities of energy." The energy of the radiations of this substance is so great that one of the electrons thrown off by it, if set in chase of a Mauser bullet, would pass through it as though it were standing still.

An altogether effective way to "pasteurize" milk, rendering it "sterile," is to set a pan of cold water on the stove and put the vessel containing baby's milk into this pan. Just as soon as the water comes to a boil take it off. Add a pinch of baking soda to the hot milk—a little less than half a teaspoonful to a quart. If the milk was sweet and hadn't begun to "turn" it will keep sweet for twenty-four hours or more, even in hot weather, if put in a stoppered bottle.

The Lime Juice Island.

Nearly all the lime-juice used in the world comes from the tiny island of Montserrat, in the British West Indies. The lime grows wild in many West Indian Islands, but only in Montserrat is it used commercially. That island is one vast garden of lime-trees, and nowhere in the world is there a finer sight than its thirty miles of orchards laden with the fruit of the lime or fragrant with its blossoms.

The fruit is gathered by negro women, who carry it down the hills to the shipping port in big baskets upon their heads. Like all West Indians, they are remarkable for their ability to carry heavy weights in this manner. Once, the company which controls the lime-juice industry sought to lighten the burden of its laborers by introducing wheelbarrows. The negroes filled the wheelbarrows readily enough, and then carried them on their heads as they had been used to carry the baskets. Many a negro woman will carry a hundred-weight of limes on her head for a distance of a mile or more.—New York Press.

An Unhappy Family.

An Armourdale man who visited that town yesterday said that he had seen an old hen with a brood of little chicks quartered on top of a piano during the sweep of the flood there. A rat and a duck, he said, also used the instrument as a refuge. The refugees had nothing in common, however, and each kept aloof from the others. The hen mother, mistress of the top of the piano, kept a close watch on her little ones. She would not permit them to go too near the edge of their roost. One of the brood, a precocious little black feathered rooster, kept the old hen busy. He would first trot to one end of the piano, then to the other. The duck and rat were seated on the keyboard, and it seemed to delight the little black chick to lean over the edge and chirp at the rat, seated sad-eyed and lonely and watching the water which had made him take to the tall spot. The old hen kept the other two members of the animal kingdom at a safe distance, and the duck, whenever the rat moved around at his end of the keyboard, quacked loudly.—Kansas City Star.

Saved Her Dogs.

A woman came wailing and almost hysterical out of one of the rescue boats sent to North Topeka during the recent disastrous floods in the West. She clutched to her bosom a bundle which every one thought contained a baby. But when she reached dry land she carefully unrolled the bundle and displayed a female poodle dog with four young puppies.—New York Commercial Advertiser.

Servia is a Peculiar Nation.

The People Are Clean, Hospitable and Religious---Something About Their Customs.

By Emma Paddock Telford.

THE Servians, who call themselves Serbs or Sorbs, claim descent from a community of Slavs invited by the Emperor Heraclius to people the Danubian lands laid waste by the Avars. This stock to-day, in Europe, numbers over 80,000,000—1,500,000 being settled in Servia. By language and race they belong to Russia, and a common saying with them is: "The Germans have reached their day; the English their midday; the French their afternoon; the Italians their evening; the Spaniards their night; but the Slavs stand on the threshold of their morning." The Servians are more purely Slavs than their neighbors, the Bulgarians. When they adopted Christianity, part of the people joined the Greek Church and part the Church of Rome.

For a brief period during the reign of one man, Stephen Dushan from 1333

KING PETER I. OF SERVIA.

to 1355, there was a powerful Servian kingdom, including Bosnia, Herzegovina and much of Macedonia. But after his downfall and the disastrous flight of his successor at Kassova the component parts of this Servia fell asunder.

Many of the Servians remain in Macedonia to-day—in the sections known as Old Servia—while the warlike Montenegrins are the descendants of the aristocracy of ancient Servia, who fled to the mountain fastnesses between the Adriatic and the Valley of Zeta after the defeat at Kassova.

In the Ottoman invasion the Servians along the Danube were conquered, many of the nobles, in order to preserve their privileges, adopting Mohammedanism. They are a gentle-mannered people, however, and do not interfere with their Christian brothers of the Greek or Romish Church.

The Servian language is flexible, musical and powerful. Song is heard everywhere, and the wandering minstrel still traverses the country from castle to castle, singing of the glories of Servia as she was prior to the defeat of Kassova. They are very fond of the grand old hymns of the Greek Church. One noticeable feature of their songs is the keynote of hopefulness and brightness. Many of their ballads are like Longfellow's "Hiawatha" in meter. Of their poetry it has been said to be "like their own mountainous land, wild, stern and rugged, but diversified by smiling valleys and fruitful fields, showing that it is capable of development and cultivation." The versification is regular.

As a people the Servians are simple-minded, hospitable, honest, dignified. There is a great prejudice against lawyers all through the land, and they have in the interior what are known as "reconciliation houses," in which cases are decided by the village elders without expense to the litigants. The common people are grave and religious by character, many of them holding three daily prayer meetings. At the table each individual asks a blessing on the food. In drinking, even, the toast of the Servians is "to the glory of God," and no one, it is said, would take his seat at the head of a convivial party who could not extemporize a suitable prayer. There are few great land owners. Each family owns the land it tills, and with the most imperfect methods of agriculture manages to draw from it a livelihood.

SERVIAN NOBLEMEN AS THEY ARE AT HOME.

Scarcely a third of the ground is under cultivation, however, owing to the fact that there are so few day laborers. When a cultivator is not able with the help of his family to harvest his own hay or wheat he calls upon his neighbors, and in return offers his own services. At the end of each harvest is a festival called the moba, when all men and women engage in the kolo, or national dance. An immense circle is formed of men and women alternating, and holding each other by the hand or waist. In the centre the gypsy band plays the national airs.

The circle revolves slowly, in curves—the steps, a series of small standing jumps, executed with great decorum.

No Servian will consent to be a house servant—even the cooks and men servants coming from Croatia, Austria or Hungary. Maize is the principal crop, the rest of the arable land being given to potatoes, hemp, vines, tobacco, rye, wheat and corn.

The climate and vegetation are much like the South of England. The slopes are covered with strawberries, the forest glades with raspberries and blackberries, while pears, cherries, plums and apples grow even in the woods.

Lilies bloom on all the hill sides and flowers are everywhere.

The pig has always been to Servia the chief source of her commercial wealth and the prime factor in politics. Until twenty years ago, innumerable herds of these animals, almost wild, fattened in the glades of the vast beechen forests. They were brought in droves toward the Danube and sold for consumption in Austria and Hungary. Now the oak forests are devastated to a great extent, for the Servian takes from the soil but never gives back—and American bacon is used everywhere. Small wonder that Prince Alexis a few years ago should have felt emboldened to meditate an alliance between himself and the daughter of an American millionaire pork packer as "all in the trade."

The Servian woman, according to ancient tradition, holds an inferior and somewhat servile position, and not until she becomes the mother of children does she amount to much in the estimation of her family.

This was one of the reasons that impelled Queen Draga to try and palm off her sister's child as her own. In the wedding ceremony the presence of a new born child is deemed a most essential feature. When King Alexander was married the wedding was celebrated with a minute observance of all the traditional ceremonies and customs of the Greek Church.

As the Queen descended from her carriage a piece of white linen woven in the country was spread upon the ground. As soon as the bride crossed it, it was rolled up in order that no other foot might tread upon it. At the entrance door of the Konak, her aunt presented a sieve of seed corn, of which the Queen took three handfuls, tossing them over her head. She then emptied the sieve upon the ground.

On the threshold the bride was presented with a plate of bonbons, one of which she placed between her lips, while the King bit off the other half.

The bridegroom then took into his arms a new born boy, lent for this special occasion by the minister. Alexander kissed him, then laid him in the arms of the Queen, who, after kissing him three times, returned with him to his mother with the present of a new skirt. This child is called Nakonyese, "the most essential."

The scattered corn denotes that the bride brings with her joy and prosperity, while the divided bonbon means that no bitterness shall divide them. After all these ceremonies the bride must still stand at the threshold until, provided with a loaf of bread under either arm and a bottle of wine in her hands, she enters her future home.

Servian women are good housekeepers and travelers rejoice to find scrupulous cleanliness, snowy sheets and comfortable bedding—essentials lacking in most of the other Balkan states. The people are extremely fond of taking their meals al fresco, and nearly all the hotels of the cities and larger towns have charming gardens inclosed in the quadrilateral formed by their dependencies, where all sup in the open air, surrounded by trees and flowers.

The women of the cities combine European and Oriental fashions in their dress. An embroidered skirt and neckerchief cover the bust, held in place with flowers or a gold pin. A heavy

A MIDDLE-CLASS SERVIAN WOMAN IN HOME DRESS.

brocaded sash is usually thrown around the waist and hangs in front of the gay silk dress, which is made in European style. An abundance of jewelry completes the costume, whose beauty is marred by the foolish custom of dyeing the hair and staining the eyebrows and lips. The arrangement of the hair is peculiar, a slick black braid coiled around a light scarlet fez, its crown covered with embroidery.—Brooklyn Eagle.

KING ALEXANDER AND QUEEN DRAGA, THE RULERS OF SERVIA, WHO WERE RECENTLY ASSASSINATED.

THE TOWER OF JEZREEL

The Memory of an Extinct Sect of Religious Fanatics.

On the summit of Chatham Hill says The London Sketch, there is a colossal structure that forms a landmark for miles around. It is known as "Jezreel's Tower," and was erected not so very many years ago by an extinct sect called the Jezreelites. Their leader, one White—or, as he preferred to call himself, "James Jeershom Jezreel"—had previously been a soldier, but found more profitable employment in preaching a faith which promised immortality to all its believers. Money flowed into the exchequers of the "faithful," and the "Temple of Jezreel" was commenced, "for the housing of 144,000 persons who were not to taste death." However, before the building was completed the faith of the immortal Jezreelites received a rude shock. White died, and most of the money

THE TOWER OF JEZREEL.

also disappeared. It is, perhaps, needless to say that the faith of the Jezreelites in their own immortality died with him. A half-finished, ugly, gaping mass of bricks and iron still remains—a not inappropriate reminder of such a piece of monumental folly.

A Giant Sassafras.

The accompanying picture shows the largest sassafras tree I have ever seen or heard of. The tree measures thirteen feet in circumference and its height must be between forty and fifty feet. The tree stands in the township of Red Hook, Dutchess County, New York, about two or three miles southeast of Tivoli, on the road from Tivoli to Upper Red Hook. I have driven past this tree every spring for nearly sixty years. The trunk is now a mere shell, and I desire to place on record the portrait of this venerable tree before it vanishes. Years ago the tree was covered with wild grape, and every spring it was covered with bloom the fragrance of which made the old

tree famous. At such times the tree was enveloped by a cloud of insects attracted by the blossoming of the grape. The hum of myriad wings made a memorable sound.—D. P., in Country Life in America.

The Sails of Business.

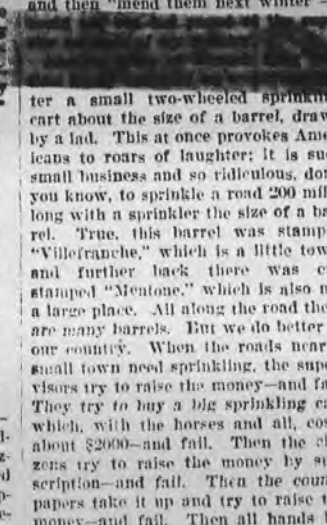
Talk fills the sails of business. But they aren't made to stand a hard blow. —New York Press.

In many parts of the country the use of stoves in passenger cars of steam railroad trains is prohibited by law.

The French Way of Looking After Roads.

MENTONE is a pretty little town with a marked English tinge to its colony. It has a fine quay, not unlike the Promenade des Anglais at Nice, but smaller. Owing to the way the mountains curve around the town it is said to have the mildest climate on the Riviera. Here we take the lower Corniche Road to return to Nice by way of Monte Carlo and Monaco. This road is livelier than the upper road, being much more frequented. American farmers and other road users will smile to know that this magnificent highway runs for a couple of hundred miles along the coast; that it is guarded with stone parapets practically all the way; that in particularly bad places the parapets are crowned with iron fences about three feet high; that it is carried over gullies and streams on magnificent stone bridges as good as those of the railways in our country; that at times it pierces the spurs of the mountains with long and lofty tunnels; incredible as it may seem, they have bored tunnels through the solid rock for a wagon road; as if to flout the practical American they have sometimes cut the rocky portal of the tunnel into ornamental shapes. Fancy spending such an amount of money on a mere wagon road! Fancy boring tunnels for it to run through solid rock! Above all, fancy making ornamental doors to the tunnel!

There are other things about the Corniche Road that excite the contempt of the practical American mind. As a national highway it is under the Minister of Roads and Bridges, one of the French Cabinet officers. Like all the national highways, it is divided into sections of a few hundred kilometres. Each section is in charge of a section man, who spends his entire time patrolling the road and mending it as soon as a break appears. He has all the necessary tools, while along the roadside are little piles of broken rock, pulverized to different degrees of fineness, with which to repair breaks at once. He is like a street sweeper on a city block, and on the block beyond him there is a man to attend to the next section. As I saw these poor purblind Frenchmen carefully mending little holes in the road — holes which we would leave alone until they developed into gullies and then "mend them next winter"—I



ter a small two-wheeled sprinkling cart about the size of a barrel, drawn by a lad. This at once provokes Americans to roars of laughter; it is such small business and so ridiculous, don't you know, to sprinkle a road 200 miles long with a sprinkler the size of a barrel. True, this barrel was stamped "Villefranche," which is a little town, and further back there was one stamped "Mentone," which is also not a large place. All along the road there are many barrels. But we do better in our country. When the roads near a small town need sprinkling, the supervisors try to raise the money—and fail. They try to buy a big sprinkling cart which, with the horses and all, costs about $2000—and fail. Then the citizens try to raise the money by subscription—and fail. Then the county papers take it up and try to raise the money—and fail. Then all hands bemoan the lack of public spirit, and go to work to get the sprinkling cart—and fail. Here the small towns get sprinkling carts and do it by hand. It's true the operator is only an eighteen-year-old boy, but in many of the small towns of our country the same boy would be loading round the corner grocery chewing tobacco. However, a two-horse sprinkling cart is a more imposing sight; perhaps the American way is the better way.—The Argonaut.

Good Roads Movements.

The movement for good roads has gained strength slowly, but steadily. It holds what it gains, and goes forward. In the New England States good roads are strong adjuncts of natural scenery, attracting people from a distance to drive among the hills and valleys, leaving money for entertainment and carrying away pleasant recollections. New Jersey has made a good start in road construction. Pennsylvania has taken up the work, and at the session of the Legislature just closed $6,500,000 was appropriated for roadmaking. There the State pays two-thirds of the total cost, so that more than $8,000,000 is in sight for use on the highways of the State this year.

In this State a little has been done in a good many places. The towns in several counties have stretches of improved highways, aggregating many miles, but lacking connection for a thoroughfare across the State in any direction. This is the aim of the league for good roads, and is strongly favored throughout the State. It received recognition in the last Republican State platform, being there linked inseparably with canal improvement. The two are parted by the Canal Referendum bill, but, whatever the fate of the latter, good roads will not be lost sight of. Appropriations aggregating $1,000,000 to pay the State's share of projected improvements are carried in the supply bill of this year. The proposition to commit the State to a $50,000,000 loan in behalf of the reform had popular approval to a degree not shown for any other public enterprise in years.

An Eastern paper, treating of good roads, says: "We are inclined to believe that the hundreds of millions which the State of New York proposes to invest in the construction of a 1,000-ton barge canal, if judiciously applied to the general improvement of the highways, would benefit the commerce and industries of its people, as a whole, more than the canal will do." We have no doubt of it. The canal may serve as a good market road for the products of the West; the farmers of New York want good roads for themselves. They and the dwellers in cities and villages want them for their mutual advantage, to save time and wear and tear, to promote ease in hauling, comfort in riding, economy in transacting the road business of a great commonwealth. The people will decide whether they will devote a hundred million to the advantage of a few, the same people who are awake to the highway needs of the many. They will not permit the latter to be side-tracked or shut out. Every mile of good road is incentive and warrant for more, and ultimately the State will be gridironed by good highways, meeting the like improvements of its neighbors at the border-lines and uniting links in national highways.—Elmira (N. Y.) Advertiser.

ENGLAND AND BRITAIN.

The Prevailing Confusion Concerning These Two Names.

It ought to be as easy—and it is surely as important—says the Scottish Nationalist, to do justice to the non-English parts of the United Kingdom and the empire, as to the non-Prussian States in the German Confederation. Prussia is the "predominant partner" in Germany as England is in Britain; Prussia is also the seat of the German Government. But no one, even in Berlin, ever thinks of saying "Prussia" when he means Germany, or finds the least difficulty in using the imperial name (and doing so invariably) when the empire and not Prussia alone is being referred to. English people, in their references to Germany, are equally careful and accurate. You never find them speaking of "Prussia and France" when they mean Germany and France, and yet you don't often almost habitually speakers of "England and France" when they mean Britain and France. The Prussians in this respect are wiser. They know that if any attempt were made to substitute the Prussian name for that of Germany ill feeling and friction would immediately ensue between them and the other German States. But they realize too well the value of a united name, and the unity and strength that it helps to secure, to adopt so foolish a course, and English people would not only show a higher sense of honor than at present, but more justice and more wisdom, if they followed Prussia's example. Even as it is, in speaking of any of our colonies, they follow the

even the most important. They never call Australia by the name of either Victoria or New South Wales. They never call Canada by the name of Quebec, or Ontario, though the seat of government is there. When the Dominion is spoken of, it gets, invariably, the name that applies to the whole of it. The same wise rule followed at home would secure invariably the united name for the United Kingdom and the imperial terms for imperial affairs.

Some English people seem under the impression that the Scotch can fairly be classed as English since they speak the English language. But the use of the English language (so-called) does not turn a people into English people or their country into a part of England. English is the language of the United States of America, but the United States are no part of England. New Yorkers, Kentuckians and Californians all speak English, but are not, therefore, English people. The negroes of Georgia and Alabama also speak English, but they are not therefore Englishmen. There is a perfectly clear distinction between English people and English-speaking people—between being English and using what is called the English language.

Force of Habit.

The force of habit was very forcibly illustrated by an incident at the pumping station of the water works at Enid. A tank stand just outside the building is kept full of water for the accommodation of passers-by and the neighborhood stock. A cow accustomed to drink at this tank came for her morning drink. The valley was covered with water and stood within two or three inches of the top of the tank, but the cow went over the waste of waters to the tank. Twice she stuck in the mud and appeared to be in danger of drowning, but by perseverance she finally reached the objective point. After drinking long and copiously she turned about and slowly made her way to land, apparently satisfied that she had done the only available thing to find water.—Enid (Okla.) Eagle.

The Frivolous Kitchener.

Gossip from India grows more feverish about Lord Kitchener. The man of iron from the South African veldt has entered with surprising zest into the amusement of Anglo-Indian society. He has attached a ballroom to his headquarters. He has melted down numerous trophies, caskets, cups and what not to make a gold and silver dinner service, which is vastly admired. There is even a rumor, which we distrust, that he has joined an amateur dramatic club. As for matrimony, the commander-in-chief is already engaged by report to many ladies, and we are forced to remind the public that, under British law, polygamy is forbidden even in England.—London Chronicle.

The hustler converts other people's stumbling blocks into his stepping stones.

THE BREAKER OF HEARTS

By RICHARD RODGERS.

Those who met Margaret Lowry in the busy whirl of society said she was a coquette. Those who had boasted of her friendship for many years and who knew her kind heart and spirit of good will said she was not appreciated. They said that she liked society for the amusement it afforded and that if hearts were broken and hopes were shattered by those big brown eyes it was not intentional. And so the two sides argued and raged over the matter. For Margaret Lowry was as much admired as she was disliked. The young women of the circle in which she moved took great pains to impress on their men friends the fact that Margaret was a heartbreaker—of the ruthless kind that leads you up to the very threshold of love and just as you are about to make the leap slams the door of her heart before you and shuts you out. Yet Margaret had the largest following of admirers of any young woman in town. The society leaders knew this, and so did the society editors of the newspapers. And whenever there was a social function it was "Miss Lowry who poured," and the newspapers seemed to take particular pride in printing pictures of Margaret in her finest gowns.

As for Margaret—well, she enjoyed the distinction of society's favor and she revelled truly in the hearts which were flung about her. It was her delight to think of the lovers she could count.

But it changed. When Henry Thorpe came on the scene society noticed a change in Margaret Lowry. The heartbreaker seemed to pause in her mad career of breaking hearts. Everybody liked Henry Thorpe. Not only because when his father died and left him to support his mother and two sisters he had gone out into the world and had carved a place for himself in the rock of fortunes, but because he was manly and true.

"Don't you suppose you will ever fall in love?" asked Margaret of Thorpe one night as they were sitting out a dance apart from the swinging, swaying crowd in the ballroom.

"Yes, I fully expect to fall in love," was the candid answer. "But not until I find my heart's equal."

"What do you call your heart's equal."

"A woman who is constant in her affections; whose love must be pure and holy; who will come to me because she loves me from the heart and not from the social side of her character."

And then Margaret Lowry had an ambition.

Society wondered at the change in her. Margaret herself found it was a hard struggle. It was the battle of the true emotions against the superficial feelings which society builds up. Henry Thorpe worked his way through the social field for two years. The lionizing of society amused him, but did not change him. Then Thorpe and Margaret Lowry sat again apart from the gay music of the dance.

"I have had an ambition and I have worked two years trying to realize it," she said.

"Have you succeeded?" he asked.

"I don't know," she replied, and the red glow on her cheeks bespoke more to the young man than worlds of words.

"Margaret, will you be my wife?" he asked abruptly. Everybody knew that Henry Thorpe was business-like in everything he did, but no one thought he would carry it into his love affairs.

"Are you sure you have found your heart's equal " she asked.

"The heart true and constant beats within your breast, and the love pure and holy is that which I feel is within you," was the reply, and then it was the old story of two souls with but one thought.

Margaret's ambition had succeeded.

All of the Same Religion.

When the late Charles Godfrey Leland was editing in New York "The Knickerbocker Magazine," he gave a weekly reception that was popular among literary people.

There arose at one of these receptions a noisy argument about religion: To quiet them Mr. Leland cried out in a voice loud enough to be heard above all:

"Intelligent persons are all of the same religion."

A lull ensued. Some one said:

"What religion is that?"

"That," answered Mr. Leland, "is what intelligent persons never tell."

THE ALLIGATOR PEAR.

It Is Both Food and Medicine, Say Its Enthusiastic Admirers.

Many advocates of the use of the alligator pear, that lustrous green stranger with the tough skin, say that it has the merits of both food and medicine and is remarkably nutritious, besides having that quality of flavor that seems nicer the more you know about it.

It can be eaten one morning plain, the next with pepper and salt, like a salad, the next with lemon juice and sugar, and the partaker cannot tell in which guise it is most delicious, being so satisfactory in all.

Then it can be served with madeira or sherry as a dessert and made into a pie if need be; only connoisseurs do not especially recommend pie, except for those pie enthusiasts who can be taught to know and love a strange fruit only through that familiar medium. It gains in popularity in New York yearly.

It is said the oil in the alligator pear has superior nutritive value to the olive oil or to that yielded by peanuts, and that it is almost equal to a fresh egg in food value. It is in reality one of the laurel family, not the pear.

Few people of the tropical cities would willingly do without it, and it is valued and beloved both in Mexico and in China. A small orchard of the fruit is bearing down by Palm Beach, Fla. It was founded by French growers who anticipate great success. California now has several orchards of it. The Brazilian variety is pronounced finer than either the Chinese or Mexican.

HIS STOLEN CHICKENS.

Bought Back of a Pair of Jersey Darkies.

A farmer in southern Jersey was recently attracted to a sale of chickens which he was going on in front of the post-office of a small town.

"Dey certainly is a rare lot of birds," said the colored man, who, with an assistant, another dusky brother, was offering the chickens separately to the highest bidder. A large basket on the back of an old phaeton held a dozen or more.

Squire Rogers, as the man from the farm was known, edged up close to the talkative darkies and said to a neighbor in the crowd:

"Them birds look powerful like some I've got over on the farm. There are very few like 'em in the county. I'm goin' to buy a bunch of 'em, and then, gol darn it, I challenge anybody to show a better lot of chickens than I've got."

The squire bought ten. He bid them up to fancy prices just to show his friends that what he was "sot on havin' he was goin' to get." He tied their legs together securely, put them into his carriage, and during the long drive home kept congratulating himself on his shrewdness and picturing Samantha's delight over the splendid addition to the chicken yard.

Upon arriving home he was surprised to see Samantha come rushing down to the gate.

"Oh, John," she cried, "somebody stole twelve of our finest chickens. I heard a noise in the coop just after you left, and then saw a carriage dash away down the road."

John was laughing by this time.

"What do you mean by snickering that way?" demanded the irate wife.

"Gol darn it all," replied the farmer, "the same fellers what took the chickens took me in. I've got all but two of 'em back again. I bought 'em. I recollect now, that there was something familiar lookin' about 'em."

Nell—Would you marry a man just because he happened to be rich?

Bess—Of course not. But, then, I would try awfully hard to get him to marry me.—Comic Cuts.

Barnum's "Wild Man of Borneo."

Joaquin Miller the California poet and naturalist was an intimate friend of P. T. Barnum. They met abroad many years ago and kept in touch until the great showman died. Many are the stories which the old poet likes to tell of his friend, "the great American humbug," and one of them is the true story of the greatest "humbug" which Barnum ever perpetrated—"the Wild Man of Borneo."

"It came about through Mr. Barnum's love of temperance and his great kindness of heart," said the poet, in telling the story recently to friends. "An old sailor who had been everywhere and seen everything came to Barnum one afternoon in Bridgeport, Conn., and asked him to buy some things which he had carved from wood on his last voyage across the Pacific. He was ragged, hairy, hungry, and altogether a terrible specimen.

"Where have you been?" asked the showman.

"'Been to Borneo,' answered the old sailor.

"'Well, you look it! Come in and sit down. We are just going to have supper.'

"The sailor did come in, and after the meal begged Barnum to lock him up in a cage, a cage with iron bars, that he might refrain ffom drinking. Thus was the 'Wild Man of Borneo' conceived, and every one who attended a Barnum show remembers what an object of interest he was to the small boys."

No Lie.

"I don't think it is a nice thing to say of Mrs. Odsent that she got her husband at a bargain counter."

"Oh but it's true. He was the young man that saved her life in a crush at a glove sale at Spotcash's one day."—Chicago Tribune.

A Long Honeymoon Trip.

Maude—Papa has offered to pay all the expenses of our honeymoon trip.

Claude—Then we'll never come back.

North Plainfield Weekly Review.

VOL. 4—NO. 17 NORTH PLAINFIELD, N. J., SATURDAY, JULY 18, 1903. PRICE 3 CENTS.

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

It is noticeable that the days are getting shorter.

The Retail Clerks went on a trolley ride Thursday night to Riverside Park.

Members of the Old Oaken Bucket Club will meet at Glendale Grove tomorrow.

St. Joseph's Church has been greatly improved in appearance externally by a new dress of paint.

A large crowd of people listened to the second popular band concert, Thursday evening, in City Park, Plainfield.

The Feast of our Lady of Mount Carmel was celebrated Wednesday and Thursday here by the local Italians.

Miss Van Deventer, of Grove street, has bought the Isaac F. Randolph homestead on Madison avenue, Plainfield.

H. D. Hutchinson and family, of Westervelt avenue, have returned from a visit with relatives at Hempstead, L. I.

Peter Bowers, of Somerset street, is reported as suffering from the effect of a sting received Sunday from a caterpiller.

James Conroy, of Somerset street, was thrown from his wagon yesterday and was somewhat shaken up, but not seriously injured.

Members and friends of the Rescue Mission, went on a picnic to Riverside Park Wednesday where they spent a very enjoyable day.

Rev. Mr Otto, will preach in the Wilson Memorial Chapel, Watchung, tomorrow (Sunday) evening. Service commences at 8 o'clock.

Housekeepers should remember that it is unlawful to deposit refuse matter where it can decay and this becomes a nuisance and menace to health.

Assemblyman S. S. Swackhammer, of this borough, will speak on "Democratic Issues" at the annual Farmer's Alliance picnic, August 19 and 20.

Some members of the Hope Young Men's Association will leave for Lake Hopatcong August 15 where they will pitch their tent and camp.

Next Thursday the Sunday Schools of the Park Avenue Baptist Church, First Presbyterian, and Congregational Churches will go to Asbury Park.

It is said that the juice of an onion will instantly relieve the pain caused by mosquito bites. Whether the remedy is worse than the bite is a question.

George D. Hallock and family, of Washington Park, this borough, have left for Elkhorn Lodge, Estes Park, Colorado, where they remain for several weeks.

Assemblyman S. S. Swackhamer and family are spending the month of July with Mrs. Swackhamer's mother at Whitehouse. Mr. Swackhamer returns to Plainfield occasionally to look after his affairs.

About one hundred English and Oregon pheasants have recently been liberated in the woods near Far Hills in the hope that these birds of gorgeous plumage might increase and add to the attractions of that section.

About thirty members of the Boys' Department of the Y. M. C. A. accompanied by Secretary Kenneth Robbie and Physical Director. C. E. A. Heywood, left Thursday for Waywaywanda, where they will camp for several weeks.

The expenditure of $2,500 for a proposed boulevard in North Plainfield appears unwarranted when there are so many important improvements to be made. Better use the $2,500 in the proposed sewage system work.—*Daily Press.*

The singing section of the Gesang and and Turn Verein, of this borough, have accepted an invitation extended them by the Singing Society Aurora, of New Brunswick, to attend the anniversary of their organization on the evening of August 3.

The mosquito plague at Westfield and nearby towns is unbearable and more porches have been screened within the past two weeks than ever before. People traveling the mountain roads say that there are very few of the pests on the mountains above an altitude of about 100 feet.

Retail Clerks Install Officers.

At a meeting of the Retail Clerks' Association, Monday evening, the following officers were installed: President, H. P. Greenwood; first vice-president, Caspar Woglow; second vice-president, W. E. Baker; guide, George Ayres; chaplain J. R. Sutton; recording secretary, Griffith Jenkins; financial secretary, Chas. H. Grier; treasurer, Wm. D. Williams; guardian, Edward Baker; Trustee, J. Stroebel.

SEVERED ARTERY IN ARM.

Knife Slipped in Carving Meat but Presence of Mind Saved His Life.

David E. Crowell, clerk in Alex. Thorn's meat market, this borough, met with a serious accident Wednesday, which but for his presence of mind, might have resulted fatally.

He was carving a side of beef when the knife slipped and cut a gash in his left arm, severing an artery. The blood spurted almost to the ceiling, but David was "game," and pressing with his right hand on the wound he partly stopped the rush of blood, and hastened to the office of Dr. Pittis, near by.

The doctor was obliged to make a large incision in the arm in order to reach the artery, and during the operation Mr. Crowell fainted, but soon revived. He lost a great deal of blood before the operation was completed.

He is attending to his duties again, with the injured arm in a sling.

The Somerset Courts.

Junge Schenck has filed his opinion in the Olcott will case, and dismissed the appeal and affirmed the order of the Surrogate admitting the will to probate.

Somerset Freeholders.

The regular monthly meeting of the Freeholders of Somerset county was held on Tuesday, which was attended by a full board.

Routine business occupied the attention of the Board, nothing of importance coming up, other than the usual payment of bills.

Jail Delivery.

Three prisoners made their escape from the county jail at Somerville last Saturday night, and no trace of them has been discovered, although it is claimed by those in authority that they can be had when wanted.

The escaped prisoners are Harry Hayes, charged with stealing chickens, and Henry Watson charged with fornication, both of this borough; and Daniel Cobb, charged with assaulting Sheriff McMurtry.

It is believed that the men received outside assistance.

Peaches, Possibly Pallies Never.

Assemblyman Swackhamer, of Somerset, reports that after talking with many of the prominent farmers of Hunterdon County, where he has been on a visit, he has discovered that the peach crop is a failure. There is nothing startling about that, but perhaps Mr. Swackhamer is using this ordinary bit of news to conceal just what he found out about the political crop. That is something that he and Senator Gebhardt are more interested in just at present than peaches.—*Newark News.*

Cash Registry Works at Bound Brook Closed.

The works of the American Ideal Cash Register Company at Bound Brook were closed down Saturday. The sudden closing is a great mystery to the workmen, who had had no intimation that work was to stop. The concern has been established at Bound Brook a number of years, and is considered one of the strongest competitors of the National Cash Register Company, with which it is said to have had considerable litigation relating to patents. Some weeks ago it was stated that a decision of the courts was in favor of the American Ideal Cash Register Company, and there were evident preparations on the part of the company to enlarge its plant. There are now rumors that the company is about to reorganize.

Barn and Sheds Burned, Due to Lightning.

The large barns, wagon sheds and cow stables of Walter P. Bliss, of Bernardsville, which have just been completed, were struck by lightning Tuesday afternoon at 4 o'clock, and burned to the ground. The barns were filled with hay and grain, which was also consumed. The farming machinery, horses, harness and wagons were saved. The loss amounts to $15,000, and was partly covered by insurance.

Mr. Bliss last year purchased the Ballantine farm between Bernardsville and Mendham, and at once began building a country home upon it. The house has 150 workmen engaged upon it, and will not be finished for two years. It is said, when completed it bids fair to rival Blairsden, the palatial country seat of C. Ledyard Blair, near Far Hills.

The buildings which were burned were situated at a considerable distance from the house, consequently no damage whatever was done the latter. They will be rebuilt with brick and stone.

Thousand Mark Passed.

Plainfield has more telephones, according to population than any other town in New Jersey. There are now over one thousand telephones in the Plainfield exchange, known as the Plainfield district, a result that Manager Runyon is quite proud of as he should be. When he took charge of the office twelve years ago there were only 200 instruments in his district.

A NARROW ESCAPE.

Automobile Crashes into a Tree Near New Brunswick.

Frederick Nelson, of New Market, a brother of Mrs. Charles L. Fair, who was killed in an automobile accident abroad, had a narrow escape from a similar death Thursday.

Nelson and "Nat" Titsworth, of Bound Brook, were returning in an automobile from the seashore when, at Weston's Mills, near New Brunswick, the brake refused to work. The automobile was going down hill at the time, and its speed became terrific. At the foot of the hill it left the road and crashed into a tree. The two men were pitched out, and lay helpless on the ground until farmers in the neighborhood went to their assistance. Both were badly bruised and shaken up, and it is considered almost a miracle that they were not killed. The machine was demolished by the collision, and Nelson and Titsworth were taken to New Brunswick in a farmer's rig.

The Metuchen-Plainfield Trolley.

There is talk of the projected trolley line from Metuchen running via Oak Tree, South Plainfield and New Market, and thence to Dunellen where it will connect with the Plainfield line. At first it was proposed to have it run direct from Metuchen to Plainfield, which would no doubt have suited Plainfield better than this latter plan.

Peach Crop Very Light.

The Hunterdon *Gazette* says that conservative estimates place the number of baskets of peaches to be marketed at Annandale this year at 20,000. As high as 100,000 have been shipped from there in a good season, so it will be seen that the crop will be light.

New Factory for Somerville.

The Somerville board of trade has about raised the necessary amount of money to locate the Carbon Stove and Range company. The New York agriculture works, which they succeeded in locating, has begun operations, and about fifty men have moved to Somerville from Boonton to work in their foundry. Already have the Somerville merchants discovered that they are a good help to business.

Wants Straight Channel Through Perriwig Bar.

Accompanied by a large party, Representative-elect Lanning, of the Fourth District, Trenton, went down to the Delaware River aboard the steamboat John A. Warner Wednesday to gather facts for Trenton's fight for a $200,000 appropriation for cleaning out a straight channel through Perriwig Bar, so that river navigation between Philadelphia and Trenton may not be so obstructed.

Representatives Gardner and Howell accompanied the party, as did State Senator Briggs, the city officers, Common Council and 250 prominent merchants of Trenton.

It is pointed out that Trenton produces yearly in pottery, $4,800,000; in rubber goods, $3,900,000; lamps, $1,000,000, woollens, $1,200,000; beer, $855,000; brick, $700,000; crackers, $350,000; furniture, $200,000; iron and steel goods, $13,800,000. The Board of Trade figures that thirty per cent. of that freight could leave Trenton by water were it not for the obstruction to navigation by Perriwig Bar.

Weather and Crop Bulletin.

Central Office, U. S. Weather Bureau,
Atlantic City, N. J., July 14, 1903.

The temperature during the week ending Monday, July 13th, averaged from 5 to 7 degrees above the normal. This excess was chiefly received on the 6th to 10th, inclusive, when the maxima temperatures ranged from 89 to 98 degrees. Light showers occurred on the 6th, and heavy rains (thunderstorms) on the 11th and 12th, but between these dates the prevailing conditions were most favorable for the harvesting of wheat, rye and hay—large quantities were safely housed before the rain began. Threshing in the fields was begun in Southern section, and the yield, so far, is short of expectations. All vegetation has been greatly stimulated and improved, especially the tender truck crops. Corn is growing rapidly, but still backward. The rains of the 12th and 13th, will prove highly beneficial to all crops in the Southern section.

Soft Coal Nuisance.

Considerable dissatisfaction exists in the vicinity of the Pond Tool Works in Plainfield, from the fact that the factories in that neighborhood are using soft coal, the smoke from which is declared to be a nuisance by the people living near there.

It is said that a petition will be presented to the city council asking that the factories be made to stop using soft coal.

FATAL ACCIDENT TO BOROUGHITE

John Benz, of Summit Avenue Killed by Falling From Ladder.

John A. Denz, of Summit avenue, this borough, met death at Stirling Tuesday morning by falling from a ladder while painting a house.

Mr. Denz was in the act of climbing a ladder and when near the top he was seen to waver and then fall to the ground below and died without regaining consciousness.

His body was brought to his home and buried yesterday.

He was in his fifty-third year, and leaves a wife and six children.

Saves Child at Somerville.

George C. Ball, who was formerly proprietor of the hotel at Califon, saved a little child from being crushed to death by a locomotive at Somerville a few days ago. The child stood on the track and paid no heed to the engine bearing down upon her until Mr. Ball rushed and grabbed her almost from under the wheels. Both escaped injury, and Mr. Ball was heartily applauded for his heroic act, as it was done at the risk of his life.

A New Railroad Book.

New Jersey is in every sense a typical vacation region, and each year brings greater developments and improvements for the entertainment of the pleasure seeker. The Shore, which is reached best by the New Jersey Central, includes Atlantic Highlands, Navesink, Seabright, Monmouth Beach, Allenhurst, Deal, Asbury Park, Ocean Grove, Spring Lake and Point Pleasant. To these points there is fast express service at almost every hour, while the New Jersey Central's Sandy Hook boats afford a delightful sea trip to Atlantic Highlands, from which point trains convey passengers to the above points. Atlantic City, Cape May, Ocean City, Tuckerton, Beach Haven, are also reached by the New Jersey Central by fast express trains, while the interior resorts, including Lake Hopatcong, Mauch Chunk, Harvey's Lake, have greatly improved service. The New Jersey Central has just issued a new booklet known as "Seashore and Mountains" descriptive of the region traversed by that road. The book was gotten up regardless of expense, is printed on fine paper, and has nearly 150 illustrations of scenes along the line of the road. This book is sent to any address upon receipt of 6 cts. in stamps by C. M. Burt, Gen'l Passenger Agent, New Jersey Central, R. 803, New York City. Send for it.

New Way of Salting Calves

The Newton Herald is responsible for the following: A farmer named Smith, living near Marvinville, hired a city boy to help him around the farm during the summer. One morning he told the boy to go and salt the calf. The boy took a quart of salt and rubbed it all over the calf, working it into the hair. A lot of colts scented the salt and hunted the calf up. They licked all the hair off the poor calf's back. The farmer tried to catch the calf to wash it, but the calf thinking he wanted to lick too, ran through a hole in the fence and disappeared down the road.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Calvin D. McMurtry, sheriff, to Mary Jane Sandford, et al, $1,500.

Alfred University to Martha Goodman, et al, $3300.

Alex. E. Faber, Jr., et ux to Cornelius E. Gulick $1.

Alex. E. Faber, Jr., et ux to Cornelius E. Gulick, $1.

John Spencer et ux to Wm. R. Codington $1.

Concerning Proctor's.

At this time of the year it is almost impossible to tempt the public at large to enter an indoor theatre, no matter how good the performance may be. You can go to the roof garden and swelter in the rays of "Old Sol," but the modern indoor theatres, particularly those under the management of Mr. Proctor, are so constructed that the natural coolness of the earth is borne into the spacious auditoriums by both mechanical and natural appliances. Mr. Proctor's Twenty-third Street Theatre, notwithstanding the terrific werther, remains cool, and the show—well, any patron of Mr. Proctor's knows that this important factor is always up to the standard of merit.

A fine half-tone portrait of Pope Leo XIII, in the act of pronouncing benediction, surrounded by symbolical emblems, embossed in true colors and gold; a very handsome card 11x14 may be procured at Audsley's Art Store 135 East Front street, for the extremely low price of twenty-five cents.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

One of Mrs. Richard Risley's hens, at Pleasantville, made her nest in a tall oak tree, laid a dozen eggs and hatched a brood of chickens before her secret was learned. By using a ladder Mrs. Risley was able to rescue the little chicks from their perilous position.

The police of Burlington intend to enforce the law in regard to the selling of liquors to habitual drunkards, and will put into effect the plan adopted by Burgess Pennypacker, of Westchester Pa. They are preparing a list of habitual drunkards in the town, and will file a copy of it with each saloon-keeper. Any saloon-keeper selling liquors to any one on the list will be prosecuted.

Mrs. Ramsey, who lives with a daughter, Mrs. Robert Morhead, near Wenonah has just completed a bed quilt containing 21 100 pieces and presented it to her son in-law. Mrs. Ramsey is eighty-four years of age. At the presentation an old fashion quilting bee was held. Mrs. Ramsey has two daughters and a son, eighteen grandchildren and ten great-grandchildren.

While this Mounts, a farmer, of Cedarville, was ploughing a field, he overturned a quail's nest containing fifteen eggs. Johnson Noble took the eggs to his hennery and placed them under a setting hen. All except two eggs hatched, and the young quail, as soon as they left the shells, began running around. The lively little birds are worrying the old hen to death.

Cupid has so interfered with school work in Passaic during the last year that the Board of Education is considering a plan which is expected to act as an injunction. The members of the board are now considering the proposition that applicants for places as teachers shall sign a contract not to marry within a period of five years. The proposition may be acted upon at the next session.

Property owners of Seabright await anxiously the meeting of the freeholders and turnpike officials to-day. The meeting is called with a view to effecting a settlement between the owners of the turnpike and the freeholders for the sale of the toll road. It is believed that there will be a compromise, and that this week will witness the last of the toll road.

One of the smallest woman in the world was buried at Bayonne Monday. She was Miss Mary Jane Piercey, forty years old. Her height was thirty-one inches, and for fifteen years she has been exhibited in circuses and museums. She died in the home of her mother, at 95 West Eleventh street, after a short illness. Miss Piercey had a head almost as large as that of a person of normal growth. Her brother and four sisters are of normal height.

William Dilley, of Whitehouse, was getting out stone from a mountain near that town, the other day when his attention was attracted to a small bird which was acting in a strange manner, as if it was in distress and unable to fly. Searching for the cause, he discovered a copperhead snake coiled a few feet from the bird, which was surely under the serpent's influence. Dilley attacked the snake, which immediately took its gaze from the bird and the spell was broken. The bird flew away.

N. W. Case, of Mt. Pleasant vicinity, in Hunterdon County, recently found a land turtle with the record, "P. F., 1815," cut in its shell. The appearance of the old hard shell corroborated this age record. It in know that turtles live beyond a century, and it is also know that certain changes in the surface of the shell always come in the last years of the reptile's life. These were plain on the back of this specimen. The cutting of the initials and date indicates that the time the shell was cut so deeply, which would give him a full hundred years of age.

Mrs. Lizzie Dalrymple, of Moore street Hackettstown, has in her possession probably one of the oldest newspaper publications in this state. It is the Palladium of Liberty, and bears date of January 4, 1816. It was printed and published at Morristown by Jacob Mann on the south side of the green near the church. It is a four-column folio, and the first and second pages are wholly occupied by the report of A. J. Dallas secretary of the United States Treasury. A greater part of page 4 is given up to the "The Commercial Treaty," between James Madison, President of the United States, attested by James Monroe, Secretary of State, and his Britannic majesty's Charge d' Affaires in the United States.

MOSQUITO DESTROYER.

Dr. Stiles of Hook Worm Fame Discovers It.

Dr Charles Wardell Stiles of the Public Health and Marine Hospital Service, discoverer of the parasite *Uncinaria Americana*, generally known as the hook worm, or "germ of laziness," and whose address last December before the Sanitary Conference of American Republics, in which he told of the effects of the ravages of the hook worm disease upon social, industrial and economic conditions in the Southern States, attracted such widespread attention, has made another discovery in the parasite world, which is considered by Government savants as of the greatest importance. This is the discovery and isolation of what Dr. Stiles has named the Agamomermis culicis, otherwise known as "the mosquito destroyer," a parasite which kills millions of mosquitoes each year and which, it is believed, under artificial propagation, will prove far superior to any means now known of ridding infested communities of these pests.

The discovery was not the result of accident or of haphazard methods. Some time ago the officers of the Public Health and Marine Hospital Service conceived the idea that at the present time, when mosquitoes are being subjected to such careful study because of the important relations they bear to public health, especially in connection with malaria, yellow fever, and diseases of a like nature—the mosquito having been recognized as a carrier of fever germs—it was of the greatest interest to determine by what parasite they were naturally infested.

At the time this determination was made the health authorities were convinced, although without the backing of data, that the matter had a practical as well as a scientific value, for it was considered that it would make possible the elimination of certain nonpathogenic organisms from the life cycle of pathogenic organisms, certain stages of which were already known to exist in mosquitoes. It had a further practical bearing in that it was then believed that the parasites of mosquitoes might multiply to such an extent as to become important factors in extermination.

The experiments of Dr. Stiles, which followed this decision, have resulted in entire success. The parasite has been discovered and isolated. The right of the parasite to the common title of 'mosquito destroyer' has been established. All that now remains to be done by Dr. Stiles and his associates is to discover a rapid and inexpensive manner of propagating the parasites in sufficient number for general use in marshes, ponds and localities infested with the insects. The 'mosquito destroyer' will do the rest.

Certain forms of intestinal parasites had previously been found in mosquito larvæ in India, Italy and Spain, but none had been discovered in American mosquitoes, until Prof. J. B. Smith, of Rutgers College, forwarden to Dr. Stiles for examination two worms taken from the abdominal cavity of New Jersey mosquitoes. One specimen was hardly in a condition to be of use for study, but Dr. Stiles determined that both specimens were larval round-worms, belonging to the family mermithidæ, either to mermis or paramermis. Dr. Stiles christened the parasite 'agamomermis culicis.'

The agamomermis culicis is an internal parasite and has its habitat in the abdominal cavity of mosquitoes, infection taking place in the larval or pupal stages of the growth of mosquitoes. Mosquitoes infected with the parasite are sluggish in their movements and do not live long. Female insects infected do not breed.

The researches which led up to the discovery of this parasite showed conclusively that what is generally termed "a bad year for mosquitoes"—that is, when the pests are most numerous in their usual haunts, and even in places where they are usually few in number—is due to the existence of conditions unfavorable to the natural propagation of the "mosquito destroyer." Correspondingly in the years when the parasite breeds in large numbers, mosquitoes are not so troublesome. Indeed, from what has already been learned, it is apparent that, were it not for this natural enemy of the mosquito, the pests would breed unchecked in such numbers as to make certain sections of this country almost uninhabitable in certain periods of the year.

It is admitted by Dr. Stiles and other Government scientists that considerably more difficulty would be experienced in propagating the "mosquito destroyer" in sufficient numbers for general use than was involved in distributing the parasite of "the grasshopper plague" throughout the farming sections of the West. Although not generally known, it is, nevertheless, a fact that the Department of Agriculture, by sending out cultures of this plague to many points in the Middle West and Southwest, where formerly a

EVENTS IN POPE LEO XIII.'S LIFE

Born at Carpineto	March 2, 1810
Entered college in Rome	1824
Entered College of Noble Ecclesiastics	1832
Ordained a priest by Cardinal Odeschalchi and aided in superintending cholera hospitals during scourge	1837
Governor of Spoleto	1841-1843
Papal Nuncio at Brussels	1843-1845
Decorated by King Leopold with Grand Cross of order founded by King.	
As Archbishop of Perugia prevented an outbreak at death of Gregory XVI	
Created Cardinal	1846
Created Cardinal	December 19, 1853
Created Cardinal Camerlingo to Pope Pius IX	July, 1877
Elected Pope after three ballots	February 20, 1878
Revived Roman Catholic Hierarchy in Scotland	March 4, 1878
Founded college for Armenians in Rome.	
Gained diplomatic victory over Prince Bismarck and re-established friendly relations with Germany.	
Chosen to settle quarrel between Germany and Spain over Caroline Islands.	
Recognized unity of Italy	October 7, 1883
Celebrated golden jubilee of his accession to priesthood	1888
Celebrated fiftieth anniversary of his accession to the Episcopate	1893
Issued appeal to England for reunion of Christendom	April 14, 1894
Celebrated sixtieth anniversary of his first mass	February 13, 1898
Created eleven new cardinals	June 19, 1899
Celebrated twenty-fifth anniversary of his Pontificate	March, 1903
Received King Edward in April, and Emperor William in May	1903

CAREER OF POPE LEO XIII. IN DETAIL.

In the little town of Carpineto, perched on a high eminence in the Diocese of Anagni, Italy, already famous as the birthplace of four Popes—Innocent III., Gregory IX., Alexander IV. and Boniface VIII.—Gioachino Pecci (Leo XIII.) was born, March 2, 1810. He was a member of an old and illustrious family of Siena. Toward the middle of the thirteenth century the Pecci family already wielded great power in the country. They soon became so powerful that when Pope Martin V. visited Siena he was very comfortably quartered, together with all his court, in the house of the brothers Giovanni and Giacomo Pecci, who further lent him the sum of 15,000 florins.

When the future Leo XIII. was born it was a dark time for the Papacy, Italy being then under the heel of Napoleon and Pope Pius VII. a prisoner and divested of his temporal power. The clouds lifted, however, in 1814, when, as one result of Napoleon's overthrow, Pope Pius returned to his sovereignty. He at once restored the Society of Jesus, which had been suppressed by Clement XIV., and to the Jesuits the Count and Countess Pecci intrusted the education of the future Pope.

In 1832 the young student entered the academy or college for Noble Ecclesiastics, the nursery of most destined for a diplomatic or administrative career under the Papal Government. There he was educated in civil and ecclesiastical jurisprudence, as well as theology. In 1835 he won a prize of $132 by a thesis on the subject of "Immediate Appeals to the Roman Pontiff in Person."

The Asiatic cholera was sweeping over Italy. Mgr. Pecci, not being yet in priest's orders, could not minister to the spiritual wants and comfort of the plague-stricken, but he was active and devoted in assisting his chief, Cardinal Sala, in his important work of superintendence over the cholera hospitals. It may have been due to his anxiety to serve the sick and dying in a priestly character that, on November 13 of that memorable year, he received Sub-Deaconship and Deaconship at the hands of Cardinal Odescalchi, the Pope's Vicar-General, in the Chapel of St. Stanislas Kostka, in the Church of "St. Andrew on the Quirinal." On the last day of that same year—1837—Cardinal Odescalchi, in the private chapel of his residence, in the vicariate, conferred the order of priesthood on Joachim Pecci.

While still in his thirty-third year Mgr. Pecci was appointed Apostolic Nuncio at the court of Belgium, with the titular dignity of Archbishop of Damietta. In the struggle between secular and religious education he strove to show the superiority of the religious method by making the religious schools better than the secular.

Meantime Gregory XVI. had died, and Pius IX. ascended the Papal throne in time for the exciting scenes which made His Pontificate memorable. It was an era of struggle and of revolu-

LEO XIII, AT THE TIME OF HIS ELECTION AS PONTIFF.

tion, and the wave did not subside before it had spread from one end of the Papal States to the other. But in Perugia the tact and wisdom of Archbishop Pecci prevented a serious outbreak, and his personal interposition was sufficient to stay the rising tumult.

In 1853 Mgr. Pecci was created a Cardinal, taking his title from St. Chrysogonus. This ancient Roman church had its origin in the time of Constantine and was rebuilt in A. D. 731 by Gregory III.

On February 20, 1878, Cardinal Pecci was elected, after three ballots, to be the successor of Pius IX.

The secret balloting which preceded the momentous choice was of unusual length and the proceedings of the dignitaries who took part in it were, it would seem, much agitated.

On Tuesday, February 19, the first balloting for the election of Pope took place. Sixty-one Cardinals were present. Cardinal Joachim Pecci's name was read out twenty-three times, but, though far ahead of all others it lacked the necessary two-thirds vote. In the afternoon another ballot was taken. Cardinal Pecci's name was announced thirty-eight times. He had fervently prayed that he might escape the great burden which he deemed himself unable and unworthy to bear.

The following morning, February 20, 1878, the balloting was resumed, and Cardinal Pecci's name was read forty-four times, the two-thirds majority limit was passed, and Cardinal Pecci was canonically elected Supreme Pontiff of the Church of Christ. To the question of he sub-dean asking by what name he wished to be called he answered "By the name of Leo XIII."

It is supposed, and not without good reason, that the advanced age of Cardinal Pecci, his apparent feebleness and the belief that he would not live very long to fill the throne which some of his companions in the Sacred College coveted, had much to do with his election.

The ability which he revealed in Benevento he has since displayed as ruler of the Roman Catholic Church. Although he ascended the throne at a moment of great difficulty he showed himself quite able to achieve his heavy task.

His predecessor, Pius IX., had been a temporal as well as a spiritual sovereign. Pope Leo XIII. had an effective spiritual jurisdiction only.

The anxious throng which stood before the lofty portals of the grand Basilica after Leo XIII.'s coronation, hoping that by appearing at the traditional window to bless the people, "Urbi et orbi," he would bow to the new order which had swept away the ancient temporal power, were disappointed.

For Leo turned his back upon the crowd and shut himself up in the Vatican. His pale, wan, intellectual face was not disclosed to them. His fragile hand was not outstretched above their heads for the expected benediction. Like Pope Pius, Leo XIII. also was "a prisoner."

But there was a wide and striking difference between the manner in which Leo XIII. labored to attain his ends and that of bluff Pope Pius.

He strove, for instance, rather for the principle than for the material reality of the temporal power. He would possibly have contented himself with exercising sovereignty over that portion of Rome across the Tiber on which stands St. Peter's and the Vatican, and a strip of territory extending to the seaport of Civita Vecchia, so that he might have been able to receive ambassadors and pilgrims alike on Papal territory.

Without conceding anything to King Humbert and his successive Ministers, while openly defying them at times and making protests against the repeated interferences of the monarchy with the cherished privileges and with the property of the Church, Leo XIII. conciliated rather than estranged his adversaries.

By his diplomacy, his foresight and the curious shrewdness which distinguished him he also won the good will or respect of foreign nations.

It was at the beginning of his reign his ardent wish to bind the Papacy to all the courts and rulers of the earth by diplomatic ties.

As time rolled on he modified this ambition, and made it his most zealous aim to gain the good will, the honor and support not of the rulers but of their peoples.

And, as we know, his prudence, his sagacity, his horror of extremes did not exclude a certain quiet, dogged firmness. It was this firmness that led Bismarck to accord the Pope a deference which he reserved for few. Indeed Pope Leo and Paul Kruger were the only statesmen whom he thoroughly and honestly admired.

LATEST PORTRAIT OF POPE LEO XIII.

Those who were admitted to the intimacy of Leo XIII. toward the close of his beneficent career are well aware of the not perhaps unnatural and most innocent pride with which he regarded his own health and longevity. This pride occasioned his physician, Dr. Lapponi, much anxiety, as it frequently led Leo XIII. to overwork himself quite needlessly. Almost to the end the late Pope's eyesight was unimpaired. His interest in the social, political and spiritual affairs not only of Catholics but of humanity at large, was, even in the last months of his Pontificate, phenomenal.

Pope Leo was always a man of extremely simple tastes, which he brought from his childhood's home at Carpineto, amid the hills, and possibly his cautious temperament, curiously combined with power and unhesitating decision, was inherited from his mountaineer ancestors.

For his personal use His Holiness selected instead of one of the numerous magnificent suits of the Vatican a few simple rooms containing little beyond absolutely necessary articles. His bed stands in an alcove, separated from a larger room by a curtain hanging gracefully over marble columns. Above the bed is a picture of the Madonna and Child. Beside it is a prayer table surmounted by a crucifix. A wardrobe against the wall faces the bed, and between the latter and the wall is a couch. The rest of the room was used as a study, and contains a writing table with a crucifix; a chair on a carpeted platform, chairs and tables for the Pope's secretaries, writing materials, and a few books, among which are the works of Dante, Virgil and Horace, besides a Bible.

The Pope, even when in good health, slept only four or five hours each night, and often in the morning his bed was undisturbed and the Pope was found asleep in the chair before his writing table.

Shot and Killed His Sleeping Wife.

Frank Manoley shot and killed his wife while she was sleeping in bed, at Baltimore. She was shot four times in the head. Manoley says he was dreaming that he was shooting at a burglar.

Worthy Poor to Get $10,000.

Ten thousand dollars is bequeathed to Chesterfield, Mass., by Horace P. Taylor for "the worthy poor who have never been public charges and who are disposed to earn their own support so far as able."

Salvation Army Exhibit.

The St. Louis Exposition management has offered Commander Booth-Tucker, of the Salvation Army, land for an army exhibit. One of the features of the army's exhibition will be a colony farm. The army will erect a two-story exhibition building.

U. S. Treaty Deadlocked.

The American treaty negotiations are deadlocked, owing to the failure of the Chinese authorities at Pekin to reply to the demand for the opening of Manchurian ports to trade.

Family Making "Queer."

J. C. Adams, his wife and son Jefferson were arrested at Bonanza, Ark., on charges of making and passing counterfeit money. A counterfeiter's outfit and $300 worth of spurious coin were found in the Adams barn.

To Urge Speedy Adoption.

It was said in Washington that strong representations would probably be made to President Marroquin of Colombia to induce him to urge the speedy adoption of the Panama Canal treaty.

POLICE FIRE ON RIOTERS

A Fatal Clash in Chicago Over the Teamsters' Strike.

Three Thousand Charge the Police Guarding Wagons Taking Freight to a Depot, and Many Are Struck With Clubs.

Chicago. — Police fired on a mob, many persons were hurt by flying bricks and several arrests were made in the most spirited labor riot of the stock yards teamsters' strike. Shortly before 3 o'clock one of the Kellogg Switchboard Company's wagons hove in sight around the corner of West Congress and Peoria streets. The wagon was escorted by a single patrol wagon, and when it encountered the blockade which had been arranged on the corner two special policemen of the company displayed revolvers.

The crowd began to hoot and jeer, and some one threw a brick, narrowly missing a city uniformed policeman. The policeman gave chase to the man who shied the brick, but soon realized that it was merely a ruse to decoy him away from the plant and bring him under the walls of a building near by in course of construction.

As soon as the fugitive reached the shadow of the walls the laborers began throwing bricks from the fifth story of the building to prevent the capture of their ally. Meantime Lieutenant O'Connor saw the predicament of his policeman and hurried to his assistance with several men. The workmen in the building were defiant, and the police were obliged to fire about thirty shots before the attack ceased.

More shooting occurred when the loaded wagon was started for the freight sheds. Sergeant Madden and ten policemen gave chase after a symthizer who had thrown a brick at the police sergeant, who was driving a wagon the driver of which had been arrested early on the trip. At the corner of Cypress street and Orden avenue the fugitive tripped and fell, but finally succeeded in making his escape. The last volley dispersed the crowd. Fourteen arrests were made during the riot.

War on Mob Fighters.

Indianapolis. — Indignation was expressed at a meeting of the last Business Men's Association over the discharge of five member of the militia company by firms employing them because of the killing and wounding of the rioters who attempted to storm the jail in Evansville. Ever since the dispersion of the mob members of the labor unions have been bringing pressure to bear upon the employers of the militiamen, and as a result five of the men were discharged.

Judge Scores Rioters.

Middleboro, Mass. — In sentencing eight persons to the House of Correction for participating in the recent riots, in which several persons were hurt, Judge Kelly stated that the police would have been justified in sprinkling the town house steps with bodies. All those sentenced were admitted to $500 bonds.

JAMES G. BLAINE'S WIDOW DIES.

Passes Away in Old Family Homestead in Maine After Short Illness.

Augusta, Me.—Mrs. James G. Blaine died at the Blaine homestead here a few days ago.

Mrs. Blaine was seventy-six years old. From Washington, a short time ago, she came to the old family residence on State street. She was in an enfeebled condition, and she had been under almost constant medical attention since that time. Her death was due to a general breakdown of the system.

Mrs. Blaine was a native of Augusta, her maiden name being Harriet Stanwood. Her long life here during Mr. Blaine's public career made her one of the most prominent women of the city. She leaves one son, James G. Blaine, and two daughters—Mrs. Harriet Beale and Mrs. Walter Damrosch, of New York—who were at her bedside during her last illness.

CUDGEL AND CAT ABOLISHED.

Czar Said to Have Put an End to Barbarous Punishments.

St. Petersburg, Russia. — The Czar has abolished the harshest remnants of the barbaric punishments of former times—namely, castigation with cudgels and cat-o'-nine-tails, also chaining to the car and shaving the head, which were still inflicted for certain offenses on persons exiled to penal settlements or to the mines. They say only the most hardened prison administrators could stand the terrible sight of the death of human beings under the measured blows of the cat-o'-nine-tails.

The cudgel and the "cat" are replaced in the new statute by prolongation of term or by solitary confinement up to 100 days, with bread and water, except every third day, when hot food will be served at one meal.

COTTON MILLS TO CLOSE.

Will Buy No Stock at the Prices Dictated by Bull Clique.

Boston.—It was announced here that an agreement had been made among New England cotton mill treasurers to curtail the production of their mills sufficiently to enable them to get along without buying any cotton until early in October, or until they can buy independently of those in control of the July, August and September options.

No papers have been signed, but the understanding is definite and the mills will shut down for a time in August.

President Roosevelt Indorsed.

The Kentucky Republican State Convention indorsed President Roosevelt for nomination in 1904.

Tobacco Trust Threatened.

William H. Butler, President of the Universal Tobacco Company, declared that a suit begun for a receivership was inspired by the Tobacco Trust and threatened to show up the connection of United States Senators and other high officials with the trust.

Kearsarge to Race Across.

Captain Hemphill has been ordered by the Navy Department to bring the Kearsarge across to Maine on a speed test for the purposes of the Bureau of Steam Engineering.

FOURTH OF JULY LOCKJAW

Tetanus, Resulting From Toy Pistol Injuries, Kills Many Victims.

ANTI-TOXIN SERUM SAVES A FEW

The Great Scourge That Follows in the Wake of Fourth of July Mishaps is Reaping a Fearful Harvest of Deaths Throughout the Country—Dreadful Suffering From Hurts Made by Fireworks

Tetanus, the dread disease that follows trifling accidents due to Fourth of July injuries, is epidemic all over the country. Four cases have been reported in New York City and vicinity, many deaths have occurred in New England, seven deaths are reported from Philadelphia, while in Chicago and vicinity the number of victims is placed at more than a dozen.

Philadelphia. — Deadly tetanus or lockjaw, the result of Fourth of July accidents, secured two more victims, making the total number of deaths in this city from that cause since Independence Day seven. William Karmel, thirteen years old, died in the Children's Homeopathic Hospital. On July 4 the boy discharged a toy pistol while the muzzle was pressed against his hand and the wadding from the cartridge tore an ugly wound in the palm. After the wound had been dressed the lad went on with his celebration. In a few days his jaws began to stiffen and he was taken to the hospital. In the course of a few hours his jaws became set. From that time until his death he remained conscious and attempted to talk to his mother by signs with his hands. Harry Banks, six years old, died in the Hahnemann Hospital. He also was wounded by the accidental discharge of a toy pistol on the Fourth. The disease was so far advanced before he was placed under treatment that serum proved ineffective.

Newark, N. J.—Mrs. Mary Vanness, thirty-two years old, died in the City Hospital from lockjaw following an injury to her hand received on the Fourth of July. She had lighted a giant firecracker and was about to throw it into the yard when she noticed her children in the way. She hesitated for a moment and the cracker exploded, lacerating her hand badly.

Mount Vernon, N. Y.—Dr. George C. Weiss opened the skull of Willie Graham, a five-year-old boy who was suffering from lockjaw following a Fourth of July accident. Antitoxin was injected into the brain. His jaws which were firmly set relaxed after the antitoxin was administered.

Bayonne, N. J.—After suffering great torture John Case, twelve years old, died of lockjaw resulting from a burn on his hand. On the Fourth of July he allowed a large firecracker to explode in his hand.

Fall River, Mass.—Antone Pellet, twelve years old, died of lockjaw, resulting from a Fourth of July pistol accident.

Kingston, N. Y.—John Lawrence, ten years old, and Ledg Kaman, nine years old, died of tetanus at East Kingston as the result of being injured on the Fourth of July. Both boys were shot in the hand with toy pistols.

Utica, N. Y.—Ferne E. Gypson, twelve years of age, died at his home in Rome as a result of lockjaw caused by a wound from a blank cartridge.

Exeter, N. H.—As a result of a shot wound received on the Fourth of July John Lotsen, thirteen years old, has died of lockjaw.

Wilkesbarre, Pa. — James Lamb, twelve years old, died here of lockjaw following a Fourth of July accident. He shot himself in the hand with a blank cartridge. He is the third victime in this city.

Pittsburg, Pa.—Six boys have died here of tetanus since July 4th. All were victims of the toy pistol.

New York City.—As the result of a slight powder burn inflicted on July 3 with a revolver, Angelo Monaco, fourteen years old, died of lockjaw. Henry Bridgewater, thirty-four years old, of Port Richmond, S. I., died in the Smith Infirmary, at New Brighton, from lockjaw, caused by a fireworks' wound. Bridgewater was employed by Nordlinger & Charlton, fireworks manufacturers, at Grantville.

Newport, R. I. — Joseph Hansen, a messenger employed by the Western Union Telegraph Company, accidentally shot himself in the hand with a toy pistol and died from lockjaw.

Milford, Mass. — Harold, the eight-year-old son of Mrs. George H. Thompson, died of lockjaw caused by shooting himself with a blank cartridge July 4.

FARMERS MAKE BROOMCORN CORNER

The Crop Is Short and They Are Holding Out For $200 a Ton.

Chicago.—Advices from Arcola, Ill., say that broomcorn farmers are holding their stock for higher prices. Within the last two weeks prices have advanced materially, $110 a ton being paid, but farmers will not let it go at this figure. They say they will hold it until they get $200 a ton.

Present advices indicate a shortage of 10,000 tons in the Illinois crop. Nebraska has a shortage of fifty per cent., and Kansas is not expected to come up to the tonnage of last year. Missouri has usually furnished 2000 tons, but this year it is not expected that the crop will exceed one-fourth of that amount. This takes from 13,000 to 14,000 tons from the yearly output, leaving Oklahoma with an indefinite amount.

Electric Chair For Slayer of Macfarlane.

Justice did not move with leaden feet in the case of William Spencer, the negro policy writer. Barely three weeks ago in New York City in the Criminal Courts Building he shot down and killed Charles Macfarlane, the prosecuting officer and assistant superintendent of the Goddard Society. Now he lies under sentence of death awaiting the electric chair.

London's Business Depression.

Much depression prevails on the London Stock Exchange.

KIDNAPED THE STUDENTS

Kansans Capture Harvest Hands Intended For Another Section.

Made Desperate by Fears of Losing Crop Through Lack of Workers, They Hold Up a Train.

Topeka, Kan.—One squad of Eastern college and high school students which was started from Topeka to the harvest fields of Ness County failed to reach the destination to which it was assigned by the State Employment Director.

The train on which the students were traveling reached the little town of Otis, on the line between Barton and Rush counties, shortly after daylight. It was boarded there by a crowd of wheat growers, who were determined to have harvest hands at any cost.

The students were asleep, but the farmers asked their errand in the country, and when told that the men were harvesters they were forced to leave the train. Several of the young men were willing to get off at Otis, but some of those who had promised the Employment Director that they would go to Ness County were determined to remain on the train. Some of the athletes among these made it very interesting for the farmers for a short time, but the latter fought to save their crops, and when the train moved on the students, barely awakened and badly disheveled, stood on the station platform, willing to accept the fortunes of war and go to the harvest fields with their determined employers.

None of the young men were hurt in the contest, but several carried pieces of car furniture, which they had torn away in an endeavor to stay on the train. Had the young men understood Kansas conditions they would have reached their destination in Ness County without trouble by telling the Otis farmers that they were bound for the mountains and did not intend to work in the harvest fields.

The average Kansas farmer believes he has the right to use all the available labor he can find, and has no scruples against using that which has been consigned to his neighbor.

WOMEN REFUSE TO MARRY.

Statistics Show Massachusetts Girls Prefer to Make Their Living.

Boston.—The special report of the Massachusetts Bureau of Statistics of Labor on "Sex in Industry" shows that women no longer need to depend on men for a living. According to the figures woman's emancipation is about complete. More than eighty-eight per cent. of the women workers of Massachusetts are unmarried. They prefer freedom, work and income of their own and care nothing for romance. Divorces, too, have increased, being about one to every eighteen marriages.

These are the answers to the special census takers: One table shows forty-four women engaged as hack drivers, teamsters, etc.; 727 messengers and errand girls, five butchers, seven marble cutters, ten brick masons, 245 photographers and five steamfitters, besides numerous other occupations usually filled by men. More than 100,000 are in factories, 70,000 servants and 20,000 practice professions.

EVANSVILLE NEGROES SHUNNED.

Ordered to Leave Indiana Towns, They Seek Aid to Go to Kansas.

Indianapolis, Ind.—Reports from several towns in Southern Indiana show that the cold shoulder is being turned on the negro refugees from Evansville and in almost every place where squads of them have arrived they have been ordered to leave.

A party of twenty-five arrived at Indianapolis and asked assistance of the local officers to get to Kansas, where they could find work in the wheat fields. They reported that they had been ordered away from a number of places where they had stopped. Even the colored people in towns through which they passed were afraid to befriend them.

DEATH NOTE FOR MOSQUITOES.

Electrical Vibrator to Draw the Insect to Certain Destruction.

Brookline, Mass.—The ordinary petroleum methods having been found useless in exterminating mosquitoes, the Board of Health is preparing to use the electrical vibrator which has been constructed by John F. Fleming. The experiments will be made in one of the most infected parts of the town.

The vibrator will play a high note, D, which, it is said, will attract and kill mosquitoes. A 110 volt current in the vibrator sounds the note 100 times a second. This note is said to be exactly the same as that sounded by the female in attracting the male insect.

LYNCHING THREATS IN COXSACKIE

Negro Who Attacked Child Taken From Jail There to Catskill.

Albany, N. Y.—Authorities of Coxsackie probably averted a lynching. A negro attacked Emma Cole, the eleven-year-old daughter of Joseph Cole, a farmer, living near New Baltimore, and escaped to Coxsackie, where he was arrested. He confessed.

Plans were arranged to take him out of the jail and hang him from a telegraph pole, so the police put him aboard a steamer and took him to the county prison, in Catskill. The prisoner said he was James Little, of Somerville, N. J.

Hanged For Wife Murder.

Frederick C. Fisher, a barber, who murdered his wife, was hanged at San Quentin, Cal. Fisher choked his wife, then saturated her clothes with gasolene and set them afire while he watched her die.

Hebrew Protest to Be Modified.

Russia's vigorous action in punishing the guilty perpetrators of cruelty to the Hebrews in Kishineff has inclined the National Administration to a modification of the method by which it purposes to make known to Russia the abhorrence felt in this country.

Train Falls Into a River.

A freight wreck occurred on the Iron Mountain Railroad between Bowden and Curdon, Ark. Two brakemen, a negro tramp and thirty-five carloads of horses and mules were killed.

CATCHING BIG FISH.

SMALL WHALES ARE PLENTIFUL IN NEWFOUNDLAND WATERS.

FISHERMEN who live in New York, and there are thousands of them, are getting out their tackle for a final overhauling, and soon they will be off after all sorts of finny, swimming things, from mountain trout to deep sea bass and bluefish. Some one has lately brought out a guide book which points the way to nearly 150 fishing places about New York. These and many others as yet undiscovered by the general public will be fished and fished again. Then will come a new series of fish stories. It is so every year, and it is a poor fisherman indeed who in the fishing months cannot assimilate enough stories to last him the rest of the year.

More than one New York man is likely to return from coming summer vacations with most unusual tales, for an entirely new fishing ground is to be exploited. Those who have discovered it are not trying to keep it a secret, for the trip is a long one and the sort of fishing they have in view impossible to one who does not own a steam yacht.

"If you hear some chronic fisherman telling next fall how he caught a whale of a fish—say eighty feet long and weighing no end of tons," said a fishing tackle man to a Tribune reporter the other day, "be careful how you call him a liar. It may be true."

"An eighty foot fish," exclaimed the visitor. "No man could hope to put down a story like that."

"Yet I have sold fishing tackle this year to several men who hope to catch fish that size," he responded deliberately. "And I think they will be successful."

"They must be going whaling."

"That's just it," said the dealer. "They own steam yachts, and they are going to cruise for whales for the fun of it. The tackle I sold them consisted of harpoon guns and fathoms of line."

"Do you mean to say that they are going on a whaling cruise to the Arctic?" exclaimed the visitor. "Why, man, that takes years."

"Who said anything about the Arctic? They will sail up to the Newfoundland coast, where the water is full of whales. They are so plenty that whale oil factories have been started in five places along the coast, and it is estimated that more than 700 will be caught this year. The Government regulates the industry, and the professional whale fishermen have to pay a yearly license of $1500 and limit themselves to fifty miles of coast."

According to reports from St. John's it is true that enormous schools of these leviathans have followed the caplin, a small fish like the sardine, of which whales are very fond, into these waters, and in six years the value of whaling products has increased from $175 to $125,000. The Newfoundland whalers have successfully adopted the methods long in use in Norway, and the industry seems secure.

The old-time whaleman started from New Bedford in a bluff-bowed old sailer, and cruised in every ocean, esteeming himself fortunate if he got home again in two or three years. He fished with rowboats and harpooned his whales by hand, and the grim, often tragic realities of the business have been faithfully described by Dana and Bullen. The present-day whaleman starts out every morning after breakfast in a speedy little steamer, cruises about the inner banks, and is home again by nightfall with a fish or two which he has killed with a bomb fired from a small cannon on the ship's bow. There is no risk or romance about the pursuit now; no angry whale splintering a boat with a blow of its flukes; no excitement of the chase, no towing of boats for miles. Everything is reduced down to a systematic basis, and the whaling skipper wears a uniform and smokes choice cigars.

HEAD OF A WHALE CAUGHT IN NEWFOUNDLAND WATERS.

CUTTING UP A WHALE AT A NEWFOUND LAND WHARF.

REMOVING A WHALE'S BLUBBER.

The steamer and the factory are the features of the new enterprise which ensure its success. The ship chases the whales, and when near enough fires a shot at one. The projectile is harpoon-shaped, pierces the whale's side and explodes within, the composition it contains tearing the animal's intestines in pieces and killing it almost instantly. The gas generated in this process helps to float the fish, which is then towed to land, or, if the herd is still near, is towed after the steamer while she tries for another. The factory ship is an inclined wharf running out under water, and by means of the huge bulk is gradually hauled up above high tide. The prize in position, the workmen begin to dense the carcass—i. e., to remove the blubber. This is a mass of fat several inches thick lying between the skin and the flesh. Flensing with the old-time whalers was a most wasteful process, because it had to be done at sea, and much of the blubber was lost, besides which the remainder of the carcass was discarded as worthless. By the new process every pound of blubber is saved, the whole operation being performed on land and with the most modern appliances. As the great squares, or "blankets," of fat are removed, they are cut into smaller pieces by other men and packed into buckets on an inclined elevator which runs to the top of the factory, where the buckets unload automatically and their contents pass into a "mincer," which grinds up the fat, and it falls into steam-packed tanks, where the oil is rendered out. In whale ships this was termed "trying out," and the furnace on deck was fed with the scraps of blubber which were thought to be exhausted of oil. The whales are of four species—sulphur bottoms, humpbacks, finbacks and "sciebs," the latter a Norwegian name for a small-sized whale as yet unclassed locally. The sulphur bottoms are the largest, sometimes reaching ninety feet in length and being worth $1200. The others are smaller, in the order named, the "sciebs" running from twenty-five to thirty-five feet in length and figuring about $200. Whale meat, especially that of the "sciebs," is very juicy and tender, like beefsteak, and is freely eaten by the factory folk and others. The first year the industry was started there was a bad codfishery along the nearby coast, and as it relieved them of the need of towing the carcasses to sea the whalemen allowed all comers to take what they wanted of the meat. The result was that the fisherfolk came in boats from far and near and took away loads of it, which they salted down for their winter's use. To people whose diet consists almost entirely of codfish it was a welcome variety, the more especially as cod was scarce. Now, however, that the flesh is turned to profit also, this advantage no longer exists, but the visitor to the factory can always count on a whale steak as a tidbit if he is desirous of making new experiments in gastronomy.—New York Tribune.

Will It Rain or Shine To-Morrow?

That Way the Weather Forecast is Made at the Weather Bureau in Washington.

IT was an evening session. The matter in hand was to give to the United States, in its morning papers, a hint of the probable weather conditions of the ensuing day. The means were some smudged sheets of telegraph manifold, plus the sum of the experience of the United States Weather Bureau.

At five minutes before eight, morning and evening telegraph circuits are made up covering the United States and extending into Canada, so that there shall be, as far as conditions may allow, simultaneous transmission of the reports of about one hundred and fifty weather observers to the Weather Bureau in Washington.

By the first quarter after eight, messages have begun to come into the telegraph-room of the Weather Bureau that read, for example, like this, "Tafeta lushberg beak baggy." At 8.30 exactly, five clerks are at a high desk which describes three sides of a parallelogram, and a sixth clerk perched at a separate high desk begins to drone figures and abbreviations with wonderful rapidity and continuity.

"Ninedoo thirdfour teen rain north cloud," he says, and the clerks on the inside of the "hollow square" make the final translation thus:

The telegraph: "Tafeta lushberg beak baggy."

The reader: "Ninedoo thirdfour teen rain north cloud twelfordy."

The clerks: "Barometer, 29.92; thermometer, 34; precipitation, .14; direction of the wind, north; cloudy; velocity of the wind, 12 miles; maximum temperature, 40."

Each clerk has an outline map of the United States before him. The observation stations are noted on the map with little circles. Underneath the map on which the clerk is working are maps on which the observations for previous days have been plotted. Clerk No. 1 is putting down all the data; Clerk No. 2 takes the temperature only, and before the next temperature is called has calculated and put down the figures representing the change from the previous observation and the difference from the normal. Clerk No. 3 is holding the barometer readings, and noting the variations from previous observations. Clerk No. 4 is noting, with little wriggles of red and blue pencil marks, the presence of clouds and their character. Clerk No. 5 is putting down figures in gross on a blank for the Associated Press, which will notify every city of the day's climatic conditions in every other city.

TRANSLATING WEATHER REPORTS RECEIVED IN CIPHER, AND CHARTING THEM ON MAPS.

PUTTING THE WEATHER-SYMBOL TYPE IN PLACE.

MEASURING THE HEAT RECEIVED FROM THE SUN.

About this time, the forecast official, who sits sixth at the desk, begins to scribble furiously on a pad. He presses the first sheet with fervor into the hand of a waiting printer, and the craftsman shuffles off to his case of logotypes. The making of the night forecast has begun.

Before nine o'clock the reader has tumbled off his stool and announced that the reports are all in. The forecaster stands before the combined map and delivers his dictum to Clerk No. 1, who is writing it out for the printer. Lines isotherm and lines isobar are racked to give up the secret of the weather for the next twenty-four hours. This is latter day necromancy for the benefit of some seventy millions of people who will read the prophecy to-morrow for overcoat and umbrella directions.

The clock ticks second by second toward that time when the forecaster must say what the weather for the next twenty-four hours will be. Section by section he goes over the country and apportions to each its mead of prophecy, while the logographs click in the printer's stick in the corner, crystallizing divination into news. At ten the forecast in all its subdivisions is complete, and by eleven or shortly thereafter the Associated Press has sent out a forecast of the weather for the following twenty-four or more hours from the printed slip furnished by the bureau, and from which slip, printed and made permanent at 10.15 o'clock on the night before, the nation gets its day's weather wisdom.—Harper's Weekly.

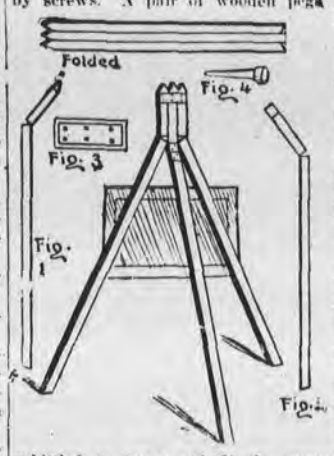
A Home-Made Easel.

A simple and inexpensive easel may be made as follows:

The centrepiece shown in figure 2 is formed of two lengths of pine, one and a half inches wide and one inch thick, four feet and one foot long, respectively, and joined with a hinge. Be sure that the bevel at the foot and the hinge are placed as shown in figure 2.

One of the two side pieces is shown in figure 1. It is also beveled and jointed, but along the width instead of the thickness. The pieces are four and a half feet and six inches long. Half-inch auger holes are bored in at convenient distances. The opposite side piece must be the same.

The three pieces are now joined together by figure 3, which is four by three by one-half inches and secured by screws. A pair of wooden pegs whittled to taper and fit the auger holes in the side pieces, serve as rests for the canvas.



The whole, when completed, makes a very useful article for indoor work or outdoor sketching; or, by making it a little more ornamental, it may be used as a "parlor easel" to hold a framed picture.

A Japanese inventor has discovered a compound which will remove natural and artificial blemishes in the skin. Birthmarks and tattooing disappear after one application.

The investment in the Government printing office is $2,429,000.

The Outlook For Good Roads.

THE outlook for the good roads movement was never so good as at the present time. A feeling had prevailed, until lately, that the general Government should take but little, if any, part in the permanent improvement of the public highways of the country, but it is being realized more and more that the burden of making the necessary improvements in the country highways is a burden too great to be borne by the people who own the agricultural lands and live in the rural districts. Inquiry, observation and investigation have developed the fact that the common highways in this country are not being substantially improved except where the cost of such improvement has been more or less distributed, so that the local funds are supplemented by contributions from a general fund, either by the State or by some county having a great city within its limits. On the other hand, it is noticeable that very rapid progress is being made where local funds are supplemented in the manner suggested above. This has led many thoughtful people to conclude that the United States Government should make some contribution to the general cause. Accordingly we find that the good roads bill introduced in the last Congress by Hon. Walter P. Brownlow, of Tennessee, providing for a general system of national, State and local co-operation, has received hearty support from all sections of the country and from nearly all classes of people. Mr. Brownlow informs me that his good roads bill is the most popular measure ever introduced in the House of Representatives since the Civil War. The Legislature of the State of Tennessee passed a resolution by a unanimous vote, so I understand it, indorsing this measure. Similar resolutions have been adopted by the Legislatures of Alabama, Minnesota, Missouri and New Mexico, and a number of other States are taking similar action.

I was invited not long ago to give an address before the Deer Creek Farmers' Association, of Maryland, at its thirty-fourth annual meeting. The subject under discussion was "National Aid to Road Building" and the Secretary of the association stated that he had taken the precaution to inform himself as to how the Senators and Representatives in Congress, from the State of Maryland, stood in reference to the Brownlow bill, and he reported to the meeting that he had written to every member and had received a favorable reply from each and every Senator and Representative, including Senator Wellington, who was about going out of office at that time, and Senator Gorman who was about coming in; and that they all pledged themselves to the support of the Brownlow bill or some similar measure, providing for a general co-operation between the United States and the States in reference to the permanent improvement of the highways. This is a new fact and a new feature in the discussion of the road question. It has not been common for farmers or farmers' clubs to interview their representatives in Congress as to this road question, and it is certainly a new fact to have an entire delegation in Congress from any State declare itself in favor of the new plan of co-operation. I therefore say again, as I said in the beginning, that the outlook was never so good for the permanent improvement of the highways as at the present time, when the farmers are taking up the question of having a general system of co-operation whereby the necessary cost of improving the highways shall be so distributed as to fall with some degree of equality upon all the people and the property, rather than to rest, as heretofore, upon only a portion of the people—those living in the rural districts.

I note with pleasure in this connection that the President of the United States, in a speech which he made on Saturday, April 4, endorses the general idea of aid being given by the national Government to the States for the purpose of improving the highway system of the country. "There are a number of very important questions, such as that of good roads, with which the States alone can deal, and where all that the national Government can do is to co-operate with them."—Good Roads Magazine.

Cooley on the Constitution.

The late Chief Justice Cooley, of Michigan, in his treatise on constitutional law, says:

"Every road within a State, including railroads, canals, turnpikes and navigable streams, existing or created within a State, becomes a post road when, by law or by the action of the Postoffice Department, provision is made for the transportation of the mail upon or over it. Many statesmen and jurists have concluded that the power comprehends the laying out and constructing of any roads which Congress may deem proper and needful for the conveyance of the mails and the keeping them in repair for the purpose."

This would seem to make it reasonably clear that the Federal Government has the right to contribute to the improvement and maintenance of such roads at least as those that constitute the rural mail routes, and so disposes of one objection that has been urged against the Brownlow bill.

Elephant Takes Up Collection.

An elephant takes up the collection in some of the Hindu temples. It goes round with a basket extended from its trunk.

THE TEA URN.

For serving afternoon tea when more than three or four persons are expected, the urn is about the most convenient apparatus for holding the beverage. The tea should be made in the kitchen, strained, then placed in the urn over the lighted lamp. It will keep hot and fresh for hours. Or if an urn is disliked as being old-fashioned and formal and cumbersome, why not make the tea on the table in a samovar. There is nothing ornate about a samovar, especially if it should happen to be an antique, and no special burnished brass or copper. Or, as a final resort, one may employ the tea kettle suspended over the little alcohol lamp. Anything is better than to fumble around with a teaball while half a score of guests watch the operation hungrily and moisten their lips in anticipation of the tea that does not come.—New York Tribune.

STAINS IN WHITE GOODS.

It is always best to try simple methods of removing stains before resorting to strong chemicals, such as chloride of lime, which is one of the most powerful chemicals for removing stains. It is so strong that it may be very destructive if not used carefully.

Iron rust may be easily removed by covering the stain with a thick layer of salt and then saturating it with a piece of lemon and laying it in strong sunlight to bleach. If the stain does not come out with the first application it certainly will with a second.

Mildew is one of the most difficult of all stains to remove. Rub well with brown soap, then apply a paste of chalk and water and put the stained article in the hot sunshine. After two or three applications the mildew may be bleached out.

To remove tea or coffee stains rub powdered borax thoroughly into the stained part and pour boiling water through it into a basin.—New York Tribune.

RECOVERING SCREENS.

A simple and inexpensive method of renovating an old screen is to cover it with heavy wall paper, either a plain paper of damask or sateen-like surface, or one showing a large floral pattern. The first proceeding is to measure a fold of the screen with great accuracy, and then, with very sharp scissors, to cut the paper to fit exactly inside the surrounding frame, which incloses the cloth of the previous covering. Have in readiness some thin glue and with this quickly brush over the edges of your paper. An inch or two is sufficient. If too much glue is applied it will cause the paper to break. Apply the strip deftly to the screen, and with a soft, clean cloth press it firmly into contact. Proceed in like manner with each fold, laying the screen flat upon a large table for greater ease in working. Sometimes the edges do not require any kind of finish, but when this seems desirable a narrow border of gold Japanese leather paper or round brass-headed nails serve the purpose admirably.

IRONING OUTFITS.

No less than twenty-one different kinds of flat-irons are on the market.

An iron especially designed for the convenient use of travelers contains a little furnace in which prepared coal is burned. A single piece of fuel will provide heat sufficient to press out a bit of neckwear or some other little thing of the kind. The fuel is said to be easily carried about and convenient to handle.

The hotel guest is provided for with an iron which contains an alcohol lamp, or, if failing the alcohol, which may be fitted over a gas burner and thus heated.

Ironing outfits come done up in cases, and comprise a small felt-covered board, the iron and stand, a stick of beeswax, and a durable ironholder.

Ironing boards which can be induced to masquerade as settees are a novelty, and there are also folding lapboards and tables for the same purpose. It is thought that the numerous cleansing preparations which enable women to remove spots and dirt from expensive gowns, of course necessitating pressing, have created a demand for small irons.—Chicago Post.

Maple Cream, Frozen—Beat the yoke of two eggs until light and add a cup of hot maple syrup, stirring constantly; return to double boiler and stir and cook until the mixture thickens. Let cool, then add a cup of whipped cream and pack and freeze.

Macaroni Rarebit—Put in a frying pan one tablespoonful of butter; when it is hot add one cupful of cold boiled macaroni, cut very fine; add to it one cupful of grated cheese and two well beaten eggs; sprinkle in salt and pepper; cook until creamy.

Berry Muffins—Cream two level tablespoonfuls of butter; add gradually one-third cup of sugar and one egg well beaten; to two and two-third cupfuls of sifted flour add four level teaspoonfuls of baking powder and one-half teaspoonful of salt; put aside one-fourth cup of this flour; mix it with one cup of any kind of berries and add to the first mixture, alternating with one cupful of milk; fill buttered muffin pans two-thirds full and bake in a rather quick oven twenty minutes.

Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Publisher.

TERMS OF SUBSCRIPTION:

If paid in advance $1 per year; if not paid in advance $1.25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands

Long distance and local telephone : : : 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, JULY 18, 1903.

Subscribers of the Review who change their address for the summer, or for a shorter period, can have the Review sent to their vacation address without additional cost, by notifying the office to that effect. Addresses may be changed as often as desired.

TIME TO CALL A HALT.

Many fatal cases of tetanus (lockjaw) have been reported by the daily press all over the United States, which are directly traceable to the explosion of fireworks and toy pistols on the Fourth.

New York City reports six cases, Chicago about the same number, and more than two hundred fatal cases have been reported from different portions of the country, Plainfield contributing her quota, and the reports are still coming in.

We are perfectly willing that young America should have all the fun possible at all times, and particularly on the glorious Fourth, but we cannot help but believe the time has arrived when toy pistols and cannon fire crackers should be made harmless or dispensed with, and some other less dangerous form of celebrating adopted.

Just before the Fourth the REVIEW as well as other newspapers published a warning instigated by the Newark Board of Health in which the danger of the toy pistol was plainly set forth, and no doubt this timely warning prevented many cases of lockjaw, but there were many doubting Thomases, and many who failed to read the warning, and so we take occasion to repeat the warning: That blank cartridges and many of the fireworks contain the bacillus of tetanus. These germs are driven into the blood by a very slight wound, and quickly spread into all parts of the body, soon manifesting themselves in that most horrible disease, lockjaw, for which there is no known specific, and which almost invariably results in death.

Until a cure is discovered, the only safe plan is to eliminate entirely the causes which produce the harm.

CITIZENS WAKING UP.

The following from *Truth*, of Newark, voices the sentiment of thinking taxpayers, and the idea of divorcing politics from municipal government is rapidly gaining many adherents.

"Essex county is setting a fine example to the other counties of the State in the matter of municipal awakening. The Citizens' Union of East Orange set the pace, next came Roseville and other sections of Newark and now the men of West Orange are the latest and lustiest recruits. It seems passing strange that for so long the citizens and taxpayers of the various towns allowed themselves to be hoodwinked into the fallacious belief that the government of a municipality had any natural connection with a man's ideas concerning Trusts, the Tariff, Imperialism, or other questions of National politics. Of course, the professional politicians wanted to have it that way and so long as the victims acquiesced, there was no reason why anybody else should clamor for a change. But the victims are now rubbing their eyes, making terse comments about their own monumental stupidity and forming resolutions to order things differently hereafter. The plan of governing a town on political shibboleths is played out. The people now want 100 per cent. value for their money; they insist on knowing how it is being spent and they don't propose being fooled into taking second hand service while paying for the best."

A DISGRACEFUL PRACTICE.

The practice of the New Jersey legislature in leaving the important business until the time for closing, was never better illustrated than at the last session.

The latest phase of this remarkable assemblage has just been brought to light at Trenton where it was discovered that the bill appropriating $100,000 for a state sanitarium for consumptives, which was duly passed and referred to the proper committee, was through oversight, or something worse, allowed to remain in the committee, and the funds are therefore unavailable until the legislature meets again.

We believe this dilatory action on the part of our law-makers is responsible, in a great measure, for the majority of our bad laws, and the practice is just as inexcusable as it is disgraceful.

AN UNENTOMBED CORPSE.

Purchase by United States Senator Dryden of a notably handsome lot in a cemetery for personal use seems to attract more than ordinary attention. It really is not significant—not so significant, anyway, as would be the purchase of a burial plot for former State Senator Charles A. Reed, for instance.—*Paterson Guardian.*

THE TIME WILL COME.

You can go against the will of the people up to and including a certain point with impunity, but when you go beyond that point, something is going to drop with a big thud. This information is particularly intended for those men who have said through the columns of a Plainfield newspaper that they intend to construct an expensive boulevard (speedway) in the borough, which is manifestly against the direct wishes of a large majority of the voters of the borough of North Plainfield.

FACTS TO CONSIDER.

The New Brunswick minister who made the statement that there are 5500 voters in that city and that 2500 of them can be bought for $5 or less, failed to take into account several facts well-known to politicians.

This minister says he received his information from a local politician who was in a position to know, and his statement caused much editorial comment by the state press.

The *Home News*, of New Brunswick rises to the occasion and says:

"Another way to put this charge is that the politicians themselves, when elections are near, go to the candidates and tell them that it will take from $6,000 to $12,000 to carry the city, on a basis of $2.50 to $5 for each voter who has to be "persuaded. The $6,000 to $12,000 is paid to the politicians of both parties for election purposes, but all of that money is not by any means spent in buying votes. The ward worker has to be paid, and he may get anywhere from $25 to $100 for his services on election day. The plain, everyday voter does not get all of the swag, and the purchasable voters are not so numerous as reported. Candidates would be surprised if they knew how much of their money got no further than the hands of the noisy ward politicians."

All of which is interesting and will apply to other places than New Brunswick.

SENATOR DRYDEN has given a trophy to be called the "Dryden Trophy," to be competed for under the auspices of the State Rifle Association. The cost is $4,000. The Senator will also give $250 a year in money prizes to the two leading teams.

STATE Entomologist Smith and the Newark Board of Health recently examined the meadows of Elizabeth, where ditches had been dug and stocked with little fish for the extermination of the mosquito. Mr. Smith says it will be only a short time before the dream of a mosquitoless Elizabeth will be realized.

THERE is planned, and will probably be built at no far distant day, an automobile speedway forty feet wide, enclosed by hedges and wire fences, the whole length of Long Island, one hundred and twelve miles. The road will cost fifteen thousand dollars a mile, or nearly seventeen hundred thousand dollars in the aggregate. While automobilists have plenty of money, and can afford such luxuries, there is every reason to believe that should they run short of funds before this road is finished that they will have no trouble in securing aid from other citizens who are not automobilists, but who will gladly contribute to so worthy a cause to keep these machines off the public roads.

LATE advices from Bogota indicate that the prospects of the canal treaty are now regarded as more favorable than they were generally held to be some time ago. There still exists a strong opposition to ratification, but the belief is growing that the antagonism to the treaty is losing ground. The opposition seems to be grounded mainly upon the insufficiency of the payments provided for by the treaty.

AMERICAN troops are being withdrawn from Cuba. There are now only four companies of coast artillery on the island, and these will probably be retained to guard the coaling stations which the United States will establish. Cuba is doing very well in taking care of itself and needs but little of Uncle Sam's assistance. And it knows that when it does want help it will not have to go far to get it.

THE treasury statement for the fiscal year that ended June 30 shows total receipts $558,887,526, of which $283,891,719 were from customs, $230,115,256 were from internal revenue and the balance from miscellaneous sources. The total expenditures were $506,176,590. The surplus for the year was $52,710,396. Penny postage ought not to be so very far distant with such a splendid financial showing as this.

HON. CHARLES N. FOWLER, in an address before the Minnesota Bankers' Association last week had for his theme, "Necessary Financial Currency Legislation," and condemned the Aldrich bill, claiming it was no remedy for the present unsatisfactory conditions. Mr. Fowler suggested the following plan to remedy the matter: "My plan is to allow the issue of currency to a certain percentage of bank capital. It was twenty-five per cent. in the last bill. It might be made as high as 100 per cent. after the system is in good working order. If all the farmers and farm laborers and small storekeepers were accustomed to the use of checks there would be no use for any currency expansion in this country."

SHERIFF'S SALE.
IN CHANCERY OF NEW JERSEY.

Between Fredrick C. Jennings, complainant, and Ada M. Cuming et al., defendants.—Fi Fa. for sale of mortgaged premises.

By virtue of the above stated writ of Fi Fa., to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE SEVENTEENTH (17) DAY OF AUGUST NEXT,

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All that certain tract or parcel of lands and premises, situate, lying and being in the borough of North Plainfield, in the county of Somerset and State of New Jersey.

Being known and designated as No. 215 Somerset street, and more particularly described as follows:

Beginning at a point in the southwesterly side of Somerset street and corner of A. Jacob's lot, as shown on a Map of Valuable Villa Sites and Building Plots, North Plainfield, N. J., on file in the Clerk's office of the county of Somerset. Thence running along his line south forty-five degrees and forty-seven minutes west one hundred and fifty-nine feet to a stake in the line of Lot No. 5; thence running in a northwesterly course parallel with Somerset street thirty-five feet to a point where the centre line of the division wall if extended would reach; thence running in a northeasterly course along the centre line of said division wall one hundred and fifty-nine feet to the southwesterly side of Somerset street as formerly laid out; thence running along said old line of Somerset street in a southeasterly course thirty-five feet to the place of beginning.

WAS AS ONE IN A DREAM

By MYRTLE REED.

A CRISIS IN THE CAREER OF JOE HAYWARD.

People said that Joe Hayward's pictures "lacked something." No one was sure what it was. Even the critics, who know everything, were at a loss. Hayward himself worked hard; studying the masters, patiently correcting faults in color and perspective, and succeeding after a fashion. But he felt that art, in its highest and best sense, was utterly beyond him; there was a haunting elusive something which was continually out of his reach.

Occasionally, when he sold a picture, he would give "a time" to a dozen artist chums from studios near by, as they did whenever fortune favored them; after which he would paint again, on and on, with a really tremendous perseverance.

At length he obtained permission to make an exhibition of his work in a single room at the Art Gallery. The pictures were only ten in number, and some of them were small, but they represented a hard year's work. When he superintended the hanging, on Saturday morning, he was more nearly happy than he had ever been in his life. The placard on the door, "The Hayward Exhibition Will Open Monday," filled him with pleasure. It was not a conceited feeling of importance, but rather a happy consciousness that he had done his best.

At last he was suited with the arrangement. The man went out with the ladder and wire, and he stood in the center of the room, contemplating the result. The landscape in the corner might be a little out of drawing, he thought, but the general public would not notice that. And the woman in white beside it, which he had christened "Purity," certainly showed to very good advantage. He remembered very well the day he had put the finishing touches upon it, after the night of revelry in which he had helped Jennings and a dozen other fellows from neighboring studios to celebrate the sale of Jennings's "Study of a Head," and how he had thought at the time that he, who spent such nights, had no business to paint a figure like this of "Purity."

As he turned to leave the room, he saw a gray gowned young woman, who evidently did not know that the pictures were not as yet upon public view. She passed him as she came in, with a rustle of silken skirts and a cooling odors of violets. Seeing the key of the room in his hand, she turned to him and said:

"Pardon me, but can you tell me whose pictures these are?"

"These are Hayward's," he replied.

"Hayward," she repeated after him, as if the name were wholly new to her.

"Hayward is a young artist and of purely local reputation," he explained. "This is his first public exhibition."

She surveyed the collection without any strong show of pleasure, until he remarked, "You don't seem to think much of his beginning."

She was prompt in her answer. "No, I do not. They seem to lack something."

He sighed inwardly. That old, old "something!" Hayward's pictures all "lacked something," as was commonly said of them; but what that something was, his intimates his fellow artists, were not the kind to know.

"What is it, do you think?" he asked.

"I don't know," she replied slowly. "If one knew the man, one might be able to tell."

For the first time she looked him full in the face. He saw nothing but her eyes, clear and honest, reading him through and through.

"Yes," he answered, "if you knew the man, I think you could tell."

"I'm not at all sure," she laughed. "It's only a fancy of mine."

Drawing a watch from her belt, she looked surprised and turned away. He listened until the silken rustle had completely ceased. Then he too went out. On the stair he found a handkerchief. It was edged with lace, delicately scented with violet, and minutely marked in the corner: "Constance Grey."

On Sunday night the studio building where Hayward and others painted glowed with light. The morrow's opening of "The Hayward Exhibition" was being celebrated with "a time" at the expense of the artist. Glasses clinked and the air was heavy with smoke. Two women from a vaudeville theatre near by made merry upon an impromptu stage. Everybody was happy except Hayward. The owner of the handkerchief was in his mind. He felt that those eyes of hers, gray, deep and tender though they were, might blaze with anger at a scene like this. The handkerchief had no place in such an atmosphere. He went over to his bookcase and put it between the leaves of his Tennyson, smiling as he caught the words on the opposite page:

"A man had given all other bliss
And all his worldly worth for this:
To waste his whole heart in one kiss
Upon her perfect lips."

Her handkerchief would feel more at home there, though, as he closed the book, he wondered what she would say.

A quick eye had followed him, and soon afterward its owner, Jennings, took occasion to examine the volume. He waved the handkerchief aloft triumphantly. "Heigho, fellows! Hayward's got a new mark for his clothes. Look here—'Constance Grey!'"

Hayward was shaken with a mingled shame and anger that he could not explain, even to himself. The words and tone with which he bade his friend put the little thing back where he had found it were as hot as they were foolish. For a moment the two friends faced each other; then Jennings apologized and then Hayward. In sparkling champagne they drank to good fellowship again. But the incident was not without a certain subtle effect upon the celebration, and at 1 o'clock Hayward sat alone by his easel, his head buried in his hands, a dainty handkerchief upon his lap, and before him the rapidly sketched outline of a face.

He knew now why Jennings had angered him. The shaft of light from a woman's eyes, which once strikes keep into the soul of every man, had at last come home to him.

The "opening" was auspicious. Wealth and art alike were well represented.

Toward the end of the evening a lady who had once sat for a portrait came up to him.

"Mr. Hayward," she said, "I want you to know my niece."

He followed her into the next room, where a young lady sat on a divan. Her gray eyes were lifted to his face, and then suddenly lowered in confusion.

"Mr. Hayward," she said, "I am so much ashamed!" And when he tried to reassure her she answered: "Let's not talk about it; it's too humiliating."

So they spoke of other things. He learned that she had come from a distant city to visit relatives, and the aunt invited him to call upon them. Friday afernoon came at last, and Miss Grey and her aunt were at home. Other Fridays followed, and other days which served as well as Fridays. It was seldom that the girl looked him in the face; but when she did so he felt himself confessed before her—a man with no right to touch even the hem of her garment, yet honoring her with every fiber of his being.

They were much together, and Constance took a frank enjoyment in his friendship. He made every effort to please her, and one day they went into the country. Constance was almost childishly happy, but the seeming perfection of her happiness distressed him when he learned that in very few days she was to sail for Europe, pass the Summer and Autumn in travel, and spend the Winter in Paris.

At length they sat down under a gnarled oak tree and watched the light upon the river and in the sky. After some moments of silence Hayward spoke.

"I think you know the man now. Will you tell me what his pictures lack?"

She hesitated. "I do not know the man well enough to say, but I will give you my art creed and let you judge for yourself. I believe that a man's art is neither more nor less than the expression of himself, and that in order to obtain an exalted expression his first business is with himself. Wrong living blunts, and eventually destroys, the fundamental sense of right and wrong, without which a noble art is impossible. When a man's art is true, it is because he himself is true. The true artist must be a man first and an artist afterward."

Hayward took the admonition with a worshipper's meekness. Their conversation ended with his declaration that he would not paint again until he had something in himself worthy to put into the picture.

"You'll help me, won't you?" he asked.

Her eyes filled. "Indeed I will, if I only can."

He went home with love's fever in his veins. She had promised to help him, and surely there was only one way. He wrote her a hasty note, and an hour later his messenger brought her reply:

"Believe me, I never dreamed of this, and you know what my answer must be; but I do not need to tell you that whatever honest friendship can offer is already yours.

"With deep regret, I am, as ever,

"CONSTANCE GREY."

The grim humor of the thing stunned him momentarily, and he laughed harshly. Then he flung himself down in a passion of grief. In the morning he took pen and paper again, after a night of sleepless distress.

"You cannot mean what you say. That white, womanly soul of yours must wake to love me some day. You have stood between me and the depths, and there has been no shame in the life that I offer you since you came into it. Oh, you perfect thing, you perfect thing, you don't know what you are to me! Constance, let me come!"

The answer was promptly forthcoming:

"I cannot promise what you ask, but you may come and see me if you wish."

Pale with expectancy, Hayward was only the ghost of himself when the servant admitted him. He had waited but a moment when Constance entered the room in the gown in which he had seen her first. He rose to meet her, but she came and sat down beside him.

"Listen," she said, "and I will tell you how I feel. I am twenty-five and I have never 'cared.' I do not believe that I ever shall care, for the love that we read of is almost incomprehensible to me. You cannot marry such a woman."

It was very hard to say what she must. With an effort she rose and drew away from him. "I must be true to myself and to you," she said, "and I can say nothing but the old, bitter no."

White and wretched, he went away; leaving her, white and wretched, behind him.

For days and weeks thereafter Hayward painted busily. Jennings went

Concluded on last page.

Doctor

Tried but Could Not Relieve Me

Of Headache, Dizziness, Twitching.

Dr. Miles' Nervine Did Relieve and Cure.

"The doctor tried but couldn't relieve me" is a phrase commonly met with in the letters we receive from grateful patients. The reason is plain, The doctor tries to cure the symptom and neglects the disease. In all cases of chronic headache, nervousness, weakness, general debility, dizzy spells, loss of appetite, inability to sleep, lack of energy, loss of flesh, lack of interest, morbid tendencies, hysteria, the disease is a nervous disorder and some means must be taken to strengthen and restore the nervous system. Dr. Miles' Restorative Nervine is performing wonders every day and will cure you as it has thousands of others. Read how quickly it acted in the following case:

"A few years ago I was greatly troubled with nervousness and indigestion. While at work a dizzy spell would come over me and I would be forced to stop and rest. I suffered terribly from headaches and my nervousness was so marked as to cause almost constant twitching of the muscles. My doctor tried but could not relieve me. I finally began the use of Dr. Miles' Restorative Nervine and continued until I have used four bottles, although I have not had a dizzy spell since taking the first dose. I am very thankful for what your medicine has done for me and shall take pleasure in recommending it whenever I can."—FRANK P. BENTLEY, Middlebury, Vt.

Educated Men Spare Themselves in Crucial Moments

By the Rev. Dr. W. Merle Smith.

THE greatest gift that life offers is education, and it implies a corresponding responsibility. For one who has such an advantage the greatest temptation is not immorality, nor any form of materialism—it is the declining of responsibility. The question is often asked whether or not a university education pays, in the ordinary sense of the word. President Jordan says that it does but, on the other hand, President Wheeler and others say that it is at least doubtful. More men fail from want of force than from want of judgment, and it would appear that education often tends to reduce rather than to add to a man's forcefulness. The danger is that one has learned to spare himself when crucial moments come.

It is a fact that some of the characteristics of the rotten life of decadent Rome are to be observed among us to-day. There is an air of blase indifference, of knowing it all, to be seen in too many university men, including some of the younger instructors as well as undergraduates. There are some such instructors who have shown themselves unable to stand the air of a German university. Men who really do know something worth knowing, great men like Huxley and Tyndall, are invariably humble, as Isaac Newton was.

True Value of Yacht Racing

By John R. Spears.

GENERALLY classed in the popular view as sporting events and nothing more, the international yacht races for the America's Cup have had, from the first, a serious and important practical end in view. For the building of every international race—a work that is carried out with an unstinted use of time and money—is a search for absolute knowledge. The work of the Smithsonian Institution, or that done under the Carnegie fund, is not more serious, and certainly it is not done more eagerly.

For while the Cup that cost less than $500 is the prize held up to view for each series of races, the real object which the naval architects have in mind when planning the racers is to discover what form of hull and combination of spars and canvas can be driven at the greatest speed through and over the water. The work done by D'Alembert, Colonel Mark Beaufoy and our own Franklin, is now continued by the builders of the racers that meet off Sandy Hook to sail for the America's Cup.

If we compare the racers built for the present year with those that sailed for the Cup fifteen or twenty years ago, we shall see that while furnishing the public with the most healthful recreation known to the world, the men behind the international races have accomplished something worth while even from the point of view of the most practical captain of industry.—World's Work.

The Fascination of Angling.

By Dr. A. T. Bristow.

WELL to know is it that the angler's art is but a pretext or rather the incentive to a ramble and not the sole object of the fisherman, unless alas! he belongs to that too common variety the man whose sole object is his catch. Such a man fishes with a worm, hides fingerlings in the depth of his basket and photographs his catch as a witness of his crimes. He is not a fisherman, but a butcher. A yellow primrose on the river's bank is to him a primrose and nothing more. The true fisherman loves to catch fish, to match his wits against the wary trout, but as he wanders from pool to pool the songs of the birds greet him restfully; every turn in the stream reveals a nook in which strange wild flowers nestle. The gentle excitement of the sport prevents the scene from becoming monotonous. The element of chance, the uncertainty of the catch add the drop of tobasco sauce which gives zest to the day. And the noontide meal by the brink of the stream! When did a meal have a more delightful flavor? Delmonico never served a trout like unto those we have eaten by the banks of a mountain brook with the clear blue sky above, the waving forest round about and the murmuring stream at our feet. The hour of contemplation comes afterward with the pipe of peace in our hand instead of the relinquished rod. How far off the city seems! Are there such things as corporations, trusts, stocks, bonds; electric lights that amaze the sight, harsh warnings of trolley gongs, the rumble and grind of the wheels and the brakes on the elevated road which affright the ear? The harshest note that breaks the stillness here is the boom of the bittern in the distant marsh. Home to camp the fisherman goes, taking a cast in this silent pool in which the trout rose in the forenoon to his cast but missed the fly, or in that dark hole deep under the bank in which a vigilant eye may detect the brown sides of a trout with lazily waving fins and tail—an old campaigner not easily caught.—World's Work.

The Menace of Small Families

By Dr. George F. Shrady.

IT is a most deplorable fact that the persons who occupy the important places in our industrial, commercial and political life are failing even to reproduce their own number, while it is among the most undesirable element in our population that we find the greatest fecundity. This is particularly true in the cities, where the average number of children in the families of the well-to-do is certainly not greater than two, while the foreign born population, many of whom are from the lowest classes of Europe, are increasing at a marvellous rate.

Were it not for the fact that in the rural districts this condition is not so apparent the danger of the country would be much greater than it is. In the country there may not be as many children on the average among the families of American born parents as formerly, but the rate of increase is still much greater than it is in the cities, and merely because the country, as a whole, will be secure so long as the rural districts are still able to send their worthiest sons to the cities, there to take the most important places, is no excuse for the parents now living in the cities for not doing their share to reproduce a race which has taken first place in the world.

For the mother who deliberately sacrifices the joys of motherhood in order to be able to devote more of her time to society, and for the father who prefers to be able to have his automobile and his clubs and his handsome city and country homes, without being burdened in even the slightest way by a large family of children, there is no excuse, there can be none.

And for the fashionable mother who delivers her child over to the care of a nurse immediately after its birth there is still less excuse. To this fact, to the unhappy fact that a large proportion of city bred children are brought up on bottles is due the great preponderance of country bred men among those who are filling the positions of importance in all our cities. Statistics prove that less than fifteen per cent. of such men were born in cities. Fed when young on a bottle, instead of being nourished as nature demands, they are unfit to compete with the boys who come from the mountains and plains, who were started right, and before they entered on their careers gained the strength and nervous energy necessary in the life we are leading in the larger cities.

To this violation of the laws of nature is due much of the weakness and tendency to disease which is so strikingly apparent among city children as compared with those bred in the country.

I cannot too strongly express my opinion on this point. The true aristocracy of this country is an aristocracy of brains, whether it originates in the farm house, the tenement or the palace, but if we are to continue to have this sort of an aristocracy the men and women who now make it up must not fail in their duties of future generations. The far seeing girl of the future who wishes to solve this problem in her own way, would much better make a choice of a young man of brains than of the young millionaire without them.

It should not be so much a question of money as of real ambition and ability in the future father. That is the important point, and if this condition of affairs is not to be altered for the worse it behooves the educated men and women of the present to think for the future, and to remember that it is the luxuries and not the necessities of life that make us cowardly about taking upon ourselves increased responsibilities coincident with increased families of children.

The too careful man presumes that his children may not be able to succeed as well as he has done. On the other hand, I often wonder what our forefathers who worried over the prospective poverty of their descendants would say if they could see the present palatial mansions of their millionaire grandchildren. In some respects this view might be taken by our children as a reflection upon their ability, and might be becomingly resented by some telling [illegible] of disparagement.

NEW IDEAS IN TOILETTES

New York City.—Yoke waists of all sorts are among the features of the season and are made exceedingly attractive with trimming and contrasting material of various kinds. This stylish May Manton one is shown in pale pink crepe de Chine with yoke and trimming made of bands of pink silk held by fancy stitches, but the design is suited to a variety of materials, silk and light weight wools, and to the many cotton and linen fabrics. Lace insertion can be substituted for the silk of the yoke, or bands of material feather stitched, or any yoking material can be used. In the case of the model the lining is used and cut away beneath the yoke, but it can be entirely omitted where washable materials are chosen.

YOKE WAIST.

The waist consists of a fitted lining on which the fronts and backs are arranged. The yoke is separate and joined to the waist at its lower edge. Both front and backs are tucked at their upper portions, but the backs are drawn down smoothly, while the front blouses slightly over the belt. The sleeves suggest the Hungarian style and are made with snug fitting upper portions to which the full sleeves are attached. The upper portions of these last are tucked for a few inches and below that point they fall in soft folds. At the wrists are straight cuffs.

The quantity of material required for the medium size is four yards twenty-one inches wide, three and one-fourth yards twenty-seven inches wide, two and one-half yards thirty-two inches wide or one and seven-eighth yards forty-four inches wide, with seven yards of banding to make as illustrated, or five-eighth yards of material eighteen inches wide for yoke and collar.

TUCKED BLOUSE.

Woman's Tucked Waist.

Tucks of all widths and arranged in all possible ways are greatly in vogue and are most effective in the soft fashionable materials. The very charming May Manton waist, illustrated in the large drawing, shows them arranged in pointed groups and combined with a deeply pointed yoke that is exceedingly becoming. The original is made of white pongee stitched with corticelli silk, with a yoke of cream lace, but silk, wools, cottons and linens are all appropriate to the design.

The waist consists of a fitted lining, front, backs and yoke. The front is tucked diagonally, and seamed at the centre and blouses slightly over the belt. The backs are drawn down snugly at the waist line, and are tucked on horizontal lines. The yoke is separate and arranged over the whole. When desired the lining can be omitted in both waist and sleeves. The sleeves are made with the upper portions which are tucked at the lower edge, and the full parts that are gathered at both upper and lower edge and are finished with straight cuffs at the wrists. At the neck is a regulation stock.

The quantity of material required for the medium size is four yards twenty-one inches wide, three and one-half yards twenty-seven inches wide, three yards thirty-two inches wide, or two and one-fourth yards forty-four inches wide, with three-fourth yards of all-over lace.

A Warm Weather Collar.

In close, hot weather it is a decided grievance to be obliged to imprison the throat in a stiff, high, starched collar. It feels particularly oppressive under the chin, and it is to obviate this discomfort that a collar of a new pattern has been devised. This is as high as usual at the back, but the front slopes away beneath the chin. It is really stylish, and the drooping curve in front proves generally becoming to those who try it on. This collar measures two inches high in the back, but in front is only one inch high, beneath the chin. This is just the thing for warm weather.

The Bottom Flare.

A well-cut "runabout" is not awkward, however short, and when it comes from the right tailor's hands it is graceful and by no means resembles a "drum." This is because of the special cut. The breadths all show a decided flare toward the helm, and careful goring and fitting are required to attain the desired end. If this is a lining this must also be flared to match. Featherbone or some other cording is introduced in the hem, and this keeps the skirt, which is short, from "falling in" around the ankles, and seems to improve the general appearance.

Tufted Veilings.

Tufted veilings are in the market, and very delightfully they are to view—better still to possess. In fawn-color, smoke-gray, banana-color and willow green the effect seems particularly good, and it becomes difficult to make a choice. One can obtain tufted veilings in navy blue and black, the tints desired by so many women who do not wear light colors except in wash gowns. The tufted veilings are quite novel, much more so than the smooth-finished etamines, voiles and alpacas of the mohair type.

Stole Collar Waist.

Nothing escapes the stole colar. As a last resort it begins to make its appearance on fancy silk, and crepe de Chine waists. Used in this manner, it is probably shown to much advantage. The waist is creme crepe de Chine made over liberty silk with a stole of ecru guipure and a wide sailor collar. The sleeves and cuffs are trimmed with insertion to match. It makes an extremely attractive evening waist.

Daisy and Wild Rose.

The pretty design of a pin for fastening the back of a fancy collar is an enameled daisy and a wild rose with twisted gold stems. The flowers are realistically tinted, and in the centre of the daisy are three small diamonds and a single large one in the rose.

Woman's Shirred Skirt.

Skirts that fall in full and folds draping the figure gracefully are much liked for all the soft materials now in fashion. This very pretty May Manton one is made of flowered batiste and is shirred at yoke depth from the waist and again between that point and the knees. The shirrings are exceedingly fashionable and give a most satisfactory effect while the lines produced by their fulness are in every way desirable.

The skirt consists of one portion, which is circular, and the belt. The shirrings are made on indicated lines and are drawn up to fit bands which are cut in the exact length required.

SHIRRED SKIRT.

The back is finished in habit style and the closing made invisibly.

The quantity of material required for the medium size is ten yards twenty-one inches wide, seven and three-fourth yards thirty-two inches wide, or five yards forty-four inches wide.

SCIENTIFIC & INDUSTRIAL

Recent work with reflecting telescopes indicates that in a good atmosphere the photographs taken by the projected eight-foot reflector of the Lick Observatory should show us a universe three hundred times as great as that revealed by our best refractors. That is, such an instrument should detect stars seven times as far away as any that have been yet discovered.

Attention is called to the fact that the steam turbine in order to become available for marine work should be capable of being reversed. It is significant that among the recent issue of patents Charles G. Curtis, the inventor of the type of steam turbine which bears his name, has been secured one for "means for reversing compound turbines." If successful this invention opens up another vast field for the turbine, from which it has heretofore been barred.

Alcohol is coming into considerable use for illumination in France. The flame is made luminous by the addition of sufficient coal-oil or crude benzine, or the ordinary non-luminous flame is used to give incandescence to a Welsbach mantle. The latter is the more important method. Some lamps have from sixty to eight hundred candle-power, and these large portable lamps, carrying their own illuminant, seem to have advantages over gas or electricity for many purposes. The best of the burners yield about thirty candle-power hours per ounce of alcohol.

There are a number of microbes too minute to be seen through the microscope, with present methods, but which cloud clear media in which they multiply and produce disease when inoculated into living tissues, states American Inventor. It is impossible, however, that any microbe is many times smaller than some of those now recognized because a living organism necessarily contains many thousands of molecules and any large number of molecules would make a mass which would be detected by our microscopes.

The River Indus at its source is 16,000 feet above the sea level. At Attok it is still 2000 feet above the sea, for the greater part of its course it is, therefore, a rapid river, and is always bringing down with it from the mountains a vast quantity of silt and mud and gravel. When it slackens its pace over the lower levels of the Sind Valley this silt is deposited on its bed, which, thenceforward is always rising. If the banks of the river in its lower reaches were not artificially raised and strengthened at all weak points a great part of Sind would become an uninhabitable swamp.

The amount of oil produced in the Baku district last year again showed a fall. The figures for 1900, 1901 and 1902 were respectively 600,763,912, 674,543,725 and 636,528,852 poods, or a reduction of 38,014,873 poods—3,801,487 barrels—during the years under review, as compared with 1901. Although this reduction was very large, yet the production of 1902 was fully sufficient to satisfy the demand. The huge production of 1901 was undoubtedly the result of the energetic working of the oil fields which commenced in 1898, and, when prices were at their highest in 1900, was carried on with feverish activity.

What to Do With Flies.

Flies are most detestable than mosquitoes. They mar whatever they touch, and do not possess the merit of being sweet singers. A mosquito orchestra is not bad when one appreciates it. I have heard worse music in the opera. But let that pass. The desire of Mr. Fly to settle upon the whitest things in the house is his worst fault. In fly communities white shades are converted into dark blue or bottle green ones before spring is half over. The fly is the only universal beast. It is the unwelcome companion of man in every quarter of the globe, and is equally at home in Alaska and the Great Desert. A ship may leave port without one on board, yet in mid-ocean an unclean spot on deck will attract a swarm. The fly seems to be born for the occasion. Born in filth it thrives upon filth. It is the most disgusting of all insects.—Victor Smith, in New York Press.

Sharing the Birthdays.

In Japan they have a very simple method of dealing with birthday celebrations, the people waiving all claim to their individual natal day.

There are two general birthdays, one for each sex. The male birthday, which is known as the "celebration of the boys," occurs on the third day of the third month, and the "celebration of the girls" on the fifth day of the fifth month. These days are general holidays for the young. The birthday of the mikado, or ten-o, as he is more properly termed, is also a general holiday throughout the country, the houses being decorated with flags and innumerable colored lanterns.—Literature.

My, What a Name!

"Coccus babyllus polymorphus lissae" is the name given to the hydrophobia microbe by its discoverer, Professor Sormani of the University of Pavia.

Wearing Monocles Becomes a Craze.

Wearing monocles, the latest fashion for ladies, a craze recently started in Paris by ladies of the Servian colony, is extending to London

The Funny Side of Life.

WEARISOME TOPICS.

Rodrick—"Did you enjoy Mrs. Ticker's reception?"

Van Albert—"No, indeed. The men talked shop and the women shopping."—Chicago News.

GIVING HIMSELF AWAY.

Teacher—"See how thin this sheet of paper is? Now, Johnnie, do you know of anything else that's thin?"

Johnnie—"Yes'm; my excuses for being late."—Chelsea (Mass.) Gazette.

THEY'LL BE NEEDED.

"I'm coming around to-morrow to ask your father's consent to our marriage."

"Very well, love, I'll have the court plaster and arnica ready."—New York Journal.

A GENTLE TOUCH.

"They gave me a wedding fee of $50," said the minister, delightedly, when the young couple had departed. "What a blessing!"

"Yes, dear," replied his wife, with outstretched hand, "it is more blessed to give than to receive."—Philadelphia Press.

ONE OR THE OTHER.

"You say he was very eloquent when he proposed to you?" said Miss Cayenne.

"Very," said the confiding young woman. "Don't you think that indicates sincerity?"

"Sincerity or experience."—Washington Star.

THE BRUTE.

"—es," said his wife's mother, "I see it was a mistake for my daughter to marry you at all. She is just as different from you in every respect as she can be."

"Well, well," replied the great brute, "how you flatter me!"—Philadelphia Public Ledger.

PERSONAL EXPERIENCE.

Crittick—"Is this the poem you submitted to the editor?"

Poet—"Yes."

Crittick — "Why, its feet are all wrong."

Poet—"Perhaps so, but the editor's weren't. I got one of them all right."—Philadelphia Public Ledger.

A BREEZY STYLE.

"Dear," said the physician's wife, when can you let me have $10?"

"Well," replied the medical man, "I hope to cash a draft shortly, and then——"

"Cash a draft? What draft?"

"The one I saw Mrs. Jenkins sitting in this morning."—Kansas City Star.

UNUSUAL PROVOCATION.

"You ought to know better," said the oculist, "than to rub your eyes after handling paper money. Unless it's perfectly new it's full of germs."

"But this was a thousand-dollar bill a fellow handed me to look at. I rubbed my eyes to see if I was awake," responded the patient.—Chicago Tribune.

HER OPINION.

"I don't see," remarked Mrs. Cumrox, "why they should put on so many airs."

"They come of a very wealthy family."

"That's just the point. It would be impossible for them to be so very rich if some of their ancestors had not been parvenus."—Washington Star.

TRUE TO HER SEX.

"What's Miss Wren doing up there on the telegraph wires?"

"Listening to the fashion notes from Paris, I guess."—New York Journal.

A REPROOF.

"It strikes me that this is about the slowest railroad in the country," said the impatient tourist.

"I knew you were going to kick," replied the conductor, genially, "as soon as you asked for a time table. You are one of these people who believe everything they see in print."—Washington Star.

Glass tumblers do not make good circus acrobats, for they always go broke when they travel far.

Ladies Can Wear Shoes

One size smaller after using Allen's Foot-Ease, a powder. It makes tight or new shoes easy. Cures swollen, hot, sweating, aching feet, ingrowing nails, corns and bunions. At all druggists and shoe stores, 25c. Don't accept any substitute. Trial package FREE by mail. Address, Allen S. Olmsted, LeRoy, N.Y.

It is quite possible to be happy in spite of riches.

I do not believe Piso's Cure for Consumption has an equal for coughs and colds.—JOHN F. BOYER, Trinity Springs, Ind., Feb. 15, 1900.

The man who is lost in thought is never found in dude clothes.

Mrs. F. Wright, of Oelwein, Iowa, is another one of the *million women* who have been restored to health by Lydia E. Pinkham's Vegetable Compound.

A Young New York Lady Tells of a Wonderful Cure:—

"My trouble was with the ovaries; I am tall, and the doctor said I grew too fast for my strength. I suffered dreadfully from inflammation and doctored continually, but got no help. I suffered from terrible dragging sensations with the most awful pains low down in the side and pains in the back, and the most agonizing headaches. No one knows what I endured. Often I was sick to the stomach, and every little while I would be too sick to go to work, for three or four days; I work in a large store, and I suppose standing on my feet all day made me worse.

"At the suggestion of a friend of my mother's I began to take **Lydia E. Pinkham's Vegetable Compound**, and it is simply wonderful. I felt better after the first two or three doses; it seemed as though a weight was taken off my shoulders; I continued its use until now I can truthfully say I am entirely cured. Young girls who are always paying doctor's bills without getting any help as I did, ought to take your medicine. It costs so much less, and it is sure to cure them. — Yours truly, ADELAIDE PRAHL, 174 St. Ann's Ave., New York City."—$5000 forfeit if original of above letter proving genuineness cannot be produced.

HAIR GROWTH

Promoted by Shampoos of Cuticura Soap

And Dressings of Cuticura the Great Skin Cure

Purest, Sweetest, Most Effective Remedies for Skin, Scalp and Hair.

This treatment at once stops falling hair, removes crusts, scales and dandruff, destroys hair parasites, soothes irritated, itching surfaces, stimulates the hair follicles, loosens the scalp skin, supplies the roots with energy and nourishment, and makes the hair grow upon a sweet, wholesome, healthy scalp when all else fails.

Millions of women now rely on Cuticura Soap assisted by Cuticura Ointment, the great skin cure, for preserving, purifying and beautifying the skin, for cleansing the scalp of crusts, scales and dandruff, and the stopping of falling hair, for softening, whitening and soothing red, rough and sore hands, for baby rashes, itchings and chafings, for annoying irritations, or too free or offensive perspiration, for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet and nursery.

Cuticura remedies are the standard skin cures and humour remedies of the world. Bathe the affected parts with hot water and Cuticura Soap, to cleanse the surface of crusts and scales and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Ointment freely, to allay itching, irritation and inflammation, and soothe and heal, and, lastly, in the severer forms, take Cuticura Resolvent, to cool and cleanse the blood. A single set is often sufficient to cure the most torturing, disfiguring skin, scalp and blood humours, from pimples to scrofula, from infancy to age, when all else fails.

Sold throughout the world. Cuticura Resolvent, 50c. (in form of Chocolate Coated Pills, 25c. per vial of 60), Ointment, 50c., Soap, 25c. Depots: London, 27 Charterhouse Sq.; Paris, 5 Rue de la Paix; Boston, 137 Columbus Ave. Potter Drug & Chem. Corp., Sole Props.

Send for "How to Cure Every Humour."

California Scenery.

As long as there remains the love of beauty in the human soul, so long will the glory of California scenery, and that of the whole Pacific coast, prove a source of inspiration to the poetic mind. Descriptive verse has been from the beginning a marked feature of the literature of this region. In fact, the term "landscape poets" may be properly applied to this bevy of song birds which seemed to the late Maurice Thompson to have taken "complete possession of the entire western seaboard." Suffice to say that if a volume of verse were written by a Californian which reflected nothing of the State's scenic beauty or its warmth of color, it would not only come as a surprise to most reviewers, but the loyalty of the poet might be seriously questioned. * * * While all this display of local color may seem toh apparent an effort on the part of Californians to place upon their work the stamp of a definite locality, and may be considered by some a cheap form of art, it is this very sensitiveness to the beauty and grandeur with which nature has clothed the West that offers the most promise of its rapid literary advancement—a sensitiveness, moreover, that will become more and more acute with the cultivation of the higher faculties through increasing educational growth. —Atlantic Monthly.

The Natural History Ramble.

Much has been written about the pleasures and advantages of getting close to nature, and yet, how many opportunities of doing so are neglected! In these days of travel and excursions, when thousands of us visit regions which, a few years ago, would have been regarded as being as inaccessible to us as the very poles; in these days when thousands of us who, a few years ago, would have been content to live the humdrum life of home from year's end to year's end, must have our annual "change," we have opportunities of observing faunas and floras of many districts and regions. How many, however, avail themselves of the privilege of familiarizing themselves with nature's varied processes and products, and of enriching the treasuries of knowledge? The board walk and pavilion of the shore have more attractions than the pine groves and the sand dunes; the lawn tennis ground and golf links of the inland resort allure far more than a ramble through forest and field in mountain glen and along lake shore. If it is true, as a certain wise man has said, that there is a time for everything, let us, in all fairness, give some time to the natural history ramble. It is certainly as refreshing, to say the least, as some other recreations.—Current Literature.

Pudding at Beginning of Dinner.

The custom of serving pudding as the first course at dinner seems to have interested a good many people of our day. A gentleman from Maine informs the writer that it is still the custom in certain sections of his State. In the autobiography of the Adams family it is mentioned that at a dinner given by the venerable ex-President of the United States, at which his grandchildren were present, the first course was "Indian pudding," and the little folks were told that the more pudding they ate the more beef they could have—so of course they gorged themselves on the pudding, and as a consequence had no appetite for beef when it was served. Thus were maintained the simple and economical methods of the forefathers. The boys who came to the city from the country, and later became the successful and wealthy merchants of Boston, were raised in a most frugal manner. Their breakfast the year round was of brown bread and milk; the same for their supper; the dinner was of baked beans and pie; rarely any meat.—Boston Transcript.

It is a poor joke that won't stand revamping every few weeks.

The less a man has to say the wiser people think him. N. Y. 29.

Long Hair

"About a year ago my hair was coming out very fast, so I bought a bottle of Ayer's Hair Vigor. It stopped the falling and made my hair grow very rapidly, until now it is 45 inches in length."—Mrs. A. Boydston, Atchison, Kans.

There's another hunger than that of the stomach. Hair hunger, for instance. Hungry hair needs food, needs hair vigor—*Ayer's.* This is why we say that Ayer's Hair Vigor always restores color, and makes the hair grow long and heavy. $1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

Headaches

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ON "CHRISTIANITY'S BROADMINDEDNESS."

The Rev. Dr. Henry C. Swentzel Contrasts the Church With the Narrow-Gauge Average Man—One of the Miseries of Irreligion Pointed Out in Detail.

NEW YORK CITY.—Dr. Henry C. Swentzel, rector of St. Luke's Church, Clinton avenue, near Fulton street, preached Sunday on "The Broadmindedness of Christianity." He took his text from Psalms cxix:96: "Thy Commandment is exceeding broad." Dr. Swentzel said:

The Son of God has called men into a place of liberty and has set their feet in a large room. His example, His teachings and His whole tone illustrate and prove His broadmindedness. No one who rightly appreciates the Gospel can well contend that it seeks to make human nature smaller and feebler than it is, or that it would lower the dignity and lessen the freedom and banish the opportunities of human life.

In the broadmindedness of Jesus is one of His most notable characteristics. He lived in the open, and His every word indicates the comprehensiveness of His thinking and the perfect sanity of His conclusions. He is the broadest being who has trod this earth and He has given the broadest religion that man has known, a religion which is not racial, national or provincial, but worldwide. It is intended to inspire the most liberal ideas and to make the largest men. It is the embodiment of broadmindedness in doctrine and ideal, in its outlook, its estimate of possibilities, and its conceptions of human destiny.

Every follower of Christ should divest himself as far as possible of narrowness and pettiness in living his life and doing his work. Let him be thoughtful and honest and industrious and brave; let him be sane, broadminded in his ideas, generous in his principles and loyal in his conscience. He is not called upon to emulate the paltry disposition of the past, or to try to restore the regime of a bygone age or to clamor for the return of conditions which were well enough for a younger civilization, but which should not be installed in the twentieth century. Religion is not superstition, faith is not bigotry, godliness is not intolerance.

We all do well to take account of the Lord's admonition concerning the use of language. He has warned us that we must answer at the last for every idle word we speak. How many idle words are used, and how massive is human guilt in this particular. Even those words which should be used always seriously and with the utmost accuracy are connected with the pronouncements of garrulous brains and flippant lips. "Breadth" is one of the words against which people sin most often, so that earnest souls have almost reached the point of suspecting its tenor whenever they hear it. In common parlance a "broad" Romanist is a Roman Catholic who cares little or nothing for his church or for the religion which it preaches. A "broad" Christian is a man who, though he may not have broken with Christianity, has no definite religious principles, no clearly stated rules of right and wrong, and has no fault to find with a propaganda, the success of which would mean not only the overthrow of faith but the ruin of society. It is supposed to be "broad" to be not too scrupulous about one's amusements, to encourage irreligion, to disregard the sanctities of Sunday. It is supposed to be "broad" to say and to do nothing that would indicate that one has religious feelings, to put himself in the attitude of sympathy with bad things. It is supposed to be "broad" to upset the Bible, to cast discredit upon the church, to brand holy traditions as a pack of lies, to make the gospel mean as little as possible, to reduce religion, not to its lowest terms, but to no terms at all. Thus the noble word is clothed with a sense which it ought not to have. When people tell of a "broad statement" they mean a statement which is suspicious, if not inaccurate. When they refer to a "broad story" they mean a story which is not quite decent. It were well to distinguish between a true breadth and a spurious breadth, so that we might be spared from the ills that follow in the train of a mere catchword, and have the blessing and the power which are imparted by the breadth of thought and sympathy which is one of the very finest marks of a son of God.

From whatever standpoint it is viewed the religion of Jesus Christ is characterized for its broadmindedness. It is to-day the only world religion, and the church looks forward to the time when all the people of all the nations will become the Lord's disciples. An examination of the theories or schemes which have been set up in opposition to or rivalry with the everlasting gospel will disclose their essential narrowness, both as to ideas and life. In contrast with the notions held by those who stand aloof from Christ, how broad and strong is the platform of Christian belief! In all the world there is no creed or confession which is so ample and liberal and comprehensive as the Nicene creed. It is great in what it says and in what it does not say, in what it defines and what it refuses to define. Its expressions and its reticence are significant and impressive. In it technical terms have been reduced to a minimum, and it stands as an unfailing source of truth and aspiration which shall bless and enrich all classes of humanity until the close of the latest age. It proposes the divinity of the Trinity and the trinity of divinity, but not in the forms of philosophy. It declares the Fatherhood of God, the Sonship of Christ, the perpetual ministry of the Holy Ghost, but not in the elaborate phrases of the theologian. It upholds the virgin birth of Jesus, His worldwide office and His omnipotent endeavors "for us men and for our salvation," but without the glosses of a mistaken devotion. It proclaims the continuity of the church of the apostles, but without the speculations and dicta of the ecclesiologist. It announces the nearness of God's children in every world, and the blessed life of endless felicity which awaits the souls that He has redeemed, but without the fancies and guesses and vagaries which have vainly tried to explore the hereafter. These truths are not only remarkable in the manner of their statement, but also in themselves. They are the foundation on which we are asked to build while we are here, and the structure of our thoughts and motives and efforts should be spacious accordingly.

What an unspeakable crime it is to attack such a belief on the score of its alleged narrowness. It presents the largest ideas that man has known, and it presents them in the largest possible way. Its portrayal of Jehovah is in harmony with His divine majesty; its account of Jesus has the sweetness and reverence of the gospel according to St. John; its interpretation of the Holy Spirit is a comforting and inspiring doctrine for the needs and sorrows and possibilities of the present; its declaration of the church marks it as a society of grace and blessing which was founded by the Lord, and, like a beautiful angel, it points to "the life of the world to come." These are the dearest of all doctrines, the best and the brightest, the largest and most liberal. Whatever else they are, they are not contracted or paltry, but as catholic as God and as universal as man. Indeed, our religion is the only thing in the world that professes to desire the allegiance of everybody. It has the length and breadth and depth and height of the love of God in Jesus Christ our Lord. It does not give us views or conjectures, but only the commandment of God which is "exceeding broad."

The clever pettifogger can make it difficult for us to defend anything, though we may be infallibly sure of its truthfulness. The cross-examiner may succeed as far as to bring us to the verge of doubting the testimony of our own senses. Even so are doubts easily possible concerning the matters of Christian belief. It is not the purpose of this discourse, however, to discuss the grounds of skepticism except in so far as they would impeach the breadth of Christianity. Several forms of unbelief, or of indifference, which is in a sense the same thing logically, present a sorry spectacle in the presence of the inclusiveness of the Gospel. What are the truths for which they stand, and how real are those truths? They talk perhaps of their intellectuality, but they should remember that the men who are responsible for the Nicene Creed were pastmasters as metaphysicians. They refer to the liberty of which they are the champions, but the liberty which they advocate is in essence the very doctrine of nihilists and anarchists in society and politics. With blare of trumpet they herald their own broadmindedness, but if they had their way, and if they could sweep religion from the face of the earth, burn up the Bible, dynamite the churches, it requires no prophet to foretell what a dreadful situation would ensue as the result of their havoc. The man who puts agnosticism against the creed has nothing to give this world except what would make men more narrow than they are, and would speedily plunge them into conditions first of civilized paganism and a little later of rank barbarism. The skeptic is no more an apostle of liberality than is the anarchist an apostle of liberty.

With great regret it must be confessed that there are and have been multitudes of narrow-minded Christians. Inasmuch as human nature finds it difficult to attain unto liberality, it is not to be wondered at that so many fall short of the breadth of our holy religion. Christians have not only been persecuted, but they have actually persecuted one another, because of differences of opinion. Only too frequently have they failed to recognize the comprehensiveness of the Gospel, and they prefer their confessions to the catholic faith and their sects to the catholic church. It is simply impossible to apologize for them or to offer any argument in extenuation of their grievous offenses along this line. They have restricted their God and their Bible and their creed, and have stood up stoutly to resist the largemindedness of their Lord. But this does not really affect the issue which we have in hand. It does not at all impair our contention that the gospel of Christ itself—not Protestantism or Puritanism or Medievalism, but the gospel—contains the broadest doctrines, the broadest ideas of God and of man and of destiny, and the broadest working principle of thought and of life.

God's "commandment is exceeding broad" in its practical application to men's conditions. It preaches the Fatherhood, which is a mighty foundation for the intellectual life, and man's brotherhood, which makes the scope of moral obligation. God's relation to us is most assuring, and our relation to Him and to all our brothers makes the theatre of action and sets forth the sphere of conscience, sympathy and endeavor. One of the miseries of irreligion is that it despoils humanity of all this. The heart which cares not for the doctrines of Christian belief is sadly impoverished and reduces this present existence to a small affair, for it has nothing to say of the higher things or of an eternity of blessedness, and nothing that avails for the enlargement of aspiration and the reinforcement of energy. Christ truly discovered the individual. He argued that a man's soul was more important than the gain of the whole world; He came expressly to lift human nature out of its smallness and to place it in an environment where the sons of God rightly belong; He revealed the model which is nothing less than the character of the King of kings, and called all the sons of men to a royal life; He disclosed a large meaning for duties and griefs, pleasures and possibilities; He would have His people stand on the Mount of the Ascension whence they can see the present in its perspective, and have an expansive outlook for the study of themselves and their lives. The broadminded Lord has given a broadminded religion for men when they pray and work and suffer, and He would inspire them to rise up to the obligations and opportunities which wait upon them every hour in the day.

How narrow is the average man! Modern conditions are not an unmixed boon to the masses. There have been many gains, but there have been many losses also. Among the losses in the world as we know it to-day is the almost inevitable tendency of our way of living and our methods of business to curtail the individual in the living of his life and the doing of his work. More and more are the people of the workaday world hampered and restricted by the demand for specialization. The individual is being called upon to do some one task and to do it over and over again three hundred days in the year, all of which is equivalent to shutting him within confines where he can scarcely hope to develop into his best self. This effect is one of the deplorable ills of the times. The rules of offices and factories and shops which encourage experts is ruinous to the individual who indeed learns to do one thing perfectly, but who is thus hindered from knowing anything else outside of his daily task. Then, too, the spirit of the business man that makes him ambitious and satisfied to become a man of business and thus reduce his life to the level of a mere money-maker, is likely to produce the same direful result. No one should willingly become a machine. In spite of the advancement which is one of the wonders of the age, the people of the United States are now face to face with a situation which sorely requires a crusade in favor of broadmindedness—a crusade that will exhort the people, in spite of discouragements to the contrary, to find leisure for considering topics and resorting to occupations in addition to those which belong to their daily engagements. We must simply make time for thought and reading and recreation; we must rise to the glorious liberty of the children of God; we must insist for ourselves that the most important things are not meat and drink, but the kingdom of God and His righteousness.

We need the broadmindedness of Jesus. We need His outlook, His doctrine, His model of thought and life, His symmetry of character, His proportions of manhood. The Saviour of mankind would save us from pettiness and illiberality. He would have us accept God's largest estimate of ourselves. He would call us to a life which will issue at last in the heavenly land. He would fill us in mind and heart and soul with God's commandment which is so exceeding broad.

Our Part Essential.

God has a place for each one of us and a work for each one of us. God does not expect us to fill more than our own place, or to do more than our own work, but each one of us is important in his or her own sphere. All the offerings of the wealthy in the courts of the temple in Jerusalem were well in their time and amount. But the poor widow, who had only her two mites, should not have felt that her gift was unimportant. It seemed as if Jesus sat watching and waiting for that little offering, and the story of her doing her part has been told the world over in the centuries since then, as a lesson, and as an inspiration. Even though our part is but a little one God, as it were, watches and waits for that. Shall it be lacking?

Superiority in Confession of Wrong.

A confession of wrong may be proof of a possession of superior ability. One who is making progress is likely to see truth in a new light to-day, and to perceive that he was not right in the light which he had yesterday. Pope says truly, "A man should never be ashamed to say he has been in the wrong, which is but saying in other words that he is wiser to-day than he was yesterday." Therefore it often requires more ability to admit having been in the wrong than to stand by the position which one maintained yesterday. Have you this power to grow?

SUFFERING WOMEN

Tired, Nervous, Aching, Trembling, Sleepless, Bloodless—Pe-ru-na Renovates, Regulates, Restores---Many Prominent Women Endorse Pe-ru-na.

AMERICA is the land of nervous women.

The great majority of nervous women are so because they are suffering from some form of female disease.

Mrs. Emma Mitchell, 520 Louisiana street, Indianapolis, Ind., writes:

"Peruna has certainly been a blessing in disguise to me, for when I first began taking it for troubles peculiar to the sex and a generally worn out system I had little faith.

"For the past five years I have rarely been without pain, but Peruna has changed all this, and in a very short time. I think I had only taken two bottles before I began to recuperate very quickly, and seven bottles made me well. I do not have headache or backache any more, and have some interest in life. I give all credit where it is due, and that is to Peruna."—Emma Mitchell.

By far the greatest number of female troubles are caused directly by catarrh.

They are catarrh of the organ which is affected. These women despair of recovery. Female trouble is so common, so prevalent, that they accept it as almost inevitable. The greatest obstacle in the way of recovery is that they do not understand that it is catarrh which is the source of their illness. In female complaint ninety-nine cases out of one hundred are nothing but catarrh. Peruna cures catarrh wherever located.

Chronic invalids who have languished for years on sick beds with some form of female disease begin to improve at once after beginning Dr. Hartman's treatment.

Among the many prominent women who recommend Peruna are —Belva Lockwood, of Washington, D. C.; Mrs. Col. Hamilton, of Columbus, Ohio; Mrs. F. K. Warren, wife of U. S. Senator Warren, of Wyoming.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

An Exile's Curse.

Professor Lylly, a most prominent Finnish scholar, has committed suicide in Berlin from grief at his unjust banishment from Finland. He was engaged in scientific research in Berlin for the last six months, when suddenly General Bobrikoff, the Governor of Finland, issued a decree sentencing him to perpetual exile on account of supposed political activity. Professor Lylly immediately after the receipt of the decree went to the Thiergarten Park and blew his brains out with a revolver. In his pocket was a scrap of paper, in which he had written, "I cannot live without seeing my beloved Fatherland. Curse Bobrikoff. God will surely avenge Finland."

The Hudson Bay Company.

The stock of the Hudson Bay Company is mainly held in London, where its affairs are controlled by a governor and board of directors, but the company has a "chief commissioner" resident in Canada. The company has lost its monopoly. In May, 1870, it formally relinquished its charter control of the Northwest in consideration of payment by Canada of $1,500,000 cash and half of all the surveyed lands within the fertile belt and posts. The land grants probably amounted to more than 5,000,000 acres. The company since has been simply a rival with other traders.

Some people avoid facts simply because they are stubborn things.

NERVE WORN KIDNEYS.

Doan's Kidney Pills make freedom from kidney trouble possible. They carry a kind of medication to the kidneys that brings a bright ray of hope to desperate cases.

Aching backs are eased. Hip, back, and loin pains overcome. Swelling of the limbs and dropsy signs vanish.

LOCK HAVEN, PA.—Mrs. L. W. Ammumen writes: "A few weeks ago I sent for a trial box of Doan's Kidney Pills for myself, and they did all they are said to do. My husband was kicked last fall by a horse and badly hurt—his hip was fractured—and after he recovered he was in such misery that he could hardly walk, and to stoop caused him such distress that he thought he would have to quit work—also, it affected his bladder, and he was unable to make his water without so much distress. I insisted on his getting a box of your pills and trying them, so I went to Mason's Drug Store and got a box. The first box helped him so much that I got the second and also the third, and now he is entirely well."—Mrs. L. W. AMMUMEN, Lock Haven, Pa.

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

MOSQUITO DESTROYER.

(*Continued from first Page.*)

general blight of all crops from grasshoppers was no uncommon thing, have practically obviated the possibility of such calamities.

When the researches with regard to the newly discovered parasite have proceeded as far, and the expense of propagating the "mosquito destroyer" has been reduced to a minimum, it is considered very possible that the Public Health and Marine Hospital Service will take an active part in practically exterminating mosquitoes in the United States.

It is intererting to note that the "mosquito destroyer" belongs to the family of gordius or horsehair worms. It is no uncommon thing to see thousands of these worms wriggling on plants, trees, shrubbery and on the earth, following a heavy storm, and it is this which has given rise to the common belief in rural districts that "it rains worms." As a matter of fact, however, these horsehair worms, like their more useful cousins, the "mosquito destroyer," lives in the abdominal cavities of various insects, and a long drought, followed by a heavy rain, usually results in their leaving the bodies of the insects and returning to the earth and to the first stage of their existence. These species, however, are not harmful to the insects which house them. "The mosquito destroyer" is deadly, but to mosquitoes only.

WAS AS ONE IN A DREAM.

Concluded from Page 5.

to see him one afternoon.

"Look here, old fellow," he said, "what's the matter? I know I was ungentlemanly about the handkerchief, but that is no reason why you should cut us all this way. Can't you forget about it?"

"Why, Jennings, old boy, I haven't cut anybody."

"No, but you're tired of us, and you can't hide it. Come down the river with us to-night. The fellows have got a yacht, and we'll have supper on board, with plenty of champagne. Won't you come?"

"Jennings," he said, "do I look like a man who would make good company at a champagne supper? You know what's the matter with me. Why don't you just sensibly drop me?"

Jennings begged and mocked and bullied, all in a good natured way, but his friend was firm. When he went out Hayward locked the studio door and drew his half finished picture from behind a curtain.

"She was right," he said to himself. Constance sailed. He dreamed of his picture as being hung in the Salon and of her seeing it there. By and by it was finished. It crossed the water, and the dream he had dreamed came true.

When Constance looked upon Hayward's painting her heart leaped as though it would leave her breast. White, radiant and glorified, it was she herself who stood in the center of the picture. That self-reliant, fearless pose seemed to radiate an infinite calm. Behind her raged the powers of darkness, utterly helpless to pass the line on which she stood. Her face seemed to illumine the shadows around her; her figure was instinct with grace and strength. Below the picture was the name: "A White Shield."

The beauty of the conception dawned upon her slowly. Pale and trembling she stood there, forgetful of place, and the things around her. At length she knew what she meant to him; that his art at last rang true because he had loved her enough to be a man for her sake.

She dared not linger before it then, but she came again when the place was empty, and stood before her lover's work like one in a dream. The fiends in the shadow showed her the might of the temptations he had fought down. She gazed at her own glorified face until her eyes filled with tears. With a great throb which was almost pain, Constance woke to the knowledge that she loved him, even as he loved her; well enough to stand between him and danger till she herself should fall.

The old gray guard, passing through the room, saw her upturned face in that moment of exaltation. It was the same that he saw in the picture above, and he quietly went away to wait until Constance came out, her face flushed and her eyes shining like stars before he locked the door.

That night the cable trembled with a message to America. It reached Hayward the next morning as he sat reading the morning paper. The envelope fluttered unheeded to the floor, and his face grew tender as he read the few words which told him that his picture had rewarded his love.

"Wait," he said to the messenger boy. Hurriedly he wrote the answer: "Sail next steamer"—then, utterly oblivious of the additional expense, he added another word, which must have been very expressive, for Constance turned crimson when it reached her—perhaps because the discerning genius who copies cablegrams in typewriting had put the last words in capitals, thinking that the message came from a Mr. Darling.

"Mother" Jones' March Doomed.

"Mother" Jones, the labor agitator, who last week left Philadelphia with a large number of children who work in the mills of that city, to march to Oyster Bay, Long Island, to present to President Roosevelt the grievances of 80,000 tertile workers who have been on a strike for the past month, will have to hasten her march or she will be the only one left of the army as desertions from the ranks are numerous every day. "Mother" Jones makes a point to call a mass meeting at the different towns through which she passes and then addresses the crowd scoring capital and labor generally, and incidentally making a plea for the abolition of child labor. The New Jersey *Advocate* says of her "She pretended to give illustrations of the abuses incident to the employment of children in mills and factories, but they were so extreme and exaggerated, that but few in the audience gave any credence to what she said. She abused the clergy, and ridiculed religion, bordering on the sacrilegious in her references to the Savior, and made light of the most sacred things. It was the most demagogic and inflammatory talk that was ever delivered in Rahway, and as a result, most of the audience was disgusted."

NEWS FROM WATCHUNG.

Mrs. E. T. Davis is visiting Mrs. William Gordon.

Mrs. W. H. Sickels, of Newark, is visiting with William Demler's family.

The children of Dr. Richard Moldenke are recovering from a severe attack of measles.

Mr. and Mrs. James Casey, of Hackettstown, are spending a week with Postmaster Schmidt's family.

Mrs. Col. Stines, of New Rochelle, N. Y., her son and grandson and Mrs. Gabriel and family are visiting Mr. and Mrs. Dr. Charles Moldenke at their beautiful villa Elsinore.

Miss Lizzie Meyer and Miss Dora Zigler, of Bayonne, Mrs. Lasher, of Summit, Miss Dowinger, of Central avenue, Plainfield, Richard Colton, of Fanwood, Arnold and Richard Challette, of New York City, have recently been guests of Geo. A. Schmidt and family.

The Sunday School members of St. Peter's German Lutheran Church thank Mrs. John H. Koch for so kindly giving the use of the grounds in her Park for the picnic recently held there, and also to still further extend their thanks to the friends whose assistance helped to make the outing a success.

Sunday Excursion to Mauch Chunk.

The New Jersey Central will run an excursion to Mauch Chunk on Sunday, July 19, 1903. Round trip adults, $1.50 children 75c from Plainfield, at 9.22 a.m. Mauch Chunk is one of the charming mountain resorts in this section. The trip over the gravity railroad to Summit and Mt. Pisgae is one of scenic grandeur and a trip that will never be forgotten. After the trip over the Switch-back you should go to Glen Onoko where you will find beautiful little cascades, caverns and like attractions.

Chancellor Magie has filed an opinion which will permit the immediate transfer to the Metropolitan Meseum of Art, of New York of real estate in New York City and Paterson, N. J. worth about $500,000 that was left in trust by Jacob S. Rogers of Paterson. The trust was created for the payment of two annuities of $500 each. The land is unimproved and the income is not sufficient to pay the taxes. Under the decision the land will go to the museum, which will guarantee the payment of the annuities. By the terms of the will the land was not to be the property of the museum until after the death of the two annuitants. This valuable property is in addition to a bequest of about $5,000.00 to the museum direct.

The State laboratory of the New Jersey Agricultural Experiment Station, at New Brunswick, which was gutted by fire last April, is to be rebuilt at once. It is expected that the building will be completed and ready for use by the end of September, when the new college year begins. The iusurance appraisers fixed the loss at $14,681.

Weep Not.

Weep not for your baby child,
Who went to Jesus undefiled;
Went to Jesus there to be,
From the world's illusions free.
To the tender Shepherd's fold,
'Twas transplanted pure as Gold;
In the loving Shepherd's care,
It will blossom bright and fair.
Though the parting gave you pain,
Christ with comfort will sustain;
When your days on earth are done,
You will see your little one.
You will praise—and bless the day,
Bless the Father's wondrous way,
Bless Him for the darkest night,
When you reach the home of Light.

Words of comfort to Mr. and Mrs. Debele
SOPHIE ST. ut.,

Enforced Peace.

"I hope this is a peaceable community?"

"You betcherlife it is, stranger. I'm the Sheriff, an' anybody thet disturbs the peace is liable to git disturbed some himself."

Mother-in-Law Joke No. 9,999.

In a railway carriage an elderly lady was asleep in the corner by the window, which was partially open. One of the other occupants of the carriage turned to the man opposite and said: "I think you had better draw up the window, old chap, there is a deadly draught coming in on your mother-in-law." "That's all right," said the other with a hopeful smile.—London Tatler.

No Cause for Apprehension.

The Count of Monte Cristo exclaimed, "The world is mine!"

"But," we asked, "don't you think you'll have a little trouble running it at first?"

"Not at all," he replied; "the college graduates will soon be out."

Perceiving there was no lack of expert opinion we humbly effaced ourself.

The Stern Reality Of It.

"Beloved, It Is Morn," is a sweet and pretty thought for the title of a song to be sung at a wedding, but it does not throw any light on the old question as to which one will get up and build the kitchen fire.—Atchison Globe.

Secret of His Madness.

"Yes," said the actor, "Starr, the tragedian, is mad, hopelessly mad."

"Overstudy?" asked the critic.

"No; it was his understudy that made him mad. He made a bigger hit in the part than Starr."—Philadelphia Press.

Delays Are Dangerous.

"Ah, Gracie, dear," she said to the duke, "why don't you go to papa today? Delays are dangerous, you know."

"Yes, I realized that, but I've only known you three days, and these get-rich-quick schemes always seem to be so risky."—Chicago Record-Herald.

We cannot suffer these Mormons to depress our domestic ideals, which call more and more for the childless home.—Life.

North Plainfield Weekly Review.

VOL. 4—NO. 18 NORTH PLAINFIELD, N. J., SATURDAY, JULY 25, 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

Crab fishing is unusually good at present in the neighboring bays.

The regular monthly meeting of the North Plainfield Board of Education will be held Monday evening.

Rev. Dr. J. H. Woods, of Somerville, will occupy the pulpit of the First Baptist Church tomorrow.

A young child of Stonewall Jackson's, this borough, died Monday afternoon after an illness of a few days.

Special music will be rendered at Trinity Reformed Church tomorrow at both morning and evening services.

The sale which was to have taken place at Mountain Park Inn, last Saturday was postponed on account of rain.

The annual excursion of Trinity Reformed Sunday School to the seashore will take place next Thursday.

The annual conference and business meeting of the Swedish Lutheran Church will take place September 8.

Members of the German Reformed Church held a picnic on the church grounds Thursday afternoon and evening.

The Board of Governors of Muhlenberg Hospital will hold a regular meeting Monday evening August 3 at the Library.

Michael Wood, who was arrested last Sunday afternoon on Somerset street for drunkenness, was fined $3 Monday evening by the Recorder.

W. W. Warnock, of West Front street, presented the children of Netherwood Camp with cake and forty quarts of ice cream last Saturday.

The third annual outing of the Old Oaken Bucket Club took place at Glendale Grove, last Sunday. About one hundred were present.

Rev. W. E. Honeyman and wife, of Lincoln place, this borough, left for Mount Freedom, N. J., where they will remain until September.

R. H. McCullough, of this borough, has been chosen a delegate to attend the session of the national body of the New Jersey Federation of Catholic Societies.

Miss Mary Reynolds and James Block, of this borough, were married in St. Mary's Church Tuesday evenings. They will reside at the groom's home on Stone street.

About thirty members of the Knights of the Golden Eagle attended the Y. M. C. A. meeting Sunday afternoon when Rev. F. E. Taylor, of Brooklyn, made an address.

The claim of Miss Mildred E. Everitt, of Somerset street and Mountain avenue, for injuries received in the Central Railroad wreck at Westfield last January, has been settled.

Assemblyman Samuel S. Swackhamer, has accepted an invitation to address the annual Hunterdon County Farmers' Alliance picnic, August 19 and 20, on "Democratic Issues."

There will be a special service held in St. Joseph's Church, this borough, Monday in memory of Pope Leo XIII. There will be a solemn mass at 9 o'clock, and special music.

The third band concert was held in City Hall Park Thursday evening. These concerts have become so popular that people from neighboring towns come by trolley to attend them.

The funeral of Andrew Mojack, the seventeen months old child of James Mojack, of Jackson avenue, who died Thursday, will be held this morning at ten o'clock from the house.

Freedom Castle, No. 42, Knights of the Golden Eagle will give the first of a series of entertainments planned for, next Tuesday. The program will include moving pictures, vocal and instrumental music.

The annual excursion of the First Presbyterian, Park Avenue Baptist and Congregational Sunday Schools of Plainfield, and the Presbyterian Church Sunday School of Dunellen, left for Asbury Park Thursday morning.

A strange epidemic of a contagious nature has broken out among the horses in Hunterdon county. The animals are suddenly attacked with a swelling of the limbs which soon become so stiff that it is impossible to get them out of the stable.

An interesting modern invention is a clock for busy or absent minded people. The user makes a note on a card and inserts it in the clock. At the proper time the clock rings a bell and projects the card before the clock face. Several cards can be inserted simultaneously.

Atlantic City Excursion Sunday, July 26th, $2.50, via New Jersey Central.

Plainfield Republicans Put on War Paint

The Plainfield City Republican Executive Committee met Tuesday night and planned for the fall campaign in that city. The committee's secretary, was instructed to issue the calls for the primaries at the necessary time and it is the desire of the committee that all members of the city and county committees forward to the executive committee the names of the election officers.

A committee on naturalization was also appointed.

The first district of the Fourth Ward has been designated as the place for one of the voting machines allowed for Plainfield. This place is chosen owing to its central location, making it possible for any one interested to see it in operation. The machine will probably be used at the approaching election in September.

Oregon Pheasants for Somerset County.

About 100 English and Oregon pheasants have recently been liberated in the woods near Far Hills in the hope that these birds of gorgeous plumage might increase and add to the attractions of Somerset county. These pheasants will have their natural enemies in the woods, but every citizen of the county has been appealed to to assist the workings of the game laws where attempts are made to evade them.

Was He Drowned?

Geo. Honeyman, age 25, son of Philip Honeyman, is supposed to have been drowned in the Millstone River at Weston on Saturday. It seems that Honeyman had been camping near Weston for almost a month. On Saturday he started for Bound Brook, where he was seen to get supplies for the camp. He went to the station and bought a ticket to Weston. Later in the day the remaining campers became anxious about their friend and started to look for him.

Near the dam a can of oil was found. It is thought that on his return he slipped while getting into the boat, had fallen overboard and was carried over the dam nearby by the swift current.

On Monday afternoon the boat was found about a mile down river. No other particulars are known.

Weather and Crop Bulletins.

Central Office, U. S. Weather Bureau,
Atlantic City, N. J., July 22, 1903.

The first three and last days of the week were characterized by heavy rains that were generally beneficial, especially in the southern section. That on the 18th was accompanied by high winds, which did considerable injury to the growing crops, in places, flooding some fields and blowing much fruit from the trees. The intervening days were warm and favorable to crop growth. Corn, tomatoes, oats, and in fact all crops are now in fine growing condition. Winter apples promise a fair yield in places, while peaches and pears are generally far below the average. The harvesting of wheat, rye and timothy hay is about completed, and housed in fairly good order. The temperature during the week averaged about 5 degrees below the normal. The rainfall was excessive, especially in the southern and central sections.

New Jersey at St. Louis.

A very elaborate work on the resources and advantages of the State for distribution at the Louisiana Purchase Exposition is being compiled by Hon. Ellis R. Meeker, of Elizabeth.

The object is to attract special attention to the great progress being made in the State, prominently setting forth its desirability as a place of residence, manufacturing and kindred industries, agricultural pursuits, investment and general employment.

The work contemplated will be of greater scope and far more reaching as a citizen gatherer among the visitors at the Exposition than any heretofore published; it will also be a valuable work of reference for all citizens, as it will contain much important data and interesting statistics.

There is no one better qualified for the compilation of such a work than Mr. Meeker, whose extensive knowledge of and interest in State affairs and acquaintanse with the public men throughout the State specially adapt him for a work of this character.

J. M. Cahart Buys New Store.

J. M. Cahart, of 43 Somerset street, has purchased the New York Painting and Decorating Company's Park Avenue store. Mr. Cahart will combine the two stores at the Park Avenue location under his name. Mr. Cahart recently came to Plainfield from Rahway, and by strict attention to business has firmly established himself in the confidence of the people, and the recent purchase will no doubt serve to make him still more popular. His Somerset street store is for rent.

Special Excursion to Atlantic City, July 26th, via New Jersey Central; fare, $2.50.

SAVED BY A BULL.

Drowning Child Caught the Animal's Tail and was Dragged From Brook.

The four-year-old child of Charles M. Bandell, a farmer living near Bound Brook, had a narrow escape Monday from drowning, and owes its life to a Holstein bull, states a news item.

The child with its nine-year-old brother, went fishing in a brook that runs through part of the Bandell farm, which is used as a pasture. The children were sitting on a bank, fishing in a pool about four feet deep, when the younger child slipped into the water. The brother in his fright left the child and ran to call his father, who was cutting hay in an adjoining field.

By chance the father saw the child fall into the brook, and was on his way to rescue him when to his amazement, he saw the child being dragged out of the brook by the bull, which had been standing in the water.

The child, in the usual manner of a drowning person, snatched at anything, managed to catch the tail of the bull, and the bull in sudden suprise, rushed from the brook.

Notwithstanding his being a life-saver, the bull is to be killed having been sold to a butcher last week.

Neglected to Repeal Old Law.

TRENTON, July 21.—The disclosures of several oversights in the transactions of the last Legislature have brought to light the fact there are two practice acts on the statute books of this State, both legally there, but one unintentionally. There are also on the statute books two laws governing the course of precedure in courts for the trial of small causes.

This state of affairs was brought about by the failure of the Legislature to incorporate repealing clauses in the revision of the practice act and in the act concerning courts for the trial of small causes, both of which were passed at the last session of the last Legislature.

While with no other information at hand, it would be safe to assume that it was the intention of the framers of the revised practice act that it was to supplant the old one in so far as the two did not conflict; yet it seems that it was their intention that the new act should supplant the old in its entirety.

Charles L. Corbin, a member of the commission by which the revised practice act was prepared, when his attention was called to the failure of the Legislature to pass a repealing clause or act, said that the commission intended that the new act should supplant the old one.

At the same time he said that, in his opinion, the provisions of both the new and the old acts would be legally operative except where they conflict.

As an example of the conflict of the two laws it has been noted that the old practice act contains a revision for service upon a non-resident or absent defendant by publication. This is not referred to in the new act, and hence without the repeal of the old act would be operative in spite of the statement of a member of the revision commission that the old act was to be superceded by the new.

The commission appointed to rectify and revise the statutes is composed of Supreme Court Justices Dixon and Fort and Lawyer Charles L. Corbin. Wilbur A. Mott is secretary of the commission.

National Woman's Suffrage Society.

A branch of the National Woman's Suffrage Society was formed at Ocean Grove Tuesday. The association, which is to be known as the Ocean Grove and Asbury Park Political Equality Club, was organized in the Temple in the afternoon, after Mrs. Minola Graham Sexton, of Orange, the State president; Mrs. Florence Howe Hall, of Plainfield, and Miss Harriet May Mills, of Syracuse, had outlined the objects of the parent society. Mrs. Acksah Dunham, of Ocean Grove, was chosen president. At a conference of workers, Mrs. Sexton told of the work performed by her auxiliary in obtaining the passage by the New Jersey Legislature of a law providing for the appointment of a commission to inquire into the advisability of establishing a State reformatory for women.

$2.50 to Atlantic City.

On Sunday, July 25th, the New Jersey Central will run a low-rate Excursion to Atlantic City, fare, $2.50 for round trip. Special train leaves New York at 8 a. m., South Ferry at 7.55, stopping at West 8th Street at 8.19, Elizabeth, 8.12, Newark at 8.05 a. m., Elizabethport at 8.25 a. m., arriving Atlantic City at 11 a. m.; returning leave Atlantic City at 7.00 p. m. This is one of the best outings of the season at the greatest of watering places.

Sunday Excursion to Atlantic City, July 26th, via New Jersey Central; tickets $2.50.

Tornado Touched Somerville

A hailstorm and a tornado which passed over Somerville Wednesday afternoon did a great deal of damage in the outlying districts south of the Raritan River. Hailstones as large as hazelnuts fell for fifteen minutes in the streets, and caused predestrians to flee for shelter.

An hour after the storm had cleared the tornado struck the town, tearing limbs from trees, and awnings and signs from buildings.

It passed over the Raritan River to the estate of James B. Duke, where it uprooted great trees, demolished the roof of a big conservatory and tore down electric light poles all over the big estate. A party of city sightseers who were travelling about the estate were driven to shelter. The party afterward found the roads blocked with great trees which had been uprooted.

At Roycefield the tornado blew a chimney off the Jersey Central Railroad station, blew down Hagerman's big hay press and unroofed a brick dwelling house.

A Valuable Horse Killed

A valuable horse belonging to Fred. W. Dealaman, of 19 Somerset street became frightened Thursday and ran away. As it reached Nelson's Hotel in the Notch, it struck its head against a telephone pole, and fell over dead.

Mr. Dealaman's brother had just alighted from the carriage to go into Wiman's blacksmith shop, when the horse became frightened.

Historical Property

Franklin Conklin, of the firm of Flood & Conklin, of Newark, who recently purchased the Culberson farm at Basking Ridge, will take possession of the place September 15. This property occupies one of the most prominent sites in that locality, and possesses much historical interest. It is the place at which Lieutenant-Colonel Lee was captured by the British during the Revolutionary War. A graphic description of the capture is given by Paul Liecester Ford's "Janice Meredith." Part of the old Tavern where Lee was made prisoner is still standing, though additions to it were built.

When the State Draws the Line.

Judge Joline, of Camden, a few days ago refused to send a fifteen-year-old boy to the State Home for Boys in order to relieve the lad's relatives of responsibility. The boy's mother is dead and his father is a traveling salesman. The witnesses failed to convince the judge that the boy was bad, and he was placed in charge of the probating officer. "We don't send boys to the Reform School for merely being mischievous; if we did, nine tenths of the boys in the county would be in the institution," said Judge Joline. What a world this would be without mischievous boys, and how few of us would have escaped doing time if mischievousness was a crime! It is well sometimes to have a judge who is not too old to remember that he was once a boy.—*Trenton Times.*

The Local Paper.

An exchange truthfully says: The arrival of the home paper is one of the events of the week. It is close to the heart of the family, old and young. All that has occurred for the past week is chronicled in its columns. Nothing takes its place.

A newspaper is like a man—because it generally reflects some man—and it should be judged as a man should be judged, largely on the whole. No man lives a perfect life; no editor prints a perfect paper. If an editor is honest he is bound to offend some one every day of his life; if he doesn't offend some one the editor is namby-pamby and flabby. The same thing is true of the average man. A newspaper is bound to make mistakes; in getting news it must necessarily take heresay. But if, in the long run and in the main, week after week and year after year, a paper stands for decency, for honest thinking and clean living, and condemns sneaks and cheats and low persons, it will do good. Frequently an item of important news is published and offends some one. This cannot be avoided. Then, again, the editor is often misinformed by some responsible party unintentionally, and so the thing goes.

Editors are the first to hear gossip or scandals, indiscretions of men and of women, things unfit for publication, intrigues, clandestine meetings, flirtations, and, in fact, all neighborhood scandals. If one-half they heard was published there would be divorce, social ostracism and other woes; there would be shotguns and gore, imprisonment, lynching, desolate homes, shame, humiliation and misery. The editor also learns much of the hypocrisy of life, and it is a wonder that he believes anything on earth or in the hereafter. People who abuse him often owe their standing in society to his forbearance.

Be on hand for the Atlantic City Excursion via New Jersey Central, Sunday, July 26th; fare, $2.50.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

Rev. J. A. Thompson of Middlebush has sweet corn growing in his garden that on July 13 measured 9 feet and 8 inches.

Last week a fourteen foot shark got tangled in one of W. T. Vandyke & Co.'s off-shore pounds at Long Branch. After being speared to death, the crew was unable to lift the net until the monster's tail had been cut off.

Fortune-tellers are under the ban. Two were arrested at Long Branch and fined and warned that a second offense meant the full penalty, which is a fine of $25 or ninety days in jail, at the discretion of the court. The women who were fined were Mrs. Caroline Smith and Mrs. Sarah Smith, the latter of Elizabeth, who has been going there for five years.

When John Brooks arrived at his home at 837 Elm street, Camden, Tuesday night he found his four-year-old son, David, choking. The little fellow was growing black in the face when his father began pounding him on the back. In a short time the child coughed up a campaign button.

Whether Methodists should kneel or not at prayers was the earnest discussion at one Dr. O'Haulon's Bible class meetings this week. Some objected because of dusty floors, others because the pews were too close together. Dr. O'Haulon said the time was coming when kneeling boards would be in every church.

Owners of fields of blackberry and raspberry bushes in the suburbs of the Oranges find it impossible to pick the berries because of the onslaught of mosquitoes. One South Orange grower said that if the present plague continued much of his crop of berries would rot on the bushes.

A young robin of an even light tan color, was an unusual sight at the home of George Smith, who lives near Glen Moore, one day last week. At first Mr. Smith thought it was a young chick, but when he saw the mother bird feed it he made an investigation, and to his surprise saw that it was a robin.

A number of Bayonne boys have introduced a new and exciting amusement. They gather on Avenue C, which is paved with asphalt, each with a full-rigged miniature yacht. The yachts are ranged in line and released at a signal of the judge. The brisk wind causes the boats, which are mounted on wheels to travel at a lively rate.

Albert Fischer, wife and two-year-old child, of Magnolia, Camden county, are very ill from the effects of eating sardines that were in a tin box. All took freely of the sardines and an hour after the meal Mr. Fischer suffered so much that he lost consciousness. His wife, so ill that she could hardly stand, staggered to the door and called a passerby, who brought a physician. Mr. Fischer's condition is most critical, and the physician has almost no hope of saving him. There is a probability of the others recovering. The sardines had evidently been packed two or three years ago.

Mrs. Aleta McCollough, who has a carpet-weaving establishment at New Brunswick, has asked the police to help her learn whether a young man at her home is her son. She was unable to care properly for her baby, years ago, and gave him to a neighbor who later moved away and Mrs. McCollough lost track of her son. She gave a young man work last winter, and one day he told her he was the missing boy. She believed him until she heard him say in his sleep that she "was an easy mark." That aroused her doubts and she appealed to the police. If she discovers that he is an impostor she says she'll land him in jail.

A mammoth Gulf Stream rubber back turtle, weighing 1087 pounds, and measuring ten feet three inches in length and six feet seven inches over the back, was brought ashore last week at Wildwood, by the Anglesea pound fishermen, and is now on exhibition on the outer end of the Wildwood Casino Pier. So big is this monster that it required the combined strength of 28 men to place it in the big tank on the pier. This specie of turtle belongs to and is hardly ever found outside of the southern waters. From Wildwood the gulf stream is about 200 miles off shore. It is generally supposed that this turtle followed the Gulf Stream north, that it worked its way out of the warm current, and becoming lost, strayed in to the coast when caught in the pound nets. The fishermen insist that it is several hundred years old. At any rate it is the most wonderful monster that has ever been brought ashore here and is proving to be a great attraction to hundreds of visitors to the pier daily.

Opposition to Amendments

The Hunterdon *Republican* has this to say about the proposed amendments:

"There is developing considerable opposition in some quarters to the proposed constitutional amendments. The new court, which they propose to create, it is said will cost the State some thing like $70,000 per year, and yet effect what is most desired. It is also claimed that the lawyers who prepared the amendments made no inquiries into the reforms and experiences of other States. The opponents of these amendments claim that they are but a patch upon our already antiquated system. Our State now has the most elaborate, cumbrous and expensive judiciary system in the country. There are nine kinds of courts in New Jersey at the present time above the municipal or justices' courts. These nine courts are Oyer and Terminer, Quarter Sessions, Common Pleas, Orphans', Circuit, Supreme, Prerogative, Chancery and Errors and Appeals. The change, if any is made, should be in the direction of greater simplicity, instead of adding to our already complicated judiciary system."

Mosquitoes Stop a 700 Horse-Power Engine in Missouri.

It is not denied that New Jersey has a few mosquitoes, but it has never been intimated that they were plentiful and strong enough to put a 700 horse-power engine out of business as was the case in St. Louis recently, as the following news item states that mosquitoes stopped a 700 horse-power engine in the plant of the Pittsburg Reduction Company at Alta Sita, a suburb of East St. Louis. Examination showed that mosquitoes, attracted possibly by the oil on the engine, had been mashed to death on the cross heads and along the piston runs until they formed a gummy mass that even steam pressure could not overcome. The factory now has screens.

Lightning Hit Woman's Corset Steel.

Mrs. Conrad Wagner, of Hackensack, while hurrying through the storm Wednesday night, was struck by lightning. The bolt hit a corset steel and jumped to the right leg, burning the flesh in its course downward.

The tooling was torn off and the shoe shattered, every nail in the latter burning blisters on the foot. The woman's side is paralyzed.

Apply the Remedy.

It is with the merchants of any town to hold the trade or drive it away. In other words they can by high prices and neglect of the people's wants, drive it to other towns and thus injure their own. Stores conducted in the interests of patrons are as indispensible as good schools, churches and morals to the growth and development of the community.

There is considerable talk about the trolley affecting the business of the town when it is the merchant himself who controls it. He must go after it, advertise for it, and let the people know of the advantages to be had at his store. It is where people can save that interests them above everything else. Why does the independent city merchant advertise in numerous newspapers all the year round? Would he do this if it did not pay? He is constantly telling the readers of these papers about his prices and goods, and they go to him to buy. In this respect the average country merchants fail to see the advantage.

One of our town merchants, who having already caught the spirit of our argument and put it in action, acknowledges the truth of it, and he now helps new customers on the trolley with well filled baskets and bundles.

On this line of thought an exchange has this to say:

The board of trade and the improvement society of any town cannot undertake a more important work than to aid and stimulate its merchants in making it distinguished for selling good goods at low prices. When business men aim at this they will find a way to effect it. Not one, two or three, but all merchants will become keen as buyers for the sake of themselves, their customers and town. Factories may be important. Advertising the town is necessary. But more fundamentally necessary than all else to the self-preservation of a town, is it for its merchants to be able to get and to give as much good goods for a dollar as any other merchants elsewhere. In other words a town's prosperity depends on home trade and home trade depends on resolutely solving the problem of buying at the bottom price. When merchants of any town can buy so as to sell lower than other merchants, look out for a real estate and building boom there.—*Pennington Post.*

W. E. Bartle, of Second and Church streets has just put in a new stone planing machine. The utility of which is its stone cutting capacity which will enable him to do work with more rapidity, accuracy and economy than what could be accomplished by the hand process.

POPE'S LONG LIFE IS ENDED

The Pontiff's Last Words Were of Benediction on Those Around Him.

GAVE OREGLIA AUTHORITY

The Dean of the Sacred College the Temporary Head of the Church ---Scenes in the Sick Room.

Rome.—Pope Leo XIII. died at four minutes past 4 o'clock Monday afternoon. His last moments were comparatively peaceful and painless, and were preceded by a period of insensibility. Around his bedside at the final moment were the Cardinals, the relatives, and the members of the Papal Court. Before lapsing into unconsciousness the dying Pope feebly moved his lips, his last articulate words being those used in bestowing a benediction. Gradually the shadow of death spread over his face, and Dr. Lapponi noted his last fluttering heart beats, which gradually became slower, until they finally stopped.

The Pope entered into what the doctors believed to be the death struggle at about 3 o'clock p. m. Dr. Mazzoni, on leaving the sick chamber at 3:30 p. m., said the indications then pointed

POPE LEO XIII.

to the Pope's death within two hours. At 4 p. m. the Pope had lost all consciousness, and in this state he passed away.

The news of the Pope's death spread rapidly throughout Rome, and caused a profound feeling. The whole city is now in mourning.

While the doctors were examining their patient in the morning, believing him to be in a stupor, he suddenly fixed his eyes on them, saying:

"This time, doctors, you will not win in your brave fight with death."

"It is your Holiness who is brave," replied Dr. Lapponi, but before the remark was uttered the Pope was again unable to understand what was said.

The following medical bulletin was issued at 9.35 a. m.:

"During the night the Holy Father rested only at short intervals. His general condition remains grave. Pulse, 94; respiration, 32; temperature, 36.2 centigrade."

Although the morning's bulletin was calculated to give the impression that the Pope's condition was somewhat ameliorated, in reality the doctors considered that the lowering of the pulse and the diminution of the respiration were due to great prostration of the whole organism. It was reported by persons at the Vatican in the morning that the Pope continued, now and then, to mutter phrases, although unconscious, and that his mind evidently returned to the events which impressed him most before his illness began. Every time his mind cleared he seemed to grasp the fact that it might be the last time, and he made use of it.

At 11.40 o'clock there was great alarm at the Vatican as the Pope was suffering from a grave increase of cardiac affection. Dr. Lapponi really thought the end had arrived, and Cardinal Serafino Vanutelli, the Grand Penitentiary, began the prayers for the dying and gave the Pontiff absolution in articulo mortis.

His death was considered so imminent that all the Cardinals were present, and the members of the Diplomatic Corps were admitted to the sick room, as, according to tradition, Popes must die surrounded by the Sacred College, the Pontifical Court and the diplomats accredited to the Vatican.

Just at that moment a large party of American tourists, unaware of the critical situation of the Pontiff, ascended the grand staircase, talking and laughing. They were approached by a gendarme, who said, "Please do not make any noise, as the Holy Father is dying."

This produced great emotion among the tourists, and they immediately retired.

When, during the alarming crisis about noon, he was lying on his bed, perfectly motionless, while around him knelt the Cardinals and other members of the Papal Court, without any preliminary restlessness the Pope opened his eyes, which fell on Cardinal Oreglia, who was at his side, and he said solemnly:

"To Your Eminence, who will so soon seize the reins of supreme power, I confide the Church in these difficult times."

Then Mgr. Bisleti, the Master of the Chamber, asked for the Pope's benediction for the court, which the Pope granted, adding, "Be this my last greeting."

Then the Pope gave his hand to kiss to the Cardinals present, who were Oreglia, Rampolla, Serafino Vanutelli, Della Volpe and Vives y Tuto.

Dr. Lapponi profited by the Pope's animation to administer restoratives, after which the patient sank back as suddenly as he had revived.

The words the Pope addressed to Cardinal Oreglia are much commented upon, and some wondered whether the intention of Leo XIII. was to indicate Cardinal Oreglia as his successor.

The first notifications from Cardinal Oreglia of the Pope's demise were sent to the Cardinal Dean, representing the College of Cardinals, and the Cardinal Vicar, representing the Bishopric of Rome. Immediately after the accredited representatives of the foreign powers to the Vatican were informed. Monsignor Nocella, the Secretary of the Sacred College, communicated with those Cardinals who were absent from Rome, and requested them to attend immediately at the forthcoming conclave.

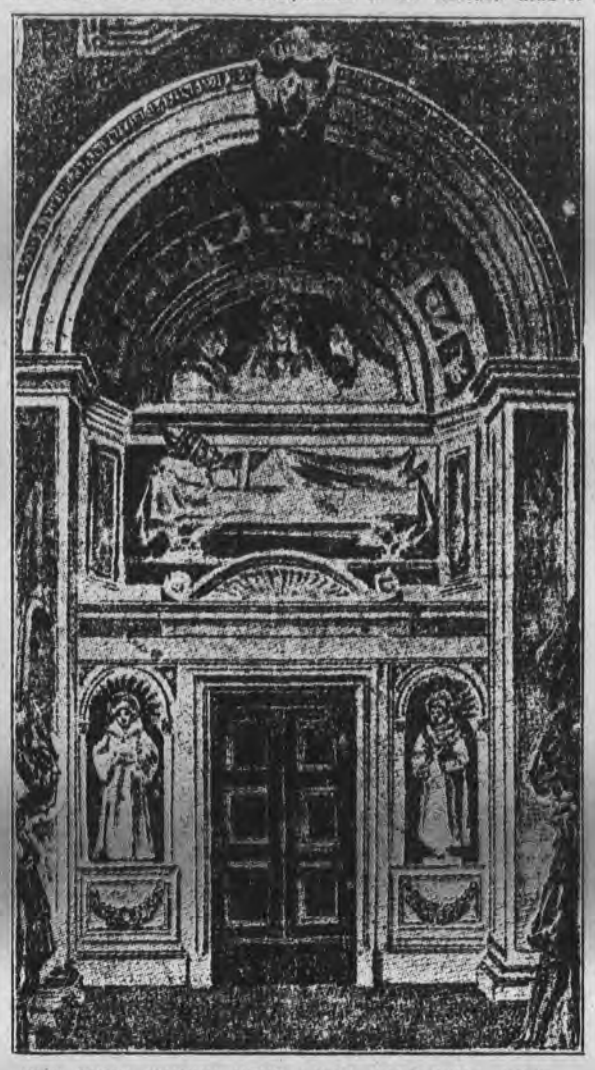
Orders were sent to all the churches and religious communities in Rome, directing the clergy to hold special services and to celebrate requiem masses.

Those present in the Pope's chamber at the time of his death were Cardinal Serafino Vanutelli, Sacristan Pifini, Count Camille Pecci, the Pope's nephew; Dr. Lapponi and the Pontiff's valet, Pio Centra.

The occurrences in the death chamber immediately following the Pope's demise were of impressive solemnity. Couriers had been dispatched to summon those delegated to perform the first religious offices for the dead Pope, and soon the chanting of the Franciscan monks was heard, as, two by two, in coarse brown habits and with sandaled feet, they proceeded to the room in which Leo lay dead. From time immemorial the Franciscans have been Penitentiaries of St. Peter's. Following them came the Noble Guards, to watch over the Pontiff's remains, the brilliancy of their uniform contrasting strikingly with the sombre attire of the monks and the solemn dignity of the chamber itself. The only sound heard was the measured chanting of the Psalms of Penitence by a group of monks kneeling beside the couch of death. Two Noble Guards took up positions at the foot of the couch and stood there, rigid and silent as statues, with swords drawn and reversed, pointing to the floor.

The death chamber preserved much the same appearance as it did during the illness of the Pope. It is situated on the third floor of the Vatican, the apartments fronting the splendid piazza of St. Peter's and the window of the room commanding a view of the tall obelisk and playing fountains, with Rome stretching off beyond the Tiber. Across the middle of the room hang heavy draperies, partly concealing the bed on which reposed the body of the Pontiff. By the side of the low bed burned a number of candles, and from above looked down the picture of the Madonna, with the infant Jesus in her arms. Leo's desk was closed, but some of the books on religious topics which he kept near him remained on it.

Pope Leo, who had undertaken exhausting labors in spite of the warnings of his physician, Dr. Lapponi, became seriously ill on July 4 with a bronchial and catarrhal ailment, which rapidly developed into pulmonary trouble, affecting his right lung. He sank steadily in strength, although maintaining the brightness of his intellect until within the last few days. On July 5 he expressed a desire to Mgr. Pifferi, his private confessor, to receive



THE TOMB WHERE POPE LEO'S BODY WILL REST.

The design, made by Leo himself, of the tomb that will be erected as his final resting place, and which custom dictates will be built under the auspices of the Cardinals made by Leo during his reign.

solemn communion in the evening, saying: "To-morrow I shall be no more."

At 11 o'clock that night the last sacrament was administered by the Grand Penitentiary, Cardinal Serafino Vanutelli, in the presence of the Pontifical family. After the sacrament the Pope passed an almost sleepless night, being kept alive by stimulants constantly administered. From that time on there was no hope of his recovery, except during a brief rally on Wednesday, July 8. At various times extreme unction was repeated.

Twice during the week after he was taken ill the patient was operated on by Dr. Mazzoni for extraction of serum from the lung cavity. Each time he obtained great relief. Besides Dr. Mazzoni, Dr. Rossoni was called in to assist the regular physician, Dr. Lapponi.

The second Sunday of his illness passed favorably, but hopes were hardly entertained of his recovery. Twenty-four hours later the august patient lapsed into semi-consciousness, and his condition grew more serious than it had been at any time since he was stricken. From then on hope fluctuated until the end came.

ITALIAN KING GRIEVED.

The Official Gazette Refers Sympathetically to Pope Leo.

Rome.—Premier Zanardelli telegraphed the news of the death of the Pope to King Victor Emmanuel at the Castle of Racconigi. The King, although he expected the announcement at any hour, was much touched, and is reported to have said:

"No matter what our complaints may be because of distant and recent controversies and discourtesies, I cannot help feeling deeply affected by the disappearance of a great and enlightened mind and the head of the Church of my people."

The Official Gazette, the Italian Government organ, after announcing the death of Pope Leo, adds:

"His Holiness, who, because of his elevation of mind and the severe austerity of his example, received frequent warm manifestations of reverence, undertook in the twenty-five years of his Pontificate numerous conspicuous works which will leave a lasting remembrance of his name. Above all, Pope Leo's active Pontificate will remain in history as a document of the authority which the law of the Italian State guarantees to the exercise of the supreme religious power."

Premier Zanardelli sent circulars to the Prefects throughout the kingdom instructing them that, in the event of funeral ceremonies taking place within their jurisdiction and the ecclesiastical authorities inviting them to participate, they should take part in the functions. The Minister of War ordered all military bands to cease playing in public.

All the newspapers, including those favorable to the present institutions, publish long eulogistic articles about the dead Pontiff. The only discordant note is struck by the Socialist organ, Avanti.

PRESIDENT ROOSEVELT'S REGRET.

An Expression of Appreciation of the Pope's Exalted Character.

Oyster Bay, L. I.—President Roosevelt was deeply touched by the death of Pope Leo. At his home on Sagamore Hill on being informed of the demise of the venerable head of the Catholic Church, he dictated the following for the press:

"The President expressed his profound regret at the death of the venerable Pontiff, whose long career no less than his exalted character has commanded the respect of all Christendom. The President said that in uttering these sentiments he was giving expression to the feeling of all the people in the United States, wholly without regard to their religious faiths."

State Department Notified.

Washington, D. C.—Charge d'Affaires Iddings at Rome has notified the State Department that the Pope died at 4.04 o'clock.

The State Department, upon learning of the death of the Pope, sent the following cable dispatch to Cardinal Rampolla:

"Cardinal Rampolla, the Vatican, Rome:

"The President desires me to express his profound sense of the loss which the Christian world has sustained in the death of his Holiness Leo XIII. By his lofty character, his great learning, and his comprehensive charity, he adorned his exalted station and made his reign one of the most illustrious, as it has been one of the longest, in the history of the Catholic Church.

"JOHN HAY."

Popes of Two Centuries.

Counting St. Peter as the first Pope, Pope Leo was the two hundred and sixty-third Pontiff. The Popes of the last 200 years were as follows:

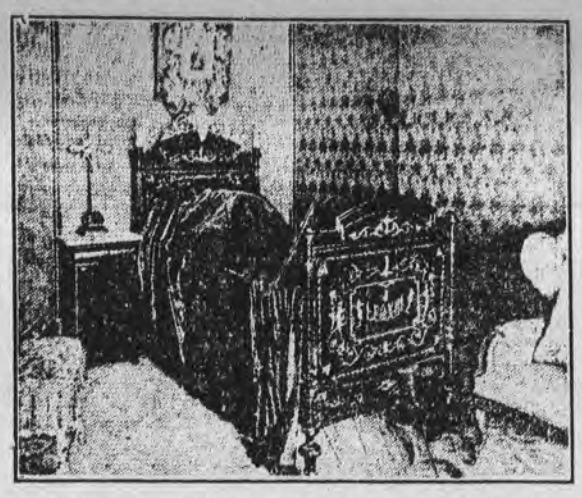
	Elected.	Died.
Innocent XII.	1691	1700
Clement IX.	1700	1721
Innocent XIII.	1721	1724
Benedict XIII.	1724	1730
Clement II.	1730	1740
Benedict XIV.	1740	1758
Clement XIII.	1758	1769
Clement XIV.	1769	1774
Pius VI.	1775	1789
Pius VII.	1800	1823
Leo XII.	1823	1829
Pius VIII.	1829	1830
Gregory XVI.	1831	1846
Pius IX.	1846	1878
Leo XIII.	1878	1903

CARNEGIE ADVISES GREAT BRITAIN

Fears That Protection Scheme Would Make Great Alliance Impossible.

London.—Andrew Carnegie, in the course of a speech at Dingwall, Scotland, said that he hoped that the British people would consider the tariff question thoroughly, because Great Britain's future as an empire depended upon its decision.

He was certain that a discriminating tariff as between the United States and Canada would not tend toward the unity of Great Britain and America, without which the English speaking race could not become the dominant world power.



POPE LEO'S BEDROOM IN THE VATICAN APARTMENTS.

Strikers Enjoined From Picketing.

Judge Dunwiddie, of the Circuit Court of Rock County, Wis., granted an injunction against picketing at the Berlin Machine Works. The injunction is very sweeping in its nature. The Machinists' Union has been out on a strike for nine weeks.

Slays Girl and Himself.

To avoid arrest on the charge of eloping with a fifteen-year-old girl, A. A. Earl, of Caldwell, Idaho, shot and killed the girl and then himself. Earl left a wife and two children

New Capital of Australian States.

The committee appointed to select the site of the new capital for the federated Australian States has recommended Tumut, New South Wales, 264 miles southwest of Sydney. Tumut is situated in a rich agricultural district and in 1899 had a population of 1500.

Outlook For Farmers Good.

Secretary Wilson, who returned to Washington from a trip through the West, said there would be a short corn crop, but the outlook for the farmers generally was good.

An Alleged Poisoner Arrested.

The deaths of Mrs. Annie Mull and her baby, at Seattle, Wash., resulted in the arrest of E. C. Crowell, who was engaged to the woman, he being suspected of giving her some drug which caused death.

Son Born to the Clevelands.

A son was born to former President and Mrs. Grover Cleveland at their summer home at Buzzard's Bay, Mass. The attendants said that all conditions affecting both mother and child were satisfactory.

Louisville Fire Chief Killed.

At Louisville, Ky., Fire Chief Edward Hughes was run over and killed by a trolley car. He had been at the head of the Louisville Fire Department for twenty-five years, and recently was retired on half pay.

Old Age No Longer a Bar.

President Roosevelt has issued an order eliminating old age as disqualification for eligibility to appointment as laborers in the Government service. The physical qualifications, however, must be met.

TORNADO HITS PATERSON

Four Persons Are Killed and Many Houses Wrecked.

FLYING DEBRIS HURTS SCORES

A Woman Dies From Fright and a Boy Is Guillotined—Tornado Demolished Houses and Factories in the Twinkling of an Eye Without Warning—Many Miraculous Escapes From Death.

Paterson, N. J.—A dense black cloud, assuming the shape of a cone, and whirling with furious rapidity, loomed up over the top of Garrett Mountain, just southeast of Paterson, at 3 o'clock p. m. In less than ten minutes it swept over that section of the city known as South Paterson, killing four persons, seriously injuring fifteen, and hurting more than a hundred, and wrecking six buildings and damaging more than 200 others. Then it passed over the Passaic River, across the meadows, and disappeared in the air.

The tornado was directly preceded by a literal cataract of rain. Close to the depot of the Lackawanna Railroad it first struck the earth. It swept up Main street and passed through a big brick house at No. 680, tearing it to pieces.

Here occurred the first death.

Joseph Van Dorn, a plumber, was at work inside. He was crushed lifeless. Four companions were also buried in this wreck, but were dug out fearfully mangled and taken to St. Joseph's Hospital.

It was this hospital which the tornado next attacked. It stood right in the path of the blast, and its solid construction only saved it from destruction. Its windows, awnings and frame portions were whirled up into the inky sky, nearly every pane of glass was smashed, and about forty big shade trees in the grounds were torn out by their roots and deposited in the nearby road.

Nicol & Pohly's silk mill in Front street caught one edge of the tornado and escaped with the loss of a big section of its roof. The structure was crowded with operatives, however, and the doors were locked to prevent them from rushing out to certain death among the flying debris.

The Passaic Rolling Mills next received the full fury of the blast. The roof was torn off and sections of the wall fell in. Over a dozen workmen were injured there.

John Saunders and John Connolly sustained such severe injuries that they were carried to St. Joseph's Hospital.

In the Sandy Hill section the tornado transformed a score of pretty frame cottages into heaps of kindling wood. The inmates were compelled to take their chances in the open air. Charles P. Lowerie, a blacksmith, rushed out of his shop just as it fell at his heels.

At Chestnut and Clay streets the wind tore to pieces a big laundry building and the huge timbers began to descend upon the house at 73 Chestnut street almost opposite. One of the frightened inmates, an eight-year-old boy named Charles Hancock, ran out. As he did so a timber weighing 200 pounds came down upon him like a cannon ball, completely severing his head from his body.

Not a tree or telegraph pole was left standing in the track of the storm.

The General Hospital buildings were next visited. They sustained damages similar to those of St. Joseph's.

For a moment the blast swirled in its course and struck a corner of the magnificent residence of the late Attorney-General, John W. Griggs. It was severely damaged.

Mary Nevins, seventy years old, was the third victim of the tornado. Her home in Straight street was on the edge of the wind current. She was so frightened, however, by the roar and darkness, that she fell dead on her doorstep from heart disease.

In all about fifty buildings were wrecked. The storm tied up local traffic of all kinds. Trolley wires were blown down everywhere.

Men, women and children ran frantically about the streets, bleeding from wounds inflicted by the flying debris. Every doctor in town had his hands full, and the hospitals were besieged when the storm abated.

To add to the horrors of the storm, fires broke out in several sections of the city, caused by falling buildings. The heavy rainfall materially aided the firemen, however, in extinguishing the flames.

About 4 o'clock the sky cleared again and rescue parties were made up to render all the necessary help to sufferers. At first it was reported that several hundred people had been killed. A view of the havoc wrought by the storm makes it seem miraculous that the death list is so small.

At midnight the police had secured a record of 125 persons who had been treated at the different hospitals.

One case was recalled at the General Hospital, where a sliver of wood had been driven three inches into the hip of an unknown man.

The damage was greatly increased by a heavy rainstorm, which began about 10 o'clock p. m., and continued for two hours. The deluge seriously hampered the work of the rescuing party.

Father Shoots His Son and Kills Himself.

At New Albany, Miss., George Churchill, a planter, shot his son and then committed suicide as the result of a family quarrel. The son had forced the father to leave home, and when they met the shooting occurred.

Cuba to Enter Postal Union.

Minister Squires, at Havana, Cuba, says, in a telegram to the State Department, at Washington, that just prior to its adjournment, the Cuban Senate approved the Postal Convention with the United States and an agreement for Cuban admission to the Postal Union.

Oklahoma Town Wiped Out by Fire.

The town of Landers, Okla., population 650, was wiped out by fire. Loss, $200,000. Mrs. Jason Burgess was burned to death.

QUEER STORM IN CHICAGO

Hail Comes Down in Huge, Jagged Chunks Instead of Stones.

Snow Falls, Horses Run Away, Bridge Collapses, and Hail Cuts Through Plate-Glass Windows.

Chicago.—This city experienced for half an hour the most remarkable hailstorm ever witnessed in the West. Shortly before noon a black cloud, which looked like rain, suddenly opened, and let down on the city a shower of hail, which, for the size of the particles and the damage they did, has never been equalled. The hail did not fall in balls as usual, but in huge, jagged chunks, the sharp edges of which cut men and horses, and which broke through plate glass windows as though they had been paper.

The storm did not extend beyond Thirty-first street on the South Side, but up north it went beyond Lincoln Park. Trees were stripped of their foliage, and some of the twigs were cut off as though with knives. At least $3000 worth of damage was done in Humboldt Park and still more in Lincoln Park.

Down-town plate glass windows, skylights and lamp posts were damaged and the conservatories in two parks were ruined. The great, sharp bits of ice cut horses and caused many runaways, in which the drivers and others were injured. In the midst of the storm a span of the Milwaukee avenue viaduct collapsed, letting a wagon and several people fall, with the debris, upon the freight cars below.

At one point on the roof of the Marquette Building during the storm there was a light fall of snow. Over 500 trees were felled by the storm in various parts of the city. Down-town horses became panic stricken and ran away, dragging wagons into collision, running over pedestrians, and shrieking with terror at the sudden darkness and the pain inflicted by the shower of ice. The windows of four school buildings were destroyed and in some apartment houses there is barely a whole pane left.

At Washington and Fifth avenue a runaway horse crashed through a plate glass window of the Teutonia Building, terribly cutting itself. The Academy of Sciences in North Clark street will need $500 worth of new glass. The Zoo in Lincoln Park was rendered frantic by the hail. The animals which were exposed screamed with terror, and the lions and other caged beasts roared in sympathy. Half an hour later there was not a morsel of the hail left to show there had been a storm.

Of the persons injured in the strange storm hardly any two came by their hurts in the same way.

Jonathan Smith, on a wagon at the Milwaukee avenue bridge, was knocked unconscious when the bridge collapsed. J. G. Terry, engineer of a freight train, the cab of whose engine was crushed in by falling timber, was scalded and may die. Elmer Lucas, the conductor of the freight train, was thrown off the train and bruised and cut. Grover Robinson, of 134 West Randolph street, was injured about the head in trying to stop a runaway. He was taken to the County Hospital.

Michael Walsh was struck by a runaway and both his arms were broken. R. Wiesie was thrown from his wagon and is probably fatally injured. Two unknown persons were injured in the crash after the Fifth avenue runaway. A cabman, whose name is unknown, was hurt in a stampede of horses.

ST. LOUIS BOODLER GETS 7 YEARS

Conviction of Lehmann, a Rich Citizen, Marks Another Triumph For Folk.

St. Louis, Mo.—In fourteen minutes the jury which tried Julius Lehmann, ex-member of the House of Delegates, for bribery in connection with the passage of the City Lighting bill, found him guilty and fixed the punishment at seven years.

It was another signal triumph for Attorney Joseph W. Folk. He presented the case against Lehmann in a twenty-minutes' talk to the jury. He summed up the evidence to the effect that Lehmann distributed the $47,500 boodle used in the lighting steal, and asked the jury to give the defendant the maximum penalty.

The $47,500, it will be remembered, was distributed at an alleged "birthday" party at Lehmann's house, and was accompanied by shameless quips and jests on the part of the boodling members of the combine which shared in the rake-off.

Lehmann seemed to be greatly crestfallen by the verdict.

Soon after the verdict had been returned Lehmann gave bond in the sum of $15,000, and his attorneys gave notice of appeal.

ANARCHISTS FORCING STRIKES.

Many Labor Troubles Declared to Be Due to Their Influence.

Chicago.—"It is quite true that Anarchists are now taking a prominent part in the policy of union labor," said Chief of Police Frank O'Neill.

"They have discovered that war on capital can be waged more successfully through labor unions than by bombs and fiery tirades. For years they held aloof from labor unions because union men were not radical enough. Since the law suppressed them they have quietly joined the various unions, where they can advocate the most extreme measures without much danger of arrest. The Anarchists have not given us any trouble for years except through labor unions."

"The police are my authority for the statement that Anarchists are members of unions, and exert a strong influence," said Mayor Harrison, "I believe, from the way things have been going, but it won't be so long."

War Cloud in the Far East.

It was reported from Pekin, China, that there is increasing danger of war between Russia and Japan, and that the Japanese believe that Russia's policy is to provoke them to begin hostilities. The Russian Minister to Korea opposed the opening of Wiju, a port on the Yalu River.

Kentucky Postmaster Arrested.

Charged with trading postage for merchandise, Henry Bamitz, postmaster at Houstonville, Ky., is under arrest.

Hard Medicine to Take.

"Doctor," said a fashionably-dressed woman to her new physician, "I want you to give me a prescription which will cure me of a most irritating trouble." The doctor bowed and waited for her to go on.

"About 11 o'clock every evening," said the patient, "I am overcome by a feeling of sleepiness, no matter where I am—at the opera, at a dinner party, wherever I may be, this dreadful sensation comes over me. I have suffered from it now for five weeks, and no remedy has seemed to do any good."

"Oh, I can give you a prescription that will prevent it from overcoming you ever again," said the doctor.

His new patient was radiant, but when she looked at the slip of paper the doctor gave her her face clouded. He had written:

"Bed from ten at night till seven the next morning. Repeat the dose once in twenty-four hours, whenever symptoms recur."—Youth's Companion.

Dining in the Future.

The host sat at the head of the table, surrounded by the various food-condensing devices.

"Light or dark meat, Mr. Smith?"

"Light, if you please."

"A little of the gravy?"

"A very little, thank you."

"Cranberry sauce, of course?"

"Please."

The host pressed three buttons and turned a crank.

"Tea or coffee, Mr. Smith?" asked the hostess, from the other end of the table.

"Coffee."

The hostess pulled a lever.

Then a servant came with a tray and carried Mr. Smith his tabloid, which he swallowed at once, since it was not deemed good form to wait till the others were served.—Detroit Free Press.

Bear's Suicide.

An old black bear kept in a zoo at Dallas, Tex., became violent a few days ago and tried to tear itself to pieces and beat its brains out against the walls and bars of its den. The animal had refused to eat for two months. Finally it jumped into the water tank and held its head under until drowned. It was a clear case of suicide. About two years ago the bear killed its cubs and devoured them. A year later it drowned its mate in the tank.—Chicago Post.

"Cowhide" whips are made of hippopotamus hide. N. Y.—30.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. DR. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa.

There are many books and one good one in the mind of every man, but most of us are poor choosers.

The Domestic Hen a Wonder.

Scratching a living here and there, killing thousands of bugs and worms which would cause much loss of crops if allowed to live, the ordinary barnyard hen is a wonderful combination of productive forces. In five years' time she will lay 700 eggs, each containing 650 grains of water, 125 of fat, 108 of lime, 80 of albumen, 26 of sugar and 10 of ash—the most condensed and strengthening form of food offered to man. Every person having a little plot of ground is able to keep from half a dozen to many dozen of these wonders and so add to the family income. To do this to the greatest advantage, one must know how to care for his fowls—to guard against, detect and cure disease; which fowls to save for breeding purposes, etc. The simplest and most satisfactory way of securing this knowledge is to buy it from some person who has made a success of fowl raising as a business. Such a book, giving the experience of twenty-five years, is obtainable for 25 cents in stamps from the Book Publishing House, 134 Leonard St., New York City. It is an invaluable work. The life of one chicken saved would pay for the book several times over.

The Astor family in New York City has bought land in Mexico for the largest cattle ranch in the world.

Ask Your Dealer For Allen's Foot-Ease, A powder. It rests the feet. Cures Corns, Bunions, Swollen, Sore, Hot, Callous, Aching Sweating Feet and Ingrowing Nails. Allen's Foot-Ease makes new or tight shoes easy. At all Druggists and Shoe stores, 25 cents. Accept no substitute. Sample mailed FREE. Address, Allen S. Olmsted, LeRoy, N. Y.

The opening up of old sores is a painful but sometimes a necessary operation.

Iamsure Piso's Cure for Consumption saved my life three years ago.—MRS. THOMAS ROBBINS, Maple St., Norwich, N. Y., Feb. 17, 1900.

The United States has granted 3500 patents to women.

Hair Falls

"I tried Ayer's Hair Vigor to stop my hair from falling. One-half a bottle cured me."
J. C. Baxter, Braidwood, Ill.

Ayer's Hair Vigor is certainly the most economical preparation of its kind on the market. A little of it goes a long way. It doesn't take much of it to stop falling of the hair, make the hair grow, and restore color to gray hair. $1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

The Funny Side of Life.

A MISSING INGREDIENT.

The Romans had great circuses
Historians declare,
It's hard to see
How this could be,
They had no peanuts there.
—Washington Star.

CHANGED HIS MIND.

"I thought you said you would never have that doctor in your house again!"

"But nothing was the matter with me then."—Chicago Record-Herald.

ILLUSTRATED EXPRESSION.

Giving him a few pointers.—New York Times.

INSPIRING.

"How perfectly the girl graduates keep step."

"Yes, the orchestra is playing the wedding music from 'Lohengrin.'"—Cleveland Plain Dealer.

LOOKED THROUGH HIM.

Amy—"I don't see what she saw in him."

Ann—"Oh, it wasn't what she saw in him; it was the money she saw back of him."—New York Sun.

INEXPERIENCED.

"She has never been to Europe, has she?"

"No. She doesn't even know how to get away from people who want to tell her all about it."—Harper's Bazar.

HAS NO NEED.

Doubleday—"What did Singleton say when you invited him to join our club?"

Wederly—"He said home was good enough for him as long as he remained a bachelor."—Chicago News.

KEPT ASUNDER.

Tom—"Have Maud and Ethel quarreled? I don't see them together lately."

Dolly—"No, they haven't quarreled, but Maud's new gown is lavender and Ethel's new gown is blue."—Somerville (Mass.) Journal.

PARENTAL ASSISTANCE.

Barnes—"When I was young my mother always used to sing me to sleep."

Shedd—"Yes, women are good at that sort of thing; but it takes the father's voice to wake a fellow up in the morning."—Boston Transcript.

HIS PLEA.

"My plea," said the young lawyer, who had just won his first case, "seemed to strongly affect the jury."

"Yes," replied the judge, "I was afraid at one time that you would succeed in getting your client convicted in spite of his innocence."—Chicago Record-Herald.

SELF-APPROVAL.

"Well," said the detective, "there is one thing upon which we may congratulate ourselves in this case."

"Why, you haven't even found an important clew."

"That's just it. We can rest assured that no innocent person is going to suffer."—Washington Star.

NOT SO BAD AS THAT.

"It was too bad to keep you waiting so long for your change," said the smiling shop-girl, as she counted it out. "I am afraid I have given you a bad quarter——"

"What!" exclaimed Mr. Tyte Phlat, in alarm.

"——of an hour."

"O!" he said, considerably relieved.—Chicago Tribune.

A BAD BREAK.

Bank President—"So you worked in a bank before?"

Applicant—"Er—not in de daytime, boss."—New York Journal.

MODERN METHODS.

"I tell you that new salesman of ours is a hustler when it comes to advertising methods," said the automobile manufacturer.

"How so?"

"Why, he's offered the free use of any of our make of automobile to anyone for suicidal purposes. Great ad, isn't it?"—Baltimore Herald.

SCIENCE & MECHANICS

When a plant is found thriving in dry and sterile soil, one is always warranted in the suspicion that it is helped in its work under ground by the bacteria. The partridge-pea (Cassia chamaecrista) of sandy wastes puts up its attractive flowers by such assistance and the New Jersey tea (Ceanothus Americanus) which flourishes on sterile hillsides has thousands of bacteria upon its roots. So large and abundant are the nodules formed by the bacteria that it is difficult to dig up a plant without noticing them.

One of the best established laws of physics is that compression heats and expansion cools. The first effect of compressing air is to raise the temperature, and if at a single operation the pressure be raised to ninety or one hundred pounds the temperature may reach 500 or 600 degrees Fahrenheit. Under these circumstances oil does not always work well as a lubricant, at least in the main cylinder. Soap suds is very much better. Several methods have been devised for introducing this material. These vary in merit, of course, but there is no doubt about the superiority of the material itself to oil.

Thirteen hundred stone sledge hammers have been taken out of tunnels made by prehistoric men in the iron mine at Leslie, Mo. They are made of black hematite and have no other finish than a groove about the middle of each, showing where formerly they were bound by wythes to wooden handles. Greenstone and jasper used by the aborigines for war axes were not hard enough to chip away the hematite and expose the pockets of red oxide of iron which the savage used as a paint. The form of some of these hammers shows that they were fitted with two handles so that the operator could hold one in each hand.

The latest method of hardening the face of armor-plate is by heating the face with electrical currents by means of large carbon anodes instead of applying the heat in a furnace. It has been found that during the electrical treatment a portion of the carbon of the anodes enters into the composition of the steel, producing great hardness of that metal. The depth to which the hardening proceeds is regulated by the length of time during which the treatment is applied. It is claimed to be superior to the Harvey system or that of Krupp. By the latter process plates require fifteen to twenty days' treatment. With the electrical method the desired result is accomplished in five hours.

Important irrigation reclamation projects, under consideration by the Hydrographic Bureau, contemplate the erection of a number of storage reservoirs, necessitating the building of numerous dams. Some of these it is proposed to build entirely of steel, the most novel feature of which will be hardened steel inclined columns and arch ribs. It is estimated that a reliable storage reservoir, good for the next fifty or one hundred years, could be built on this plan for "about one-half the expense required for a masonry dam." For high dams the advantages of steel construction are just as great as for low ones, and the problem of building such structures is no more difficult than the erection of a modern steel skeleton office building. It is also asserted that in case of a break in such a steel dam, through carelessness, neglect or incendiarism, the balance of the structure would not be jeopardized, as would be the case with masonry construction. The age limit of a steel dam, it is argued, is such that it will extend far beyond the time when "the development of the country makes new structures, improved with respect to location and capacity, either desirable or unavoidable."

Too Bad About the Cane.

Next to the woman who jabs us with her umbrella comes the man with the cane which he flourishes in a manner that menaces our faces. I happened to follow two young men thus armed into an office building yesterday. On the way to the elevator they gesticulated so violently with their canes that I deemed it prudent to keep out of their reach. While waiting for the elevator to come down, they tapped and poked around with their sticks until one of them ran his through the grillwork surrounding the elevator shaft. Just then the elevator came down lickity sizzle, and, catching the inner end of the cane yanked the outer end up so suddenly that it hit its owner a resounding whack under the chin. Then it broke the cane in two.

Of course I felt sorry for the young man, but even sorrow cannot always make us forget that an elevator, properly interpreted, may carry a young man up to heights of wisdom.—Brooklyn Eagle.

Effect of Wind on Water.

Lake Erie affords a good opportunity for studying the effects of the wind on an enclosed body of water. Its trough, fifty miles in extent, lies about in the direction of the west to southwest winds that prevail there, and a great blow from that quarter sends the body of water eastward, so that a rise of eight feet or more takes place at Buffalo in the course of a few hours. When the force of the gale has passed the water swings back.

A Singular Record.

Census returns just issued show a singular record for Buckinghamshire, England. The number of unmarried women, 57,928, is precisely the same as the number of bachelors.

GOOD ROADS.

Enemies of Mud Should Unite.

ONE great reason for the prevalence of bad roads throughout the United States is lack of agreement and united action among the advocates of improvement. Everybody prefers good roads to bad. Everybody knows that the roads can be improved only by the expenditure of money and labor. But here the agreement ends. There is a great variety of ideas and schemes for securing the desired object. There is no end of discussion, but very little is accomplished. Some people would rather travel through mud than to have the roads improved by any other plan than their own "pet scheme." Thus road reformers themselves sometimes actually hinder the cause to which they are devoted.

If the roads of the country are to be made good within the lifetime of the present generation it is high time the advocates of good roads should unite in support of a few general propositions, and go to work in favor of a general plan. If a national good roads movement ever gets started nothing can stop it. It will sweep everything before it. But the difficulty is to get it started.

One great advantage possessed by the national aid plan, which is now becoming so popular, is that it is general instead of sectional or local. It is broad as the whole country. It can bring into harmonious united action the friends of good roads in every State, and it is the only plan yet proposed that can do this.

The friends of national aid will make a mistake if they undertake to work out details in advance. They will disagree among themselves and give objections every advantage. They should go to work for the general principle and leave details to be worked out in due time.

Local Road Building.

The old-fashioned theory was that each local community should build and maintain its own roads. If it made good roads, its people had the benefit of them, and if they were bad, they suffered accordingly. Strangers passing through fared well or ill precisely as the residents along the line. But we are changing all that. Travelers in steam carriages want better roads than most rural communities care to build, and owners of inaccessible, unsettled lands want roads built for them. In several Eastern States the State now pays one-third the cost of constructing or reconstructing roads when built according to specifications prepared by a State engineer, the local community, of course, caring for them when built. At the last election the people of California, in a fit of unparalleled stupidity, adopted a constitutional amendment permitting State road building on a scale unheard of before, we presume, in any community, civilized or uncivilized. Under that amendment the Legislature may build roads all over the State, paying therefor entirely from the State treasury, and not only build them, but maintain them forever. Of course the Legislature will not build roads everywhere, but only in those places possessing the strongest pull. Large land owners, who are to be benefited, will probably raise funds to buy votes in the Legislature, or members will trade votes with each other, and so make two roads grow where only one grew before. Since that is what the people wanted, and voted for, it is, of course, all right, but it is a curious taste. Now comes Congressman C. P. Brownlow, of Tennessee, who introduced in the late Congress a bill creating a full "bureau of public roads," with an appropriation of $75,000 for salaries and expenses, and $20,000,000 for paying one-half the cost of "good roads" in different States and Territories, the amount available to any State to be in the ratio of its population. The State or local district applying pays the other half of the cost. This bill was never reported from committee, but will be reintroduced in the next Congress.—San Francisco Chronicle.

Roads of the Hawaiian Islands.

To Americans and English jointly are due the superb roads of Oahu and its sister Hawaiian Islands. They are wide, level and well rolled. The material of the bed is red clay and decomposed lava rock. Where the route is over meadow land or arable soil there are evidences of a good stone foundation. When a stream or rivulet is crossed a bridge, viaduct or masonry arch is employed. When the way is on a hillside the bed is well rounded, guttered and supplied with drains to carry the gutter water harmlessly under the road to the continuation of the slope. When the path is cut on a steep mountain side, a substantial wall or stout fence prevents any accidentally falling off. Many of the roads are green tunnels. Nature has been lavish with her vegetable treasures; palms and other noble trees grow almost everywhere. Where she has been niggardly man has made up for the deficiency.

Madison Square Garden, New York City, paid expenses last year, for the first time since it was built.

PE-RU-NA IS OF ESPECIAL BENEFIT TO WOMEN

Says Dr. M. C. Gee, of San Francisco.

A CONSTANTLY increasing number of physicians prescribe Peruna in their regular practice.

It has proven its merits so thoroughly that even the doctors have overcome their prejudice against so-called patent medicines and recommend it to their patients.

"I Advise Women to Use Pe-ru-na," Says Dr. Gee.

Dr. M. C. Gee is one of the physicians who endorse Peruna. In a letter written from 513 Jones street, San Francisco, Cal., he says:

"There is a general objection on the part of the practicing physician to advocate patent medicines, but when any one medicine cures hundreds of people it demonstrates its own value and does not need the indorsement of the profession.

"Peruna has performed so many wonderful cures in San Francisco that I am convinced that it is a valuable remedy. I have frequently advised its use for women, as I find it insures regular and painless menstruation, cures leucorrhœa and ovarian troubles, and builds up the entire system. I also consider it one of the finest catarrh remedies I know of. I heartily indorse your medicine."—M. C. Gee, M. D.

Mrs. E. T. Gaddis, Marion, N. C., is one of Dr. Hartman's grateful patients. She consulted him by letter, followed his directions, and is now able to say the following:

"Before I commenced to take Peruna I could not do any hard work without suffering great pain. I took Peruna, and can say with pleasure that it has done more for me than any other medicine I have ever taken. Now I am as well as ever; I do all my own work and it never hurts me at all. I think Peruna is a great medicine for womankind."—Mrs. E. T. Gaddis.

Women are especially liable to pelvic catarrh, female weakness as it is commonly called.

Peruna occupies a unique position in medical science. It is the only internal systemic catarrh remedy known to the medical profession today. Catarrh, as every one will admit, is the cause of one-half the diseases which afflict mankind. Catarrh and catarrhal diseases afflict one-half of the people of the United States.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Favors Young Men For Office.

Schwab likes to help worthy young men. Himself a protege of Andrew Carnegie, he has gathered about him several able youngsters who are proud to set themselves down as his proteges. There is one in particular, now a resident of New York. His name is Renner. His age is thirty-two. Schwab, Carnegie & Co. have made him president of a corporation at a salary of $25,000 a year, and it is believed that he is a cheap man at that price. Mr. Renner is a bachelor.

Nursing Them Sick.

"I need a vacation badly, but I can't take it now," said Dr. Price-Price. "Many of my patients are in such condition that I can't afford to leave them. They need constant nursing." "Ah, yes," replied the man who knew. "I guess there are certain patients who if you quit nursing them will get well the first thing you know."

Signs of Life in Hen's Eggs.

An electrical test, as first proposed as a means of determining whether life is extinct, has been used to show when life begins. No reaction is produced if the matter is lifeless. Applying this method to hen's eggs, Augustus Waller has found that signs of life begin in twenty-four to sixty-two hours after the beginning of incubation, and that only when development fails or is arrested does the reaction continue to be absent.

Plague Statistics.

The following figures are interesting as showing how the plague epidemic has spread in India during recent years: There were in 1897 56,000 recorded deaths; in 1900, 93,000; in 1901, 274,000, and in 1902, 577,000. During the first three months of the present year the mortality was 234,000, that in March last being no less than 136,000.

GET WELL—STAY WELL.

The thousands of people who are every day being made well by Doan's Kidney Pills and the free trial herewith offered makes further delay, "Kidney neglect."

They correct urine with brick dust sediment, high colored, pain in passing, dribbling, frequency, bed wetting. Doan's Kidney Pills remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness, dizziness.

NEWBERN, KY.—B. C. Jones writes: "I was unable to get anything to stop the too much flow of water. For forty years I had headache day and night—could not sleep well—was very weak, and about giving up all hope. I got Doan's Pills and they cured me. That was five months ago, and I can say, to-day, my water is regular and I have not had headache for five months. For bed wetting, scalding urine, and headache, Doan's Kidney Pills have no equal. I have recommended them to fifty different persons with good results. I first read of Doan's Pills in Smithland Banner, sent to you for sample and afterwards purchased the pills from Jolley Bros., Grand River."—B. C. Jones.

For free trial box, mail this coupon to Foster-Milburn Co., Buffalo, N. Y. If above space is insufficient, write address on separate slip.

BAD BREATH

"For months I had great trouble with my stomach and used all kinds of medicines. My tongue has been actually as green as grass, my breath having a bad odor. Two weeks ago a friend recommended Cascarets and after using them I can willingly and cheerfully say that they have entirely cured me. I therefore let you know that I shall recommend them to any one suffering from such troubles."—CHAS. H. HALPIN, 109 Rivington St., New York, N.Y.

FIFTY CTS. OF DRUGGISTS OR R. P. HALL & CO., NASHUA, N. H.

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

North Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Publisher.

TERMS OF SUBSCRIPTION:

If paid in advance $1 per year; if not paid in advance $1.25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands

Long distance and local telephone : : : 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, JULY 25, 1903.

Subscribers of the Review who change their address for the summer, or for a shorter period, can have the Review sent to their vacation address without additional cost, by notifying the office to that effect. Addresses may be changed as often as desired.

POPE LEO XIII.

The death of Pope Leo XIII on July 20, was a matter of world-wide interest, not only to the great church of which he was head, but the whole Christian world mourns the loss of a great man.

As the head of the Roman Catholic Church he is credited with having done much to lessen the bitterness and antagonism between the Roman Church and Protestantism.

Inside his own church circle he was beloved and revered as few men have ever been before him, and to those who do not accept papal authority there has never been a pope so much respected as Leo XIII.

FOR THE THIRD TIME.

For the third time disaster, death and suffering have visited our neighboring city, Paterson.

Wednesday afternoon a tornado struck the unfortunate city, killing three and possibly four, and injuring scores of others.

On February 9, 1902, a fire destroyed property there valued at $10,000,000; and before the ruins were cleared away the Passaic river overflowed its banks and flooded the city, causing further and extensive damage to property.

Unaided, Paterson recovered from these disasters, and now says she will take care of her latest sufferers.

While the whole country sympathises with Paterson, underneath it, there predominates a feeling of admiration for the pluck, the indomitable will-power and heroism which rise superior to three disasters (either of which might well dismay any ordinary city) and refuses assistance from any outsiders.

We are proud of Paterson, and the example set by her will undoubtedly add to the credit of the State throughout the whole length and breadth of our land.

A GOOD LAW.

On the first of this month a new law went into effect in New Jersey which, if the intention of the law is practical, will compel all speculative building and loan concerns to go out of business.

The new law provides that not more than one per cent. of their receipts shall be used for officers and clerical assistants.

As a majority of these wild cat concerns were operated with the sole purpose of providing fat offices for a few men on the inside, who had full control of the whole business, it may readily be seen that this new law will speedily put such associations out of business.

It is to be regretted that some such law was not inaugurated years ago before such concerns as the American Savings and Loan Company and the Colonial Homestead Association of Trenton and a dozen or more of similar concerns in Paterson and other cities, were allowed to fleece the people as they have done.

However, better late than never; and if the new law will serve the purpose of wiping out the few still doing business in the State, and prevent others from starting up, it will be a good thing.

We have no word of censure for strictly local building and loan associations, whose officers serve without pay. So far as our knowledge goes these are perfectly safe and are considered good investments.

ONE MAN ARBITRATOR.

The *Youth's Companion* truthfully says: "Not many weeks ago a strike involving several allied crafts took place in Newark, under the direction of the masons' union. It bade fair to spread to other trades, and cause great loss and much ill feeling. Some one proposed arbitration, and it was finally agreed that the union and the master masons should each prepare a list of names from which the arbitrators should be selected. When it was found that one man was on both lists it was voted to make him sole arbitrator. He accepted, went into the case exhaustively, rendered a decision that covered the minutest detail, both sides heartily accepted it, and the strike was ended at once. This arbitrator on whom masters and men relied for "absolute justice, so far as human judgment could define,"—the phrase is quoted from the letter of thanks signed by both parties to the controversy,—is the pastor of one of the largest churches in the city. Probably there are still in Newark, as there are elsewhere, persons who would like to make us think that "working men are done with the church." For the benefit of people who hesitate to believe, we record this cheering incident."

MUNICIPAL REFORM.

Our esteemed contemporary, *The Orange Chronicle*, of last Saturday, editorially endorses our position on municipal reform in the able article given below.

In common with all outsiders, the *Chronicle* does not understand that North Plainfield is a separate and distinct municipality from Plainfield, North Plainfield being in Somerset county, and Plainfield in Union county; and while it is possible that the city of Plainfield may, as suggested by the *Chronicle*, enjoy a better government than do the Oranges, the same statement would hardly apply to North Plainfield, because here it is a one-man government and that man is decidedly the whole thing. Following is the article:

"Civic reform is becoming contagious, if we are to judge by the way citizens are taking it up in various parts of the State. Plainfield is the latest to join the ranks, although it has not as yet taken any positive steps toward organizing a Union or a League such as East Orange and West Orange respectively possess. The press of that city, however, has begun to take an interest in the subject and last Saturday the North Plainfield WEEKLY REVIEW had a leading editorial commenting pleasantly upon the West Orange League, and making much of the fact that men of prominence, like Thomas A. Edison and others, have interested themselves so far as to take foremost positions in the membership list and undertake as well committee work. It is highly pleased to note the fact that the commuter element is taking a hand in local governmental affairs and the outlook for the successful divorcement of local and State politics is bright, according to its view. The paper does not directly advocate the formation of a league in Plainfield, but its tone is so favorable toward the movement that it would not be at all surprising to see the establishment of a citizens' union or league in that city before very long. Plainfield does, however, if we are not misinformed, enjoy a better government than do any of the Oranges, and perhaps it does not stand in such need of active work on organized lines by independent citizens; but the probability is that much good could be done there and that the idea will strike the citizens favorably after it has had a chance to more fully appeal to them.

"East Orange enjoys the distinction of putting forth the idea in the most practical and successful form, and now West Orange is falling admirably into line. The organization is excellent in the latter place and the leaders are working vigorously and intelligently to systematize their efforts in order to accomplish the greatest good. It matters little just what it is that goes wrong with the municipal government, or whether there is anything seriously wrong with it at all. The public interest in affairs of importance is the salvation of the municipality and the more it is aroused the better it is for whatever community has one. West Orange could be greatly improved along many lines and the Citizens' League, notwithstanding it starts out so wisely by not antagonizing a single interest, will undoubtedly be felt as a power in the community from now on. But the larger promise in this widespreading civic interest is yet to be worked out in county and State, when the people will be united under civic improvement associations and will be able to extend their power to Trenton itself. The county is already in a fair way to see a united movement on the lines first laid down by the Citizens Union, of East Orange, and other counties will join before many months. The citizen appears at last to have made up his mind that government by the people and for the people must never be surrendered to government of the people by the politicians."

THERE is a movement on foot in Elizabeth to compel the saloon-keepers to raise their curtains on Sunday, so as to give a clear view of the interiors of the saloons. The Trenton *Times* pertinently asks "What's the use? The plan was tried in Trenton, but it did not work. According to report, some of the dealers merely moved the supplies into a back room.

NEW JERSEY will have to take a back seat now on the mosquito question. Our mosquitoes, are not as strong as a 700 horse-power engine, and lack the confidence to tackle a job of that magnitude. We are perfectly willing that St. Louis should enjoy the honor she no doubt deserves.

THE EAST ORANGE city council has taken steps toward purchasing a water plant, and have agreed on a price to be paid for land for the location of the plant at Milburn. Such action seems to meet with the approval of the citizens generally.

SHERIFF'S SALE.
IN CHANCERY OF NEW JERSEY.

Between Fredrick C. Jennings, complainant, and Ada M. Cuming et al., defendants.—Fi Fa. for sale of mortgaged premises.

By virtue of the above stated writ of Fi Fa., to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE SEVENTEENTH (17) DAY OF AUGUST NEXT,

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All that certain tract or parcel of lands and premises, situate, lying and being in the borough of North Plainfield, in the county of Somerset and State of New Jersey.

Being known and designated as No. 215 Somerset street, and more particularly described as follows:

Beginning at a point in the southwesterly side of Somerset street and corner of A. Jacot's lot, as shown on a Map of Valuable Villa Sites and Building Plots, North Plainfield, N. J., on file in the Clerk's office of the county of Somerset. Thence running along his line south forty-five degrees and forty-seven minutes west one hundred and fifty-nine feet to a stake in the line of Lot No. 5; thence running in a northwesterly course parallel with Somerset street thirty-five feet to a point where the centre line of the division wall if extended would reach; thence running in a northeasterly course along the centre line of said division wall one hundred and fifty-nine feet to the southwesterly side of Somerset street as formerly laid out; thence running along said old line of Somerset street in a southeasterly course thirty-five feet to the place of beginning.

TALBOT'S LUCKY SWIM

June the Seventeenth, 1876, just one hundred years to the day after the Battle of Bunker Hill, was a red letter day in the life of Dick Talbot.

In the first place, he was fourteen years old on that day; and, in the next place, he had pitched his club, the Trimountains, to victory, over their bitter rivals, the Wonders, in an exciting 21 to 20 game, of ten innings.

In the next place——

But wait until we get to it.

After the game and the Wonders had gone home defeated to Hyde Park it began to rain hard. The rain began at five o'clock, and it came down as if it intended to make a clean, all night job of it. As the boys ran into old Sky High Gimcrack's old red barn, out of the wet, Dick said:

"Say, fellers, this is just the kind of weather in which to go in swimming!"

No sooner were the words uttered than the boys began to get out of their clothes and into their bathing trunks, which were hanging in the barn. Then, with wild yells of laughter, they all started for the water in the rain, and Dick was the first to dive off the little pier which ran from the barn thirty feet out into the bay. One boy after another followed, and soon they were all splashing around, ducking each other and playing leapfrog.

About a quarter of a mile from the pier was a small white schooner yacht lying at anchor. She had been there for a week. Nobody seemed to know anything about her, or very little, which amounted to this: Her owners, two mysterious looking men, were seen around the village a good deal, but for what purpose nobody seemed to have much of an idea. They were evidently enjoying a vacation.

"Say, fellows," said Dick; "I am going to swim out to have a peep in at that yacht.

Dick swam out to the mysterious yacht, and boarded her over the bows. Nobody seemed to be aboard. Dick went aft and looked into the cabin. Nobody there. He went down the companionway and looked around. He was about to go up on deck, when he heard somebody weeping in a boat alongside, and then a man's voice, saying:—

"Hurry up, Bill! Here take her. Send her down into the cabin out of the way. Hoist the anchor, then up sail, quick. Stop your snivelling, young one. Nobody's going to hurt yer if yer'll be nice and quiet like."

Then Dick heard steps overhead. He drew back as the companionway was darkened and a little girl came sobbing down into the cabin. He could hear them hauling up the anchor and hoisting sail while peering into the little girl's face.

He recognized her as Mr. Roger Baldwin's daughter Nelly. Mr. Baldwin was the richest man in Dorchester and Nelly was his only child. Dick gasped.

"What is the matter, Nelly?"

Then Nelly Baldwin sobbed as if her little heart would break as she replied:

"The bad men stole me off the porch while I was playing with Fido after dinner."

Dick did not wait to hear any more. He said:

"I'll save you. Don't worry," and he was on deck like a flash.

The yacht was going through the water at a spanking gait, the sails were up and there was a man at the wheel. Dick shot past him like an arrow from Robin Hood's bow and took a header over the stern, while the man at the wheel yelled:

"Here! What are you—who—say, Bill, wing that duck, quick!"

By that time Dick was a little astern, but not out of range of the bullets that whistled around his head, one of which ploughed a furrow along his scalp like a part made by a comb and brush. In two minutes the yacht was far away and Dick was alone with the blood and rain running down his face and a mile of water between him and land.

With a "Now for it!" Dick's jaws came together like a steel trap, locking in his determination to save Nelly Baldwin from the fate of poor little Charlie Ross, who had been stolen two years before and was never heard of afterward. Stroke after stroke, on and on, toward that distant pier, Dick swam through the dark and rain.

Steadily, splendidly through the waters he ploughed, until it seemed ages since he had leaped from that pier! Nelly might never again be heard of! The thought was maddening! Then the tears ran down with the blood and rain! Another dip, and his eyes were clear and he could see lanterns moving about the pier. He summoned all his strength and packed it into one long, tremendous shout. Some of the lanterns seemed to drop off the pier. Those who carried them were getting into row boats. It seemed to Dick as if he were dropping out of a balloon, as if he were dying under a mountain, and then—a gasp—two white arms in the air—and a blank!

When he opened his eyes men and women, boys and girls seemed to be about him. In the army he saw Mr. and Mrs. Baldwin. He gasped his story into their eager ears, and then away he went into the land of oblivion again.

In less than five hours that yacht was captured by a revenue cutter off Nix's Gate in Massachusetts Bay.

Do you think that Dick went to Harvard?

Clerk at the Speaker's Desk.

The speaker's right hand man is called "clerk at the speaker's desk" and is one of the most useful men in the house of representatives. It is his business to know things, all things; in fact, everything connected with legislation. He must know parliamentary law, precedents of the house and must have them ready at a second's notice, so that they may be cited by the speaker or the chairman of the committee of the whole house whenever a point of order is raised or a parliamentary point is to be decided. He must know all the members of the house and from what state they come in order to tell the speaker or the chairman how to recognize them when they address the presiding officer. He must know all the secretaries of the president and clerks of the senate, so as to tell the presiding officer when there is a message from the president or the senate to be received by the house. He keeps the time on men who are addressing the house, and the "hammer" falls when he says that a man has consumed his allotted time. Of all these tasks the greatest is to be well informed upon parliamentary law. There is no index to parliamentary rulings, and many points are found by the man who will delve and dig and study the subject all the time.—Washington Post.

Infant Geniuses.

When he was but a schoolboy in the Jesuits' college at Dijon Jacques Bossuet was known as one of the best classical scholars in Europe.

At eight Louis de Bourbon, prince of Conde, was a perfect Latin scholar. Three years later he published a work on rhetoric, and at seventeen he was appointed governor of Burgundy.

Fenelon displayed so much precocity that he won fame as a preacher of rare eloquence when he was but fifteen years of age. Pascal wrote treatises on acoustics at twelve, at which age he was busily occupied in constructing elaborate circulating machines, and at sixteen he published his treatise on "Conic Sections," which Descartes refused to believe was not the work of a great master.

John Stuart Mill was studying Greek at three, had practically mastered the language at seven and a year later was acting as schoolmaster to his younger brothers and sisters. John Ruskin actually produced a manuscript work in three volumes before he reached his seventh birthday.

Mark Twain In a Fog.

Mark Twain's former lecture manager told this story of an entertainment given by the humorist in London during a heavy fog: "One night the queen's concert rooms were like a smokehouse, and I saw from my chair in the royal box a shadowy dress coat, supported by a pair of shadowy trousers, girdled by the faint halo of the ineffectual footlights. A voice was in the air, but it was difficult to locate it with any degree of certainty. The apparently headless trunk of the lecturer told what he knew of our fellow savages, the Sandwich Islanders, and at intervals out of the depths ascended the muffled murmur of an audience invisible to the naked eye. Mark began his lecture on this occasion with a delicate allusion to the weather and said, 'Perhaps you can't see me, but I am here.'"

Improving on Horse Power.

In Venezuela many years ago a wealthy agriculturist was appointed minister of marine. Being a hard worker, he asked at once for particulars of the fleet. The secretary brought him particulars about the only war ship. The details gave length, tonnage and horse power. At this last the minister stopped the secretary and bade him write down quickly an order to the chief of customs. "Take out these 120 horses at once, and I will send you good mules in their places," explaining that mules were much more economical, both as regards food and ability to withstand fatigue.

Severe

Nervous Trouble and Dyspepsia.

No Sleep for Weeks Because of Pain.

Dr. Miles' Nervine Gave Back My Health.

Dyspepsia nearly always arises from a derangement of the nerves. When the stomach is not well the entire system suffers. Constipation, bad breath, sour stomach, frequent headaches, biliousness, etc., will lead to terrible consequences if not treated in time. Dr. Miles' Nervine is a specific for nervous dyspepsia and all nervous diseases.

"My health was miserable for years, due to severe nervous trouble and dyspepsia. I had not been able to sleep for weeks at a time without being awakened with pains in my chest and stomach. My limbs felt tired, I was unable to do my house work without feeling completely worn out. The doctors failed to relieve me, and after taking an endless amount of their medicines I began taking Dr. Miles' Restorative Nervine and Nerve and Liver Pills. I obtained relief from the first bottle of Nervine, was able to sleep better than I had in years. My stomach began to gain strength and I felt better in many ways. I have taken twelve bottles of Nervine and Nerve and Liver Pills in the past three years but have not taken any of late as I have not felt the need of it. I go about my work an entirely different woman and have recommended them to ever so many people. I am a great believer in Dr. Miles' Nerve and Liver Pills, I have them on hand all the time. I feel very grateful for the Dr. Miles Remedies."—MRS. J. W. WHITMAN, Mechanic Falls, Me.

All druggists sell and guarantee first bottle Dr. Miles' Remedies. Send for free book on Nervous and Heart Diseases. Address Dr. Miles Medical Co., Elkhart, Ind.

The Business Ideal---Not Wages But Profits

By Andrew Carnegie.

IF late years I never see a fishing fleet set sail without pleasure, thinking this is based upon the form which is probably to prevail generally. Not a man in the boats is paid fixed wages. Each gets his share of the profits. That seems to me the ideal. It would be most interesting if we could compare the results of a fleet so manned and operated with one in which men were paid fixed wages; but I question whether such a fleet as the latter exists. From my experience, I should say a crew of employes vs. a crew of partners would not be in the race.

The great secret of success in business of all kinds, and especially in manufacturing, where a small saving in each process means fortune, is a liberal division of profits among the men who help to make them, and the wider distribution the better. There lie latent unsuspected powers in willing men around us which only need appreciation and development to produce surprising results. Money rewards alone will not, however, insure these, for to the most sensitive and ambitious natures there must be the note of sympathy, appreciation, friendship. Genius is sensitive in all its forms, and it is unusual, not ordinary, ability, that tells even in practical affairs. You must capture and keep the heart of the original and supremely able man before his brain can do its best.—World's Work.

A Sensible View of "Race Suicide"

By the Editor of Harper's Weekly.

SOCIOLOGISTS continue to discuss "race suicide." This question, so vigorously brought into the forefront of public concern in the early part of the year by the President's pronouncement, has had quite a long inning and its topical interest is still far from being exhausted. In the North American Review, one "Paterfamilias," a gentleman who has "for many years been laboring privately and publicly in the interest of many kinds of social reform," takes up what he considers to be the common-sense end of the argument and says "some plain things because they need to be said." He protests that the logical deduction from the President's expressions on the subject, in his famous prefatory letter, and in letters to begetters of large families, is that "the nearer Americans approach the physical status of rabbits the more patriotic they become." His own view is that "we need better citizens, not more of them," and he sees no reason "for a man bringing into the world a larger number of children than he is able to care for," which practice, he contends, means death for some and a state of social degeneracy for the rest. With frankness and, it must be said, some courage, he denies "that the sexual relation is a function designed solely for the propagation of the human race," averring that this theory is a mere assumption and that it is contrary to human experience. He denies, too, that marriage is solely an institution for the promotion of self-sacrifice and the unlimited propagation of children and misery. In short, he believes that the present generation is entitled to a goodly share of well-being and happiness, and that its claim to them should not be made completely subservient to the claims of the next generation. The change in the economic condition of women which has come about is a large factor in the diminution of the numerical size of families. "The wives are no longer pack-mules, but are getting some of the comforts of life," says the writer. "Why shouldn't they?" he asks. Why, indeed? will be the answer of many women and

Flies as Bacteria Carriers.

Some Experiments at Johns Hopkins University---From the Scientific American.

IN the theory that flies may be active agents in the spread of bacteria, there is, of course, nothing new, but a forceful demonstration made under the auspices of Johns Hopkins University, which has been recently brought to our notice by a member of the medical staff of that institution, is well worthy of record. The experiments were conducted with a box that was divided into two compartments, in the first of which was exposed some food material infected with an easily recognizable species of bacteria—harmless bacteria, of course, being used—while in the second compartment was placed an open dish containing a sterile nutrient such as is used as a culture medium for bacteria. Flies were placed in the first compartment, and, as soon as a number of them had been seen to walk upon, or eat of, the infected material, they were allowed to pass through a small door into the second compartment, where they had a chance to come in contact with the culture medium in the dish. The result was that bacteria deposited upon the surface of the sterile nutrient, multiplied there, and formed characteristic colonies.

In these experiments molasses mixed with a growth of yellow bacteria was spread on a plate in the first compartment, and a dozen flies were put into the apparatus. Half an hour later the door between the two compartments was opened, and as soon as several of the flies had been seen to come in contact with the sterile nutrient, the dish that contained it was covered and put away to develop. A few days later there had grown on the nutrient over a hundred colonies of yellow bacteria. The experiment was repeated with red and violet cultures, and colonies of corresponding color were obtained.

To prove that the germs from which these colonies grew came from the infected material in the first compartment, and not from accidental sources, further experiments were made with other groups of flies, but with no infected material in the first compartment. In this case, however, none of the dishes used in the second compartment developed yellow, red or violet colonies. To prove further that the flies were the only means of transmitting the bacteria, experiments were made with infected material in the first compartment, but with no flies in the apparatus. The dishes containing the nutrient [illegible] also developed no colonies.

Amateurs vs. Professionals.

By the Editor of Harper's Weekly.

IN the days of thirty years ago, perhaps even later, very few, if any, of the country played baseball, or ran, or vaulted, or leaped, for money. Probably there were men who rowed for the pecuniary gains of victory, or for gate-money, coining into money their muscles, their breath, and their knowledge of the ways of tides and of men. Other and more brutal men punched each other's faces into bloody pulp, also for money. But there were then gentlemanly sports into which the conception of gain did not enter, and into which entered the students of our colleges—universities were then a dream—and other amateurs. In baseball we had the Atlantics and the Excelsiors of Brooklyn, great champions; the Unions of Harlem, the Knickerbockers of Albany, the Haymakers of Lansingburg and a club in New York City the title of which escapes us, the championship being as rare a visitor to the metropolis as it is in these later days of professionalism.

Manners have changed. It is largely to the inroad of professionalism that we owe the change, and it has not been for the better. Let us not be understood as saying aught against the occupation of the professional. Baseball is a good trade for those who have no better, and it is no more prone to intemperance and idleness than, say, stevedoring or than striking, although stevedoring may, in the end, be more useful to the world than baseball playing. The latter is as lofty, too, as any other acrobating, while the dirt plowed up by the slider of bases is more easily got rid of than is the black of the minstrel's business. It is also a much better occupation than the "bunching" of ballots on election day used to be. It is respectable, but not noble, while it is easily seen by the clear of mind that baseball playing is not among the great arts by which the world advances. It is a pity, then, that the professional player of games should set the fashion for amateurs, and it is especially to be regretted that the spirit of professionalism has invaded the colleges, whose athletics should be not only secondary, but an expression of the joy of life, certainly not of its sordid side. In England the amateur still rules, and his spirit is still manifest. A defeat in a game is not an event in his life, any more than the stubbing of his toe or the tearing of his coat on a barbed wire is something to be recollected throughout the life of any one. Defeat in spirit is only important to those who make their living by sport, for defeat impairs the market value of those who suffer it.

"GIVE US MEN."

By the Bishop of Exeter.

Give us men!
Men—from every rank,
Fresh and free and frank;
Men of thought and reading,
Men of light and leading,
Men of loyal breeding,
The nation's welfare speeding;
Men of faith and not of fiction,
Men of lofty aim in action;
Give us men—I say again,
Give us men!

Give us men!
Strong and stalwart ones;
Men whom highest hope inspires,
Men whom purest honor fires,
Men who trample self beneath them,
Men who make their country wreath them
As her noble sons,
Worthy of their sires!
Men who never shame their mothers,
Men who never fail their brothers,
True, however false are others;
Give us men!
Give us men—I say again,

Give us men!
Men, who, when the tempest gathers,
Grasp the standard of their fathers
In the thickest fight;
Men who strike for home and altar
(Let the crowd cringe and falter),
God defend the right!
True as truth, though lorn and lonely,
Tender, as the brave are only;
Men who tread where saints have trod,
Men for country—home—and God;
Give us men! I say again—again—
Give us such men!

THE OPERATIONS . . OF SHIFTY SIMMONS AT PEAPACK. . . . .

A LITTLE STORY OF THE FARMER AND THE FAKIR.

THE village of Peapack was radiant. It was a legal holiday and the circus was in town. Every one was there drinking in its intoxicating delights. The tents had been erected under the joint criticism of the entire male population of Peapack, and the stimulating odor of the menagerie filled the place.

In one corner of the circus field Shifty Simmons, the Philanthropist, was busily engaged in doing good. This worthy man was giving away gold watches. At first the suspicious citizens of Peapack regarded the thing with a cold and calculating eye. Philanthropy seemed to be a drug on the market. Then four watches were sold for a dollar each to four well-known Peapackers and a two-dollar bill was found in the back of each case. Thereupon the intelligent citizens of Peapack brightened up. They took more interest in this affair.

Shifty Simmons took four other watches and surreptitiously tucked a twenty-dollar bill in the back of the case of each. The quick sighted Peapackers were on. After spirited bidding old Amadee Pierson bought one of the watches for $19. He opened the back case with an exceedingly fond expression of countenance. This expression suddenly disappeared, and he looked at Shifty Simmons with an intensity which made even that hardened sinner shudder.

The case was empty!

In all the various phenomena of nature there is nothing more tantalizing than to observe a vacuous looking space where coin of the realm is confidently expected to be found.

In front of the First National Bank of Peapack the street was deserted. It seemed as though every one was attending the afternoon session of the circus. And yet inside the bank a performance was going on which was not without merit. The actors were three capable looking gentlemen who were doing clever tricks with the safe. The audience consisted of the bank watchman, who lay on his back in an indolent attitude. This watchman was bound and gagged in such an artistic manner that he was unable either to applaud or to exhibit any signs of the disapproval which at times seemed to be welling up within him.

Two hours later the cashier entered. He was softly and happily tooting in peaceful emulation of the steam calliope. His eyes fell upon the watchman. The tooting stopped. They exchanged agonizing glances. The cashier ran to the vault. The door opened readily at his touch and showed certain unmistakable vacancies within. The cashier at once resumed his tooting, but an expert musician might have observed that the tune was now pitched in quite a different key.

In a few minutes all Peapack knew that the bank had been robbed of $50,000. A bank robbery and a circus in one day! The town had never seen such metropolitan excitement. The watchman became the oracle of the hour. His story gradually accumulated additional details about the fight he had put up before he was overpowered, but his conclusion was always the same:

"And then the little man who limped stuffed all the money in a green satchel and out he skipped."

In the office of the bank the cashier was bitterly cursing the fate that had led him to make up a deficiency of $500 in his cash account the day before.

Night had come. Shifty Simmons, tired out with his philanthropic labors, slowly walked up Main street to the hotel which he was gracing with his presence. A low whistle sounded. Simmons stopped and looked around with ready apprehension. He had philanthropic funds in his pockets. Through the darkness he perceived a short man carrying a satchel and limping around the corner. A gas lamp glinted for a moment on the satchel. It was green. Shifty Simmons gave a stage start and followed. His air was determined. He seemed to be saying "Sh-sh" to himself.

The short man limped through the town and out into the country. After an hour's walk he jumped over a fence and ran nimbly over a freshly plowed field. Shifty laboriously followed, keeping close to a fringe of trees that bordered the field. The short man went to a little tool house and obtained a shovel, with which he dug a deep hole. He then opened the satchel. Shifty saw him abstract a few yellow backed bills, leaving the rest of the contents. He then placed the satchel in the hole, carefully covered it up, put the shovel back in the tool house and silently stole away.

Shifty Simmons now took a prominent part in this little drama. He sneaked up to the tool house and began groping for the shovel. Enter the trained beasts—two large, cavernous, bounding, resounding and ravenous bulldogs—who dashed across the field from the farm house in the next lot. Shifty fled. He spent the night just outside the fence and kept an unwinking eye upon the spot where the olive colored satchel lay buried.

As a strict matter of history it should it should be stated that it started raining in torrents shortly afterward, and that the rain continued all night. It would indeed often seem as though nature was not above a joke.

At daybreak next morning there was unusual activity in the field. A number of hired men appeared with spades and lumber. Shifty shook some of the water from his clothes and climbed over fence.

"What's going on?" he asked.

"We're going to dig potato pits," they replied.

Shifty didn't like this development. It seemed to him that these prospective potato pits were much too near the buried treasure. He asked for the owner of the field and found in him old Amadee Pierson, who had bought one of his watches the day before for $19.

"I've just been looking for you to pay you back that $19," began Shifty solemnly. "It's been troubling my mind."

"Oh, that's all right," replied Amadee. "I'm not kicking. That was business and I got valuable experience. Anything I can do for you?"

"Why, yes," answered Shifty. "The circus people want to rent a field to put some old circus wagons and things on. I'll give you $20 for a year's use of this field."

Amadee scratched his head with a puzzled motion.

"Seems kinder funny they didn't come themselves," he remarked. "Still, it's none of my business. I was just going to put some improvements on this lot and I'd figured on making quite some money out of it. I'll let you have the field for six months for $250 and not a cent less. And I'd want the cash in advance, seeing as I don't know you."

"I'll take it," Shifty replied, after a suitable pause. "If you'll give me a receipt I'll give you the money. Immediate possession—and say, just chain up your dogs at night, will you?"

That night, in another pouring shower, Shifty Simmons dug up the precious satchel. He carried it lovingly to the tool house and opened it carefully under the flickering glim of a little lantern. He picked a neatly folded note out of the satchel and read:

"My boy Eph limped like the bank burglar and Josh painted the satchel green. We lay for you. The American farmer is quick to learn and it's a bad business to cheat him out of $19.

"AMADEE PIERSON."

In conclusion it may be set down, judging from Shifty's subsequent remarks and manner, it would seem that there are few things so irritating as for a man to be tripped up at his own game.—New York Evening Sun.

Russian Lady as Navvy.

The Lockalonzeiger states that the "watchman" at a level crossing on the Russian Southern Railway, who goes under the name of Alexander Rodichevsky, is really the daughter of a high railway official. She sought and found work as a navvy on the line some time ago, and proved so intelligent and industrious as to soon become foreman. When the position as watchman became vacant, it was given to her, and she has discharged the duties with unfailing regularity and zeal.

Chance led to the discovery that the "watchman" was a lady, a blue-stocking who had taken a University degree, and a distinguished classical scholar. She disappeared from home over eighteen months ago, and her relatives had given up all hope of seeing her again, when they heard of the curious employment she had accepted. As soon as a new watchman can be appointed she will be sent back to her parents. It is not known why she gave up her studies to become a manual laborer. Her age is twenty-seven.—London Express.

Three Great Thoughts.

The winner of a prize of one guinea, offered by the London Academy to the person who should select the three most pregnant and felicitous sentences from any authors, chose the following three quotations:

Fancy plays like a squirrel in its circular prison, and is happy; but imagination is a pilgrim on the earth—and her home is in Heaven.—Ruskin.

Discouragement is but disenchanted egotism.—Mazzini.

The true wisdom is to be always seasonable, and to change with a good grace in changing circumstances. To love playthings well as a child, to lead an adventurous and honorable youth, and to settle when the time arrives into a green and smiling age, is to be a good artist in life and deserve well of yourself and your neighbor.—Stevenson.

New York City.—Costumes of flecked cheviot and homespun are exceedingly smart, and have the added merit of being extremely serviceable. The very

A SERVICEABLE COSTUME.

desirable model shown is of cheviot in gray flecked with white and is trimmed with stitched bands of white cloth edged with plain gray of a dark shade. All suiting materials are, however, equally appropriate.

The jacket is made with fronts, back and under-arm gores and with a deep tunic that is seamed to the blouse and can be omitted whenever a short jacket is desired. The sleeves are full, with turn-over cuffs. The skirt is circular, with a habit back, and has a circular flounce at the lower edge, which is cut in two portions, both jointings being made invisibly beneath the tucks.

The quantity of material required for the medium size is, for jacket, two and a half yards forty-four inches wide or two and a quarter yards fifty-two inches wide; for skirt, seven yards forty-four inches wide or five and three-quarter yards fifty-two inches wide.

Misses' Blouse Jacket.

Blouse jackets with tunics, or skirts, are among the smartest of the season's garments, and are exceedingly becoming to young girls. The very attractive May Manton one, shown in the large drawing, includes the stole collar and the new wide sleeves. The original is made of tan colored etamine and makes part of a costume, but the design suits the odd wrap equally well.

The jacket consists of the front, back and under-arm gores of the blouse and the tunic. The back is plain, but the fronts are gathered at the belt and blouse slightly. The tunic is smoothly fitted, and is joined to the lower edge, the seam being concealed by the belt. The stole collar, which finishes the neck and fronts, is trimmed with applique and stitched with corticelli silk and is arranged over the edges. The sleeves are snug at the shoulder, but full at the wrists, where they are gathered into bands under the flaring cuffs.

The quantity of material required for the medium size is five yards twenty-one inches wide, two and three-eighth yards forty-four inches wide, or two and one-eighth yards fifty-two inches wide.

Flowers on Hats Popular.

The flower toque and flower crown, or flower brimmed hat, is an increasing favorite. A pretty fancy is to make the crown entirely of foliage (any one variety preferred), and place a single large rose or effective cluster of small blossoms on one side. Some of the smartest of the new hats (and new fancies are shown daily in the leading shops) are either in white felt or chip, Manila or Leghorn, simply trimmed with a wide braid of ecru or yellow lace straw, wound and twisted softly like a ribbon around the crown, with a loose spray or cluster of cherries, small pears or little apples, and their foliage thrust through a knot placed a little to one side. These fruits, as well as clusters of white thistles, are very effective.

New Dress Fabrics.

Among the new dress fabrics is a silk gauze called vaporin, as sheer and filmy as chiffon, of silky lustre and beautifully adapted to dressy modes wherein much tucking and shirring is used. While speaking of dress fabrics, there are many new silk-and-woolen and silk-and-linen mixtures in all the new colors, and of excellent wearing qualities. Especially attractive are the very sheer mohairs, known as "mohair Swiss," that stands any amount of wear, dust or damp atmosphere.

Shirred Sun-Bonnets.

Shirred sunbonnets are to be used for outing wear. They are simply one of the novelties of the season. For country wear and use at the seashore they are rather picturesque. They are made of shirred mull and fine thin lawn. Some models are seen made of flowered organdies. The shirring is done on feather bones. Broad, long ties are used on all models.

Pretty Wash Collars.

Pretty new wash collars and cuffs are of heavy white linen, buttonhole stitched, in black and embroidered in two colors, say, pale green and pale lavender or pink and pale green. Others of the same style are made in fine linen lawn.

An Expensive Dress Fad.

Parasol, hat and girdle to match are one of the expensive dress fads. It is a very effective fashion with white or linen colored costumes.

The Modish White Plume.

Exclusive milliners are just now exploiting long white plumes on big, black hats, and the modish white plume, by the way, is coming in a warm, creamy tint ever so much more becoming than blue white.

MISSES' BLOUSE JACKET.

Woman's Shirt Waist.

Shirt waists are among the good things of which no woman ever has enough. This very stylish May Manton one is new and becoming to the generality of figures. The tucks, which are arranged to give it a pleat effect, are stitched only to yoke depth at the front, so forming becoming folds over the bust, while the back gives tapering lines to the figure. The original is made of dotted chambray, but all waist materials are equally suitable.

The waist consists of the smoothly fitted lining, which can be used or omitted as preferred, the fronts and the back, and is shaped by means of shoulder and under-arm seams. The back is drawn down smoothly and snugly at the waist line while the front blouses slightly over the belt. The sleeves are cut in one piece, and are full below the elbows and gathered into straight cuffs at the wrists.

The quantity of material required for the medium size is four yards twenty-one inches wide, four yards twenty-seven inches wide, three and three-quarter yards thirty-two inches wide or two and one-quarter yards forty-four inches wide.

SHIRT WAIST.

Characteristics of Pope Leo XIII.

Mild in Private, Stately in Public.

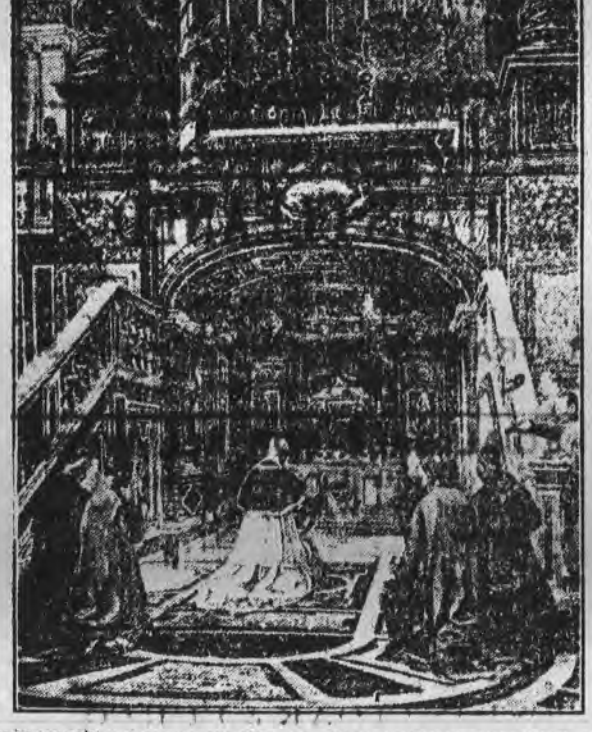
POPE LEO XIII. entered his pontificate in the sixty-eighth year of his age, a long-tried prelate, whose strength of character, ob... ...ergy, judgment, piety, virtues and services are matters of record. He united in admirably proportioned degrees the apostolic mildness with the administrative rigor; he made himself at the same time loved and feared.

A CHARACTERISTIC ATTITUDE OF THE POPE, AND ONE IN WHICH MANY VISITING AMERICANS HAVE SEEN HIM AT THE VATICAN.

Personally he was a man of stately bearing. His voice was sonorous and brilliant when he preached, and slightly nasal in familiar conversation. In private life he was simple, affectionate, affable and witty. In the ceremonies of the church, under the tiara, he was grave, austere and majestic. One would say that he was given to posing, but that was not true. The pose with him was natural; he did not seek it; it was the potency of modern ideas. A man of narrow mind might have come forth as a champion against them, but not such a man was Leo. Intolerance formed no part of his creed; class prejudices found no favor in his eyes. In his masterly encyclicals he spoke authoritatively and most wisely, not always on purely ecclesiastical subjects, but very often also on subjects which are of world-wide secular interest. Thus he was more than an ecclesiastic; he was also a great statesman. Of his personal character, all who were ever privileged to know him, have spoken in the highest terms. That he was very charitable and kindly is known to all. In a word, he bore himself nobly in his high office, and now that he has gone to his reward all who have watched his sterling and loyal work will admit that he was a true and eminently sagacious shepherd of the people.

Many anecdotes have been related as to the personal characteristics of Pope Leo XIII. He was accessible and affable to all who sought an audience and consequently thousands of those who have visited Rome retain vivid impressions of the Pontiff. Simplicity and frugality of living enabled him to husband his strength and to accomplish an amount of work devolving upon him as "head of the church," which to many men of greater physical strength would have seemed appalling. But Pope Leo XIII. was well entitled to be considered in many respects the grandest old man of the age.

The Infanta Isabella of Spain has undergone a painful surgical operation in consequence of her recent kick from a horse.



THE POPE AT MASS IN ONE OF THE VATICAN CHAPELS, ATTENDED BY CARDINALS AND PRIESTS.

sought him. It was the same with Pius IX. The pontificate creates a second nature.

A photograph of Cardinal Pecci, taken in 1870, when he attended the Ecumenical Council, gives one the ideal miraldo idea of the personal presence of the Pope. With it appear also the likenesses of all the other Cardinals,

TYPES OF THE SWISS GUARDS.

and it is no exaggeration to say that Pecci's head is by far the most impressive in this gallery. There are sterner heads, heads more severely intellectual, or austerely grand, or cast perhaps in finer diplomatic mould; but for supreme kindness and benevolence and a certain beaming, gentle grace, no face in the gallery of Cardinals can approach it.

Like that of Pio Nono, it was a countenance that won at once and immediately the way to the scrutinizer's heart. At the same time it was stronger in its intellectual quality than was that of Pio Nono, and it was particularly conspicuous in the manifestation of sound sense and clear judgment. Leo XIII. was a tall man, rather spare in build, but nevertheless of strong, wiry physique. His presence was most commanding. His head was very large and thoroughly Italian. It differed from the good natured roundness of Pio Nono's by its great length and the sharper outlines which it reached to wing the chin. The forehead was massive, high and rather straight, and was especially striking from its great width, indicative of intellectual strength. The slim hair that streaked it was of silver hue. The eyebrows were dark and heavy and of perfect arch, and the eyes were singularly mild and soft and, at the same time, penetrating and searching. The large, well-defined nose was characteristic of firmness and will power, decidedly Roman in shape, but with wide nostrils that were credited by physiognomists with bold leonine qualities.

His handwriting is peculiar enough to excite interest, even if it were not that of the Pope. It is exceedingly small, and of very careful, laborious construction, as if each of the minutely-formed characters was formed with the most painstaking care. In its play delicacy it resembles a lady's hand, but the minute elaboration of every stroke has something highly scholastic about it. Under his diminutive signature the Pope left half an inch of vacant space and when completed it by five dashes, growing successively smaller and smaller.

Pope Leo XIII. had a marvellous memory, which he retained up to the last. Speaking of him in December, 1896, Archbishop Stonor, who frequently attended on him, said:

"He recollects many of the people he receives after intervals of as long as sixty years. Many years ago, when Lord Palmerston was Premier, His Holiness visited England, and was presented to the Queen and Prince Consort. Of that visit he still remembers the small details, and only a short time ago he mentioned Sir James Graham, who was one of the Ministers of the period, and spoke of the part he took in a controversy respecting posts and telegraphs." Again, when a Miss O'Connell was presented to the Pope a short time ago, His Holiness asked whether she was a relative of the distinguished parliamentarian of that name, and, on learning that she was his niece, said, "I well recollect hearing your uncle speak in the House of Commons."

A poet as well as a statesman and pontiff Leo remained to the last, as is evidenced by the fact that a fine poem by him was published as late as February, 1903. In it we note all his old vigor and grace of diction. A real achievement it was for a man of his years.

Of him indeed it may be said that whatever he did was well done. There have been many pontiffs, but not many who have done greater deeds or endeared themselves more to all Christendom than Leo XIII. A conservative in many respects, he was at the same time a true child of the century, and hence he could not be blind to the march of events. He saw the meaning of modern progress and he recognized

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "GOD'S TRAINING OF A WORKER."

The Rev. Dr. O. E. Bartholow Shows the Evil Results That Follow the Atrophy Which Has Settled Over the Spiritual Thinking of Our Time.

NEW YORK CITY.—Dr. O. E. Bartholow, pastor of James M. E. Church, preached Sunday morning on "God's Training of a Worker." His text was taken from Exodus, iv.: 1, 2, 3 and 4: "And Moses answered and said, But, behold, they would not believe me; nor hearken unto my voice; for they will say, The Lord hath not appeared unto thee. And the Lord said unto him, What is that in thine hand? And he said, A rod. And the Lord said, Cast it on the ground. And he cast it on the ground and it became a serpent; and Moses fled from before it. And the Lord said unto Moses, Put forth thine hand and take it by the tail. And he put forth his hand and caught it and it became a rod in his hand." Dr. Bartholow said:

Our text presents Moses in what many have considered an unfavorable light. Standing in the presence of the great God, the recipient of a glorious revelation and a divine command with promise, he appears hesitating, uncertain and weak. A study of the occasion and ground of Moses' reluctance dissipates the unfavorable light and presents to us a study in human life under divine direction altogether true and common. The call of God to Moses was certain, clear and well attested. It came to a man refined and schooled by abundant experiences, to one who was more than familiar with human nature in its relation to spiritual truth.

The shepherd of Midian knew how dull, apathetic and incredulous toward Jehovah and His truth the children of Israel had become in their base servitude to the Egyptian Pharaoh. Foreseeing the cruel skepticism and the all but universal lethargy of his people, Moses was for the moment blind to God's knowledge and power. Under the spell of fear he uttered the words, "But, behold, they will not believe me, nor hearken unto my voice; for they will say, the Lord hath not appeared unto thee."

To Christian faith this may appear weak, but it certainly is not unnatural. History affords us abundant illustrations of reformers, heroes and preachers hesitating and trembling, not because they doubted God, but because they feared the reception God's truth would receive at the hands of His reputed friends. Jerome, Huss, Luther, Wesley, Savonarola, one and all have to fear from the church, and at times they trembled and were hesitant at the commands of God. (It takes grace to be wounded in the house of your friends).

God's response to this tendency or impulse of Moses' nature is full of interest and suggestion. It is a divine encouragement to Christian daring and zeal. "And the Lord said unto him, What is that in thine hand? And he said, A rod. And He said, Cast it on the ground. And he cast it on the ground, and it became a serpent, and Moses fled from before it. And the Lord said unto Moses, Put forth thine hand and take it by the tail. And he put forth his hand and caught it and it became a rod in his hand." Now, it is of no concern to us how this miracle was wrought, or whether magicians could simulate it or not. What we do desire to know is, What answer or revelation to the great hesitancy of Moses did Jehovah give in this peculiar work of power?

To our mind three truths constitute that answer—the first of which is this: All the helps, gifts and attainments of the soul, disregarded and neglected, tend to become hostile. Moses was a gifted man, an experienced man. The shepherd's staff symbolized him perfectly. As it was an instrument of defense and rescue, so might Moses, by what he had done and what he could do, be an instrument in the hand of God to defend and rescue his people. God elected him to a mighty and glorious service. He gave him a complete and adequate preparation, a clear mind, an indomitable will, a spiritual and lofty nature.

Would Moses accept the election? The significance of a possible refusal was seen in the meaning miracle. The discarded staff became a serpent. It is the common teaching of the day that powers and gifts unused become atrophied, that men may die to spiritual things through simple neglect. This is correct teaching so far as it goes, but it does not compass the whole of the matter. Spiritual calls, gifts and powers cannot wholly die. They may be disclaimed or cast aside, as was Moses' rod, but they return with inherent life to sting and bite. As an example, the direction and commands of conscience may be cast aside, the impulses of love and faith may be ignored, the direct calls of the Holy Spirit be unheeded and yet the soul have more conscious relation with these spiritual entities than ever before.

John Newton, the hymn writer, tells us that there was a time in his life when he deliberately insulted and drove from his mind every holy thing of which he had knowledge, yet at times the moral judgment and the heart's love for eternal things would so torment him that life was full of misery. Those elements in his life designed for peace and joy became the sources of unrest and unhappiness. Remorse is no more than the return of these spiritual powers crying night and day, in silence and in great commotions, "Alas, alas! It might have been."

The doctrine of annihilation and atrophy has so settled over the spiritual thinking of our time that the consequence of disobedience to the equipments and purposes of life and to the voice of God are in certain quarters reduced to mere nothings. It is high time that the truth illustrated to Moses become our truth, that we realize that there is no such thing as spiritual annihilation, even to the gifts and powers of God, but that there is transference, transformation—the going (in a spiritual sense) from Mount Gerizim (blessing) to Mount Ebal (cursing).

Disobedience to God and His law is not mere negation and the withdrawal of certain gifts, but it is in a certain and awful sense an affirmation and a possession—the serpent of menace rather than the support of life. God's rain upon the thirsty earth is in itself good—that it be so for man depends altogether how and for what purposes he uses it. He may use it for the growing of food products or for the production of weeds. That the rain was made for man's blessing is evident. That man may disregard and so convert the gift into a foe is also evident. What the rain is to the earth so are the gifts, helps and calls of God to man. For these things God shall bring us unto judgment, the judgment begins with the obedience or disobedience.

In our beloved Methodist church we have a host of God placers at work. People who do not expect to meet God in new forms or expressions, who, like Moses before his enlightenment, know or act as though they knew just how He would manifest Himself. That Christian joy and expectancy die in such lives is natural; the glory of God is to conceal a thing, but these people will not have it so. They are perfectly sure God is in some particular form of class meeting, revival service or Christian experience.

Another people of God thought this thought so intensely and held it so tenaciously that they missed the glory of the Messiah when He came to walk the fields and streets of earth. He had "no form or comeliness that they desired or expected. He came to His own and they received Him not." But in His coming they had kingly and exalted forms which they were certain He would posses; they were sure of the order of His coming. The rod out of the stem of Jesse they cast forth; they would have none of Him. Oh, the blindness and dullness of the human heart. In that rod were the power, the knowledge and the love of God; with it alone Israel could have overcome all oppression and have reached the land of light and peace.

The rejection of Christ, the rod of Jesse, also illustrates the significance of the text: Christ was cast down, thrown aside by Israel. The results of that rejection are known to the world. The spiritual life was atrophied, but something more than that resulted. In the path of that people stood Christ in divine opposition to the fulfillment of their selfish hopes. He, the rod of God, became to them, or, rather, to their position, a hostile power and must so remain until they reach forth their hands and accept Him.

The third thought we would emphasize as the teaching of the miracle of the rod is that no man can be equipped to do great things for God who is filled with fear and trembling. Moses was afraid to do the bidding of God—afraid of the reception the divine message would receive, afraid of the consequences to himself. The transformed rod revealed the secret of his heart. Conscious fear of God before the fear was within his heart. God gave him mastery over that weakness. He reached forth his hand and grasped the menacing serpent and it became a rod again. Moses was taught and, as his after life revealed, learned the lesson of fearlessness for God and His truth. "If God be for us who can be against us?"

The relation of fear to all life and truth is an interesting study, one on which more light is now shed than at any other time in the world's history. Fear is altogether detrimental to the health and growth of the physical body. Professor Sully tells us of children dwarfed and ruined in body and mind through the shock and power of simple fear. Physiologists tell us, and we know from experience that fear hinders digestion, that it brings mental collapse. The changing of the color of the hair in one night through the paralysis of fear is a well established fact. That which can so radically change the color of pigment must have an awful effect upon the more vital and direct parts of the body. Fear destroys mental and spiritual development. Every book on pedagogy and the spiritual training of children now recognizes and emphasizes this truth. Dickens powerfully illustrated this truth to all England in his "Nicholas Nickleby." Fear has worked havoc in the religious life; it has distorted the vision of God and frozen the genial and natural expressions of worship. It has paralyzed and hampered the church in her triumphant march. It has transformed many of the messengers of God into poor whining and ineffective apologists. It is this fear in religion and for religion that our God would have us overcome even as the lad Moses overcame. A right conception of God is necessary that He may triumph in the work of His hands, that His kingdom may come and His love and truth prevail everywhere. God would have His children confident in the presence of difficulties, assured in the presence of perils, calm in the mighty storms of prejudice and doubt, certain in the midst of uncertainties. He would have us obey Him as implicitly and lovingly as the gentle child obeys the loving parent. In all this He would have us open eyed to danger, direct in the meeting of it and sure in the mastery of it.

To-day the church, as a whole, is more possessed of fear than we like to acknowledge. A dominant materialism and worldliness freeze the faith and hope of a great number—evangelical zeal and enthusiasm are at a low ebb in these trembling children of the Most High. Critical scholarship, with all the presuppositions of the higher criticism, stands before the church. It must be met. Some fear that dire and dreadful results to the cause of God must ensue. The scientific spirit stalks abroad in the land and has seized the people with a mighty grip. Many a child of God, knowing that his most precious possessions have not and cannot, from their nature, come through or be established by such a spirit, but that they are the gifts of faith—is fleeing with fear from before the imagined terror. To all such fearful believers God says—even as to Moses in the miracle of the rod—"meet the difficulties, seize them in their vitals and fear not."

There can be but one result to the child of God. The Apostle Paul knew this when he wrote: "All things work together for good to them that love God." There can be but one result to the Kingdom of God "His kingdom is an everlasting kingdom." All things shall be put under His feet.

In the preparation of His church our Saviour gave great attention to the eradication of the elements of religious fear. His addresses to the seventy and the twelve were supreme emphasis upon confidence in God and fearlessness toward man and all things that were or might appear in opposition to the work Divine. "Behold I give unto you power to tread on serpents and scorpions and over all the power of the enemy and nothing shall by any means hurt you."

In His relation to them on sea and land, alone or with the multitudes, before and after death, there constantly appears directly or by inference the injunction: "Be not afraid." The Master would have His children joyfully expectant of His presence in every place and under all conditions and to realize that that Presence was the ultimate solution of every problem, the resolution of every difficulty and the fulfillment of every promise; that the fearless challenge of the church should ever be: "If God be for us, who can be against us?"

Transmuting to Higher Forms.

A gentleman on one occasion noticing the peculiarly unpleasant mud of the streets of London, exclaimed: "What dirty, dreadful, disgusting stuff!"

John Ruskin, overhearing this exclamation on the part of his friend, said: "Hold, my friend, not so dreadful after all. What are the elements of this mud: First, there is sand, but when its particles are crystalized according to the law of its nature, what is nicer than clean, white sand? And when that which enters into it is arranged according to a still higher law, we have the matchless opal. What else have we in this mud? Clay. And the materials of clay, when the particles are arranged according to their higher laws, make the brilliant sapphire. What other ingredients enter into London mud? Soot. And soot in its crystalized perfection forms the perfect diamond. There is but one other—water. And water, when distilled according to the higher law of its nature, forms the dewdrop resting in exquisite perfection in the heart of the rose.

"So, in the muddy, lost soul of man is hidden the image of his Creator; and God will do His best to find His opals, His sapphires, His diamonds and dewdrops."

"Who Are the Praying Ones?"

It is said of Charles G. Finney, the great evangelist and preacher, that he always insisted on the spirit of prayer power to prevail with God, as absolutely indispensable in a successful Christian worker. The fact was very marked in all the powerful revivals where Mr. Finney labored. Perhaps not the many were led in this way, for as in our day, only the few hidden ones got down into the deep places with God, but there were always those who learn the secret of the Lord as He loves to reveal it to the willing and obedient; and these Mr. Finney considered as most important allies in carrying on a revival.

His question on entering a place to begin meetings, was, not who will help in the preaching, but who are the praying ones. Has there been a spirit of prayer poured out upon any in the community? Who are "standing upon the watch tower," waiting for the vision? And if he found but one or two who really took hold on God with conscious power, his heart was encouraged, and he took up his labors with renewed energy.

Purpose of Worship.

Until of late all the most glorious buildings that our race has reared beneath the sun have been erected to serve the purposes of worship. Man does not live by bread alone.—The Rev. Dr. Utter, Unitarian, Denver, Col.

How Blisters Are Raised.

A blister is the vesicle, or bladder, which is formed by an effusion of serum—the watery portion of the blood—underneath the scarf, or outer skin. Any such powerful irritant as boiling water may produce blisters, and we may regard their formation as an effort of nature to protect the true and acutely sensitive inner skin from attack.

The fact speaks for itself, but the reason for this injurious action of scalding water has a much deeper seat. Our blood vessels are supplied with nerves, and the stimulation of these causes in some cases dilatation and in others contraction. Any excessive stimulus will cause paralysis of the muscular coat of the vessels and consequent stagnation of the blood in these parts, and then their nutrition is impaired.

It is owing to the condition thus induced by scalding water that the serum oozes through the vessel wall and makes its way into the surrounding tissue. This raises the upper and insensible skin into a blister, which probably takes its name from the Anglo-Saxon blœstan, to blast or puff.

The Flight of Time.

One day "Uncle Chet" Thomas drove out to South Topeka to sell a man a horse. The man was no judge of horseflesh and knew it. So after looking the animal over he told "Uncle Chet" to come out again in about ten days. "A friend of mine who knows a horse when he sees it will be here then," he said, "and I'll see what he thinks. And, by the way," he added, "how old did you say the horse was?" "Seven years old comin' February," said "Uncle Chet" as he gathered up the reins and drove away. "Uncle Chet" drove out to South Topeka again. The prospective purchaser was there, and after looking the horse in the mouth asked his age. "Twelve years old this spring," replied "Uncle Chet," smiling blandly. "But," broke in the man who wanted to buy the horse, "you told me not ten days ago that he was only seven." "So I did," squeaked "Uncle Chet"—"see I did. My, how time does fly!"—Topeka Capital.

An Ancient Tragedy.

A historical paper in Lord Montagu's collection in London tells of a strange tragedy "done in Holborn, a little before Christmas," several centuries ago. "A boy seven years old came up into a gentleman's chamber and prattled to him and drew his sword and flourished with it. The gentleman, being in bed, wondered to see the boy toss his blade so and said: 'So, good boy, thou hast done well. Put in the sword.' The boy persisting, the gentleman rose and held him the scabbard, and the rude handed lad, thinking to sheath the sword, lustily chopt it into his belly. Company were called. One offered to strike the child. 'Let him alone,' quoth the gentleman. 'God is just. This boy's father did I kill five years since and none knew. Now he hath revenged it.' And the gentleman died the second dressing."

How Oysters Grow.

A man who has devoted much time to the study of the oyster says that this bivalve is born with his shell on and that he grows only in the summer time. The beard of an oyster is not only his breathing organ—that is, his lungs—but it also serves to convey food to his mouth. When the warm, calm days of June come the oyster opens his shell and by means of his beard begins building an additional story to his house. This he does by depositing very, very fine particles of carbonate of lime till at last they form a substance as thin as silver paper and exceedingly fragile. Then he adds more and more till at last the new shell is as hard as the old shell.

Secret For Secret.

In the days of Louis XIV. even warriors handled epigrams with one another.

The Marechal de Grammont had taken a fortress by siege.

"I will tell you a secret," said its military governor after surrendering. "The reason of my capitulation was that I had no more powder."

"And, secret for secret," returned the marechal suavely, "the reason of my accepting it on such easy terms was that I had no more balls."

Wanted Something Effective.

Under a "sketchy little thing" exhibited by Jones there hangs a printed card which bears the words:

"Do not touch with canes or umbrellas."

An appreciative small boy added the following postscript:

"Take A Ax."—London Tit-Bits.

His Calling.

"My dear friend, allow me to introduce to you M. X., a man who writes more nonsense than any one living."

"I see; he's a journalist."

"No; he's a legislative stenographer."—Paris Figaro.

Her Very Own.

"He says that he loves me more than his life and that he can't live without me."

"Oh, all young men say that."

"That may be, but they don't say it to me."

Accomplished.

Ethel—Isn't Judy newsy?

Mayme—Isn't she, though? She tells so much I don't see how she gets time to hear anything.—Detroit Free Press.

Eve's Daughter For Sure.

Mother—Why are you so naughty, Dorothy?

Dorothy (aged three)—'Cause it's easier, muzzer.—Comfort.

Learn first how to make a living and make a great name later.—Dallas News.

Cossack Customs.

Many queer customs and usages are prevalent among the Cossacks. No man changes his clothes on a Monday. On Thursday no fat or flesh meat must be pickled or corned. Wool is not spun on a holiday. A hen is always given an uneven number of eggs to hatch, never an even number. Bones left from a dinner at a funeral are thrown into the river, and at the same meal no one dare cut bread; it must always be broken.

Apollo's Favorite Instrument.

Apollo was the old god of music, and his favorite instrument, the lyre, was invented by Mercury. When the latter was four hours old he found the shell of a tortoise and made it into a lyre with nine strings in honor of the nine muses. This instrument Mercury gave to Apollo, who became a wonderful player upon it. The lyre was used by the Greeks in olden times, and from it was fashioned the harp.

Matrimonial Dyspepsia.

"Well, how do you like married life?" inquired the friend.

"Not at all," replied the man who had married money and was suffering for it. "I'm a case of matrimonial dyspepsia."

"Matrimonial dyspepsia?"

"Yes. She never agrees with me; she's too rich."—Philadelphia Ledger.

Poor Simile.

"I never saw any one so timid as Henpeck is," remarked Wigger. "Why, he's like a mouse in his own house."

"Nonsense!" exclaimed Wagger. "His wife isn't the least bit afraid of him."—Stray Stories.

Animals Becoming Extinct.

Every century sees several species of animal becoming extinct. In the race for life the weak must yield to the strong, and because they are persistently sought for food or for feathers not only individuals but whole families cease to exist. The disappearance of the great auk can be laid to the nineteenth century. It became extinct on the American side of the Atlantic about 1840 and in Europe about 1844. The South African quagga disappeared about 1870 owing to the slaughter by hide hunters. The twin shelled tortoise of the Galapagos islands became extinct in all probability about 1875. The black emu of South Australia was also exterminated during the century, though it was abundant in 1803. The great cormorant was last seen alive about 1830, and many other species of birds from all parts of the world have likewise been exterminated. In the Danish West India islands, for example, out of fourteen species catalogued in 1795 only six still exist, and a similar history can be told of many other localities.

Shelley Liked Bread.

The poet Shelley was very simple in his tastes and found his chief pleasure in long, solitary rambles. Bread became his chief sustenance when his regimen attained to that austerity which afterward distinguished it. He could have lived on bread alone without repining.

"Do you know," he said one day to a friend, with much surprise, "that Mr. G. does not like bread? Did you ever know a person who disliked bread?" His friend explained to him that Mr. G. probably had no objection to bread in moderate quantity at a proper time and with the usual adjuncts and was only unwilling to devour several pounds of dry bread at a meal.

Shelley had no such objection; his pockets were generally well stored with bread. Sometimes he ate with his bread the common raisins which he bought at small grocers' shops.

Sea Serpents Breathe Air.

Like all other serpents, the sea serpents, though permanently inhabiting the sea, are air breathers. The lateral flattening of their tails greatly helps them to swim in any direction, and it specially enables them to rise rapidly to the surface of the water to breathe. That they may do this the more easily and securely their nostrils are placed at the very end of the muzzle and are furnished with valves, which secure them from being entered by the water in which they live.

Unlike other snakes, they cast their skins in small pieces. Their eyes are not adapted to see well out of water, and thus they cannot when in the air take a good aim to bite. They feed on small fishes, which they paralyze by means of their poison, and thus they have nothing to fear from the spines of the fishes they eat.

Toilet of the Cat.

Cats, large and small, make the most careful toilet of any class of animals, excepting some of the opossums. The lions and tigers wash themselves in exactly the same manner as the cat, wetting the dark, rubberlike ball of the fore foot and inner toe and passing it over the face and behind the ears. The foot is thus at the same time a face sponge and brush, and the rough tongue combs the rest of the body.

Imperial Eagle Killed.

Near Stockton, a few days ago there was shot a genuine imperial eagle. This bird is a native of South America. It measured 7 feet from tip to tip of wings, 3 feet 10 inches from tip to tail to end of beak, and weighed ten pounds. Color of feathers on back gray, barred with black; wings mostly black; head crested with long gray feathers, spotted with black; under feathers pale, soft and downy; beak black, feet and legs yellow; claws when extended, seven inches long. This species of eagle was never before captured so far from its home land.

Don't forget the New Jersey Central Atlantic City Excursion of July 26th.

A Summer Paradise.

New Jersey is a pioneer state as a summer resort, and every nook and corner has some seductive attraction. The entire coast line is devoted to summer resorts of unequalled prominence, and the more noted watering places include Atlantic Highlands, Seabright, Monmouth Beach, Long Branch, Elberon, Deal, Allenhurst, Asbury Park, Spring Lake, Belmar and Point Pleasant, Beach Haven, Barnegat, Atlantic City, Sea Isle City, Ocean City and Cape May. The interior of Jersey also has many charming resorts, including Lake Hopatcong, Mauch Chunk, Glen Summit, Harveys Lake and Lehigh Gap. The story of these resorts is told interestingly in "Sea Shore and Mountains," an illustrated booklet, issued by C. M. Burt, Gen'l Pass. Agent, New Jersey Central, 143 Liberty Street, and is sent upon receipt of 6 cents in stamps to any address.

FOR SALE OR EXCHANGE.

Useful Articles of Daily Need for Sale or Exchange for Other Articles.

One cent a word first insertion, or three times for two cents. Nothing less than ten words considered. When convenient call at REVIEW office in reply to ads, where explicit directions will be given regarding same.

The loud clap of thunder you heard Wednesday evening about eight o'clock was the result of a bolt of lighting striking the house of Mr. Whelan on Brook aveune; this borough. No serious loss resulted, although considerable of the weatherboarding was torn out.

Corner Stone of New Court House Laid

The corner stone of the new courthouse for Union county was laid at Elizabeth Thursday and was witnessed by about 5,000 persons.

J. Frank Hubbard, of Plainfield was to have delivered the address of welcome, but on account of his feeble condition, the result of a recent illness, George T. Parrot, was substituted.

Ex Governor Voorhees was the orator of the occasion and gave the early history of Elizabeth and its buildings.

The corner stone was laid by W. Holt Apgar, Most Worshipful Grand Master of New Jersey, and during the ceremony the Masonic ritual was used.

The new courthouse will be of granite and marble, three stories high; the roof of dark green copper or tile, and will cost $600,000.

A banquet was served by Union county at Jacob's Theatre to the grand lodge of masons, city and county officials and prominent citizens.

A Good Story Spoiled.

The Bound Brook Chronicle says "Many of our readers probably saw a story in the daily papers to the effect that a four-year-old child of C. M. Bandell, near Bound Brook, would have met an untimely death in a raging stream but for the presence of a bull which lent its tail as a life line and towed the drowning boy to shore. The fact that this bull has been dead these many, many years prevents the Chronicle from printing the miraculous rescue in full".

Sunday Closing at Westfield.

The proposed Sunday closing ordinance of the Westfield Council is meeting with everything but the approbation of the citizens. It will close barber shops and news stands at 10 a. m. Under it milkmen must make all their deliveries before that hour. Fruit and confectionery stores must keep closed, and drug stores must sell only medicines. Bootblacks, too, must close up.

The ordinance comes up for final consideration at the next meeting of the council, when the general public will be given a chance to be heard.

Somerville Newspapers After Trolley People.

The citizens of Somerville are up in arms over the action of the Middlesex and Somerset Traction company in cutting of the sale of tickets and making the round trip fare to Bound Brook 20 cents, or 10 cents each way. The company attempted to place wooden poles in Somerville, contrary to the provisions of its franchise, and the authorities stopped the work. The service never has been good, and those who didn't know about the purchasing of tickets at one of the company's offices, have to pay the 10 cents for the four-mile ride.

Zinc Mines at Califon.

John Neighbor, of Califon, has leased his zinc mine to a Mr. Bond, of Somerville. The ore obtained there at present, says a High Bridge *Gazette* correspondent, contains both zinc and iron in such quantities that it is of but little value for either. The top ore of the mine contained valuable deposits of iron, and shipments were shipped to the Chester furnace and other places years ago. As soon as any depth was reached however, zinc began to show in large quantities and it is believed that a very good quality of zinc ore will be found at no great depth. Those who know say zinc is generally found between the strata of iron and limestone and the latter can not be very far below the surface. It is probable that these mines will yet develop into something rich.—*Hunterdon Republican.*

To Re-argue the General School Law.

That the general school law of New Jersey, under which the entire public school system of the State is conducted, is in danger of being set aside, was shown by an announcement made recently by Chancellor McGee that the Court of Errors and Appeals desired a re-argument of the case in which the constitutionality of the act was attacked. The court fixed September 9 as the date for the re argument. The law was passed in 1902. The law was attacked in proceedings brought in the name of Michael Riccio against Hoboken, the principal objection raised being that the provision making a distinction between cities and other municipalities was contrary to the constitution al provision that a system of public instruction shall be maintained by uniform laws. The setting aside of the act, it is declared, would result in the entanglement of school matters in every part of the State, and the school authorities fear that years of litigation would follow such a decision.

THE NEW TAX LAWS

Property to be Assessed at True Value--Very Few Changes.

One of the most important measures passed by the Legislature last winter, and one about which little has been said publicly, is the revised tax act. It was prepared by a commission appointed for the purpose, composed of Supreme Court Justices Dixon, Fort and Attorney Charles L. Corbin. It is the only revision of the tax laws that has been made since 1846.

The commission found itself with a mass of matter on its hands when it began the work of revision. The acts relating to taxation were a vast wilderness of rules, exceptions, directions, proceedings repealers and requirements that nobody pretended to or could understand.

When the commission had completed its work it had reduced over 600 sections to 36, contained in chapter 208 of the laws of 1903, which will take affect December 20 next. It opens with a provision for the poll tax, the taxing of property at true value, the defining of the term "taxing district" to conform to the terms used in the railroad tax law; enumeratesthe exemptions fom taxation. One tenth of all the property in the State is now exempt from taxation.

The article relating to the assessment of real property establishes the uniform rule that it shall be vauled before the third Monday of August, and empowers the State Board of Taxation to prescribe a rule that the land shall be assessed separately from the buildings, and they may require a separate entry of arable lands, etc.; the assessors must also list cemeteries, church property, public buildings and other exempt property.

No mortgage on real property is to be listed for taxation, and no deduction from the assessed value of the land is to be made on account of any mortgage, but the owner of the property who pays the tax on the land is entitled to credit upon the interest for so much of the tax as is equal to the tax rate applied to the amount due on the mortgage, except where the parties have otherwise agreed Tangible personal property is to be assessed where found, and other personal property in the district where the taxable inhabitant resides. Taxable personal property of non-residents is to be assessed where found.

Corporations are to be regarded as residents and inhabitant of the taxing district where their chief office is located, and their personal property is to be taxed as that of an in dividual, except that foreign corporations doing business here are to be taxed with respect to the amount of business done here.

National bank stock is to be assesed against the stockholders in the taxing district where they reside, and if they reside out of the State then in the taxing district where the bank is located. The tax duplicate must be made out on or before the second Tuesday in August. The county board of assessors are required to meet at the county court house on the second Tuesday of September The commissioners of appeal are to meet on the fourth Tuesday of October. In cities a different time may be fixed. They must hear every taxpayer who feels aggrieved and applies in time.

The thirty-eighth section provides that no assessment shall hereafter be set aside upon any certiorari because the State county or local taxes are blended together, nor because the aggregate amount levied is greater than called for by law, nor because the assessment is made at a higher rate than authorized by law, or because of lack of form, but the court shall correct these errors.

Taxes are payable on December 20, and all who do not pay on or before that day are delinquents, and the taxes thereafter bear interest at from 7 to 12 per cent. All the taxes may be collected by sale of chattels of the delinquent or by taking his body.

All unpaid taxes on real estate are made a first lien on the land on and after December 20, which lien is paramount to all prior and subsequent alienations and descents and liens, except subsequent taxes. If the taxes remain unpaid until the following first day of September, the land, or a necessary portion thereof, may be sold for the shortest term for which any person will take the same and pay the tax and interest; or it may be sold in fee, where no one will bid for a shorter term. A certificate of sale is issued to the purchaser, who may, at his option, record it in the office of the county clerk, and he shall be entitled to immediate possession of the lands sold and the rents thereof for the term of the sale or until redemption. The owner, mortgagee or other person having interest in the land, may redeem the same at any time within two years from date of sale or at any time thereafter until the right of redemption has been cut off. The person redeeming must pay interest at 12 per cent. The purchaser may at any time within 20 years from the date of sale give notice to all persons interested to redeem the land. If the land is not redeemed within 60 days after notice the right of redemption is gone. Tax certificates are void after 20 years from their date, unless the purchaser enters into actual possession or forecloses his right to redeem by notice or by proceedings in equity.

Every assessor is to deliver his books and papers to his successor in office. Compensation of assessors, collectors and members of the board of assessors is to be fixed by the taxing districts, except where fees are allowed.

The act is arranged in an orderly way, is compact, simple and plain.

Failure of E. S. Hooley & Company.

Another stock exchange failure was recorded soon after the opening of Monday's market, when formal announcement was made on the exchange of the suspension of Edwin S. Hooley & Co. The firm includes, besides Mr. Hooley, Frank Brumley and Norbert Heinsheimer.

The firm had no statement to make. The general belief is that the failure was due largely to the heavy drop in prices of Des Moines and Fort Dodge and Evansville and Terre Haute stocks on Saturday. It is authoritatively stated that W. L. Stow & Co. had no interest in Evansville and Terre Haute.

Last year Mr. Hooley and Mr. Stow bought control of the Des Moines and Fort Dodge property, and at the annual meeting a year ago elected three directors representing their interests, and at the annual meeting this year elected three more. The lease under which the Rock Island operates the property is still in force.

In stock exchange circles Hooley & Co.'s suspension caused little surprise. In some quarters, in fact, the announcement had been discounted. The market opened irregular and fractionally lower. It rallied just before the Hooley failure was announced, after which it declined sharply among some of the more inactive stocks, notably Evansville and Terre Haute, which dropped 9½, and Eastern Illinois certificates 8, after which it rallied again, more notably among standard railways and leading industrials.

Mr. Hooley is the president and a director of the Evansville and Terre Haute Railroad company, a director of the Des Moines and Fort Dodge railroad, in the Guardian Trust company of New York and Maiden Lane Safe Deposit company. He is prominent socially and a director of the Union League Club of New York and New York Yacht Club.

Mr. Hooley is a resident of this borough. He belongs to the local golf clubs and is a director in The Plainfield Trust Company.

Weather and Crop Bulletin.

Central Office, U. S. Weather Bureau,
ATLANTIC CITY, N. J., July 29, 1903.

The week ending Monday, July 27, was chiefly characterized by frequent thunderstorms, accompanied by hail and high winds in places. That on the 22d was especially destructive in portions of Passaic, Somerset, Middlesex and Monmouth counties. In the vicinity of Paterson, the estimated amount of damage done is three hundred thousand dollars ($300,000). The area of these storms were very limited and occurred at different hours of the day. The latter half of the week was favorable for the continuance of harvesting operations; much hay and grain were housed in the northern and central sections, and much that was cut in forepart of the week is still in the fields, too wet to house. Corn, although still backward, is growing rapidly. The cucumber and melon outlook in the southern section is not promising, owing to a lack of warm sunshine.

Big Catch of Fish.

Probably one of the greatest fishing carnivals ever had in New Jersey took place Monday afternoon and that night, when hundreds of suckers, perch and carp were caught by hand net, shot or scooped in by basketfuls from the Elizabeth River, near the gates of the reservoir. One little lad, Nate Harber, a newsboy, saw the fish jumping over the gates into the river. The gates were opened and hundreds of fish including eels, carp, suckers, perch, catfish and pickerel, went from the reservoir into shallow pools in the river. Harber waded into the river with shoes on and caught a dozen big carp. Men and boys gathered with shot guns, crab nets, clubs and sticks and the fish were slaughtered by wholesale. As the schools swam past the boys and men struck at them with their sticks and killed four and five at a time.

Boys went through the city and sold the fish. Samuel Blawe alone caught 300 fish and soon sold them. Wagons were carried to the river side to carry loads of fish away.

G. B. Allen, of 18 Linden avenue employs his idle moments away from Scott's Press Works in floriculture, and his garden plants at present are very attractive.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

In eleven months Mrs. Matilda Tharp, of Sergeantsville, from 80 hens sold 6,280 eggs, the sales amounting to $100. Those used in the family were not counted.

John G. Borton, of Woodstown, reports 240 bushels of white potatoes to the acre, and as they are worth $2 per barrel there is a veritable gold mine on all the farms. Potatoes are unusually large this season.

A quartet of electric lights has been placed, by the order of Supt. Martin, at the top of the flag pole at the Reformatory, at Rahway to make the points of the compass; each is of a different shade—blue, north, red, east, green, south, and white, west.

The second anniversary of the opening of the Rahway Reformatory will be held next Wednesday. That will also be the regular meeting day for the commissioners. A new flag will be raised on that occasion, on the new 150 foot flag staff, and a fine program will be arranged.

Park Ridge will hold a special election on August 25 to determine whether the borough shall be bonded for $15,000 for the purpose of erecting and maintaining an electric light plant, the borough council having decided to submit the question to the voters on that date.

Experimental street sprinkling with oil in Rutherford, at Orange and Englewood Cliffs has been reported a success, and highly endorsed by the citizens. It has been found that besides laying the dust for a long period, the odor clears the immediate vicinity almost entirely of mosquitoes.

Superintendent Blodgett, of the New York and Long Branch railroad says that Sunday trains will never be stopped at Ocean Grove so long as he lives. He made an agreement with the late President [illegible] of the Ocean Grove association, years ago that he would never stop Sunday trains at the Grove without the consent of the association, and he is very emphatic in his declaration that this promise will be kept.

Rev. Holmes F. Gravatt, pastor of the First M. E. Church, of Millville, evidently believes that he should see to the physical comfort of his people as well as look after their spiritual welfare. Sunday morning at the close of his sermon he said that during the heated spell the women should leave their hats and bonnets at home, and he also recommended that the men of the congregation wear shirtwaists. The ushers will appear in shirtwaists next Sunday.

The old Sound steamboat Massachusetts, which ran on the Providence and Stonington Line, has been purchased by John H. Gregory, the local wrecker, and will be taken to Perth Amboy this week and broken up. She is a three-decked sidewheeler, built at Greenpoint, by Steers, in 1877, is 324 feet long, 43 feet wide and 16 feet deep. Her tonnage is 2,606. For the last twelve years the steamboat was in charge of Captain O. C. Griffin, now master of the Plymouth, of the Fall River line. His predecessors were Captain Ray Allen and Captain William H. Jones. The hull will probably become a coal barge and the engines and boilers will be used again.

While workmen were taking out sand for building purposes near Milford last Monday, a large bowl made of baked clay and covered with Indian hieroglyphics was unearthed. It is larger and better made than any that Indian relic seekers in that locality had ever seen. Within a short distance of this pit there is another pit, from which, not long since, were taken several Indian skulls, and one of them had a stone pipe, rudely and curiously carved, clutched between the well-preserved teeth. Tradition has it that a fierce bloody battle, known as the "grasshopper battle," was fought here between two Indian tribes over a dispute originating among some Indian children about a grasshopper.

Alexander Barret, of Nyack, N. Y., who makes his living, and quite a fair one at that, as a professional pearl hunter, invaded the borough of Sussex last week. Mr. Barret has ferded about all the streams near Nyack and practically the Hackensack River as far down as Hackensack, and has nearly scraped the bottoms of the streams for the same distance for mussels, which he opens in search of pearls. He has made a business of it for many years and has made some lucky finds. At times he goes out to Ohio and works certain streams there. Some one told him there was an abundance of mussels in the Wallkill and Papakating streams, in Sussex county, and he went there to try his hand at it. He was well rewarded, having found about $30 worth of the little gems, which he exhibited in a small vial of water. He wears a rubber suit, which comes well up under his arms, wades the streams and picks up the mussels from the bottom of the stream. These he puts into a basket, takes them to the shore and opens them. He sometimes opens hundreds, using a little instrument like an oyster knife, before he finds one. On Friday last he opened 3,000 mussels, the biggest day's work he ever did, so he says, when he was compelled to abandon the work on account of high water. He says the Papakating is one of the best streams he ever worked in, and that he never found so many mussels in a similar stream. Most of the pearls found there are white, some of them good size and very valuable. Some handsome pink specimens were also found. He had some pink ones found near Nyack that were valued as high as $30 each. The Wallkill is also fertile in mussels.

SUBURBAN NOTES.

WATCHUNG.

Miss Essie Schmidt is visiting her aunt at Oak Tree.

Mr. and Mrs. F. Bartel are happy over a new little baby girl.

Miss Cora Meyer, who has been visiting Geo. Schmidt's family, has returned to her home in Bayonne.

Mrs. Wm. Leitheusser, of Plainfield, with her daughters, Minnie and Helen, visited Mrs. J. H. Koch on Friday.

Mrs. J. H. Koch gave an afternoon tea on her lawn in honor of Miss Sloebone, who has been her guest for a week.

Mr. and Mrs. Casey have returned to their home in Hackensack after a long visit with Postmaster Schmidt's family.

Now for a sidewalk from Watchung to the trolley line. Since J. Y. Wilson has so generously offered one hundred tons of crushed stone for a side walk, a petition has been circulated by the citizens in which the Township Committee has been asked to take the matter up at once and with Mr. Wilson's help have the sidewalk laid.

• • •

LIBERTY CORNER.

Mrs. Schue and daughter are stopping at Mrs. Froehlings.

Mrs. Helen Fee, of Jersey City, is visiting her father, Fred Wienken.

Wm. Smith, of the St. Charles Hotel, New York City, visited his mother on Sunday.

Wm. H. Rommel, of Brooklyn, N. Y., will spend his vacation with his father, H. B. Rommel, of this place.

Mr. and Mrs. J. S. Irving and daughter Mina and Mr. and Mrs. Frank Irving, of Westfield, N. J., spent Sunday with Mr. and Mrs. Wm. L Hayes.

Sunday Excursion to Mauch Chunk.

The New Jersey Central will run an excursion to Mauch Chunk on Sunday, Aug 2, 1903. Round trip $1.50, children 75 cents from Plainfield at 9.22 a. m. Mauch Chunk is one of the most charming mountain resorts in this section. The trip over the gravity railroad to Summit and Mt. Pisgah is one of scenic grandeur and a trip that will never be forgotten. After the trip over the Switchback you should go to Glen Onoko where you will find beautiful little cascades, caverns and like attractions.

Literary Note.

"Book News" for August is the annual index number. A carefully compiled reversible index to the whole twelve issues of the year is furnished, so that bound copies can be conveniently made. The remainder of the current number is replete with matters of literary interest, the deficiency due to the dulness of the book season being supplied by articles upon timely topics concerning the world of authors and letters.

A Summer Paradise.

New Jersey is a pioneer state as a summer resort, and every nook and corner has some seductive attraction. The entire coast line is devoted to summer resorts of unequalled prominence, and the more noted watering places include Atlantic Highlands, Seabright, Monmouth Beach, Long Branch, Elberon, Deal, Allenhurst, Asbury Park, Spring Lake, Belmar and Point Pleasant, Beach Haven, Barnegat, Atlantic City, Sea Isle City, Ocean City and Cape May. The interior of Jersey also has many charming resorts, including Lake Hopatcong, Mauch Chunk, Glen Summit, Harveys Lake and Lehigh Gap. The story of these resorts is told interestingly in "Sea Shore and Mountains," an illustrated booklet, issued by C. M. Burt, Gen'l Pass Agent, New Jersey Central, 143 Liberty Street, and is sent upon receipt of 6 cents in stamps to any address.

POPE LEO XIII. LAID TO REST

The Final Solemn Ceremony Over the Pontiff's Body.

PUT IN NICHE IN ST. PETER'S

An Eulogy Read While Brazier Sent Sparks Toward the Ceiling—Diplomats Accredited to the Vatican Make a Formal Call on the Cardinals—The Fisherman's Ring Lost.

Rome.—The body of the Pope was interred in St. Peter's. The strokes of the hammer which resounded through the immense dome of the Cathedral, announced to the earnest gathering in the nave that Leo XIII. had been laid to rest. At sundown, the most important and most solemn of all the obsequies took place. The front doors of the Basilica were closed, and the vast church, except for a row of lights at the shrine of St. Peter, the candles about the bier and those persons who had quietly and with the utmost reverence gathered there, appeared deserted.

About 1000 persons had received invitations to attend the ceremonies. The Cardinals, who met earlier in the Vatican, entered, the chapel choir waiting there for the arrival of the procession, Cardinal Oreglia, the Chamberlain, holding the keys of command.

Cardinal Rampolla as Archpriest of the Basilica was waiting outside the gates, in violet robes, surrounded by *the chapter of the Cathedral, which* was led by Mgr. Ceppetelli, who conducted the service. Drs. Lapponi and Mazzoni directed the work of the removal of the bier, which was executed by eight sediari, or Pope's carriers, attired in their brilliant red brocade costumes. They at first tried to raise the bier, but, finding it too heavy, they slowly slid it onto a low car with noiseless wheels.

Then, to the strains of the "Miserere," which rose dolefully through the lofty church, the procession, carrying candles and torches, slowly left the chapel and went up the church, passing the bronze statue and beyond the shrine of St. Peter. *Those gathered fell to their knees.*

After slow progress around the church the sad cortege arrived at the chapel choir, the bier being so carried that the dead Pope entered head first, according to the ceremonial, the chapel from semi-obscurity flashing into the brilliancy of the suddenly turned-on electric light. Here all those who had received invitations were stopped, remaining in the main part of the building behind a double line of the Swiss Guards, in their peculiar yellow, red *and black uniforms and armed with* halberds and serpentine swords. Within the chapel was Count Camillo Pecci, a nephew of the late Pope, wearing the red uniform of a general of the Noble Guard.

In the chapel the music changed to notes of joy and triumph and "In Paradisum" rang out with telling effect. From the outside the five bells of St. Peter's rang their accustomed salute to the coming night, mingling harmoniously with the music of the choir.

The scene in the chapel was most remarkably effective. The bier bearing the body was received by Cardinal Oreglia. It was placed in the centre, backed by an altar, with a beautiful image of the Madonna, before which were burning four immense candles in silver staffs. Around the two sides of

CARDINAL OREGLIA.

the chapel, in the choir seats, were *thirty-six Cardinals, all wearing violet* robes, except Cardinals Gotti and Pierotti, who wore the white mantles of their orders; Cardinal Martinelli in black, as an Augustinian, and Cardinal Vives y Tuto, in Franciscan brown.

In the middle of the right side of the chapel, among the Cardinals, sat Prince Mercantonio Colonna Vassistaitto, on the Pontifical throne, with an empty seat next him, owing to the fact that Prince Orsini, who held the same position, had resigned.

The body was sprinkled *with holy* water, absolution was given and the foot of Leo XIII. was kissed for the last time by Major Domo Cagiano. *Master of the* Chamber Bisleti, and Count Camillo Pecci. The Major Domo then covered the venerable features and hands with a white silk veil bordered with gold. Over this was spread a large silk veil, which covered the whole person.

Fire was lighted in a brasier and blown by a bellows, the sparks rising almost to the ceiling, while Mgr. Bartolini read for twenty minutes the Oratio Brevis, after which the body was interred.

It is estimated that 80,000 persons passed before the body of the Pope while it lay in state in St. Peter's.

An imposing ceremony was the reception by the Sacred College in the Hall of the Consistory of the whole *diplomatic body accredited to the Vatican.*

Senhor d'Antas, of Portugal, the dean of the corps, made an address, in which he expressed the grief of his

CARDINAL GOTTI.
(Pope Leo is said to have favored him as his successor.)

colleagues at the death of the Pope and offered their condolences. He also delivered a eulogy of the late Pontiff.

Cardinal Oreglia replied. After thanking Senhor d'Antas personally and expressing the gratitude of the Sacred College for the interest taken in this sad matter by Catholic nations, he paid a glowing tribute to Leo XIII. He added that he hoped God would direct them in the choice of a successor to the late Holy Father.

After these addresses the Ambassadors defiled before the Cardinals, some of them kissing the hands of the members of the Sacred College. This concluded the ceremony.

Several thousands of the faithful visited St. Peter's the following day to pay tribute before the sarcophagus containing the body of Pope Leo, on which is the following simple inscription in gilded letters:

"Leo XIII. Pont. Max."

The will of Pope Leo was read after the meeting of the Congregation of Cardinals. Only that portion which *deals with the personal estate* was made public. The religious testament was not disclosed.

The will is written on large sheets in the small, clear handwriting of the late Pontiff, presenting no trace of uncertainty, and it might almost be taken for copper plate. It was opened by Cardinals Rampolla, Mocenni and Creioni, the executors. The relatives of the late Pontiff were not present, although they had been invited.

While the will nominally leaves the estate of Carpineto to Count Ludovico Pecci, it really makes no change, as the whole family property, the value of which amounts approximately to $120,000, had *already been divided among* the three nephews, and Count Camillo had sold his share.

When the time came to take the Fisherman's Ring from Pope Leo's finger, it has just developed, another was found in its place. This did not astonish any one, as generally the Pontiff did not wear it, the ring being less of an ornament than an unused seal. At the first meeting of the congregation of Cardinals after the Pope's death, when the famous ring should *have been broken, the ceremony* was omitted, and it was put on record that the ring, for the moment, could not be found. So far it has not been discovered, but the Vatican authorities give assurance that the ring will undoubtedly be found.

Our Condolences Appreciated.

Washington, D. C.—The State Department has received the following:

"Rome.

"John Hay, *Secretary of State*, Washington:

"I have not failed to convey to the Sacred College the heartfelt sympathy expressed by you in the President's name on the sad occasion of His Holiness's death. The Sacred College desires me to express to the President its deep and sincere gratitude for such a noble manifestation.

"M. CARDINAL RAMPOLLA."

Emperor William's Message.

Rome.—The following telegram, dated Molde, Norway, has been received by Cardinal Oreglia from the German Emperor:

"I am painfully affected by the sad news I have just received. I send to the illustrious College of Cardinals the expression of my sincere sympathy at *the grievous loss the Roman Catholic* Church has sustained through the demise of the Pope. I shall always retain a faithful memory of the exalted and venerable man, who was a personal friend of mine, and whose extraordinary gifts of heart and mind compelled my admiration anew only a few weeks ago on the occasion of my last visit to Rome."

King Edward's Deep Regret.

London. — King Edward has commanded Irish Secretary Wyndham to express to Cardinal Logue, the Archbishop of Armagh and Primate of All Ireland, his Majesty's deep regret at the news of the death of the Pope and to ask his Eminence to convey to the Sacred College his Majesty's sincere regrets.

HIS WIFE'S BLOW KILLED HIM.

Barker Had Said His Spouse Could Not Make Coffee "Like Mother."

Chicago.—Thomas Barker, the man who told his wife that she could not make coffee "like mother," and was hit on the head with a stove lid, is dead as a result.

Mrs. Barker is under arrest, charged with murder. "He got up late that morning and the coffee became cold," she said. "He had always criticised my cooking. I did not mean to hurt him."

Nearly 8000 Hedgehogs Killed.

Since the last Legislature of New Hampshire placed a bounty of twenty-five cents on hedgehogs, twenty-six towns, one-tenth of the whole number, have settled with the State Treasurer, and have turned in 7986 pelts, for which the State has paid in bounties $1976.50.

Fatal Collision at Sea.

The British steamer Middleham Castle ran down a Swedish brigantine, six of whose crew were drowned, near Owners' Lightship.

JAPAN GROWING UNEASY

Cranborne Says Britain is Anxious For Manchurian Settlement.

Russia and Japan Reported to Be Making Preparations For War in the Far East.

London.—In the House of Commons Joseph Walton, a Liberal, who strongly favors an extension of British trade by means of colonial development, accused the Government of a succession of humiliating surrenders in China. He said the time had arrived for facing the situation in Manchuria.

The Under Foreign Secretary, Lord Cranborne, in reply, said that British trade in China was still increasing at a satisfactory rate, and he was confident of securing a full share of railway and other valuable concessions. The Government, he said, was fully aware of the position of Manchuria. The great difficulty up to the present time *in negotiating with Russia* was that Great Britain had never yet been able to ascertain exactly what the Russian Government wanted, and the fact remained that Manchuria was still occupied. Russia's failure to fulfil her undertaking, he said, was satisfactory neither to Great Britain, Japan, nor the United States.

"Our ally, Japan," Lord Cranborne said, "is becoming uneasy at the prolongation of the occupation of Manchuria, and we are equally anxious for some kind of a settlement. There are certain elements out of which an agreement ought to be possible, and if Russia is prepared to give due weight to *our treaty rights and commercial* interests, she will not find us irreconcilable to compromise."

Lord Cranborne's remarks were the subject of special comment because of the presence in London of the French arbitrationists.

The Daily Mail's Tokio correspondent sends rather an alarming view of the situation in the East to his paper. He says that Russia's retention of Manchuria, the increase of her fleet, the dispatch of reinforcements to Manchuria, the southward movement of the occupying army in Manchuria, and the defiant conduct on the Korean frontier alarms the Japanese, many of whom are convinced that it would be better to fight now than risk the eventual loss of Korea and the relegation of Japan to a secondary place. He says the Japanese are accumulating stores and negotiating the purchase of ships; that a squadron is off Vladivostock, to which port Russian vessels have been sent as a precaution, and that both fleets are ready for action at any moment.

He says that a perusal of the Siberian press reveals the aggressive *spirit of the Russian military party;* that the Russians believe they will lose prestige if they give way now with the result that their Far Eastern empire will be lost and Japanese influence will become predominant. The appointment of Marquis Ito as President of the Privy Council, the correspondent says, is favorable to peace, but Russia must retreat, or there will be very grave danger of war. He says the Japanese believe that France and England will join in the expected conflict, which diplomats at Tokio think might, if once begun, continue for years, involving disastrous results to Japanese finance and the creation of a sort of *Balkan difficulty in Korea.* He adds that confidence is shown in the Anglo-Japanese alliance.

The Standard's Tien-Tsin correspondent says that since the 15th of the month there has been an incessant increase in the concentration of Russian forces at Port Arthur and elsewhere, many who were ostensibly emigrants being in reality soldiers. He adds that there is not the slightest evidence that Russia inteads to withdraw or moderate her policy.

WHEAT BLOCKADES RAILROADS.

Heavy Crop Movement Already Too Great to Be Handled.

Kansas City, Mo.—Almost before the great wheat crop of 1903 has begun to move the railroads have thrown up their hands and declared their inability to cope with the situation. The Missouri Pacific and Burlington have announced that they will not receive grain shipments for Kansas City, and the Missouri Pacific is not only refusing shipments to Kansas City, but will not receive grain routed through Kansas City.

The Santa Fe will issue an order placing an embargo against the Burlington, Wabash, Missouri Pacific and Kansas City Southern railroads. This means that the Santa Fe will not deliver cars to the companies named until some assurances can be had that these lines will return cars promptly. Under present conditions these lines cannot make prompt return of cars.

BETTING ON YACHT RACE.

Wall Street Brokers Taking an Interest in International Contest.

New York City.—With the approach *of the international yachting races the* brokers in Wall Street are becoming more or less interested. Betting was at 10 to 7 in favor of the American boat. There was a growing disposition among the brokers on the floor of the Stock Exchange to take the short end and the feeling in the Street, especially among the betting men on the curbs, was in favor of the Britisher.

Fred H. Brooks, who is making the odds on the great racing event, said that the betting would probably be even money before the first race on August 20th. He has already placed several thousand dollars on the Shamrock at the prevailing odds of 10 to 7.

Threshing Winter Wheat.

Winter wheat harvest is practically completed, except in a few of the more northerly States. Weather conditions have been favorable for threshing, which work is in progress, the yield continuing light.

Final Estimates of Tobacco Crop.

The final estimates of the Department of Agriculture, at Washington on the tobacco crop of 1902 in the United States are announced as follows: Acreage, 1,030,734; production 821,823,963 pounds; value, $57,563,510

MANY KILLED IN EXPLOSION

Powder Magazines Near Lowell, Mass., Blow Up.

AWFUL MISTAKE OF WORKMAN

He Poured Nitric Acid on Nitro-Glycerine and the Disaster Followed—Four Boys in Swimming Killed by the Concussion—Country For Miles Around Shaken—Militia Aided Police.

Lowell, Mass. — With a crash like thunder that follows a near-by flash of lightning and a shock that was felt fifty miles away, two powder magazines of the United States Cartridge Company, in Tewksbury, a suburb of Lowell, blew up, causing the death of twenty-one persons and injury to more than fifty.

Fourteen frame house in the vicinity tumbled down as though they were built of cardboard. Seven of these caught fire, probably from the kitchen stoves, and were consumed. At least three persons pinned in the ruins were burned to death, and eight others who were rescued died later. At least fifty houses were badly damaged.

Early in the morning eight men, three of them employes of the company, three expressmen and two carpenters, were sent to one of the magazines to mend the floor. Two of the wagons had been loaded with the powder which had been removed to give room *to make the repairs,* when at 9:06 o'clock the explosion occurred.

Clarendon Goodwin, the foreman of the crew that was removing the powder, and one of his assistants, Amadee Boulanger, miraculously escaped, although they were seriously injured. At the hospital Goodwin explained the cause of the explosion.

He said that the men went down to the magazine to fix the floor, and after the reuse had been loaded with the powder which was in the magazine it was discovered that a can of nitro-glycerine, which was stored in the magazine, was leaking.

Mr. Goodwin picked up what he thought was a jug of water and began pouring it on the nitro-glycerine with the idea of diluting it and washing it up. As soon as the fluid from the jug struck the floor he found that it was nitric acid.

The floor at once began to smoke, and when the men saw it they rushed from the building, but had not gone ten feet when the explosion occurred. The magazine was therefore the first to go up, followed immediately by the gunpowder in the three wagons, and several seconds later by the second magazine.

To those who heard the crash it seemed as if there were two distinct explosions, with a continuous roar between them. There are, however, five holes in the ground, which seem to indicate five explosions.

The entire catastrophe, however, occupied the space of scarcely five seconds, but in that time the surrounding property was swept as if a small volcano had broken forth in its midst. *Every house within 200 yards col*lapsed. Trees were blown down, the grass within 100 yards mowed as if by a lawn mower, while bricks from the two magazines were hurled far across the river and all over the neighborhood.

The magazines, fortunately were situated more than a mile away from the factory itself. Both magazines ordinarily contained two or three tons of gunpowder in tin kegs, each keg being about eighteen inches high and a foot in diameter.

For several minutes after the explosions the air was completely filled with smoke and dust, illuminated by the glare from the already burning houses. *Those who survived dragged* themselves to what seemed a place of safety, only to be recalled by the shrieks of those less fortunate.

The work of rescue at once began, but in many cases the flames had already gained full sway over the crumbled ruins, and despite the energetic efforts of those who were not seriously hurt, several persons were burned to death before the debris which covered them could be removed.

The property is situated just over the Lowell line, in Tewksbury, but the Lowell Fire Department at once responded and did noble work in caring for the wounded.

Ambulances soon appeared on the scene and assisted the firemen, and all sorts of vehicles were pressed into the service. Nearly two score of persons were conveyed to the hospitals within half an hour, while many more who suffered merely from slight cuts by flying glass had their wounds bound up and remained on the scene, where they also assisted in caring for the less fortunate.

The explosion shook the city, and within half an hour there were at least 5000 people on the scene of the catastrophe, hindering the work of caring for the wounded so that the Acting Mayor of Lowell sent out a call for the *militia to assist the local police.* Three companies responded and three hours later had thrown a cordon of men around the district and cleared the place of every one except those immediately engaged in quenching the flames and searching for other victims of the explosion.

Two hundred yards further down the river from the second magazine the firemen suddenly came across the bodies of four little boys, who were just about to have a swim. A fifth member of the little party was fortunately in the river when the explosion occurred and escaped without injury.

On the other side of the magazine was a grove of trees, through which the explosion tore a path fifty feet wide *for a distance of nearly 300 yards.* The four little boys were caught in the centre of this path, and three were instantly killed. The body of one of them was frightfully mutilated, the head being completely blown off. The fourth was alive when he was discovered, but died a few minutes later.

Apparently the force from this second magazine was expended in two directions, north and south. On the north it completely demolished the house of William Riggs about fifty yards away, almost burying Mrs. Riggs and badly injuring her little son. Mrs. Riggs was subsequently removed, but died before being taken to the hospital.

Most of the property destroyed consisted of small buildings constructed of wood and at a comparatively small cost. The property loss, therefore, will be rather small.

The Selectmen of the town of Tewksbury, in which the explosion occurred, stated that they thought that $75,000 would cover the entire loss.

So large was the quantity of powder in storage that the shock of the explosion was distinctly felt all over northeastern Massachusetts. In Lowell many windows were demolished, and at places fifteen miles away glass was also shattered. The wreck caused by the explosion covers an extent of three acres. Houses, barns and outbuildings lie in ruins, some half demolished and others hardly more than a heap of broken timbers.

The building in which the explosion *occurred was about one and one-half* miles distant from the works of the cartridge company, which are in Lowell. Within a distance of fifty yards are half a dozen houses.

One hundred yards away there are twenty houses more, and beyond that the buildings are close together. Every structure within a quarter of a mile was torn within and without. Men, women and children who were inside sustained cuts, bruises and broken bones.

Most of those killed were employes of the concern or persons living in the small houses destroyed.

TURK LONG HELD OFFICE.

Knowledge of State Secrets Enabled Him to Have His Own Way.

Constantinople, Turkey. — Hadji Rey, Minister of Public Instruction, has been promoted to the position of Minister of Marine, which was occupied for twenty-three years by Hassan Pasha, who died a few days ago. The latter was known as "the permanent Minister of Marine," and was reputed to be the richest man in the Turkish Empire. He was credited with the possession of State secrets, which, it is said, enabled him to commit acts which nobody else would have dared to contemplate.

During his last illness it is said that his house was searched, presumably with the idea of seizing compromising documents, but nothing was found, and it is presumed that they were all placed for safe keeping, together with the bulk of his fortune, in a private bank. It is alleged that he agreed with Russia, for a consideration, to prevent the upbuilding of the Turkish navy.

CONSUL-GENERAL LONG DEAD.

He Is Killed by a Fall While on a Visit to Scotland.

Glasgow.—J. G. Long, the United States Consul-General at Cairo, died at Dunbar, Scotland. His death was the result of a fall.

Mr. Long was returning to his hotel at the time he met with the fatal accident. In the darkness he fell down the basement steps, a distance of eight feet, and fractured his skull.

Washington, D. C.—Mr. Long was born in Wilmington, N. C., August 19, 1846. He held various minor Federal offices, and was at one time Mayor of St. Augustine. He was appointed *United States Consul-General at Cairo* in 1897.

DISCONTENT IN HONOLULU.

Home Rule Party Denounces Governor Dole's Administration.

Honolulu, Hawaii. — The platform adopted by the convention of the Home Rule party denounces the administration of Governor Dole as oligarchical, the charge being made that the Governor and a selected clique control the *affairs of the Territory in a selfish and* wasteful manner. The administration is charged with being corrupt, and favoritism is declared to be rampant to a degree intolerable to the citizens of the islands.

It was decided that the time is not ripe for the presentation to the National Congress of a memorial praying for an independent form of government similar to that enjoyed by Cuba.

Lost Boy in a Swamp Four Days.

Albert Swanson, the five-year-old son of Charles Swanson, a homesteader near Cowan, forty miles from Duluth, Minn., after having been lost in a great *swamp near that place for four days* and four nights, was found by an Indian guide named John Laparlo. The Indian was one of three guides in charge of 100 white men, and they found the boy on a deer trail, nearly dead from starvation and terror. Laparlo made a birch bark basket, and in it carried the boy to his home.

Wants the $50,000 Anti-Weevil Reward.

George Franklin, a farmer living near San Marco, Texas, says he has discovered a successful remedy for eradicating the cotton boll weevil. He submitted to Governor Lanham his claim for the reward of $50,000 which is offered by the *State of Texas* for a remedy for killing the pests. His remedy is a liquid chemical solution which is sprayed upon the cotton and is harmless to the plant.

Land Frauds in Mississippi.

It is said that numerous land frauds have been discovered in Mississippi.

Heroic Mother Succumbs to Burns.

After hovering between life and death for three weeks Mrs. George Potts, at Elkton, Md., died as a result of being horribly burned about the breast and limbs, while making an effort to save the life of her four-year-old son. The latter was burned almost to a crisp by the explosion of a can of coal oil.

Servian Heir a Degenerate.

After an examination made by order of the Russian court, the eldest son of King Peter of Servia was declared to be a degenerate.

Arkansas Kicks Turret Loose.

The monitor Arkansas arrived at the Navy Yard at Portsmouth, Va. She kicked her turret loose by trying to fire her twelve-inch guns simultaneously. The turret will have to be removed and the guns taken out, as in the case of *the monitor Nevada, now at the yard.*

Heavy Loss of Life at Che-Foo.

An extraordinary rainfall has inundated Che-Foo, China, resulting in enormous loss of life and property in the native city and heavy damage to the foreign settlement.

RUSSIA LIMITS PASSPORTS

Signers of Kishineff Petition May Not Travel in Her Territory.

MANILA TO LOSE ITS CONSULATE

State Department Notified That Only in Four Cities Hereafter Will Passports to Russia Be Signed by Her Consular Representatives—It is Believed Count Cassini Will Not Return to Washington.

Washington, D. C.—Russia has made an unexpected move, which is accepted here that she has decided on retaliatory measures as a result of the Kishineff petition, and that there will be a more strict examination of Americans *who intend to travel in Russia.*

Acting Secretary Loomis was notified by the Russian Charge that hereafter passports issued to American citizens who expect to visit Russia will be vised only at the Russian Embassy in Washington and the Consulates in New York, Chicago and San Francisco. This cuts off Savannah, Mobile, Pensacola, Baltimore, Philadelphia, Portland, Ore., Galveston and Manila, at all of which ports passports have heretofore been indorsed by the Russian consuls or agents.

The new order came from St. Petersburg. *Mr. Loomis was not told why it* was issued, and was left to guess its real purport. One reason assigned by State Department officers is that the Czar has decided to reduce expenses by abolishing the consulates at the ports at which passports will be no longer vised. This sweeping reduction in Russia's consular representation in the United States would in itself be a step which diplomats especially would be quick to recognize.

The real reason is believed to be the determination by Russia to exercise a much more strict supervision over Americans who want to travel in the country, with a view to shutting out of the *prominent people* who took leading part in the demonstrations in behalf of the persecuted Jews following the Kishineff massacre. This embargo may even extend to all the signers of the Kishineff petitions so far as their names can be ascertained. The largest demonstrations were held in Washington, New York, Chicago and San Francisco, and the Russian consular representatives in those cities have complete lists of the men who are regarded with disfavor by Russia on account of their activity in behalf of the Jews.

Passports issued by the State Department for travel in Russia are of no value *unless* they bear the indorsement of some Russian consular representative who has the necessary authority. Any consul can refuse to indorse a passport for any reason or for none at all, and even Secretary Hay or the President cannot ask him why. His refusal to vise the passport ends all argument.

The belief that Count Cassini will not return to this country as Russian Ambassador or in any other capacity is growing. Mail gossip from St. Petersburg speaks of Alexander Isvolsky as his probable successor. The same advices hint that the United States may be deprived of the presence of any Russian Ambassador for some time. Mr. Isvolsky was until recently Russian Minister to Japan, and until the Count Cassini's return was said to be slated for the Danish mission. He was formerly one of the Secretaries of the Embassy in Washington.

RACE MURDER BY MOTHERS.

Indorsement of Dr. Woodward's View as to Neglect of Infants.

Washington, D. C.—Dr. George N. Acker, visiting physician at the Children's Hospital, fully agrees with Dr. William C. Woodward, Health Officer of the District, that race murder is being committed here through the carelessness and negligence of mothers.

"The mortality of infants is a matter *of grave concern to the public.* The death rate is so abnormal that the question can no longer be put aside without comment. A remedy is needed. That remedy must be provided by the people themselves.

"Without a shadow of doubt the conditions are due to the improper feeding of children. The chief fault lies in the careless use of milk—impure milk is death to an infant.

"But this is not all. The basic trouble is invariably found in the ignorance of the mother, who knows nothing and cares nothing about the proper nourishment of children. It is their wilful neglect and lamentable ignorance that results in the excessive death rate—and 'race murder.'"

NEGRO WOMAN LYNCHED.

Was a Servant and Was Accused of Poisoning One of the Family.

Shreveport, La.—Jennie Steer, the negro maid servant who poisoned Miss Dolan, was lynched a few miles from the scene of her crime. A deputy sheriff was sent to Cross Keys, where the woman was arrested, in the hope of preventing the lynching, but arrived there too late.

The lynched woman was in the employ of Mrs. Frank Matthews at the time of the mysterious murder of the woman last April and it is now thought she had some hand in it. It was developed that she had previously attempted the life of Miss Dolan but had failed. She killed Miss Dolan by putting poison in a glass of lemonade. Miss Dolan was sixteen years old.

MURDER AT MOTHER'S DEATHBED.

German, Angry Over Disposition of Property, Kills Two Others and Himself.

Hamburg.—A sensation has been caused in Northwestern Germany by a tragedy at Altona, where, alongside *the deathbed of his mother,* Judge Baur, who was a well-known and respected man, shot and killed his brother, who was a lawyer, his mother's housekeeper and himself.

It is stated that Mrs. Baur left all her property to her housekeeper, which caused a quarrel between the brothers,

President Roosevelt's Summer Home.

WHEN the President returned to his summer home at Oyster Bay, L. I., the townspeople greeted him with enthusiastic ceremony. The younger children, with their usual horde of pets, went to Oyster Bay several weeks before the President's arrival. The improvements at Sagamore Hill, as the Roosevelt estate is called, have been without pretensions from an architectural standpoint, but merely designed to extend the capacity of the quarters for guests and servants, so that the hospitality of the Roosevelt home may be even broader than before. The President's estate comprises ninety-seven acres, of which more than thirty are heavily wooded. A vegetable garden occupies two acres, and fifteen acres are given up to lawn. The house is a rambling frame structure, with immense rooms and a great portico. The library is one of the features of the house, but the vast collection of books overflows into other apartments.

Last summer the Presidential offices were located in the Oyster Bay Bank building, but the bank building is too small to accommodate the larger staff of workers necessary this year.

Of course it is highly essential that the Presidential offices shall have at all times perfect facilities for prompt communication with Washington, and special telegraph and telephone wires will connect the Oyster Bay offices and the White House, and in this way "long distance Cabinet meetings" will be conducted.

The postoffice at Oyster Bay becomes during the time that the President spends at his country seat the busiest and most important office of its size in the United States. Extra employes are required to handle the Presidential mail, which frequently exceeds a thousand letters a day.

To realize how much Oyster Bay thinks of President Roosevelt one must have seen the village at the head of one of the most beautiful of Long Island indentations. It is a sleepy little place, dignified with age, self-satisfied in the beauty of its surroundings, peculiar not alone in its octagonal hotel. The older villagers always knew that something, they knew not what, was going to happen to Oyster Bay. It started to happen when Colonel Roosevelt became Governor, but he was almost within the White House before Oyster Bay awoke to the opportunity.

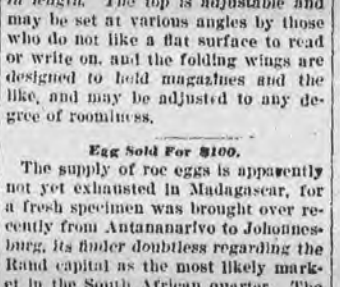
The town has grown wonderfully in the last two years. Five business blocks of brick have gone up, and one is building. The Independent Order of Odd Fellows have a new hall, with the three links done in red, white and blue on the front.

Then there is the building which for two months this summer will be the virtual capital of the United States. For executive offices the President has secured the entire second floor and it is now being fitted up for him. The blinds are already hung and the man who bought them must have been color blind. No sky ever showed a brighter, more noisy blue than those blinds. The building is the Moore Block, on one of the four corners about which Oyster Bay life throbs. It is owned by the man who keeps the grocery on the street floor.

SAGAMORE HILL, PRESIDENT ROOSEVELT'S SUMMER HOME AT OYSTER BAY, L. I.

Naturally they show to the most delightful advantage when placed in a room papered in one of the lovely foliage effects—can you think of anything cooler-looking than wind-agitated greenery on a pearl-gray background?

This particular table is thirty inches in length. The top is adjustable and may be set at various angles by those who do not like a flat surface to read or write on, and the folding wings are designed to hold magazines and the like, and may be adjusted to any degree of roominess.



THE ADJUSTABLE TABLE.

bit of summer furnishing, especially where the other pieces are done in the same lovely and cool-looking finish.

VIRTUAL CAPITOL OF THE UNITED STATES THIS SUMMER. President Roosevelt has his executive offices over this Bay grocery store.

Egg Sold For $100.

The supply of roc eggs is apparently not yet exhausted in Madagascar, for a fresh specimen was brought over recently from Antananarivo to Johonnesburg, its finder doubtless regarding the Rand capital as the most likely market in the South African quarter. The egg was put up for sale by auction, "between the chains," the other day, and after some spirited bidding was sold for $100. Being, comparatively speaking, a fresh egg, the price paid for it is probably a fair one, but after it passes through a few more auctions its figure may reach the regular market standard, which has been lately well over $300.

The Suicidal Mania.

The rate of suicides per 1,000,000 in London is ninety-five; in Brussels, Berlin, Stockholm and St. Petersburg 300, and in Paris and Vienna 400.

The Voice of Experience.

The breakers at the seashore are not always those that dash on the beach.—Philadelphia Telegraph.

A German scientist who has spent eight years in Patagonia says that Patagonians will soon be extinct.

Flower growers in the South of France and other favored climes find it profitable to send the products of their skill to British markets.

PROMINENT IN THE PUBLIC EYE

HON. GROVER CLEVELAND AND HIS SON, RICHARD FOLSOM CLEVELAND.
(As photographed on the porch of Mr. Cleveland's home at Princeton, N. J.)

Hudson Tercentennial

To Celebrate the Discovery of New York's Great River.

AN organization has been formed in New York recently, having for its object the proper celebration of the tercentennary of the discovery of the Hudson River in 1909 by Hendrik Hudson. Here are a few of the things contemplated in the way of the features of the proposed celebration:

First—A $3,000,000 memorial bridge, to span Spuyten Duyvil Creek from Manhattan Island to the Bronx.

Second—Two public parks, one at each end of the bridge.

Third—A water pageant of magnificent proportions, in which the growth of New York's commerce shall be illustrated by floats and ships of all degrees.

Fourth—A gathering of the war ships of the United States and foreign governments in honor of the day.

Fifth—A reproduction of the Half Moon, Hudson's famous vessel, with a crew in costumes of the period.

Sixth—A diplomatic banquet, probably under the auspices of the Holland Society, which may also contribute an equestrian statue of William the Silent.

Seventh—Fetes by various participating societies, with athletic carnival, fireworks, etc.

PROPOSED MEMORIAL TO HENDRIK HUDSON.

ODD HEN'S EGGS.

Freaks of Nature Produced by Domestic Fowls.

In a series of investigations on the development of the common chick Clement L. Webster was surprised at the many strange forms of eggs met with in the course of his studies. In describing these eggs in the American Inventor, he says: A very unusual form of egg is covered by a thick, strong chalaza ("soft shelled"), and has two parts, one much larger than the other. At the smaller end of the larger part is an attachment composed of the thickened and more or less wrinkled chalaza. The smaller part contained a normal, though rather small, yolk, surrounded by a very small quantity of albumen. The larger part of this egg contained only albumen. The contents of the two parts were united by way of the constriction.

In the picture of the egg resembling a club we have a very remarkable form of egg. It has a strong shell of normal appearance, and is in fact a double egg in part. The entire contents of this strange specimen was albumen, save a long, narrow and poorly-defined light yellow yolk located in the upper portion of the large part. Another example has been brought to my attention which varied from this one only in being larger, and abruptly crooked a short distance above the smaller end, giving it almost the form of a crook-neck gourd or squash.

A unique form of egg is the triple egg. This has three lobes, or more properly speaking, is three distinct eggs joined together, and all are covered by a thick, strong shell with a very rough surface. None of these eggs contained yolks, but were filled with albumen. I have known of another specimen in all respects identical with this one, save only that it had two parts instead of three. I have several times seen very small normal-shaped eggs, and other very small ones (three-fourths of an inch in diameter) as round as a marble, none of which contained yolks. On the other hand, I have met with double-yolk eggs as large as two normal eggs, as well as other eggs having three yolks; and another having one perfect egg (including the shell) inside itself, as well as other forms even stranger than any here described.

STRANGE FORMS OF HEN'S EGGS.

A New Egg-Boiler.

The accompanying cut represents a new egg boiler, also the invention of a Frenchman. This little apparatus is claimed to be able to boil an egg "with one gramme of water and one gramme of methylated spirit. The measure of water is poured into the "coquetiere," the egg is dropped into the holder, the asbestos ring is soaked in spirit (a gramme of which it absorbs), placed under the little apparatus and a light applied. In three minutes the egg should be boiled, and part of the device may then be used as an egg cup if nothing else is handy

HANDY EGG BOILER.

A SERMON FOR SUNDAY

A BIOGRAPHICAL DISCOURSE BY PRES. STRYKER, OF HAMILTON.

An Eloquent Tribute to John Wesley and the Influence of His Preaching—Stands Out Supreme Above All Men of His Age as a Religious Leader.

NEW YORK CITY.—Union services of the Lafayette Avenue Presbyterian and Clinton Avenue Congregational churches began Sunday morning in the edifice of the first named. The Rev. Dr. M. W. Stryker, President of Hamilton College, Clinton, N. Y., spoke on "John Wesley," but used no text. As will be seen, he paid an eloquent tribute to the influence of his preaching. Dr. Stryker said:

Upon June 17, 1703, that is, 200 years ago, was born at Epworth, Lincolnshire—Bo miles from London, and at about the east centre of England—a man whose influence stands out supreme above all the men of his age. Eighty-eight years and, on the 2d of March, 1791, he died. Thus his life compassed nearly the whole of the eighteenth century, and under God it was the most forceful and redeeming agency toward the moral forces and accomplishments of the nineteenth. And still the world is debtor, and will ever be, to the convictions and consecrations, the energies and the efficiency of that one man—John Wesley. A mighty impulse and a potent organization attested and attests his singular and recreative purpose and achievement. We may well reckon with such a personality in considering the movement of the modern world. Even the barest outline records a wonder and furnishes a corrective to a hundred superficial philosophies and a thousand shallow neglects. While Wesleyans and Methodists in all lands are reciting that story, let us all, with them, who share a like precious faith recall and rejoice, ponder and hope. For the elements of it are as deep as the first principles of the Christian religion, and the fame and forces of it are the common possession of all who hail the kingdom of the Son of God.

This man was born into a home when life in an age that hated anything more than formal religion was exceptional. The mother that nurtured him was that Susannah Wesley of whom Adam Clark said that he never saw her equal. His ancestry was of that Puritan stock and stuff whose fiber of conscience had affirmed the real England; its vigors and rigors had been superceded by the recrudescence of the livid Stuarts, but, though ignored, it had not departed, and in him and by him it spoke again and bore its second harvest.

Wesley began his work in the Establshed and Episcopal Church, and through it as he was ordained and received he loved it always and cherished its better part. For over forty he was active in George, but the Church Jew it that enemy indicated him. There he uttered that notable word, "I hope to learn the sense of the gospel by preaching it." He came into close touch with Moravians here and in Europe. Had that little body done nothing else than directly to deepen, and by its reaction to enlarge, John Wesley, it had done a mighty work. But their narrowness he escaped, while retaining their intensity. Over the deep and critical experiences of his inner heart, with its unusual combination of sensitiveness and decision, we will not pause. They were basal. In them he found the Light he followed to the end.

See him at Oxford. He was a student—intensely so. Specially and always of logic and language. He found in these an ample discipline; for language is organized thought. An able master of five tongues, he learned compass and discrimination. In his life he wrote or edited 230 volumes. At Oxford he was the centre of a little group of which his brother Charles, and soon Whitfield, were others. They began to live by rule and made their protest and example of a pure life. They served God by method—all of them at this time zealous and even ultra Episcopalians. They were called the "Godly Club"—"Bible Moths"—"Methodists." Oppr. brium easily finds derisive names. A hundred years, and more, earlier this same devotion had been called "Puritan."

Consider that eighteenth century into which they came. It was a feculent and rowdy age. Read Thackeray's "Four Georges"—read Lecky's ample treatment who says "all the dazzling episodes of the reign of George II. must yield in real importance" to Methodism. Hear Bishop Butler (1736). "It is come to pass that many assume Christianity to be purely fictitious and no longer a subject of inquiry." The general sentiment of the church was benumbed, torpid, stagnant—dry essay sermons were the vogue, a languid and lukewarm moderation held away, ready to hate whatever molested its sodden indifferentism. Look into the cartoons of Hogarth and see if the times he pictured did not need the winds of God! Consider the veneers of Chesterfield and reckon if that stilled and padded and festering society did not demand the breath of reality! Public life was debauched by the coarse and frank corruption of the ministry of Robert Walpole. It was Wesley more than all others who roused a public conscience to rally about the stern and aggressive honesty of Pitt—Pitt, who rescued India, and Germany, and America. It was Wesley who under God broke the moral drouth—struck an artesian well far into the substratum beneath the morass of the desert—led the great reaction which made possible the reform and the power of modern England; made possible the revival of the nineteenth century—Huber, and Martyn, and Keble, and Liddon. He became an influence so incalculably fertile and diffusive that to no other man of modern times save Luther, to no other Englishman save Wyclif, does the world owe so much. It pleased Matthew Arnold, with an icy Philistinism, to fleer at Wesley and to disparage him as "a third-class mind." But by what token this frosty estimate? In that drunken, unclean, insolent century, Wesley's is the brightest name, whether his work is judged by its width or its depth, whether by its immediate or its permanent results.

When conformity and nonconformity were alike moribund, he renewed the individualism of the gospel message, personalized its appeal and rediscovered mankind!

Do not forget that this starting point of modern religious history was within the walls of a college, and lay in the devotedness and relentless aggressiveness of a few men.

The work began in the open air. Whitfield, with his lively and unselfish character and that wondrously emotional voice, led the way among the colliers of Kingswood in Cornwall. England was full of pagan poverty, and this new departure toward the "submerged" and the forgotten—this human compulsion of a zeal that ate up neglect and its embitterments, broke once for all with the traditions of apathy. Then John Wesley stormed Bristol town. Little did men know, little did these men know, what a chord they had struck, as their indomitable fervor and unintermittent aggression hurled out of their way the things that would have obstructed them and once more reached after the soul of the common man. It was a radical return to the simplicity of Christ, and it had to face the frown and scoffings of those who do always resist the spirit of what is real and uncompromising. The harvest was white and had long been unattempted. The work was born under the sky, baptized by the tears of the lowly, hailed by the new songs of tens of thousands under the dome of God!

It went with Christ after the lost sheep, and swept the very dust for the lost jewels. It did not reach down from an attitude of stiff condescension and patronage, but reached out from the universal level of human sympathy and childlike love. And it proved by its errand and result that he who wants the souls of men enough to go after them in Christ's way can have them. This is the method of the evangel for which the world is aching and starving. This is the idea of service upon which alone rests the power of Christ, Friend of Sinners, and of whom always the common people hear gladly when He is truly told. The indifference and the contempt of men at large for the church is at any given time the reflection of the indifference and contempt of the church for men at large. The sign of the apostle is the sign of the sickle.

And the other power was over and through the intensity with which they bore it, the clearness and directness of the message itself. It uttered the two fundamental words, "repent" and "believe," with an accent of imperativeness that smote the frivolity and inhuman superficiality of the age. Again it transfigured the possibilities of the lowliest man. It said what many only thought and dared what many only wished. Its business was to convince [illegible] that every man had a soul and that life was an immortal soirway, up or down. It taught of a living God and the powers of an endless life. It reviewed that standing article of the Reformation, "Justification by faith." It carried the truth afoot and again it lifted the rafters' roof till it touched the stars. It tried the bottom of human hopeless and while it arraigned sin in fearful terms, it brought the news of hope and joy. No wonder that men came with the rain upon the barren land. No wonder that fearful emotion accompanied the flood of feeling. Many things always are rent when Satan is cast out. Always such upheavals carry stability upon their currents—such tides swing loose unanchored spirits. But parody is a counting proof of power, and the forces of eternity were shaking a people to its centre. Much was unwelcome when all was unready.

What real prophets have not met opposition? These men were "shut out of the synagogues" of the establishment. They "faced a frowning world." They knew all indignities. Mobs led by squires and clergymen dragged them through horse ponds and howled against their lives. Nothing was too foul to fling at them with hand and tongue. Not a man of all the bishops save Samuel Butler took their part. But despising hardships and dangers, they grew, and upon the church that disowned them they put an indelible mark. Being defamed, they entreated, and they lived to see opinion change.

What a diocese waited this apostolic man John Wesley! He touched two hemispheres. Nay, all the ends of the earth, and his hand is stretched out still. In 1703 Methodism began in America. Wesley at his death declared, "The best of all, God is with us." There were then 313 of his preachers in England; in the United States, 198. Now in Great Britain there are 761,000 communicants, in Canada 240,000, in the United States 6,000,000, who recur to that new Pentecost. At length in 1778 Dean Stanley received in Westminster Abbey a relief with the statues of John Wesley and Charles. [illegible] a state church [illegible] "money not the sign of a nation" and [illegible] the reflex influence of its people and own a work so grand y done!

In John Wesley tremendous zeal and a rare gift for organization and order and the loftiest spiritual enthusiasm and a single purpose to do one thing were united in the proportion of genius. Great he was by any test. Time is a stern criterion and by that estimate Wesley survives as Paul does and Luther and Lincoln. He is of the few who make eras. He had large sense and system. He wrought with mighty industry for half a century. No moment was wasted. With a giant energy he preached 500 times a year for fifty years. And yet with this passion for work he had a pure and calm mind. Self-denying, refined, sweet tempered, considerate, he had the scholar's vision and a saintly heart. "In seventy years," he said, "I have not lost a night's sleep." "I save all I can and give all I get." "Make all you can by industry, save all you can by economy, give all you can by liberality." Thus he was rich toward God. Peculiarities he had; let small souls count them. Strifes there were, but who cares for the logical differences between Wesley and Whitfield, since both preached the evangel of a holy and immediate decision. Thank God for that good home at Epworth and for that Susannah's sons!

Let us all see that religion is not in rubric and rite, but in devoted hearts and lives, unsophisticated by the bribes of question, undaunted by the oppositions of hollow tradition, instant to serve, tireless to effect results, believing God! For one may have all the apparatus of regularity and die a starveling. Power is granted only to those who will pay its whole price! Love is catholic when it is apostolic and can utter Wesley's "All the world is my parish." The methodical in God's service are the conquerors.

Oh, let me say to you Wesley's great text, "Seek ye the Lord while He may be found; call ye upon Him while He is near!"

Emulate such a man! And considering the issue of a totally surrendered life, imitate its faith. It is success. It is triumph. It is attainable. Let me quote Wesley's hymn:

"Give to the winds thy fears—
Hope and be undismayed;
God hears the sighs and counts thy tears—
God shall lift up thy head."

Popular Gospel is Wrong.

The most popular gospel of to-day is the gospel of "Don't worry." The calendars and gift books are full of daily mottoes to the general effect that one should cast off all care, fear nothing, live for to-day, let the other man do the worrying, and it will all be the same in a hundred years.

But no great transforming movement has ever been inaugurated on such a platform. There is nothing calculated to stir men deeply to action, to heroism, to sacrifice, in the announcement that their fears are groundless, and that all is well. Joined with the very tenderness of Jesus is ever the note of warning, and His message is not complete without it. The old doctrine of hell was very crude and very false, and yet it was infinitely nearer the truth than this modern "Don't worry" philosophy, which ignores the real dangers that confront the human soul and tells us that evil is simply the result of our fears. It makes a world of difference to a man's religion whether he takes up with that smooth gospel or whether he gives heed to Jesus Christ speaking of the dangers of the human soul. The degeneration of character which greed or jealousy, or cowardice, or duplicity, or cynicism, or sensuality, or any other violation of vital law brings is something whose seriousness becomes more evident the closer we get to it. It is not a matter of faith, but of absolute knowledge.—The Rev. W. R. Thorp.

The Making of a Man.

All life is variegated. It means happiness as well as sorrow. Mind as well as body needs change. A young man needs relaxation and recuperation. By it life gains elasticity.

Christianity when it comes into the heart of man does not drive the sunshine out. A man is not necessarily Christian because he looks consumptive. Pity with a long face and a deep cough is not Christ's idea of religion. There is nothing antagonistic in religion to the helpful influence of society.

Society being the best of characters possesses molding power. It will minister to the lower or the higher ideals of life; through it he will either serve God or the devil. If a man has the vulture instinct which seeks the carrion he will find it. If he desires that which is noblest and purest and best he may possess it.

The thing that makes the life of modern society so strenuous is the struggle to keep up appearances at whatever cost, and the idea that many have that there can be no fun without filth.—The Rev. Dr. Fowler.

Hypocrisy.

Hypocrisy is contemptible in any walk of life; especially is it so in the church.—The Rev. George Adams, Brooklyn, N. Y.

GRAFTING IN MIDDLESEX COUNTY.

Our adjoining county of Middlesex is suffering from an overdose of "graft" on the part of its Freeholders.

Charges are directly made of irregularity and gross extravagance in the conduct of county affairs, and the "misuse of public moneys, which may exceed the bounds of extravagance and have to be called by an uglier name," are hinted at.

An investigation has been recommended by the Grand Jury, and startling developments are looked for.

Nine years ago similar proceedings were had in Middlesex county, but owing to the fact that the entire set of officers were of the same political faith, nothing was done in the matter. This time politics are entirely eliminated, the people are thoroughly aroused, and men, without regard to politics, have signed the petition. James M. Parsons, a democrat, heads the movement. Others are John A. Carpenter, P. H. Wyckoff, Peter P. Runyon, all prominent men of New Brunswick; and Charles D. Edgar, Robert J. Smith and James Parker, of Perth Amboy; and many other prominent manufacturers, business men and farmers of the county.

The principal fight is to be made against Asbury Fountain, who for six years has been the director of the Board of Freeholders, and the recognized boss in the conduct of its business.

The Grand Jury heard a great deal of testimony touching on irregular methods in the conduct of county business, so much so in fact, that they recommended an investigating committee, and the citizens have petitioned the Supreme Court to appoint a commission of experts to examine the books and accounts of the board with the idea of proving whether the county affairs have been honestly conducted or not.

So much for Middlesex county. Simultaneous with this charge comes one of a similar nature from unfortunate Paterson, in Passaic county, where charges of "grafting" are made against some of the officials there. The Mayor has been petitioned to act promptly and decisively in the effort to expose and punish the guilty ones.

The lesson in all this is plain and may be read by him who runs. It is this: That "grafting" whether it be done by public officer or by the leader of labor unions, can only be kept secret for a time. It is just as certain to be made public as that it occurs. It is only a question of time when the guilty man is apprehended and made to suffer.

LACK OF ISSUES.

As we near the time for electing a President of the United States a lack of important issues is one of the most remarkable features in connection with the history of this country.

Ordinarily one election is hardly decided before well defined issues are brought up for the next election. But at this time there is no issue before the people, and, so far as known, none liable to be brought up.

The tariff question which elected Cleveland in 1888 and defeated him in 1892, will hardly be brought up again.

The silver issue in 1896 was dominant, overshadowing all other issues, and we think we are safe in asserting that it too was permanently settled in the East, at any rate.

In 1900 there were two questions before the people: "Imperialism" and silver, although more importance was attached to the latter, in the West. So far as the Democratic party was interested, these questions were divided—Silver for the West, and Imperialism for the East.

It cannot be said that these two questions are dead by any means, but that they will not play an important part in the next campaign is admitted by politicians on both sides.

Just what issues will take their places is not now known, and unless something "turns up" a most remarkable campaign will be fought.

NEW MANAGEMENT VS. OLD.

As a matter concerning every citizen of Plainfield and vicinity, the following editorial from the Newark Evening News will be found of interest.

What the *News* says of the former managers trying to wreck the road, has been generally known for some time, but we believe that the *News* is the first newspaper to make it public:

"In view of the embarrassing and distressing conditions into which the Central Railroad of New Jersey was thrown by gross mismanagement a few years ago, the company's recent expenditures for better equipments and its proposed plans for new dock facilities on the New York side of the Hudson River furnish quite conclusive proof that the road is once more enjoying prosperity. For a time it was feared that this road would be forced into bankruptcy a second time, and the general public impression was that some of the managers were endeavoring to wreck the property in order to effect a sale or deal whereby vast sums of money might be secured. Whether this impression was correct or not, the road was neglected, its equipments were allowed to go without proper repairs and were in a dangerous condition, its passenger trains were run on anything but schedule time, its freight business was more or less abandoned, its employes were demoralized and angered, and its managers were loaded with maledictions.

"The change that was made came none too soon for the welfare of the road and for the satisfaction of its patrons. New ferryboats were contracted for, new and powerful locomotives were ordered, the old engines were repaired, the trains were run on time, the business of the road was attended to on something like business principles, and at once the danger of bankruptcy passed away. It took time to restore and replace all that had been lost through mismanagement, but the road's good name and good service were restored and the company has entered upon an era of expensive improvements, of which the elevation of its tracks in this city is but one.

"The latest improvement planned is the development of the road's dock facilities in New York, not exclusively on its own responsibility, but in conjunction with other roads. New bulkhead sheds and pier superstructures are to be built, a bridge is to be thrown across West street, which will be of great advantage to New Jersey passengers, and the marginal street between West street and the river is to be widened to 250 feet. On the top of a three-story bulkhead shed a broad, open water-front promenade is to be provided, to be used by the public without let or hindrance. Nothing of the kind has hitherto been erected in New York, but they are in use in Copenhagen and Antwerp, and are a boon to the crowded districts in which the docks are located.

"All of this goes to show that wise, sagacious and business-like management will under ordinary conditions insure success. Several times the Central has been badly mismanaged, and at each time it was driven to the verge of bankruptcy and once was toppled over. There is no railroad property in the State that responds more quickly to judicious business control than does the Central. It may be damaged by consolidation with larger and less stable concerns, or hampered by carrying less valuable properties and less successful companies, but standing on its own merits it has always been successful when properly cared for."

PUBLIC OFFICE FOR PRIVATE GAIN

An article in the *American Monthly Review of Reviews* for August says that "Certain conditions and tendencies of American life have been painfully illustrated in the current news of the past weeks. In almost every instance, however, there have been encouraging signs to show that the forces making for good are stronger than those making for evil in the body politic. In the governmental sphere, there have been various disclosures pointing to the use of public office for private gain. There has been such a remarkoble increase in private wealth throughout the country that standards of living, especially in the cities and larger towns, have been changed very greatly. Official salaries, meanwhile, have not been increased to any corresponding extent. In a European country like Germany, while official salaries are very small, it is a high honor to hold a place in the public service, and tenure is for life, on conditions of faithfulness, honesty, and efficiency. Under those circumstances, public posts are regarded as so desirable that officeholders are content with a very simple scale of living, and seldom feel any temptation to ape the manners of the rich. Public rather than private life may be said to fix the standards; and a great deal of solid comfort, as well as of high thinking, goes along with very plain and simple living. In the United States, on the contrary, private life sets the pace, and officialdom finds its lot rather precarious and difficult. In a few positions, the public service affords opportunity for a career practically permanent and in most respects satisfactory. But for the most part, our officeholders come and go, and are ever uneasy and anxious. They are strongly tempted to be on the lookout for influential outside connections, because they do not expect to find permanence or adequate reward in the public service. At times, this condition of things becomes seriously detrimental to the efficiency, and even to the honesty, of the public service; and that this is true is now abundantly illustrated in the facts already brought to light by the investigation of the scandals in the administration of the post-office system."

"DRINK water and get typhoid fever," says the Southwestern World. "Drink milk and get tuberculosis. Drink whisky and get the jimjams. Eat soup and get Bright's desease. Eat meat and encourage apoplexy. Eat oysters and aquire taxemia. Eat vegetables and weaken the system. Eat dessert and take to paresis. Smoke cigarettes and die early. Smoke cigars and get catarrh. Drink coffe and obtain nervous prostration. Drink wine and get the gout. In order to be entirely healthy one must eat nothing, drink nothing, smoke nothing, and even before breathing one should see that the air is properly sterilized."

THEY now say pigskin is better than rubber for automobile tires. There is also a certain fitness in its use by those automobilists who take the whole of the road and want more.

VENUS AND A PROFESSOR

You will find the cottage in perfect order," wrote the Professor; "it has been newly furnished throughout, and I think I can say that it is furnished artistically."

"Delightful," cried my wife when I had read so far from the letter in which the owner of a seaside cottage on Long Island Sound described the place we had rented for the season. "Mrs. Rogers told me that Prof. Smith was the best of landlords; and I'm sure, Herbert, it will please you to go into a cottage for the summer that is furnished artistically. Most summer cottages, as we know, are simply dreadful."

"Simply dreadful," though vague, was understood by me, and I quite agreed with Mrs. Burton in her estimate of the attractiveness, internally, of the average summer cottage, and shared in her delight at the prospect of something better which was held out of our new landlord's letter. A "Professor," of course, would have the proper ideals about art as applied to household decoration. We were already the subject of envy among our friends because we were going to the seaside so early this year, and after we had gone about bragging for a while about the artistic attractions of our cottage this envy amounted to positive dislike.

"What airs those Burtons give themselves!" said our neighbors, little knowing what was ahead of us, and forgetting the adage that "pride goeth before a fall."

The Professor met us at the station when we arrived at our village. We gasped when we saw him. "He must be a Professor of ploughing or haying," whispered my wife. Under his chin wagged a billy-goat beard, and he was for all the world the figure of the typical farmer. We later found out that early in his youth—he was now about seventy—he had taught in the village school, and that the title of "Professor" had clung to him ever since. However, nobody could have been more courteous or kind than the Professor. He did all he possibly could to make things pleasant for us, and his cottage was, as he had promised, well and newly and comfortably furnished. But the artistic end of the decorations!

"Horrors!" whispered my wife under her breath when her eyes saw the pictures that hung everywhere on the walls. There were oil paintings of a quality that—well, they were what my wife—exclaimed horrors. Oil paintings of dogs' heads done in glaring colors, and supposed portraits of dead and gone men and women which make us think that if the originals in any way resembled them it was well that they were dead and gone. And they hung on every available foot of the wall. The Professor pointed them out with pride, and told us the history of each one. To him, it was plain to see, they represented the flowering of a perfect art. They were mostly family portraits.

"What in the world are we to do about them?" asked my wife, when the Professor departed. "We will be the laughing stock of all our friends who visit us, with those objects on our walls, after all we have said about the artistic merits of our cottage."

"Why, we'll take them down," said I. But Mrs. Burton demurred to this. She is a kind-hearted woman. "It would break the Professor's heart to do that," she said, and I think she was right. So we let them hang.

My wife had, however, one of her own pictures with her in her trunk—a splendid little photograph of the Venus of Milo, and this she got out and hung up over her desk in the front room.

"Thank Heavens I brought this," she said; "I'll try not to look at the others." But, alas, for our good intentions, for our desire not to hurt the Professor's feelings!

Venus has caused a lot of trouble in the world, and she brought it into our cottage on the Sound. The Professor was a deacon of the severe old school. He came to the cottage next day to see if we wanted anything, and his horrified eyes fell upon our Venus. It caused him more alarm than his ancestral oil paintings had caused us. He stood for a moment as though stupefied, while we stared at him in wonder, and then he made a mad rush for the wall and began to take down the portraits of his grandparents and other relatives and hurried them out of doors, away from the contagion of the calm Venus!

"My folks can't stay in the same house with that hussy!" he cried. And they did not. He took all his pictures away, and now Venus has the cottage to herself so far as pictures are concerned.

"Well, at any rate," said my wife, "the cottage certainly is artistic now." But the Professor has put us down as objects for earnest prayer.

Holland Curtains.

Objection is sometimes raised against the use of holland or other cotton blinds on the score that they soon soil and spoil, or run up in washing. There is no need to have them washed, as there is a much simpler way of cleaning them. The blind should be spread flat on a table, and well rubbed all over with bread crumbs. This will make it look quite clean and fresh. While it makes much less work than washing, it will prove more satisfactory in the end.

"What are you writing such a big hand for, Pat?" "Why, you see that my grandmother is dafe, and I'm writing a loud letther to her."

I Used

Dr. Miles' Nervine and Anti-Pain Pills.

Cured Grip—Did Full Day's Work.

Anti-Pain Pills, the Best Headache Remedy.

"I wish to say I have used your Anti-Pain Pills and Nervine for LaGrippe and knocked it out and kept up my full day's work. I have also used Dr. Miles' Anti-Pain Pills many times during the past year for headache and always with most gratifying results. I consider them the best of headache remedies. I have also used your New Heart Cure in my family with excellent results. Actual experience with these three of your remedies have proved so beneficial that I cheerfully recommend them to others."—MERRIT M. DAYTON, Business Mn'gr Ithaca Publishing Co., Publishers Ithaca Daily and Weekly News, Cornell Daily Sun, Cornell Alumni News, 202 N. Tioga St., N. Y.

In itself LaGrippe is very dangerous, but in its after effects it is one of the most deadly scourges that afflicts mankind. It shatters the nervous system, weakens the heart's action, and lays the foundation for heart disease. The accompanying fever consumes the vitality and renders the patient susceptible to pneumonia, bronchitis and catarrh. The best treatment consists of Restorative Nervine which quiets the nerves, soothes the brain, restores strength and vitality to the entire system; Dr. Miles' Nerve and Liver Pills, a nerve tonic acting directly on the nerves of the digestive organs causing them to act in a natural and healthy manner, and Dr. Miles' Anti-Pain Pills which speedily relieve the torture of headache, backache and soreness, the most common symptoms of Grip.

The Making of Railroad Curves.

By M. G. Cunniff.

GEORGE PULLMAN once said, when asked the secret of easy riding, that the secrets are so many that no one can keep them. This is true, but the easing of curves is one of them.

Curves, no matter how slight, have always been laid as arcs of true circles. The outer rail is raised according to the sharpness of the curve and the estimated speed of trains that are to round it. A mile-a-minute train on a one degree curve needs an outer rail five inches higher than the inner rail; a slower train a lower elevation. It is clear from this explanation that a train going faster than the maximum for which the track is prepared would shoot off the rails. Conversely, a slower train than the one provided for would grind the flanges off its wheels. Any road must strike a serviceable average for trains of varying speeds, and engineers must nurse their locomotives around the curves as close to it as possible. That puts an inevitable check on high speeds. The Empire State Express once made a burst for two miles at the rate of 102 miles an hour on a straightway section of track. A heavy curve would have shot the engine at that top speed a quarter of a mile 'cross country. On most roads however, sixty miles an hour is quite safe, though very costly.

To permit such speed the engineers of the last few years, in relaying tracks instead of starting a true circle curve with the sudden lift of the outer rail that causes the jolt and lurch that travelers know, have laid a slight parabolic curve from a point a hundred yards back on the straight track, and have elevated the outer rail imperceptibly along that curve to the maximum. The result of the device—in practice quite new—has been the annihilation of curves as regards a passenger's senses. With eyes shut he cannot tell whether the track is straight or curved.—World's Work.

The Climax of Napoleon's Follies.

By Goldwin Smith.

BUT of all Napoleon's insanities, for they were nothing less, the climax was the invasion of Russia. What motive can he have had for this, saving delirious ambition, and what was also undoubtedly strong in him, sheer love of the bloody game of war! He evidently reckoned on encountering the Russian army of defense nearer the frontier, winning an Austerlitz or a Jena, dictating terms as he had dictated them to Austria or Prussia, and returning to Paris in triumph. He was deceived in the character of his enemy. He tried in vain to force a battle at Smolensko. The Russians, instead of fighting him near the frontier, retreated before him, gave up their country to his ravages, compelled him to make a march in which he lost a great part of his enormous host, and after handling him very severely at Borodino, evacuated Moscow, leaving it in flames. They then refused to treat with him. He had consequently to decamp without having provided for retreat or subsistence. He lost almost his entire army in the wintry wastes, and but for the extraordinary conduct of Kutusoff in letting him and his guard pass unopposed, would himself have fallen into the hands of the enemy. This error was on a far more imposing scale and more tragical than any blunder of Beaulieu or Mack. But was it less of a blunder, or less of a detraction from the reputation of the man of action or even from that of the commander? It is frightful to think what power a despot has for evil. There was probably not a soul on either side, saving Napoleon himself, who desired the Russian expedition.—The Atlantic.

The Development of the Racing Hull.

By John R. Spears.

PREDICTIONS are made that as an experiment in the shapes of hulls the races of this year are to be of greater interest than any ever held.

In the races of the Galatea period the stem rose vertically out of the water, while the stern overhung the water by a few feet. A broadside view of either of them showed a lateral plane that looked like a sled runner cut from a plank by a country boy. Seen from another point of view the bow of the yacht was found to be a vertical wedge, thin and sharp, like the blade of a woodman's ax; and it was a question among builders whether the wedge should have lines like an ax or hollow lines like a razor. The stern below the waterline was also something of a vertical wedge, though a blunter one than the bow. In general dimensions the Galatea was 102 feet long over all, eighty-seven feet on the waterline, fifteen feet wide, perhaps ten feet deep below decks, and her draught was thirteen feet six inches. Her successful opponent, the Mayflower, was 100 feet long over all, was twenty-three feet wide, and was perhaps seven feet deep under the deck, and she drew ten feet of water.

With these facts in mind we can see how far we have traveled in changing the shapes of boats of that class. For Shamrock III., though but three feet longer on the waterline, is 140 feet long over all. The old boat had an overhang of fifteen feet, all of which was aft, while the new boat has an overhang of twenty-five feet at each end. The new defender, when compared with the Mayflower, shows almost exactly the same changes in length.

Roughly speaking each end of the old yachts was a wedge that rode the water with its edge perpendicular. The forward half of Shamrock III. is not unlike the half of a cone split lengthwise, while the stern half is drawn out into a long, thin, horizontal wedge—a wedge with its edge laid parallel with the water. At the stern the challenger is a scow. The Reliance, however is a scow at both ends, in spite of the fact that her bow comes to a point above water. Each end presents a fine horizontal wedge to the water, and therefore in every sailing line she is a scow. We used to stand in front of a yacht and marvel at the thinness of the vertical wedge. Now we stand off abeam and look with delight at the sweep of the fore and aft lines. One sees at a glance why the modern hull is more easily, and therefore more swiftly, driven through the water. The modern hull presents fine or acute angles to the water, where the old hull presented wide or obtuse angles.—The World's Work.

If Women Were Men.

By W. D. Howell.

ONE often hears the expression in women: "Oh, if I were only a man!" "I should just like to be a man, once!" I would give anything to be a man!" In all honesty, then, or in as much honesty as she is obliged to have, is not woman, when she is thinking of living her life over again, thinking of living a man's life? Is not she wishing to set an example to her husband, who has shown himself so little able to set an example to her, and for whose discipline she is believed oftenest to indulge what seems a vain aspiration? A very strange thing in regard to this is that men are never heard sighing to be women. The weakest, the unhappiest, the most abject of men is not known to wish himself a woman, and when he considers living his life over again it is certainly a man's life that he has in mind. He is perfectly willing to allow that a woman is much better by nature, wiser by teaching, sweeter, lovelier, gentler, and yet he does not ask to change his lot with hers; if he were a beggar, and she a queen, he would not. He is found saying, in print and out of it, that women have by far the safest, easiest and pleasantest time of it, but still, somehow, he does not envy them enough to offer changing places with them. He will tell them, as he has often told them, that they are the real rulers of the world, and that in the sacred quality of daughter, wife and mother they are the holiest beings on earth; he bows down in worship of them, but he leaves them their altar. He does not think it any great thing to be a man, but he is not surprised that the objects of his idolatry should sometimes declare themselves eager to descend from their high places and be men, in the dust and grime of affairs, the din and heat of battle, and the wild, useless efforts to escape from the struggle of life. He understands that they wish to be men in order to show men what men ought to be, and would be if they were women, and that they are not meaning permanently to be men, and he forgives to their ignorance and inexperience what he could not otherwise account for. He forgives it with a smile, and possibly with a chuckle.

New Ideas in Toilettes

New York City.—Plain shirt waists are always in demand, let the season bring forth as many novelties as it may. This simple but stylish May Manton one is adapted to the whole range of waisting materials and can be trimmed in various ways, but, as shown, is of embroidered muslin with a stock which combines it with lace.

PLAIN SHIRT WAIST.

The waist consists of the front and back of the lining, the front and back of the waist and the sleeves. The lining is smoothly fitted, but the waist is gathered slightly at the neck edge in front and at the waist line in both front and back. The fitting is accomplished by means of shoulder and under-arm seams. The sleeves are snug above the elbows but full and form soft puffs below and are gathered into cuffs at the wrists. The stock is novel and includes a plain foundation with the fancy turn-over portions.

The quantity of material required for the medium size is three and a half yards twenty-one inches wide, three yards twenty-seven inches wide, three yards thirty-two inches wide, or one and three-quarter yards forty-four inches wide.

Woman's Waist With Fancy Yoke-Collar.

Waists made with yoke-collars are among the notable features of the latest styles and are as becoming to the generality of women as they are fashionable. The May Manton design shown in the large drawing is adapted to a wide range of materials, silk and light weight wools and the many linen and cotton fabrics, but, as shown, is made of pale blue silk mull with trimming of cream lace and is stitched with corticelli silk.

WAIST WITH FANCY YOKE.

The waist is made with a fitted foundation on which its tucked front and backs are arranged. The backs are tucked for their entire length to give a "V" effect, but the front to yoke depth only, then is gathered at the waist line where it blouses slightly over the belt. The yoke collar is novel and is extended over the shoulders to give the breadth of figure so much in style. The sleeves are quite new, and, in addition to being smart, are well adapted to remodeling, as the full pieces could be of lace or other contrasting material set in those of less size, so making them up to date. If preferred, however, the puffs can be omitted and the sleeves left plain above the cuffs. The tucks extend from the shoulders to a short distance above the elbows, where they fall free to form the fullness of the lower portion.

The quantity of material required for the medium size is four and a quarter yards twenty-one inches wide, four yards twenty-seven inches wide, four yards thirty-two inches wide, or two and a quarter yards forty-four inches wide with three-quarter yards of all-over lace, for yoke-collar and three and a half yards of applique to trim as illustrated.

New Belt.

In order to be in keeping with the fashions that carry all garments below the waist line the new belts have tabs that are becoming to a stout or slender figure. An inexpensive one is made of black stitched glace silk and finished with silk tassels. The back is decorated with buttons. One of the chief novelties of the belt is the manner of sewing the hooks and eyes in the front so as to give the sloping, long waist effect. The hooks are sewed on the usual way, but the eyes are placed along the top edge of the other end of the belt.

Gainsborough Hats.

All lovers of the picturesque are glad the Gainsborough hats are still fashionable. They come in chip, bass and new fancy straws, decorated with the always becoming single, long, thick ostrich plume. Whatever fashions come and go, the best milliners remain faithful to the graceful lines made famous by the old masters, and in this they show great wisdom.

Jewels Which Require Care.

Owners of jewels should remember that if turquoises are wet they are apt to lose color. Pearls should be exposed to light and air as much as possible, but not to damp. Opals must never be exposed to great heat, or they may crack and fall from the setting. Don't forget this when warming your hands at the fire if you happen to wear an opal ring.

Of "Mannish Materials."

"High-class walking skirts of mannish materials," is placarded on some very smart-looking, well-pressed tailor skirts of cloth resembling trouser stuff. Like all garments made by expert tailors, they are expensive, but they show what they are at a glance.

Triple Skirts Becoming.

Triple skirts are much seen. They are even noted on shirt waist suits. For the tall and slender they are very becoming.

The Pointed Waist.

In the models of evening gowns in European fashion journals the pointed waist is a prominent feature, and the point grows deeper and sharper.

Misses' Waist With Bertha.

Bertha waists are among the features of the season and are exceedingly becoming to girlish figures. This May Manton one includes the fashionable handkerchief points and is adapted to silk and to wool as well as to cotton and linen fabrics, but is shown in white batiste with trimming of Valenciennes lace and French knots. The yoke is exceedingly effective and combines bands of the material embroidered with the knots with strips of insertion.

The waist consists of the fitted lining, which is closed at the back but separately from the outside, the front and backs of the waist and the yoke, all of which are arranged on the foundation when it is used, but can be joined one to the other when the lining is omitted. The waist is gathered at the waist line and blouses slightly at both back and front. At the edge of the yoke is the bertha, which is circular but cut in points over the shoulders and at both back and front. The sleeves are in Hungarian style with snug fitting upper portions to which are joined full puffs which droop becomingly at the wrists.

The quantity of material required for the medium size is four and a half yards twenty-one inches wide, three and three-quarter yards twenty-seven inches wide, three and a quarter yards thirty-two inches wide, or two yards forty-one inches wide, with ten and a half yards of insertion and one and a quarter yards of wide applique to trim as illustrated.

MISSES' WAIST.

Good Roads

A New Combine.

A FEW weeks ago a Maryland farmer found an automobile safely anchored in a mud hole on a country road about twenty miles from the city home of the owner. The automobilist was vigorously swearing at the mud, the farmers and the rural districts in general. After cooling down somewhat, he struck a bargain with the farmer to extricate his machine and haul it to the nearest possible road for $3.50. When the job was finished both were in a comparatively good humor. The automobilist lit a fresh ten-cent cigar and presented the farmer one, and the following dialogue ensued:

"Why don't you farmers improve these roads?"

"Well, we do work 'em every year, but they don't seem to get any better."

"But why don't you build first-class roads and be done with it?"

"Say, mister, you must think we're rich out here in the backwoods. How much do you reckon it would cost? Not less than two or three thousand dollars a mile, I guess. That would break us up. We're taxed already as much as we can stand. If you city fellows want to go touring over these roads, I guess you'll have to get used to the mud, same as we have."

After the two had smoked in silence for half a minute the farmer cleared his throat and ventured to ask:

"Say, why don't you rich city fellows give us a lift and help us improve these roads? I've been reading some lately about State aid and Government aid for the farmers in building good roads. Why don't you go in for these things? Wouldn't it be a benefit to the whole community? Besides, haven't us farmers been voting for tariffs to build up industries in the cities for a good many years? Isn't it about time the rural districts enjoyed a little of the fostering care of the Government?"

"Well," replied the automobilist, who happened to be a millionaire manufacturer, "I don't know but you are right, I hadn't thought of it in that light."

After some further discussion along this line, the two separated, each with some new ideas. The farmer had grasped the idea that the automobile which he had always viewed with mingled feelings of scorn and amusement, might after all turn out to be a great friend of his; might, in fact, be the means of inducing the rich men of the cities to help the farmers build good country roads.

The rich city man, on the other hand, had got a glimpse of the real conditions and sentiments prevailing in the country. He realized as never before that no general improvement of the country roads could be hoped for so long as the farmers were left to work out the problem unaided. In fact, he saw the injustice of expecting them to shoulder the whole burden.

As a result of this incident, both the farmer and the automobilist are now conducting a little campaign among their neighbors in favor of State and national aid to road building.

The True Value.

The late address of President Roosevelt on good roads has awakened larger interest than ever in the subject. He alluded to the value of interurban electric lines and to rural free mail delivery as important factors of civilization, but one of the best things he said was the following:

"No one thing can do as much to offset the tendency toward an unhealthy trend from the country into the city as the making of good roads."

This is true, and the practical thing uppermost in the public mind is the best and most economic method of making good roads. It may be said with certainty that control of the water from rains is a consideration of first importance in the making of good roads. There are millions of acres of land that would not be growing good crops annually were it not that the surplus water was under control by surface and tile drainage. And so drainage at the sides of the roads should be supplemented by the drainage under the roads—two or three rows of tile three or four feet below the surface. Where this method has been practiced it has been very effective in controlling the water which makes bad roads, and also prepares the road bed for the gravel, broken stone or other material to be used in better road making. Such drainage alone, when other materials are not at hand, will do much toward bettering the roads, for they are found to dry out much sooner for travel, just as farm lands dry out more quickly when tile-drained for farming. We can make better roads by thus getting rid of the water, and enjoy them till still better are made on these prepared beds with gravel or other materials. Let us do this much, and not stand still because we are not ready to do the best in this line.

Titanium in Iron Ore.

There are a number of iron deposits in different parts of the country that miners have not been able to work profitably, on account of the large proportion of titanium found with the ore, this metal being a serious hindrance to smelting the iron. It is said, however, that a Western man has discovered a process by which the trouble may be wholly overcome.

The renovated White House contains more than thirty-two miles of wire.

Ignorant Russian Peasants.

The Russian moujik, or peasant, while an honest and, in the main, good-humored fellow, is the most ignorant being on earth of those who claim a degree of civilization. His ignorance is exceeded only by his intense religious sentiment. He makes more pilgrimages to church and perpetrates more religious formalities than any race of men.

To Launder Delicate Garments.

Many of the expensive and beautiful summer garments which will not stand ordinary washing may, with care, be successfully laundered. Use Ivory Soap. If water will not cause colors to run, Ivory Soap will not, and avoid extremely hot weather, hot sun, and a too hot iron.

ELEANOR R. PARKER.

Egypt has exported $25,821,600 worth of cotton from the season's crop, half of which went to England.

Court Sustains Foot-Ease Trade-Mark.

Buffalo, N. Y., July 25th.—Justice Laughlin in Supreme Court has granted a permanent injunction with costs against certain New York City dealers, restraining them from making or selling a powder which is an imitation and infringement on "Foot-Ease," now so largely advertised and sold. The owner of "Foot-Ease" is Allen S. Olmsted, of Le Roy, N. Y., and the decision upholds his trade-mark and makes liable those attempting to profit by "Foot-Ease" advertising by marketing a similar-appearing preparation.

The man who knows it all is generally looking for some one to try and convince him that he doesn't.

Mrs. Laura L. Barnes, Washington, D. C., Ladies Auxiliary to Burnside Post, No. 4, G. A. R., recommends Lydia E. Pinkham's Vegetable Compound.

"In diseases that come to women only, as a rule, the doctor is called in, sometimes several doctors, but still matters go from bad to worse; but I have never known of a case of female weakness which was not helped when **Lydia E. Pinkham's Vegetable Compound** was used faithfully. For young women who are subject to headaches, backache, irregular or painful periods, and nervous attacks due to the severe strain on the system by some organic trouble, and for women of advanced years in the most trying time of life, it serves to correct every trouble and restore a healthy action of all organs of the body.

"**Lydia E. Pinkham's Vegetable Compound** is a household reliance in my home, and I would not be without it. In all my experience with this medicine, which covers years, I have found nothing to equal it and always recommend it."—MRS. LAURA L. BARNES, 607 Second St., N. E., Washington, D. C.—*$5000 forfeit if original of above letter proving genuineness cannot be produced.*

Such testimony should be accepted by all women as convincing evidence that Lydia E. Pinkham's Vegetable Compound stands without a peer as a remedy for all the distressing ills of women.

Dizzy?
Appetite poor? Bowels constipated? Tongue coated? Head ache? It's your liver! Ayer's Pills are liver pills, all vegetable. Sold for sixty years. J. C. Ayer Co., Lowell, Mass.

Want your moustache or beard a beautiful brown or rich black? Use BUCKINGHAM'S DYE
FIFTY CTS. OF DRUGGISTS OR R. P. HALL & CO., NASHUA, N. H.

In "Dog Days" use TARRANT'S SELTZER APERIENT (TRADE MARK REGISTERED)
to keep the stomach clean, brain clear and liver active. It cools the blood, cures heat eruptions, relieves constipation, aids digestion. *Effervescent; Agreeable; Reliable.*
Used by American Physicians for nearly 60 years.
50c. and $1.00.
At Druggists or by mail from
The Tarrant Co., 21 Jay St., New York.
Business established 1834.

RIPANS TABULES
Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

The Funny Side of Life.

THE LOVE THAT LASTS.

There are many loves that fill man's heart
And make existence sunny;
But time sees all save one depart—
And that's the love of money.
—New York Sun.

STILL SURVIVING.

Hotel Clerk—"Well, I can give you a room, but I haven't time to give you a bath just now."—Columbia Jester

REAL CAUSE.

Host—"My wife is worrying about there being thirteen at the table to night."

Guest—"Superstitious, eh?"

Host—"No, not exactly; but she has only a dozen silver knives and forks."—Chicago News.

A FELLOW-FEELING.

"You were very lenient with that conductor," said the first passenger.

"Oh," replied the other, "we're all liable to make mistakes."

"Perhaps you were a conductor yourself once."

"No, sir; I'm a weather forecaster."—Philadelphia Press.

POOR CHILD.

"I hear Jack Kandor was here to see the baby," said Mr. Hoamley.

"Yes," his wife replied.

"I suppose the first thing he said was: 'He looks just like his father.'"

"No; the first thing he said was: 'Good heavens!' Then he said that."—Philadelphia Press.

NOT ASPIRING.

Haskins—"I wonder your friend Sillers never went to the Legislature. I consider him eminently qualified for public service."

Belmont—"Oh, there's no doubt about his fitness. That's the very reason, you see, why he never had any desire that way."—Boston Transcript.

DIFFERENCE OF OPINION.

"What is genius?" asked the man who has a liking for abstruse questions.

"There is a difference of opinion on that question," answered Mr. Sirius Barker; "some people think that genius is an infinite capacity for taking pains; others that it is the ability to get on without doing any work worth mentioning."—Washington Star.

THE DIFFERENCE.

Customer — "See here, this watch doesn't run half the time."

Jeweler—"Well, your account does."—New York Journal.

IT'S OFTEN SO.

"I understand that old Goldust carries $50,000 in life insurance."

"I shouldn't wonder."

"He must consider his life of very great value."

"Quite likely, but that doesn't make it so."

"No?"

"Oh, no. It merely shows that he is worth more dead than alive, so far as the community is concerned." — New York Herald

NEWSPAPERS AND NEWSPAPERS.

Present Day Conditions in Journalism Show Change and Improvement.

"In America," said Wordsworth to Emerson, when the two poets were discussing our country together, "I wish to know not how many churches or schools, but how many newspapers." Poets often strike out brilliant criticisms. Wordsworth, long before the press had become what it now is, saw its importance in the development of our people. The newspaper is the characteristic expression of contemporary thought. The skill and intelligence employed upon the editorial pages of our leading newspapers is greater to-day than the skill and intelligence which goes into the making of books. Foreigners are sometimes surprised that so many Americans, with a literary career already assured, choose journalism. The book means less here than it does in several other countries; the newspaper means more. The best work in it is anonymous. It goes not into literary, artistic or dramatic criticism, as it does, for instance, in Paris, but into the handling of the news and the expression of editorial opinion. The arts are, thus far, at least, not our main concern. We are more occupied with the interests of the many than with the refinements of the few. The reading public here is the million, as it is in no other land. Democracy, in our sense, where millions read, think and vote, is new in the world, and our concern is to reflect, guide and clarify it, much more than to make art along established lines. Newspapers, every year cheaper, reach a public every year bigger. A Justice of the Supreme Court of the United States has just given out the opinion that the press, in enabling us every day to know our fellow citizens throughout the land, has removed antipathies and misunderstandings, increased our sympathies and helped us to realize the purpose announced in the Constitution, "to form a more perfect union." He also sees in the press a powerful influence toward the solution of our many and deep social problems, especially by bringing them before the court of public opinion, "a court of increasing wisdom and power, mightier than any organized tribunal." The newspapers have their faults like individuals. Some are controlled by money, like municipal councils. Some are vulgarly subservient to the untrained, like many politicians. But they are improving. One of the greatest and most successful was, a short time ago of the deepest saffron. Today, with some sensational left, it has abandoned inaccuracy and violence. Among journalists it is now deemed the most complete and veracious daily newspaper in the city, in news service, with the most interesting page of editorial opinion. Its position is strengthening, and its former rival, now almost alone in the yellowest field, is every day losing its hold.—Collier's Weekly.

A Serial Receipt.

Great musicians, like other men of genius, are not infrequently erratic and inclined to unsociability; but this was never the case with Mendelssohn, one of the most human and companionable of men. There are many anecdotes in Moscheles' delightful biography of the composer which illustrate his geniality and kindliness. This little story, which has not before been printed, bears testimony both to his excellent memory and his love of a quiet joke:

On one occasion, while he was directing the orchestra at the Hanover Square concerts in London, the concert happened to fall upon Shrove Tuesday. As the orchestra assembled in the band room, the conversation turned upon the feast day and the various ways in which it was celebrated in different countries.

Some one asked Mendelssohn how the carnival was spent in Germany.

"Well," said he, "first we eat pancakes."

"And how are pancakes made in Leipzig?" interrupted his questioner. Slowly and gravely, as if discussing a matter of serious importance, Mendelssohn began:

"Flour, milk, sugar——" but at this moment the bell rang, and every one hurried in to the concert hall.

It happened that this was the last concert of the season and the two men did not meet again until the next year.

The moment Mendelssohn entered the band room he caught sight of his friend, and with a beaming face, shouted out:

"And eggs!"

The American Farmer.

When the American farmer rises early in the morning it is to look over broad and fertile acres that are his own. When he goes forth it is to fields that no human being can lawfully step upon without his consent. When he gathers and garners the harvest he stores up what, in a vast majority of cases, no greedy and rapacious landlord can take from him. It is all his. The proceeds of it are to clothe and feed him and his family and educate his children; to be the support of his old age and the heritage of his posterity. Looked at from every point of view, it is doubtful if there is another human being under the heavens who has more cause for carrying a light heart and a contented mind, for regarding the past with satisfaction and the future with hope, than the American farmer.—Kansas City Journal.

Hot Weather Counsel.

Don't hurry and don't worry, no matter if the quicksilver is beating records with its high jumps.

Be calm, should it be impossible to be cool. Use plenty of water on your head, your wrists, your ankles and your feet, provided you can beg, borrow or steal the time for plentiful lavations and ablutions, and, above all, don't fret and don't get excited.

Then, with good luck, you may possibly outlive dozens of fiery summers.—New York Tribune.

SCIENTIFIC & INDUSTRIAL

An extensive sugar mill is being erected at Morelia, in the State of Michoacan, Mexico. All the machinery required for this factory will be ordered in the United States.

The master electricians and the electrician sergeants of the newly-created corps of the army will be designated by a symbol of white metal resembling forked lightning inclosed within a wreath of gilt metal. The uniform trousers of these officers will show a scarlet stripe.

There has been recently introduced to science a new and powerful medicament, an extract of the suprarenal glands called adrenaline. This extract is a hemostatic of the first order, and its vaso-constrictive powers are such that its equal is not to be found in any agent employed in medicine. Its use quickly arresting any flow of blood, while repeated applications of adrenaline destroy, or at least partially cure, certain malignant growths. Numerous applications have been made of this new drug, which seems adapted particularly to the treatment of external cancer.

Laying masonry in freezing weather is rendered possible, it is said, by a substance recently brought out in Germany, says the Engineering News. The substance is a liquid, which, when mixed with the water used in making up the mortar, enables the latter to set properly even in the coldest winter weather. It is claimed that mortar made with the addition of the new substance shows even slightly greater strength than mortar made up with water. The liquid, which is marketed under the name "Calcofuge," is a solution of chlorite of calcium, and has a freezing point far below zero. It is said to give equally good results with cement as with lime mortar.

A wrecking system has been invented which depends upon the fact that acetylene gas is generated from carbide in the presence of water, states the American Inventor. The essential feature of the process is to provide a number of hollow steel cylindrical vessels in which to generate acetylene. In a compartment at the top of each a sufficient quantity of carbide is placed, and the cylinders filled with water. After being submerged they are attached to the sides of the vessel and water is admitted to the carbide. The gas generated displaces the water in the cylinders and the wreck is raised and can be towed without repairs. A cylinder thirty-feet long and fifteen feet in diameter would lift about 100 tons.

Wonderful Grotto Found.

H. H. Ewers, with the help of picks, ropes and a ladder forty feet long, has succeeded in reaching from the sea a grotto in the precipice near the Arco Naturale at Capri. The grotto was known to exist, but was considered inaccessible.

Mr. Ewers has named it the Marvelous Grotto, and it is wonderfully beautiful. On climbing into its entrance the bottom was found to be level for about 100 yards, and then to rise gently for another 200 yards. The maximum breadth of the grotto is fifty yards, and the maximum height 100 yards. Wonderful stalactites and stalagmites meet the eye on every side.

In the centre there is the appearance of a round green lake, bordered with yellow buttercups and gold-brown wall flowers. The grotto receives its light from below, and the turquoise reflection from the sea has the same effect as in the Blue Grotto, but then changes, as it passes upward, into an emerald green, and ends in the deepest cerulean blue. One group of stalactites is perfectly rose colored, while others are marble white, cinnamon colored, or black.—Brooklyn Eagle.

Gladstone's "Tip."

Canon Cattley, who died at Gloucester, England, the other day, used to tell a good story of how on one of his visits to Gloucester Mr. Gladstone kept a rule of the Cathedral in the letter while breaking it in the spirit. Mr. Gladstone was conducted over the building by a verger named Cross—a man of unusual culture—whose account of the features of interest was more intelligent than such expositions usually are. The statesman, highly pleased, tendered a "tip" of half a sovereign. The man respectfully declined the gift as against the rules. Mr. Gladstone dropped the piece of gold on the floor. "There," he said, "the rules will not prevent you from picking it up." And they didn't.

A Difficult Salvage Undertaking.

The Moss Shipyard and Salvage Company, of Denmark, is at present engaged upon a salvage undertaking of considerable difficulty. It is a question of raising the steamer Ekliptica, which foundered on the Swedish coast, with a cargo of 2800 tons of coal, and which lies in fourteen fathoms of water, in addition to which the salvaged goods have to be conveyed one mile shorewards. The Moss Company has dispatched three salvage steamers and two lighters, each of 1100 register tons, to the spot, with a staff of seventy-two men, and the company incurred expenses for new material of over $17,500. The Salvage Company is to have seventy-five per cent. of the value of the salvaged goods.—Philadelphia Record.

He Works Downward.

The son of the self-made man generally begins at the top and works downward.—Chicago Record-Herald.

Should Doctors Wear Badges.

The Lancet and the New York Medical Journal have been discussing some distinctive badge for medical men. A case is related in support of the suggestion where a surgeon of eminence, witnessing an accident, went to the assistance of the injured man, but "on seeing a well-dressed gentleman in a frock coat and silk hat rush up and take charge of the case" retired without making himself known, leaving the case, as he supposed, in the hands of a brother medico. It turned out that the "well-dressed gentleman" was not a medical man at all, but a commercial traveler, who had been actuated merely by instincts of humanity, and who afterward confessed that he had suffered great uneasiness as to the possible results of his amateur treatment.

It has been suggested that medical men wear watch charms that should be not only characteristic of their profession, but, also emblazoned with symbols distinctive of their alma mater. The Medical Journal, however, considers that some international badge should be adopted like that of the Red Cross Society.

The Life of a Seed.

The United States Department of Agriculture is making experiments for the purpose of determining the extreme vitality of seeds. Over a hundred species of plants have been packed in a soil consisting of dry clay inclosed in pots, and buried at varying depths underground—eight sets at a depth of six inches, twelve at a depth of twenty, and a third set of twelve at a depth of three and a half feet. At the end of one, two, three, five, seven, ten, fifteen, twenty, twenty-five, thirty, forty and fifty years a set from each depth will be exhumed and tested. The results of the experiment are likely to be of extraordinary value to agriculturists, both commercially and scientifically. Incidentally, it may be recalled, says Harper's Weekly, that authentic cases are on record which prove that certain seeds have the power of sprouting after having been buried for long periods of time, reliable tests having shown that twelve out of twenty-one species have the power of germinating after twenty years.

Knitting For Nervous Patients.

I read that a famous physician has said to his nervous patients, "Go home and do fancy knitting for half an hour every day." The prescription is an excellent one, says the London Graphic. Nothing soothes the nerves and employes the mind pleasantly, yet not fatiguingly, like needlework. It takes people from the restless habit of introspection and worry, and acts as an anodyne on tired nerves. Our mothers appreciated this occupation rightly when they made their daughters do a portion of dainty needlework every day, preferably for others. Perhaps a great deal of the neurotic tendency in women nowadays is attributable to the fact that they neglect the soothing qualities of needlework, with its pleasant attendant, cheerful talk, and only indulge in exciting games or rushing about.

A Versatile Princess.

Princess Charles of Denmark, says the Westminster Gazette, is one of the cleverest and most versatile members of the royal family. It has been said of her, indeed, that she can bind a book, steer a boat, pull an oar, ride a bicycle, knit a stocking, take a photograph, play chess and speak five languages; a list of accomplishments which even a Girton girl might envy.

There are 144,000 Mormons in the United States. N. Y.—31.

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. Dr. R. H. Kline, Ltd., 931 Arch St., Phila., Pa

The fellow who is always asking somebody else to put in a good word for him is seldom worth the trouble.

Use Allen's Foot-Ease.

It is the only cure for Swollen, Smarting, Tired, Aching, Hot, Sweating Feet, Corns and Bunions. Ask for Allen's Foot-Ease, a powder to be shaken into the shoes. Cures while you walk. At all Druggists and Shoe Stores, 25c. Don't accept any substitute. Sample sent FREE. Address, Allen S. Olmsted, LeRoy, N.Y.

It's all right to be soft-hearted if you are not also soft-headed.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c. a bottle

Hair Splits

"I have used Ayer's Hair Vigor for thirty years. It is elegant for a hair dressing and for keeping the hair from splitting at the ends."—J. A. Gruenenfelder, Grantfork, Ill.

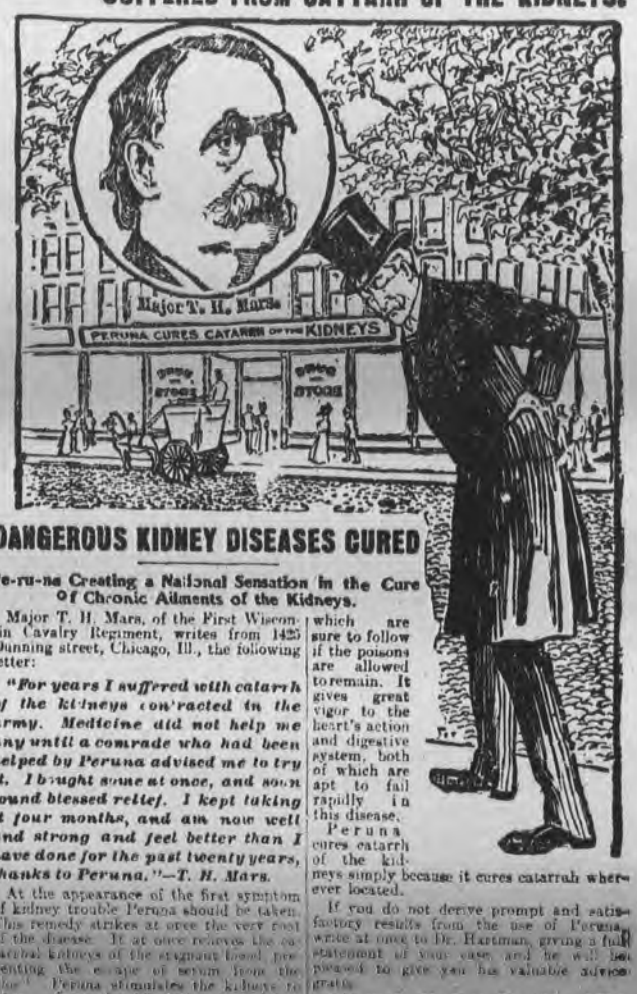
Hair-splitting splits friendships. If the hair-splitting is done on your own head, it loses friends for you, for every hair of your head is a friend.

Ayer's Hair Vigor in advance will prevent the splitting. If the splitting has begun, it will stop it.

$1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address J. C. AYER CO., Lowell, Mass.

FOR TWENTY YEARS MAJOR MARS SUFFERED FROM CATTARH OF THE KIDNEYS.



DANGEROUS KIDNEY DISEASES CURED

Pe-ru-na Creating a National Sensation in the Cure of Chronic Ailments of the Kidneys.

Major T. H. Mars, of the First Wisconsin Cavalry Regiment, writes from 1425 Dunning street, Chicago, Ill., the following letter:

"For years I suffered with catarrh of the kidneys contracted in the army. Medicine did not help me any until a comrade who had been helped by Peruna advised me to try it. I bought some at once, and soon found blessed relief. I kept taking it four months, and am now well and strong and feel better than I have done for the past twenty years, thanks to Peruna."—T. H. Mars.

At the appearance of the first symptom of kidney trouble Peruna should be taken. This remedy strikes at once the very root of the disease. It at once relieves the catarrhal kidneys of the stagnant blood preventing the escape of serum from the blood. Peruna stimulates the kidneys to expel from the blood the accumulating poison and thus prevents the convulsions which are sure to follow if the poisons are allowed to remain. It gives great vigor to the heart's action and digestive system, both of which are apt to fail rapidly in this disease.

Peruna cures catarrh of the kidneys simply because it cures catarrh wherever located.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

Patent Office Work.

The record of the Patent Office for the past year is notable, chiefly in point of volume of issue, according to patent officials. There were 29,329 patents issued during the year, against 26,031 the previous year, while the trade-marks showed an increase from 1864 to 2194. Designs were all that showed a decline during the year, and the decrease in that direction was due to the passage of a law in 1902, restricting them to ornamental matters, instead of to useful things. Heretofore there had been no restriction whatever. The change has opened up a wide field for interesting questions as to what constitute the ornamental and what constitutes the useful.

Andean Railway.

The Chilean Congress, after wrestling with the subject twenty years, passed a bill providing for the construction of a railway over the Andes Mountains, to connect Buenos Ayres with Santiago and Valparaiso. It will shorten the time between Europe and Chile by a week, as traffic is now by the straits of Magellan. The distance between the railway systems is covered by mule train in one day during the summer months, but it is impassable from April to November.

Live in the Dark.

In New York, at the lowest possible average, 500,000 people live in rooms which are dark and without any window or ventilation.

KIDNEY COMFORT.

Summer is a good time to treat Chronic Kidney, Bladder, and Urinary troubles with Doan's Kidney Pills; they conquer the most stubborn cases.

Aching backs are eased, flip, back, and loin pains overcome. Swelling of the limbs and dropsy signs vanish.

They correct urine with brick dust sediment, high colored, pain in passing, dribbling, frequency, bed wetting. Doan's Kidney Pills remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness, dizziness.

Mrs. James Beck of 314 West Whitesboro Street, Rome, N. Y., says: "I was troubled with my kidneys for eight or nine years; had much pain in my back; as time went on I could hardly endure it; I could not stand except for a few moments at a time; I grew weak and exhausted; I could not even do light housework; I could not stoop or bend; my head ached severely; I was in pain from my head down to my heels; centering in the kidneys it was a heavy, steady, sickening ache; I could not rest nights, and got up mornings weak and tired. I thought I was about done for, when I saw Doan's Kidney Pills advertised. Within a week after commencing their use I began to improve, and from that time on rapidly grew better. I used five boxes in all and was cured."

THE REWARD OF VIRTUE.

Uncle Bill's Escape from the Fate That Befell Bad Jake Phelps.

"Y' can always reckon on it, it pays t' be good," said Uncle Bill. "Virtue beats vice in every race, an' in addition t' bein' its own reward it usually pulls in a few of th' outside bets of life along with it.

"Take th' case of poor old Jake Phelps, for example. How's that? Y' never heard tell of what happened t' Jake? Well, then, y' better listen now. It'll be a good lesson fur ye.

"Jake wus a bad man clear through. He drank an' cussed an' Lor' knows what he didn't do. He'd steal th' dinner bag of a blind horse if he thought there wus oats in it.

"As fur me, on th' other hand, I've always lived a good Christian life an' never done no critter harm, as any one who ever knew me'll tell ye. I know Jake's old man an' felt sorry ter see th' boy goin' wrong. Why, I've talked t' him with tears in my eyes as big as horse chestnuts tryin' t' get him t' change his ways an' walk th' path of righteousness. Little good it did, though, as you'll see.

"'Twus on as likely a spring Sunday as y' ever seed that Jake met his end. We'wuz walkin' through th' woods Jeadin' t' Morton's Drop. Everything wuz peaceable. Th' beez wuz hummin' 'round th' wild flowers along ta roadway, an' th' little birds wuz a-titterin' in th' trees, all so joyful-like that it seemed it ought t' soften any man's heart.

"I pleaded with Jake durin' that walk as I'd never pleaded afore. By th' time I'd finished talkin' we'd reached th' end of th' walk an' stood on th' end of th' precipice, a-lookin' at th' calm lake that lies below.

"Suddenly Jake wheeled 'round facin' me. A strange look came into his eyes an' I drew back skeered-like.

"'Gol durn you, Bill,' he growled. 'What th' 'ell right have you got t' be talkin' t' me th' way y' have, y' old varmint, ye. Why, I've half a mind t' heave y' off inter——'

"With that he sprung at me like a wildcat.

"'Help!!' I hollered, but he grabbed hold of my throat an' shut me off. There we fought like two hyenas, he a-tryin' t' throw me off, an' me a-tryin' not t' let him.

"Back an' forth, back and forth we swayed. But he wus younger 'n I wus, an' finally his strength began t' tell. He gave me one final push an' over I went. I made a clutch at him an' he came, too.

"Down, down, down!

"Poor Jake met a just but awful death in th' placid lake below.

* * * * * * *

"Me? Oh, jest as we struck th' water I woke up an' found 'twas nothin' but a dream with me. But poor Jake, he never woke up. All of which goes t' show th' truth of what I said about virtue in th' first place."

Baby Lacked Style.

Aunt Edith—And what do you think of your little baby sister?

Little Elsie—Oh, I'm dreadfully disappointed in her.

Aunt Edith—Disappointed?

Little Elsie—Yes; why she doesn't look a bit more stylish than the baby our washerwoman got last Spring.

At the Oculist's.

"Can I see Dr. Spinks, the oculist?"

"I'm sure I don't know. If you can, you have no need of his services, and he won't care to see you; if you can't, why, step right in."—Chicago News.

Forgetful.

Laura—This time last year you were engaged to that little homely professor.

Bertha—Sure enough; what was his name?—Detroit Free Press.

Constancy.

Tom Jynn—Can't you give me just one more chance. I've stopped drinking for good this time.

Mabel Syruppe—Stopped drinking? Nonsense! You couldn't stick to anything if you tried.

Tom Jynn—Why, Mabel! How can you say such a thing? Think of the way I've stuck to drinking.

Real Thing.

"What game have you to-day" asked the haf-starved Eastern man, as he registered at an Arizona hotel.

"Seven-up and poker, sir," replied the proprietor, as he extended the glad hand.—Chicago News.

Mr. Beazle—After we've done read a lot of these epertaphs in this here graveyard I've 'bout made up my mind the great people of all kinds must be dead.

Mr. Feazle (reflectively, after reading a few more)—Yes, mebbe. All but the greatest liars.

When one drops into ppetry he should be careful and not misplace his feet.

Oh!

Samuel—Have you announced your engagement to her mother yet?

Daniel—But I'm not engaged to her mother—it's the daughter, you know.

Probably Not.

Dear Mamma it rains here most all the time; you never saw such a bad spel of weather.—Harvard Lampoon.

LEGAL NOTICES

SPECIAL MASTER'S SALE.
IN CHANCERY OF NEW JERSEY.

By virtue of a Decree of the Court of Chancery of the State of New Jersey, bearing date on the Twenty-ninth day of June, A. D. Nineteen hundred and three, in a cause pending in said court wherein Abram M. Vail, is complainant and Edgar R. Vail and others are defendants, I shall expose for sale at public vendue to the highest bidder on

FRIDAY, THE FOURTH (4) DAY OF SEPTEMBER A. D. NINETEEN HUNDRED AND THREE,

between the hours of twelve o'clock noon and five o'clock in the afternoon, to wit, at two o'clock in the afternoon of said day, at the dwelling house on the premises hereinafter described, all of the following tract of land and premises being a certain farm or tract of land situate, lying and being, in the Township of North Plainfield, in the County of Somerset and State of New Jersey, bounded and described as follows, to wit:

Beginning at a point in the center of the mill race in the southwesterly line of property known as property of Goldson Smalley, said point being distant fifty (50) feet in a magnetic course of north twenty-eight degrees and fifty-four minutes West (N. 28° 54' W.) from a stone monument on the northwesterly bank of Green Brook, and running thence along line of said Smalley's property in a magnetic course of north twenty-eight degrees and fifty-four minutes West a distance of two thousand six hundred seventy and seven tenths (2670.7) feet to a stone monument being the southerly corner of property known as property of Garretson and Gray; thence along the line of said last mentioned property, north twenty-three degrees and thirteen minutes West (N. 23° 13' W.) a distance of one thousand six hundred fifty-nine (1659) feet to a stake and stone-heap in line of land formerly of Ephraim Runyon and making a corner; thence along the line of said last mentioned property south sixty-seven degrees and twenty-two minutes west (S. 67° 22' W.) a distance of thirty-four and six-tenths (34.6) feet to a stake and stone heap; thence along another line of said last mentioned property, north twenty-one degrees and forty-eight minutes West (N. 21° 48' W.) a distance of three hundred nine and fifty-four one-hundredths (309.54) feet to a stake and stone heap and corner of property of Helen H. H. Pellow; thence along the line of said last mentioned property South sixty-seven degrees and thirty-two minutes west (S 67° 32' W.) a distance of sixty-six (66.0) feet to a stake and stone heap; thence still along another line of said last mentioned property, south twenty-one degrees and forty-eight minutes east (S. 21° 48' E.) a distance of three hundred nine and fifty-four one hundredths (309.54) feet to a stake and stone-heap; thence still along another line of said last mentioned property, south sixty-seven degrees and thirty-two minutes west (S. 67° 32' W.) a distance of four hundred ninety-one and four tenths (491.4) feet to a stake and stone heap, being the northerly corner of other property known as property of Garretson and Gray; thence along the line of said last mentioned property, south twenty-two degrees and twenty-eight minutes east (S. 22° 28' E.) a distance of one thousand one hundred and seventy-eight (1178.00) feet to the easterly side of an Elm tree being the northerly corner of property of John Grogan; thence along the line of said last mentioned property, south twenty-two degrees and nineteen minutes east (S. 22° 19' E.) a distance of six hundred two (602) feet to a stake and stone heap; thence still along line of said last mentioned property, south fifty-eight degrees and thirty minutes west (S. 58° 30' W.) a distance of one hundred and nineteen and seventy-two one hundredths (119.72) feet to a stake and stone heap; thence still along property of said Grogon, south thirty-one degrees and forty-four minutes east (S. 31° 44' E.) a distance of two thousand two hundred and seventy-nine and two tenths (2279.2) feet to an iron monument in the center of the Green Brook Road; thence along the center of said road, north sixty-three degrees and forty-two minutes east (N. 63° 42' E.) a distance of two hundred thirty-six (236) feet to an iron monument and corner of property of Abram M. Vail; thence along the line of said last mentioned property south thirty-one degrees and forty-four minutes east (S. 31° 44' E.) a distance of four hundred five (405) feet to a point in the center of the mill-race; thence up the center of the mill race in a general northeasterly direction a distance of three hundred seventy-six (376) feet more or less to the place of beginning; containing 63.762 acres of land more or less, which said property is shown on the map annexed to the bill of complaint in this cause, including the inchoate estate of dower and interest of Sarah A. Vail, wife of complainant, Abram M. Vail, in the said premises, together with all and singular the hereditaments and appurtenances to the said premises belonging or in anywise appertaining.

Conditions made known on day of sale by

North Plainfield Weekly Review.

VOL. 4—NO. 20 NORTH PLAINFIELD, N. J., SATURDAY, AUGUST 8, 1903. PRICE 3 CENTS

NEWS OF THE WEEK,

Brief Bits About Many Matters of Local Interest.

Mrs. F M. Ward, of Fairview avenue is in the Adirondacks.

The stork left a little boy with the family of W. J. Allen, of Grandview avenue.

W. H. Kirch, has purchased the property, 62 Duer street, and will greatly improve same.

L. C. Wyckoff, of this borough, has been appointed State Game Warden, of Somerset county.

"Mother Jones" is booked to arrive in Plainfield with her army at about ten o'clock this morning.

Miss Sophia Schaefer, became the wife of Patrick Kellegher last Monday. Both parties reside in this borough.

The annual state camp of the Patriotic Order, Sons of America, will be held in Somerville, Wednesday, August 18.

The Trolleymen's Benevolent Association will hold a picnic August 12 in the Grove at the head of Somerset street.

Charles W. McCutchen. of Rockview avenue, this borough, is erecting a large conservatory at the rear of his residence.

Two young men were killed on the Jersey Central Railroad near Bound Brook Thursday afternoon. They yet remain unidentified.

John C. Osborn formerly of Watchung, but now residing on West End avenue, this borough, was presented with a little son on Tuesday night.

The Sunday Schools of the Methodist Churches of Plainfield. Dunellen and this borough went on their annual excursion to the sea shore Thursday.

The engagement of Miss Helen A. Arthur, of Grandview avenue, this borough, to W. E. G. Pearson, of West Third street, Plainfield, has been announced.

On account of extensive repairs being made to the office of John H. Van Winkle & Son, Counsellors-at-law, the

[redacted]

U. A. M.

John H. Van Winkle, Mrs. Van Winkle and John H. Van Winkle, Jr., of 19 Duer street, this borough, left for Asbury Park yesterday where they will remain during the month of August.

James Cromwell, of the New York law firm of Sullivan & Cromwell, of the firm of Sharp and Ryan, of New York, which failed this week, at one time taught school here and practiced law in Somerville.

Members of Warren Engine Company have accepted an invitation from the Bound Brook Engine Company to attend an entertainment to be given at Riverside Park, Monday night. They will attend in full uniform.

Sheriff Corriell, of Plainfield has served notice on the tenants of the Durlach building to remove in order that Watchung avenue may be widened from Front street to Greenbrook to correspond with the North Plainfield side.

Mrs. Oakley at Rest.

The funeral service over the remains of Mrs. Emma A. Oakley, wife of Edward F. Oakley, of Arlington avenue, were held from her late home Tuesday afternoon. Rev. Dr. Bryan officiated. The deceased leaves a husband, a daughter, and a son.

Plainfield's Election Officers.

The following Republican election officers have been appointed for Plainfield by the county election board: First ward, first district, A. J. Stiglitz and David Dunavan; second district, Horace Adams and Guillermo Thorn; second ward, Armstrong Mulford and J. W. Drayton; third ward, first district, Alonzo Titsworth and Theodore La Rue; second district. A. I. Little and John H. Cose; fourth ward, first district, W. T. Newman and Daniel Force; second district, George B. Cose and James Paterson; third district, Garret Dunham and William Craig.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Calvin D. McMurtry, sheriff, to Mary J. Sanford et al, $1500.

Alfred University to Martha Goodman et al, $3300.

Alex. E. Faber, Jr. et ux to Cornelius E. Gulick, $1.

Alex. E. Faber, Jr. et ux to Cornelius E. Gulick, $1.

John Spencer et ux to W. R. Codington, $1.

Death of a Well-Known Citizen.

John Henry Carney, a life-long resident of this borough, died unexpectedly Sunday night after a short illness of typhoid fever. The funeral was held Wednesday afternoon from the home of Jacob Voehl, father-in-law of the deceased, at his residence on Somerset street.

Rev. Dr. Millard Grant, of Bayonne, officiated at the house service.

The remains were interred in the Methodist Cemetery, and at the grave the Odd Fellows held a service.

Among the floral contributions were some handsome set pieces from the orders of which the deceased was a member.

Mr. Carney leaves a wife and two children.

Mr. Carney was a charter member of Perseverance Lodge of this city, the largest organization of Knights of Pythias in this State. He was a past officer of Plainfield Lodge No. 44, I. O. O. F., and was a member of the district initiatory team. He was also a member of Miantonomo Tribe, I. O. R. M., and the Plainfield Exempt Firemen's Association. Until its disbandment he was an active member of Warren Company No. 3, of the borough fire department.

Some News From Hunterdon by Boroughite.

A. Emery, of 23 Somerset street, has just returned from a week's outing in Hunterdon county. He reports peaches almost a total failure this season. They appear to be shriveled and dried up and are not one-fourth the usual size. Very few orchards will produce any marketable fruit at all.

Some of the apple orchards will bear abundantly, but as a rule apples too will be scarce.

Mr. Emery visited his old friend Charles Vail, formerly of South Plainfield and well-known here, who was badly injured in the Westfield wreck. Mr. Vail purchased a farm near West Portland and moved there last Spring.

It was near Mr. Vail's farm that two [redacted] bought a farm (on credit)

[redacted]

cash bonus of from $6 to $8 for securing them the position. This army of men and teams were set to work building a great stone wall. No one knew the purpose of the wall, but as they were engaged at large wages, they were engaged they were content until the time came for their pay, when the landowner (?) and his agent had disappeared.

Another Sensational Story Spoiled.

Of all the fairy stories which a suffering Plainfield people have been inflicted with in recent years, the one describing the wonders of a monstrous cave filled with stalactites and stalagmites reaching from the floor to ceiling, the walls encrusted with wondrous beautiful crystals, and a subterranean pond, which when the cave was discovered discharged its waters in volume sufficient to frighten the quarrymen almost out of their wits, the ceiling fifteen feet high, etc., etc., in Wilson's quarry near Watchung, is a prize winner!

The fact is that workmen found a fissure in the quarry, near the top, filled in with calcite and other minerals which the water had absorbed and deposited. The great room "fifteen feet high" is about three feet high and extends six or eight feet into this fissure. A number of calcite crystals, some dog tooth spar and two or three stalagmites were found in this little opening.

Wilson's quarry is composed of trap-rock and genuine caves are never found in that kind of formation.

Somerset County Board of Elections.

Governor Murphy has appointed on the Somerset County Board of Elections the following men: C. H. Bateman (Rep); Jacob Shurts (Dem); reappointed John H. Mattison (Dem), 1904; Joseph Fitzja (Rep), 1904.

Up the Hudson.

History teaches us that Hudson, in his trip up the river which bears his name, was highly pleased with the marvelous scenic surroundings. Were he to make the trip to-day words could not express his delight, for in addition to nature's handiwork the embellishments by man have made the Hudson one of the grandest spots in the country. The New Jersey Central will run in connection with the Steamer St. Johns a popular priced excursion up the Hudson on Sunday August 16, 1903. Rate to be $1.00 and train to leave Plainfield at 8.52 a. m. Fare for children half of above rate. Steamer St. Johns is one of the famous Sandy Hook fleet and is the best appointed and fastest excursion boat in the harbor.

Wanted: General housework by the day, or will do laundrying. Bertie Claiborne, 318 East Fourth street, Plainfield.

Another Chapter in New Brunswick Grafting Matter.

A special dispatch from New Brunswick to the Newark Evening *News* said that Madison Transportation Company had relinquished the contract to build the macadam road from Hall's Corner to Cheesequakes Creek and it was filed late yesterday afternoon with D. W. Clayton, clerk of the Board of Freeholders of Middlesex County. There has been a dispute over this road, and, as a result, the award of the contract was taken to the courts. The allegation was made that Asbury Fountain, the director of the Board of Freeholders, was a stockholder of the transportation company, and might have been benefited, indirectly perhaps, by the construction of the road.

The matter was taken before the grand jury by Ephraim Rose. He contended that there was to be no steamboat dock at the end of the road, as had been claimed. The grand jury found that the cost would be $5,800, and that the county would be put to a useless expense for a road that would be of no direct public benefit.

In relinquishing the contract the Madison Transportation Company states that inasmuch as there was trouble over the awarding of the contract, the company decided to withdraw its bid rather than put the members of the board to any trouble. As a result, the road will be advertised for again.

Mr. Fountain, the director of the board, has determined to issue a statement, which is now in course of preparation. He expects to give a record of his acts as a member of the Board of Freeholders, and, it is understood, he is confident that he will clear himself of any charges.

New Post Offices Reclassed.

As a result of the readjustment of postmasters' salaries on the basis of office receipts just completed at the Postoffice Department, 125 offices will be advanced from the third to the second class which will include Bound Brook, Belmar and Lumbertville, of this State, and twenty-four offices will be transferred from the [redacted] class which will in[redacted] Rutherford of this

Sudden Death of a Recluse Artist.

Elisha Hall, aged seventy-two, who had been suffering for some time with lung trouble, was found dead in his bed last Saturday morning. The funeral services over him were held last Tuesday and interment made in the Presbyterian Cemetery at Liberty Corner.

Mr. Hall was a bachelor and in his younger days was quite a noted artist, but on account of trouble with his eyes he was forced to give up his profession and since that time has lived a secluded life on a farm two miles from Basking Ridge on the Liberty Corner road. In his home he had many of his paintings, some of which he valued at $1,000 each.

He is survived by a brother, S. Hall, of Perth Amboy.

Found Dead in His Hut.

Matthew Eeler, a stone mason, about forty five years of age, was found dead last Saturday night in a cabin on the mountain, between Bernardsville and Peapack. He had been living alone in this hut for a year. It is supposed that the case may be one of suicide, as, according to the statement of the examining physician, the man's lips were blistered as from carbolic acid, and it is said that an empty phial which had contained carbolic acid was found in the cabin.

Saturday night one of the neighbors went to the cabin to see Eeler regarding some work, and found him dead in bed. Dr. Sutphen, County Physician, made an examination of the body and declared the man had been dead for several days.

Eeler was a native of Germany. A brother in Bound Brook took charge of the body.

Lake Hopatcong.

Lake Hopatcong has become justly famous for several reasons but chief of these is its location. High up in New Jersey's beautiful mountains, a thousand feet above the sea level, surrounded by verdant hills and charming landscape, it is the perfection of outing places. To reach it is a delightful journey through a series of picturesque valleys, and the time of the traveler is so occupied feasting on the scenic sights that the few hours journey are like fleeting moments. For a Sunday excursion no place is more popular than Lake Hopatcong, and if you want a day of enjoyment take in the $1 excursion to Lake Hopatcong. The New Jersey Central is to run on Aug. 9. There will be a special train from Plainfield at 9.20 a. m., and the return train does not leave the lake until late in the afternoon. There is ample opportunity for a trip over the lake or such enjoyment as one may care to indulge in.

A Home-made Bakery Opens Here Today.

The old house at 73 Somerset street. after being in the hands of carpenters and painters for the last few weeks, is now completed and presents quite a modern appearance.

The Misses Goodman have taken possession of it and in the extension built off for them, they will open, today, a store where home-made pies, bread and cake will be sold.

They have been carrying on the home-made bakery business for sometime, but the demand was exceeding their facilities to supply the same. Now this is changed for in the old house is an old-time brick oven which is in perfect condition and hence a large amount of baking can be handled easily.

They have already established a reputation for good, home-made products, and now with a store in the business part of the borough and with better facilities they will soon have a large trade.

Somerset Courts.

In the Orphans' Court last Friday Judge Schenck laid the Hoerster and Badgley estate cases over until the 28th of this month.

Several witnesses were heard in the will case of George V. Clickener, and further hearing will be continued the 28th.

In the criminal courts John Foster (colored), charged with petit larceny, pleaded guilty on allegation. The Court, in consideration of the long time the prisoner had been in jail, gave him thirty days.

Meeting of Board of Freeholders.

The Board of Freeholders met at the Harlingen Hotel last Tuesday morning. In the absence of A. P. Sutphen, Joshua Doughty was elected secretary pro tem. It was decided by the board to replace the Cortelyou bridge with another of 18 feet in width and be built five feet above the water line. The board ordered its secretary to notify Fred E. Ballentine to fill up a ditch which it was claimed he had made in the county road at Bernardsville, and to grade the road, also that he would be held responsible for any accident or damage resulting from the open ditch.

Secretary, A. P. Sutphen invited the board to visit him today at Lake Hopatcong. The board accepted.

Concerning Proctor's.

Business at Proctor's Fifth Avenue Theatre has been exceedingly good during this hot spell, owing probably to the fact that many brilliant comedies have been offered as attractions, interpreted by skillful comedians and comediennes. If, in his regular stock company, Mr. Proctor finds that he has not exactly the right person or persons to fill the various characters, he scours the market until the right one is found. The consequence is that every production at this theatre is perfect, not only from the scenic standpoint, but also in cast.

Proctor's Fifty-eighth Street, after a most successful Summer season of stock, will in a short time turn to combinations for the Winter season. Only the best comedy dramas and plays have been negotiated for, and a most prosperous season is the out look.

Proctor's Twenty-third Street Theatre, in the heart of the most fashionable shopping district, will very soon see the debut of many new European novelties that Mr. Proctor has booked through his agents abroad during the Summer season. At present several brilliant one act comedy plays, interpreted by good actors, and written by prominent newspaper men, are now holding the attention of Mr. Proctor's patrons at this playhouse.

As the Summer season goes into its decline, Mr. Proctor's keen vaudeville eye, always on the alert for new material, is securing many new acts that will be produced in due time at his Newark house. An up-to-date Jerseyite in days of yore had to go to New York for his vaudeville entertainment. Now all he does is to walk to Military Park, where a standard show, brim full of comedy and variety, is always maintained.

Up the Hudson.

History teaches us that Hudson, in his trip up the river which bears his name, was highly pleased with the marvelous scenic surroundings. Were he to make the trip to-day words would not express his delight, for in addition to nature's handiwork the embellishments by man have made the Hudson one of the grandest spots in the country. The New Jersey Central will run in connection with Steamer St. Johns a popular priced excursion up the Hudson on Aug. 13, 1903. Rate to be $1.00 and train will leave Plainfield at 8.46 a. m. Fare for children half of above rate. Steamer St. Johns, one of the famous Sandy Hook Fleet and is the best appointed and fastest excursion boat in the harbor.

Has Wife and Now Wants $50,000.

Clifford Schorb, of this borough, who has been separated from his girl wife, a granddaughter of Mrs. John R. Marsh, of Scotch Plains, since their marriage, has finally succeeded in securing her and has her now at his home.

The couple, both under age, were secretly married at Rahway several months ago, and when the girl announced the fact to her family consternation reigned supreme, and it is claimed the husband was refused permission to see her. She was taken to Saratoga recently and while there the young husband met her and she returned to North Plainfield with him. He has filed a suit for $50,000 in Supreme Court for alienation of wife's affections by her family. The suit will be heard next month.

The story of Clifford Schorb's marriage and the succeeding events, would furnish suitable material for some of the sensational novel writers of today.

SUBURBAN NOTES.

WATCHUNG.

Paul Kelm has been ill from malaria.

All crops are looking fine in this vicinity.

Arthur E. Demhorst, of New York is visiting G. H. Underhill.

Dr. Richard Moldenke has returned from a trip to Pittsburg.

Miss Maple Swain, of Plainfield, is visiting Miss N. L. Beeching.

Mr. and Mrs. Geo. Mobus are happy over a new little baby girl.

Mrs. Richard Moldenke and daughter have returned from a visit to New Rochelle.

Mrs. H. Texier and two young sons have gone for a long visit to Gloversville, New York.

Mrs. Stewart and son and the Misses Anna and Rosie Fruller, of Plainfield, recently visited Mr. and Mrs. Geo. Schmidt.

At Watchung Chapel Sunday evening at 8 o'clock, Miss Emily March will speak and Kenneth Schuppe will render trombone solos.

Thomas J. Handler, the nine year old son of Mrs. Mary Handler, of Watchung, who was taken to Muhlenberg Hospital last Saturday and operated upon for appendicitis, died Tuesday. The funeral was held Thursday from Lincoln place, this borough, the home of Thomas J. McGann, an uncle of the boy. Rev. Father Miller officiated. The little fellow will be greatly missed, not only in the home circle but outside, for he was a universal favorite with everybody.

Whereas, it has pleased the Almighty to remove from us by death our well beloved and cherished Associate and Fellow Workman NEWTON P. GOLTRA.

Resolved, that while bowing to the will of the Almighty, who in his wisdom doeth all things well, we do deeply deplore the loss of our former Associate and Fellow Workman and regret his early departure from life most sincerely.

Resolved, that we his former Associates and Fellow Workman do hereby tender the bereaved family and friends our most heart felt sympathy in their affliction.

W. N. SORTOR, GEO. A. SCHMIDT,
ALBERT BARTLE, EDWARD BARTLE,
T. L. ABBOTT, T. H. CLARK,
DAVID KLINE, WILLIAM E. BARTLE.

* * *

LIBERTY CORNER.

Miss Augusta Long, of Plainfield, is visiting Mrs. M. W. King, of this place.

I. T. and Frank English have returned to Elizabeth, after spending their vacation here.

Master Harry King, of Somerville, is visiting his aunt, Mrs. A. Q. Ten Eick.

Miss Nellie Nixon, of Morristown, spent Sunday at the parsonage.

Lewis Smalley, of Newark, visited his parents last Sunday.

Miss Grace Darling, of Newark, is visiting Miss Lena Barritt.

Miss Pearl Stantial, is visiting friends in New York City.

Roger S. Hart, of New York City, is spending his vacation at Mrs. Froehling's.

The Liberty Corner Presbyterian Sunday school will hold its annual picnic August 18 at Brown's Riverside retreat.

A Pretty Compliment.

The eastern delegates to the recent Convention of the International League of Press Clubs at Atlantic City selected the New Jersey Central as the official route from New York. And in the last issue of the New York Insurance Journal the appreciation of the party was expressed as follows:

The New York delegation journeyed over the Central Railroad of New Jersey. The trip over this excellent road, which has been greatly improved in recent years, is most delightful, and the trains are equipped with every appliance for the comfort and convenvenience of passengers.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

The Civic Club of Orange received a communication from the Erie Railroad saying that the company will not use soft coal in locomotives running through the Oranges.

Captain A. J. Thompson, of New York, has been at Atlantic City taking soundings of the inlet to determine the feasibility of a plan for founding a steamship line from New York to Atlantic City.

A postoffice has been established at Phalanx, Monmouth county. The mail is taken to Red Bank with the Lincroft mails. There was a post office at Phalanx in 1850, but it was abandoned ten years later.

For the first time in the history of the New Jersey State prison, some of the convicts there appeared without striped suits Monday. New uniforms of gray were donned by 300, and more will gradually be given them.

The Public Service corporation has been notified by the state health to cease the discharge of waste oil from the Cranford power house into the Rahway river. A settling tank is being built to receive the waste.

County Collector John E. Barber, of Sergeantsville vicinity, has lost over 200 chickens the present summer through the depredations of some animal. A colony of ground hogs near his residence are strongly suspected as being the depredators.

Workmen are busy at the new trolley power house at Cranford laying out the grounds before the building for a spacious lawn. The ground has been leveled and made ready for sodding. It is proposed to make the surroundings very attractive in appearance.

What is said to be the largest bell in New Jersey was blessed at Passaic Monday afternoon. It is one of a chime of bells about to be placed in the new St. Michael's United Greek Rite Church in First street. It weighs 10,000 pounds and cost $2,000.

Ringoes, Hunterdon county, has the distinction of being the only place of that name in the world. It was named for Philip Ringo, who erected a mill in that vicinity about 1730. Ringo's tavern was famous, too, in those colonial days, and the change from Ringo's to Ringoes was easy.

Abram Watkins, a professional beggar, was arrested at Long Branch last week. Watkins, who is 79 years of age, deaf and bent, comes from Eatontown, and for the past two yeaas has been begging in Long Branch. The business became so profitable that he engaged a room at that place. When arrested he had change in his pockets amounting to over $115.

The annual harvest home of Old Tennent Church, Freehold, took place last Wednesday evening and fully 2,000 people attended it, coming from all parts of Monmouth, Mercer and Middlesex counties. The usual plain and substantial good things were served and the Jamesburg Band of sixteen pieces furnished music. The church will clear several hundreds of dollars from the affair.

The barking of his pet dog at the bedroom door awake Richard Jennings of 539 Jefferson avenue, Elizabeth at 3 o'clock Monday morning. He found the house on fire and the children's room filled with smoke. The dog's barking had attracted the policeman on post. Jennings's six year-old son was rescued with difficulty by the firemen. When the flames were extinguished the carcass of the faithful dog was found in the kitchen.

In former Senator Haven's collections of antiquities which he lost in a fire at Point Pleasant, last Thursday, was one fossil of an extinct sea creature, for which he had been offered $20,000 within the last year by a museum of natural history. There was only one other specimen like it known to be in existence. The Senator had been about thirty years gathering the collection, and feels his loss greatly. Part of his stock was saved and placed in a building across the street.

If "Uncle Billy" Somers, who has a small truck farm at Churchtown, does not surprise his neighbors each season in growing something of a freakish nature he puts it down as a poor season. Growing watermelons in bootlegs, citrons in bedsprings and squashes with some wording inscribed is his hobby, but this year he has succeeded in filling a peach tree with watermelons. Surrounded with blushing peaches in one large tree several nearly ripe watermelons are hanging, or rather propped up, and the sight is a remarkable one. "Uncle Billy" always has watermelons at Christmas time.

PIUS X. NOW POPE

Cardinal Sarto, Patriarch of Venice, Chosen by Conclave, Takes That Name.

The New Pontiff is Expected to Follow Policy of Leo XIII.---His Election is Popular.

Rome.—The conclave, after being in session for four days, elected Giuseppe Sarto, Patriarch of Venice, as Pope to succeed Leo XIII., and he now reigns at the Vatican and over the Catholic world as Pius X. At night all Rome was illuminated in his honor. His election and the assumption of his holy office were marked by a striking demonstration and impressive ceremonies at the Vatican, which only ended in the evening.

On the following day the new Pope, clad in his full pontifical robes and with all the ritualistic ceremony, received the members of the Diplomatic Corps, the Cardinals and the Bishops, who then offered their official homage, this notwithstanding the fact that twice on the previous day the Cardinals and many high officials of the Vatican went through a similar ceremony.

The election of Pius X., once it was consummated, was proclaimed in a loud voice by the Cardinals' scrutineers to the Sacred College. Monsignor Merry del Val, Secretary of the conclave, and Prince Chigi, Marshal of the conclave, were notified through a bell by Cardinal Oreglia.

The Pope took the throne and received the so-called "first obedience" of the Cardinals. All kissed his hand and foot, while he saluted each on the cheek with the kiss of peace. Then all sang the Te Deum, after which the Pope administered the Papal blessing to all of the members of the Sacred College.

The fisherman's ring was placed on the Pontiff's finger.

The new Pope appeared before St. Peter's and, amid the most intense excitement of an enormous crowd, pronounced his blessing on the people.

The election of the Patriarch of Venice was unanimous. After Monday's ballots it was a foregone conclusion that he was the only candidate sufficiently acceptable to all to secure the necessary two-thirds, which the laws of the church require. One of the Cardinals said that he believed Pius X. would follow the broad lines of Pope Leo's policy, although not likely to accentuate it. This voices the general feeling here, which is one of satisfaction.

Although the election was over at 11 o'clock a. m., and was announced to the world forty-five minutes later by the appearance of the new Pope at the window of St. Peter's, the conclave was not formally dissolved until 5.30 p. m. The Cardinals then returned to their various apartments in Rome, with the exception of Cardinals Rampolla and Oreglia, who temporarily retained their official suites in the Vatican, and Cardinal Herrero y Espinosa, who was too ill to be moved for several days. It was to the sick Cardinal that the new Pope paid his first visit after being formally proclaimed Pontiff. With the exception of the Spanish Cardinal, Herrero, all the others are now in fairly good health.

When the first ballot of the conclave was taken it showed that the Sacred College was divided into two groups, the stronger one for Rampolla and another quite so strong for Serafino Vannutelli. The other votes were scattered, but included four for Sarto.

On the subsequent ballots, while the two principal parties were losing ground, Sarto gradually gained, drawing strength from both sides as well as from the neutrals, until the ballot when his vote had increased to thirty-seven, within six of the necessary two-thirds.

When the result of this ballot was announced in the conclave Cardinal Sarto was so overcome with emotion and so touched by the unlooked-for confidence reposed in him that he could no longer control his feelings, and, to the surprise of all, he broke down, declaring that such responsibility and honor were not for him, and that he must refuse them if offered. Tears rolled down his cheeks, and he seemed firm in his determination to refuse the dignity. He was so palpably sincere that consternation reigned in the conclave, and the Cardinals spent the whole evening and far into the night in convincing him that his election was the will of Providence, and that he must accept.

Several times he almost fainted and had to be revived by the use of salts. He seemed happy but broken down even after all the other candidates had retired, and on the final ballot he looked a statue of resignation. Cardinal Casetta, as scrutineer, was reading out the vote. When forty-two votes had been recorded for the Patriarch of Venice the scrutineer arose, lifted his red mucchetto, saying:

"Habemus Pontificem."

But from many sides Cardinals cried out "Continue."

As the vote neared fifty, however, the Cardinals, with one accord, surrounded the new Pontiff and according to tradition, demanded to know if he would accept the pontificate.

Cardinal Sarto's lips trembled so that he could hardly articulate, but after a visible effort he said:

"If this cup cannot pass from me—"

There he paused, but the Cardinals around him insisted that it was necessary for him to answer "yes" or "no."

Thereupon he replied firmly, "I accept."

The Cardinals thereupon removed their baldachins, so that that of Sarto was the only one remaining, thus marking him as their supreme head. The passing supremacy of the Cardinals was gone and was now concentrated in one person.

During the subsequent ceremonies, when the newly elected Pope had donned the robes of his holy office, the Secretary of the conclave, Mgr. Merry del Val, kneeling, offered him the Papal white cap, amidst breathless silence. He did not follow the precedent created by Pope Leo, who declined to give his red cap to the master of ceremonies as a sign that he would soon be created a Cardinal, but, with a slight smile, Sarto took the white cap, placed it calmly on his head, and dropped the red one lightly on the head of Mgr. Merry del Val, amidst a murmur of approval. This is taken as a certain indication that the happy recipient is soon to be raised to the Cardinalate.

The Pope has confirmed in the post of master of the chamber Mgr. Bisleti, who was so trusted by Pope Leo in that position, and has also reappointed Dr. Lapponi, the Papal doctor.

Venetians who know the new Pope well say that he will soon be as much beloved as Pontiff as he was as the beloved Patriarch of the poor of the Adriatic. In appearance Pius X. is a very handsome man. He has a fine, erect figure, despite his sixty-eight years, his face greatly resembling that of the late Phillips Brooks, the eminent Boston divine.

When he pronounced his first benediction at St. Peter's his voice rang out with splendid resonance. In every way he showed beyond a doubt that he has dignity and personality in keeping with the best traditions associated with the famous Pontiffs who for centuries have ruled the Vatican.

ALL EUROPE SURPRISED.

The New Pope Had Not Been Considered as a Candidate.

London.—News of the selection of Cardinal Sarto as Pope reached England first through a dispatch from New York City, and caused great surprise here, as it did throughout Europe, as Cardinal Sarto had hardly been thought of as a possible successor to Pope Leo.

The first question asked, not only by laymen, but by high church dignitaries, was "Who is Sarto?" Books of reference were quickly hunted up in order to ascertain knowledge of the career of the new Pontiff.

Berlin. — Replying to the question whether the election of Cardinal Sarto as the new Pope was acceptable to Germany, a representative of the Foreign Office answered: "Unqualifiedly so from an official viewpoint. Sarto is a mild-mannered man and has never been active politically."

All sections of the press regard the choice as wise, praise Sarto's conciliatory character and emphasize the belief that he will be a religious rather than a political Pope.

It is remarked that Sarto is the only Italian Cardinal whom the King of Italy received.

Paris.—The election of Cardinal Sarto as Pope created a distinctly favorable impression in Governmental quarters. The choice of Sarto is satisfactory as apparently ensuring the continuance of the recent policy of moderation followed by the Holy See in its relations with France and other Catholic countries.

Washington, D. C.—The election of Cardinal Sarto as Pope came as a surprise to the Catholic dignitaries of Washington, to whom the new Pope is quite unknown, except as an able and devout member of the Sacred College. Monsignor Fanconio, the Papal Delegate, as soon as he is officially advised of the election of Pius X., will send out to the Catholic prelates of the United States a circular letter commending him to their loyalty.

POPE'S NAME AND TITLE.

Two Hundred and Sixty-fourth Successor to the Throne of Peter.

The new Pope's name is Guiseppe Sarto. As Cardinal Sarto he was Patriarch of Venice, titular of the Church of San Bernardo alle Terme, in Rome. He now becomes Pius X., two hundred and sixty-fourth successor of the Prince of the Apostles, Supreme Pontiff of the Universal Church, Patriarch of the Orient, Primate of Italy, Metropolitan of the Roman Province and Bishop of Rome.

Pius X. was born in the village of Riese, in the Diocese of Treviso, and the Province of Venice, June 2, 1835. He was educated in the Salesian Seminary at Cottolengo, where he made an excellent record in his studies, and attracted attention by his marked seriousness. Most of his subsequent life as parish priest, and afterward as bishop, he has spent within the Province of Venice. The singular success of his work as a parish priest early brought him under the notice of superiors, though he was less known in Rome, as he kept aloof from the Curia and seldom left his work on the Venetian mainland. He was made Patriarch of Venice and at the same time created Cardinal, June 12, 1893. In this position he has shown great energy and ability as an administrator, and has also become known as a sound authority on divinity. Personally he is a man of medium figure and a fresh, almost youthful face, which contrasts singularly with his silvery white hair, the invariably "tousled" appearance of which adds to his appearance something almost boyish. He has led in Venice a life of utmost simplicity, but at the great ceremonials of the church he presides with impressive dignity.

Boodler Gets Seven Years.

In the Circuit Court at St. Louis, Mo., Judge Ryan sentenced Julius Lehmann, former member of the House of Delegates, to seven years' imprisonment in the penitentiary on the charge of bribery in connection with the city lighting "boodle" deal.

Religion and Marriage in Austria.

The Austrian Supreme Court, by a judgment given at Vienna, decides that marriages between Christians and persons of no particular creed are invalid in Austria.

Artillery For the Militia.

The Ordnance Bureau of the War Department at Washington, under the decision setting apart additional funds for field artillery for the militia, will construct thirty-two guns, the guns to be built at Watervliet arsenal and the carriages at the Rock Island arsenal.

Mrs. McKinley's Uncle Dead.

Joseph Saxton, aged 73 years, died of cerebral anaemia at Canton, Ohio. He was the last uncle of Mrs. McKinley, and was a frequent visitor to the McKinley home.

POPE PIUS X.
(Giuseppe Sarto, formerly Patriarch of Venice.)

WHITE FARMER LYNCHED

Slayer of Little Girl Taken From Jail and Quietly Hanged.

MOB EVEN USED A BLACK CAP

A Washington Sheriff, Whose Daughter Was the Murderer's Victim, Opposed the Mob's Work, But in Vain—Torture Discussed, But Voted Down—When Certain of Death Crowd Melted Away.

Asotin, Wash.—A mob of 1000 men, in spite of the efforts of Sheriff Richards, of Asotin County, father of the victim, lynched William Hamilton, a well-to-do farmer, the self-confessed murderer of little Mabel Richards. The lynchers, who wore handkerchiefs to conceal their faces, carried out their work in a quiet and systematic manner. Shortly after midnight a small band of men marched to the jail and swept aside the officers and guards, twenty-five of whom were special deputies sworn in by the victim's father. The men took the keys from the jailor, but were obliged to saw the bars of Hamilton's cell before the door could be opened. Hamilton was then dragged out and into the yard.

Meanwhile another and much larger band of masked men had marched to the jail and kept back the crowd which had waited all night for the lynching. Then the men who had been guarding the jail formed about the captive and captors and kept the crowd away.

When the lynchers with Hamilton reached First and Fillmore streets they halted under a guy wire connecting electric light poles. Hamilton was asked if he wanted to confess. He did so. Finally he asked that his jewelry and trinkets he had be given his father and mother, and it was promised that this would be done.

Then there was another delay while the manner of Hamilton's death was discussed. Some wanted to torture him, but it was decided to hang him. A mask was put over the man's head, a rope around his neck thrown over the guy wire and seized by many lynchers. When certain he was dead the body was left hanging and the crowd quietly departed.

$80,000 JEWEL ROBBERY IN HAWAII

Mrs. Samuel Parker's Diamonds Taken After Attending a Reception.

Honolulu, Hawaii.—Mrs. Samuel Parker has been robbed of jewels worth $80,000, consisting chiefly of diamonds, rubies and solitaire studs. She wore the jewels at a reception held to signalize the opening of a new hotel.

Several hours later the thief or thieves entered her home and stole many of the gems. Mrs. Parker, who is the wife of Colonel Samuel Parker, one of the wealthiest men in Hawaii, was the widow of J. K. Campbell, who left her one-third of his $4,000,000 estate. She was married to Colonel Parker about a year and a half ago, and on the same day her eldest daughter was wedded to Prince David.

VICEROY CURZON LIKES WORK.

Accepts Government Offer For Extension of Term of Office.

Simla, India. — Viceroy Curzon informed the Council that he had decided to accept the Government's offer of an extension of his term of office, with permission to take a vacation in England in 1904, should he so desire.

Lord Curzon said he was fully aware of the strain on his health and spirits, and the fact that only two Viceroys in the last fifty years had stayed in office beyond five years. This, however, was too short a term for a Government which had embarked on wide schemes of reform, and it would be a neglect of duty to abandon his share of the work.

Fireworks Victim Dead.

Mrs. Michael Sinoscaca, who was burned by an explosion of fireworks in her home at Nutley, N. J., died in the City Hospital at Newark. Her five-year-old son, who was also burned, is in a critical condition. Prosecutor Riker's men are investigating the cause of the explosion.

Indians Permit White Settlers.

Indians at the Rosebud Agency, South Dakota, are signing a treaty opening 416,000 acres of their land to settlement by the whites.

SCHWAB FINALLY QUITS

Directors Accept His Resignation as President of Steel Trust.

Condition of His Health Makes It Impossible For Him to Continue at the Head of the Corporation.

New York City.—Charles M. Schwab tendered his resignation as President of the United States Steel Corporation at a meeting of the directors, and the resignation was accepted. William E. Corey, who was recently elected assistant to President Schwab, was named as his successor. Schwab remains a member of the Board of Directors and of the Finance Committee.

The directors created the new office of Chairman of the Board of Directors, and elected Judge Gary to that position. The incumbent of the new position will share the duties of the Presidency with Mr. Corey, and will act in an advisory capacity toward him. The directors also created a new committee to be known as the Advisory Committee, and appointed as its members Daniel G. Reid, William Henderson and E. C. Converse. It will be the duty of the committee to consider and make recommendation concerning questions of manufacturing, transportation and operation.

W. E. Corey, the new President, will get a salary of $75,000 a year. This is an increase of $25,000 over his salary as assistant to the President, but is a decrease of an equal sum from the salary paid Charles M. Schwab. The salary of the President was set originally at $100,000, but by some process not made public it was cut to $75,000 when the profit-sharing scheme among employes was announced.

J. P. Morgan gave out the following statement: "I deeply regret that the condition of Mr. Schwab's health renders it impossible for him to continue at the head of the Steel Corporation. His loyalty to the interests intrusted to him cannot be doubted, and from the early days of the inception of the corporation he gave to its formation, unification and development his unequaled powers as an expert in the manufacture of steel. I consider that in Mr. Corey the directors have secured an eminently competent successor to Mr. Schwab and I am confident that the future will prove this to be the case. In fact I think that to-day the steel company in all its branches is intrinsically in a stronger and better position than it ever has been."

In the meantime Mr. Schwab had sent word to the newspaper men that he would receive them in his office on the floor above. They found him seated in a corner in the great office. The President of the Steel Corporation looked the sick man he is. His face was pale, the whites of his eyes had a dull, leaden look, which is one of the manifestations of a peculiar form of nervousness, and his manner was uneasy. His voice, however, was firm and his words were pronounced with precision and decision.

The substance of Mr. Schwab's remarks was that the newspapers had not treated him fairly and had misrepresented his connection with the United States Shipbuilding matters. The only reason why he had resigned the Presidency was that he needed rest. He still remained, he said, one of the largest stockholders in the Steel Corporation. His main object now was to recover his health. He was suffering from a nervous breakdown.

Wills Away Phantom Estate.

At the age of eighty-one Isaac B. Wood died in the City Home for the Indigent at Perth Amboy, N. J. He was born in Tottenville, and lived in Perth Amboy the greater part of his life. For many years he has expected to share the good fortune that is reported to be waiting the heirs in England. So confident was he the money would come that he left directions how it should be disposed of after his death.

Sentences Negro Saved From Mob.

James Wilson, the negro, whom a mob attempted to lynch on July 25, causing a race war at Danville, Ill., that was quelled by militia, has been allowed to enter a plea of guilty on a charge of attempting to assault Mrs. Burgess, of Alvin, Ill., and was sentenced to a long term in the State prison.

Appointed Consul at Cartagena.

Clair A. Orr, of Illinois, has been appointed United States Consul at Cartagena, Colombia.

CLAY LEFT SECOND WILL

Famous Kentucky Statesman Deeds White Hall Park to the Nation.

Former Child Wife Produces Later Testament Than That Held by Heirs—Coal Mines to Keep Up Park.

Lexington, Ky.—Another will of General Cassius M. Clay, executed March 28, 1901, a year after the one offered for probate in Richmond, has been produced by Dora Clay Brock, the former child wife of General Clay. The instrument is in General Clay's own handwriting, and sealed on the back with his private seal ring in green wax.

Sections 1 and 2 appoint Dora Brock, his former wife, and two others, selected by her, as executors, and gives them one-half of the proceeds of certain sales. The will then reads:

"Section 3—The White Hall lands and fixtures of 350 acres shall remain, including houses, trees, etc., forever the same, intact—the finest natural park on earth. It shall be in fee simple the property of the United States of America, in trust for the inhabitants of this earth. It shall be so long under the care of my executors as may be deemed best by the Federal Government, and then be under their direction and support in the purposes of this legator.

"Fourth — My coal mines in Clay County, Ky., bought of Eli Bowlin, near Manchester, about 300 acres, more or less, shall be formed into a company and worked for the use and benefit of the funds and needs of the White Hall Park, and to pay all legacies and debts here enjoined. The 350 acres of my son, Green Clay, deceased, when my late divorced wife, Mary Jane W. Clay, lived in Madison County, Ky., shall be sold and the proceeds go into the White Hall Park reserve fund. All other lands shall be sold for the same fund or given to the legatees, as ordered herein."

Sections 5, 6, 7 and 8 give Dora Brock $40,000 in bonds, and names bequests to James Bowlin and other employes. All other property, personal and real, goes into the White Hall Park reserve fund. Continuing, the will says:

"Section 9—Of the works of art in my house, the protraits of the Emperor and Empress of Russia, given me by their Majesties, with their autographs and seals, and the likeness (painting) of my son, Warfield Clay, shall remain, and such other things not then disposed of shall remain there forever. The bust of this legator in marble on Verde antique marble stand—wherever found —by the great sculptor, Joel Todd Hart, shall be placed in the Corcoran Gallery, at Washington, D. C., or other gallery, as the executors elect.

"Section 10—My manuscripts, [illegible] volumes or more of my memoh and Records a Specialty. material for Icarus, written by [illegible] gator, shall be given to the [illegible] of American Authors [illegible] publication and copyright [illegible] the proceeds to go [illegible] Dora, and the other half to the society forever; in the event of her death before publication of said book Icarus the child of said Dora, Cassius Marcellus C. Brock, forever."

The other will, dated May 12, 1900, has been probated, and it was for her protection in that will that Dora Brock retained J. M. Norwood, to whom she told that she had an unopened envelope that General Clay gave her, with the admonition that it was to be kept until after his death. It turned out to be the last will.

Colonel James Scott has since been retained to assist Mr. Norwood.

REIGN OF TERROR IN CHINA.

Liberals Now Fear Arrest at the Instance of the Empress Dowager.

Pekin.—China is witnessing a return to the conditions which followed the coup d'etat of 1898. Political discussion, which increased during the imperial court's recent policy of friendliness toward foreigners, has suddenly stopped, the plan of the Dowager Empress to terrify the reformers by the execution of Shen Chien having been successful.

All the liberal Chinese, particularly those who have been associated with the reformers, are in the greatest fear of arrest, and it is difficult to find a Chinaman who is willing to mention politics. Officials are particularly dumb.

The affair is disappointing to the foreigners, who had hoped that the Empress Dowager's association with the ladies of the legations would have a civilizing influence.

THREE KILLED IN A >ACHT.

Lightning Hits a Boat on Mobile Bay—Well Known Men the Victims.

Mobile, Ala.—Bruce Granville Simpson, a wealthy young Englishman; Ledyard Scott, of a prominent Mobile family, formerly professor in the Imperial University in Japan, and William Brewton, were killed by lightning on the pleasure yacht Florodora while off Point Clear, a summer resort on Mobile Bay. Charles Baldwin, one of the yacht's party, was badly burned and disabled by the same bolt, and the little daughter of Mr. Scott was found prostrated across the body of her father by rescuers. She only escaped death by a freak of the lightning.

The accident happened during one of the heaviest squalls that has visited this region in years, the wind blowing fifty miles an hour in the city for ten minutes.

Cuba's Heroes Ask $51,589,000.

The total of the claims of the persons listed as revolutionary soldiers and as civilians entitled to pay for services rendered during the recent revolution in Cuba is $51,589,000.

Freight Crash Kills Six Men.

Through a misunderstanding of orders two freight trains, both double-headers, collided head on between Cumberland Falls and Greenwood, Ky., killing six men and seriously injuring two others.

Jew Immigrants From Roumania.

Lack of work in Roumania is causing a renewed exodus on a large scale of Jews to America. They are assisted by the B'nai B'rith and other foreign Jewish societies.

A CASE AGAINST LITTAUER

Secretary Root Refers It to Attorney-General Knox.

A Demand May Be Made For a Return of Part or All the Money Paid on Contract.

Washington, D. C.—Secretary Root made public all the papers relating to the investigation into the Government contract for gloves with E. R. Lyon. This contractor obtained the gloves from Littauer Brothers, the senior member of the firm, Lucius N. Littauer, being a member of Congress. Secretary Root has referred the case to the Department of Justice in order that it may be ascertained if the law has been violated, and, if so, that appropriate measures may be taken in the premises.

General Davis recommends that the testimony of two witnesses who could not be found by Inspector Garlington is rather important, and that the investigation be continued with a view of getting their testimony. When taken he says it can be referred to the Department of Justice with the other papers in the case.

Secretary Root in an indorsement on the opinion of Judge Advocate-General, which sends the case to the Department of Justice, says:

"There appears to be no evidence that in the manufacture of gloves by the Messrs. Littauer Brothers, to be used in filling Government contracts made by Lyon and others, there was any violation of the statute except in one case, the contract of December 7, 1898.

"I think the indications of an interest by the manufacturing firm in the lobbers' contract with the Government are sufficient to require me to proceed upon the theory that there is a prima facie case of violation of the statute.

"Three duties are therefore devolved upon the War Department. First, to put the Department of Justice in possession of the facts, in order that if that department finds the law to have been violated it may take appropriate measures for its enforcement.

"Second, to direct the proper officer of the department to demand repayment of any sum of money which has been 'advanced on the part of the United States in consideration of such contract.'

"Third, to determine whether the officer who was concerned in the making of the contract was culpable in the true intent of the statute," adds: "No influences must exist, either [illegible] to attain any-

Cash Purchasers for the next 20 [illegible] Free your choice of [illegible]

[illegible] generally known as "Calamity Jane," in the Western frontier since 1870, died at Terry, eight miles from Deadwood.

The woman requested that she be buried in Mount Moriah Cemetery, at Deadwood, beside "Wild Bill" Hickok, who was murdered here in 1876. It is said that she had a husband and a married daughter living. From the latter she is reported to have been estranged.

Born in Princetown, Mo., she emigrated, while still in her teens, to the west, where in time she became a scout. In 1870 she donned male attire, and went out as a scout with Custer in one of his raids. She was a noted shot, and her achievements included the saving of the life of an army captain who had been wounded by an Indian. She first killed the Indian. When William Hickok, known as "Wild Bill," was shot dead in a gambling house in Deadwood she headed the lynching party which caught and killed his slayer.

BURGLARS ROB A GOVERNOR.

Georgia's Executive in Pajamas Vainly Chased Marauders Two Blocks.

Atlanta, Ga.—Burglars raided the Executive Mansion at 3 o'clock a. m., and as a result Gov. Terrell lost three suits of fine clothing, $200 in cash, a gold watch, a $15 Panama hat, an ivory-handled umbrella, five boxes of choice cigars, and several other articles. Besides he is suffering from a cold caught in chasing the burglars through the streets in the gauziest of pajamas. It was Mrs. Terrell who aroused the Governor by saying there were burglars in the mansion. The Governor arose and found three men in the hall loaded with plunder.

He cried "Halt!" but the robbers fled with Terrell in hot pursuit for two blocks, when he was distanced. Returning he missed the articles mentioned. The money stolen practically represents the Governor's salary for July.

BIG CHICAGO THUNDERSTORM.

Three Killed and Seven Injured by Lightning or From Other Causes.

Chicago.—Coming out of the northwest, with all the appearance of a tornado, a storm, preceded by a mass of copper-colored clouds, swept across Chicago, spending its greatest force in Harlem and the southern section of the city.

On the South Side so severe was the thunder that its rumble seemed almost continuous. Lightning was responsible for many injuries and much damage. Three were killed by lightning and other results of the storm, and seven or eight were injured.

Hopes He Will Be Arrested.

The Rev. R. J. Campbell, in bidding goodby at Northfield, Mass., said that he was delighted with his visit to America, and hoped that he would be arrested in England for his stand against the Education act.

Servian Officer Arrested.

A Servian officer has been arrested at Belgrade on the charge of selling the mobilization plans to a foreign power. It is believed that he has several accomplices. A rigorous investigation is going on.

New York City.—Eton jackets are becoming to almost all women and are much in favor because of that fact. This one includes the fashionable stole

ETON JACKET.

with sleeves that are both novel and satisfactory to the wearer. The original, by May Manton, is made of the Sicilian mohair, stitched with corticelli silk and trimmed with fancy braid, and makes part of a costume, but the jacket is equally well suited to other suiting

TASTEFUL AND BECOMING HOUSE GOWN.

one and three-fourth yards fifty-two inches wide.

Woman's House Gown.

House gowns that are comfortable at the same time that they are tasteful and becoming are always in demand. The one by May Manton, shown in the large engraving, fulfills all the requirements and is suited to a variety of materials. The bertha with stole ends is a feature and a most stylish one, but if a plainer garment is desired it can be omitted, as shown in the small drawing. The model is made of flowered dimity with the yoke and bertha of white, banded with pale green batiste and is unlined, but woolen fabrics are more satisfactory made over the fitted foundation.

The gown consists of the lining, the fronts, back, under-arm gores, yoke, bertha and sleeves. The lining is fitted, but the gown is gathered to the yoke and falls in long, unbroken lines to the floor. The bertha is shaped to form extensions over the shoulders and to give the fashionable stole effect at the front. The sleeves are made to fit snugly at their upper portions, but form full puffs at the wrists.

The quantity of material required for the medium size is eleven yards twenty-seven inches wide, nine and one-half yards thirty-two inches wide, or five and three-fourth yards forty-four inches wide, with three-fourth yards for yoke and bertha.

A Shamrock Green Parasol.

Out of compliment to the Erin and the gallant Sir Thomas Lipton, one sees and hears of shamrock green in ribbons, sashes, cravats and veilings. Green and white make a cool-looking summer toilet, and it requires little persuasion to prejudice good Americans in favor of shamrock color. At any rate a great deal of it is now seen along the Massachusetts and Rhode Island coast.

Shamrock green silk parasols make very acceptable sunshades. The true shamrock parasol has a teakwood or ivory handle with the pretty little emblems of the shamrock carved on the flattened handle. This is much easier to hold than a perfectly smooth, round handle, which is apt to slip through the fingers on occasions

The Yard-and-a-Half Veil.

"Yard and a half" measurement obtains in veiling for automobiling women. A shorter veil may be long enough for other occupations, but it will scarcely do for motor car touring, when the wind created by rapid motion draws the thin tissue away from its moorings, snugly tied at the back of the neck. The "yard-and-a-half" veil permits the chiffon scarf to be drawn around the hat and face, and then be again brought forward under the chin, and firmly knotted or tied in a bow knot. Nothing less than a scarf of such dimensions will answer the purpose.

Dark Shades in Muslins.

Dark shades in thin silk muslins are considered very stylish for developing morning gowns. Many charming flowered effects, blue figured in red, gray with black, are seen among them. To add to the novel effect they are often made up over a colored silk lining.

Materials Most Favored.

Soft silk, crep de chine, sheer voile or delicate muslin are the materials most favored for dinner gowns for formal occasions.

Woman's Coffee Coat.

Tasteful house coats, or breakfast jackets, are among the essentials of a satisfactory wardrobe and are offered in many materials and designs. This pretty and graceful one, designed by May Manton, is made of ring-dotted

COFFEE COAT.

inches wide, with one yard of all-over lace for stole, and four and one-half yards of lace nine inches wide for frills.

The Funny Side of Life.

PARADISE.

How fair the world would be; the days
Would ne'er be dark; the bleak
And barren scenes with joy would blaze,
If every man could have a raise
Of wages every week.
—Chicago Record-Herald.

HER PRESENT OCCUPATION.

Naggsby—"What is Miss Oldgyrle's occupation?"
Waggsby—"It was formerly that of society belle; but she has had a steady job for the past seven years side-stepping birthdays."—Baltimore American.

BETWEEN FRIENDS.

Miss Elderleigh—"I'll let you into a secret if you'll promise not to tell it."
Miss Younger—"All right."
Miss Elderleigh—"I'm engaged."
Miss Younger—"Oh, fudge! Suppose I do tell it; no one will believe it."—Chicago News.

WOMAN'S QUEER WAYS.

"A Chicago woman who is figuring in a divorce case complains that her husband would go for days at a time without speaking to her."
"That's just like a woman. You'll never hear of a man going into court for such a thing as that."

BOSTON COOLNESS.

Gotham—"You don't mean to say Charley is going to marry a Boston girl. Why, don't you know, they are a terribly cold-blooded race?"
Manhattan—"Yes, so I've heard. This one is possessed of a cool half-million."—Boston Transcript.

THOUGHTFUL.

"Don't worry about money, darling, when we are married. We can live on the proverbial 'bread, cheese and kisses.'"
"I know, Archibald; but who is going to furnish the bread and cheese?"—Baltimore Morning Herald.

APPRECIATION.

"Intrinsic value should never figure in considering a gift."
"It never does with me," answered Miss Cayenne. "What touches me is the thought that anybody has been willing to brave a crowd of holiday shoppers for my sake."—Washington Star.

A SAFE STATEMENT.

"A German publisher has issued a pamphlet in which he tells what a gentleman does not do. Among other things he says a gentleman does not use eau de cologne and read greasy volumes from a circulating library."
"No. A gentleman who uses eau de cologne probably doesn't read anything at all in the book line."

IN PURSUIT OF KNOWLEDGE.

"You must be asked a great many foolish questions in the course of the day," said the solemn man to the elevator man.
"Yes, sir; I am."
"Indeed? And what are some of them?"
"Oh, same as you're asking."—Judge

DIFFERENT.

"I cannot understand, sir, why you permit your daughter to sue me for breach of promise. You remember that you were bitterly opposed to our engagement, because I wasn't good enough for her and would disgrace the family?"
"Young man, that was sentiment; this is business."—Tit-Bits.

RESENTED.

Mrs. Nuritch—"Mrs. Betterdaze told me she was going to send her boy to you for a job."
Mr. Nuritch—"Yes, she sent him, and I turned him down proper. You'd oughter seen the high-handed letter she sent with him—said she sent him to me because he "must have work of some kind, even if he had to work for a mere pittance.' The nerve of her callin' me names like that!"—Philadelphia Press.

Economic Effects.

THE problem of good roads is most largely an economic one, yet it is interwoven with others of social and political well being, states the first report of the State Board of Public Roads of Rhode Island.

There is no class of citizenship but what is benefited directly or indirectly. The farmer, that he may come to a ready market to sell and barter; the manufacturer in the town remote from seaboard or railroad, who in turn can haul his coal and raw material at an appreciably lessened cost, and carry his finished product for transportation, will be helped. It will make him independent of small railroad branches which are obliged, by reason of short distances, to charge an excessive freight.

The toiler in the many shops and offices is to be helped by lower rents within his means, because suburban living is made possible by good roads. And all who prefer the open living to the huddled city life will appreciate the benefit. Every citizen is to profit in some way. Country and suburban districts will be more easy of access. Grocery and marketmen will be enabled to send their goods by free delivery, at no enhanced cost to the buyer.

Good roads not only cheapen the cost of living in the matter of rents, but also reduce the price of supplies by reason of a ready market. It has been demonstrated again and again that the betterment of roads means a rise in the value of real estate, and the rise will come, the demand be enhanced, because of facilitated transportation.

It would be interesting to learn how many farms have been abandoned because of poor roads. Land has been given up, homes deserted, the buildings gone to rack and ruin, because the former holders could not make it pay. It was not worth the living. In many instances good roads, passable in all seasons, would have changed the drift.

The most costly, as well as the greatest amount of freight traffic, is over country roads. Outside the mere question of land values is the larger one of the influence of good roads upon commerce, manufacturing, farming. Success in business is not more remote to the question than the wear and tear upon horseflesh, wagons, human strength and endurance.

This whole matter of the economic value of such roads as your commission recommends is beyond question, and to sum up the reasons therefor, we claim: (1) That they make land more accessible, and so give it a wider market; (2) They increase the desirability of living in the rural districts. The great value of electric roads, in many instances, is not only in rapid transportation and quick service, but because with their building almost invariably comes a good road; (3) They lessen materially the cost of production by decreasing the cost of transportation, in wear and tear and time; (4) They bring with them the so-called rural delivery system; (5) They increase the value of property and lessen taxation.

And yet, besides all these, there are other values. The State is solidified in its educational interests. The public school is more fully appreciated, and its percentage of attendance is visibly increased. The people can come together more frequently for social intercourse, and so develop the community. Good roads are civilizing influences. As Charles Sumner once said: "The road and the schoolmaster are the two most important agents in advancing civilization."

Use No Vegetable Matter.

All recognized authorities on the subject say that no vegetable matter should be used in the construction and maintenance of roads or highways. In spite of this, however, many road menders are throwing into the middle of the road the mud from the side ditches, as well as the grass and weeds that have grown up by the side of the road. The leaves and other little that have accumulated at the sides of the road during the winter are placed in the road to rot and make quagmires for the people to travel through during the winter and spring.—Good Roads Magazine.

Rerolling Macadam.

Where a county has a steam road roller it can be used to great advantage in keeping the roads in repair when it is not required for construction work, either by picking up and rerolling macadam roads or by working the earth roads into shape after they have been treated by the road machine.—Good Roads Magazine.

A Clever Woman.

Patty Lyle Collins, a Southern woman, is said to be the best chirographical expert in the world. She is employed by the postoffice department at Washington, where she deciphers some of the addresses of letters that would otherwise not reach their destination. Out of every 400,000 letters received "dead" every year the system of delivery by her has been so perfect that the majority of them reach their destination in an astonishingly short time, and this she does without breaking the seals. In her record year she supplied them on eighty-seven per cent. of the cases, a fact which in itself bespeaks the enormous work this clever woman does day by day. — Chicago Record-Herald.

The Man Who Is Frank.

The man who boasts of his frankness usually has a reputation for brutality.—Baltimore American.

Snail Cure Risky.

The snail cure for a corn may cause Miss Clara Hogue, a farmer's daughter, residing in Blackford County, to lose her foot. She was suffering with a corn, and her father, following an old tradition that a snail could remove the growth, obtained one and applied it. Her foot is now swollen to twice its natural size and it is feared amputation may be necessary. Physicians say there is nothing poisonous about a snail, and are unable to account for the result.—Chicago Inter-Ocean.

More About Radium.

Radium does not get its energy from air, as some scientists seem to suppose, but very probably from changes within the atoms of which it is composed. It is believed that these atoms are the heaviest in the universe. It is possible that, after hundreds of thousands of years, radium may devolve into simpler elements, and so pass right through the series to hydrogen. Scientists do not now believe that the "elements" are really elemental. There is really only one element. But radium is its most remarkable form. Great curiosity is being manifested in the specimens now being publicly exhibited at the London Natural History Museum—three tiny grains in a watch glass, shining as they have done since before man appeared on the earth. The camera exhibit seems to give the most satisfaction. In it some sulphide of zinc has been painted with radium, and in the dark it glows with a soft green light. This part of the exhibit will not require renewal for 30,000 years. Other interesting metals in the exhibit are thorium and helium. Thorium is the main ingredient of the incandescent mantle. Helium is so light that the earth's revolution has whisked nearly all of it off into space. What remains is probably new formed by the breaking down of the atoms of radium—if the word atom can be applied to what has at least 150,000 parts.—Harper's Weekly.

Wore His Hat in Czar's Presence.

In the Metropolitan Museum of Art in New York City is hung a massive painting of the Court of Russia at the time Cassius M. Clay was the representative of this republic thereat. The scene is one of unusual brilliancy and portrays the Czar in his imperial robes, with feathers flying from his headgear, while around him are stationed all foreign Ambassadors attendant upon his court. In the picture, Clay and the Czar are the only two standing with their heads covered. It is said that Clay was requested to remove his hat in deference to being in the presence of the Czar, but this Clay refused to do, saying: "I only take off my hat to those who take off their hats to me." Had the Czar uncovered his head, it is to be presumed, says the Lexington (Ky.) Democrat, that Clay would have followed suit, but so long as the Russian monarch kept his head covered before Clay the latter would not uncover before him.

The Life of a Seed.

The United States Department of Agriculture is making experiments for the purpose of determining the extreme vitality of seeds. Over a hundred species of plants have been packed in a soil consisting of dry clay enclosed in pots, and buried at varying depths underground—eight sets at a depth of six inches, twelve at a depth of twenty, and a third set of twelve at a depth of three and a half feet. At the end of one, two, three, five, seven, ten, fifteen, twenty, twenty-five, thirty, forty and fifty years, a set from each depth will be exhumed and tested. The results of the experiment are likely to be of extraordinary value to agriculturists, both commercially and scientifically. Incidentally, it may be recalled that authentic cases are on record which prove that certain seeds have the power of sprouting after having been buried for long periods of time, reliable tests having shown that twelve out of twenty-one species have the power of germinating after twenty years.—Harper's Weekly.

The Fish Came Back.

Recently a man named Saunders, while fishing in the River Axe, near Weston-super-Mare, hooked a fine jack, which broke away, carrying in its interior three hooks and a portion of the tackle. Some three weeks later Saunders' son, while fishing in the same locality, captured the identical fish, hooks and all.—Tit-Bits.

Codfish Taken in Millions.

Thirteen new theatres to cost $8,000,000 are building in New York City.

What to Do in Case of Illness?

That is the problem which frequently confronts everyone—especially parents with small children. A slight illness treated at once often saves a long period of sickness and expense—sometimes prevents death. The trouble is that so few people can think on the instant what treatment to apply, even if they have the knowledge necessary to recognize the disease and know what simple remedies are best. To meet this want at small expense the Book Publishing House, 134 Leonard street, New York City, is sending postpaid a doctor book on receipt of sixty cents in stamps. The book is illustrated, contains 598 pages, explains symptoms, causes and simple means of overcoming ordinary illnesses. It was written by the eminent J. Hamilton Ayres, A. M., M. D. It is a volume which should be in every household, as no one can tell what moment he may require the knowledge it contains.

One hundred and thirty kinds of wild flowers are found near Nome, Alaska.

Coughing

"I was given up to die with quick consumption. I then began to use Ayer's Cherry Pectoral. I improved at once, and am now in perfect health."—Chas. E. Hartman, Gibbstown, N. Y.

It's too risky, playing with your cough.
The first thing you know it will be down deep in your lungs and the play will be over. Begin early with Ayer's Cherry Pectoral and stop the cough.

Three sizes: 25c., enough for an ordinary cold; 50c., just right for bronchitis, hoarseness, hard colds, etc.; $1, most economical for chronic cases and to keep on hand.
J. C. AYER CO., Lowell, Mass.

INSOMNIA

"I have been using Cascarets for Insomnia, with which I have been afflicted for over twenty years, and I can say that Cascarets have given me more relief than any other remedy I have ever tried. I shall certainly recommend them to my friends as being all they are represented."
Thos. Gillard Elgin, Ill.

ANNUAL SALE, TEN MILLION BOXES

RIPANS TABULES
Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

North Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Publisher.

TERMS OF SUBSCRIPTION:

If paid in advance $1 per year; if not paid in advance $1.25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands

Long distance and local telephone : : : 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, AUGUST 8, 1903.

Subscribers of the Review who change their address for the summer, or for a shorter period, can have the Review sent to their vacation address without additional cost, by notifying the office to that effect. Addresses may be changed as often as desired.

REGARDING THE REVIEW.

It is with pardonable pride that we call attention to the advertising columns of the REVIEW, which are fast being filled with advertisements of the leading business and professional men of the city and borough.

Since the REVIEW was founded over three years ago, no effort was made to solicit advertisements, until a few weeks ago. Our idea was to firmly establish the newspaper and prove that it was no temporary arrangement, and thus make it a paying investment, before soliciting any patronage. That time has arrived and we are now ready to receive advertisements and are receiving them every day.

With further reference to the REVIEW we wish to say that it has been our endeavor to publish a clean, honest newspaper which can be read with profit by every member of the family. A newspaper with an opinion, which it is not afraid to express—a fearless, outspoken newspaper, yet having due regard for the feelings of others.

The REVIEW is controlled by one man only and that man is its editor and proprietor.

On National and State questions we are Republican, but we reserve the privilege of supporting whom we please in municipal affairs, believing as we do, that questions arising in State and National elections have no place whatever in municipal contests, which ought to be neutral ground where all party lines are effaced, with the sole object of electing the best citizens.

THOSE AMENDMENTS.

The discussions of the proposed amendments to the constitution which will be voted on next month are being waged quite earnestly now. Among the opinions of those whom we deem qualified to speak, and whose opinion we value accordingly, is that of R. V. Lindabury, Esq., a gentleman well known in the borough. Mr. Lindabury says:

"I am heartily in favor of the passage of the constitutional amendments. Our present judiciary system can hardly be up to date. It certainly is contrary to modern theories and modern practice for the same judges to sit in both the original and appellate courts.

"I am sure that an independent court of errors and appeals will be better in practice, as it certainly is in theory, than the present system. Besides, it is impossible for the work of the court of errors to be any longer done properly under the present plan.

"No judges, however industrious or wise, could properly consider the number of cases that are now submitted to the court of errors, if they have the supreme court and circuit work to do, which is at present imposed upon our court of errors judges.

"I can think of no better arrangement for the present needs of the state than an appellate court of five judges having no other work to do."

THE POSTAL FRAUDS.

The critics of the administration who have insinuated that there has been a "let-up" in the prosecution of the crooked employees of the postal department, can now see that the officials have been acting with great energy during the past two weeks, although they have been doing no talking for publication. Last week the grand jury returned seven new indictments, all based upon evidence secured by the law officers of the government. Additional indictments are also presented against Machen, formerly superintendent of free delivery. The postal officials seem confident that the frauds in the department were confined to the division of which Machen was chief and that practically all his rascality has now been brought to light. They are, however, to continue their investigations and bring all guilty men to punishment.

THE FREEDOM OF THE BALLOT.

OUR esteemed contemporary, the Bayonne *Times* in a recent editorial give the following excellent advice:

"A voter ought to be able to cast his vote as quietly as he mails his letter, and be sure that his preference is registered. The Government is as competent to register his choice as it is to register his letter in the United States Post Office. It will go very far toward making better citizens and securing better officers for the administration of law when we have eliminated, as far as possible, the element of bribery which now so generally accompanies our elections. Readjust our laws so as to be able to deal summarily with the murderers, lynchers, destructive labor mobs, and oppressive trusts. Readjust these laws so that anywhere under the Government, where county and State machinery of the law fail, the Federal Government may dispense justice without delay and with efficiency. Exalt to office the best men—men who are lovers of justice and fair play, who impartially administer the affairs of their charge without a single thought of the man's condition in life; to whom the rich and the poor, the high and low, may each and all come and find impartial justice. Such men will not be just merely; they will be righteous in the divine sense of that word."

We are pleased to note the general interest which the newspapers of the country are taking in the effort made for honest elections. Perseverance on their part will sooner or later bring results, for when the newspapers of this land unite and set out to right a wrong, they always succeed.

THE CURE FOR GRAFTING.

The following excellent editorial from the Newark *Evening News* should be read and pondered over by all good citizens:

"It has been suggested that the cure for the grafting system that seems to have permeated Middlesex County and fastened itself upon Passaic county lies in the ballots of the people. This is very true. In a republican form of government all reforms are in the hands of the voters who can do anything they will. The difficulty is to get them aroused to the point of having a will and executing it. The grafters in every county have not only accomplices, but political and personal friends. The influences in favor of the grafters, not as grafters, but as individual citizens, may reach far beyond the ranks of the rascals; they may be exerted even by honorable men who despise the sin but pity the sinner. It is difficult to sting the indifference and prod the forbearance of the people into aggressive, reforming activity. They seem to require absolute proof of the irregular, illegal and criminal acts of the officials in power before they will act. This is why they go to the courts and demand impartial and thorough investigation. If the courts in Middlesex and in Passaic find that officials have been guilty of grafting and send a few of them to State prison the people can be relied upon to effect the other reforms necessary, and for a time, at least, to elect honest officials."

THE STOCK FLURRY.

The shrinkage of security values in Wall street, with the attending liquidation and the final crop of failures, did not differ in essentials from other movements of the same kind. What is in evidence is the apparent culmination of a long period of expansion and speculative activity, during which the floating capital of the country has been largely exchanged for fixed capital in the form of stock and bond issues. As has always been the case after such movements, a point is reached where the supply of capital for such purposes is exhausted and the money market puts a check to the absorption of securities, compels liquidation, and, as a rule, brings about failures in financial circles. These latter incidents have now made their appearance, and the street, it should be noted, seems to be under the impression that they mark the beginning of the end in relation to the decline and liquidation. Nevertheless, conservative authorities do not expect any immediate revival of bullish temper and activity, and the impression, indeed, is that the street must prepare itself for a prolonged period of dullness, during which the absorption of securities will proceed with a renewed accumulation of capital on a scale which will restore normal conditions in the stock market.

A NEW YORK policeman found a crowd of boys one hot day, not long ago, teasing a dog which they had driven on the steps of a vacant house. The dog was excited and to all appearances was mad. The policeman, who knew something about dogs, drove the boys away and took the dog to a near-by back yard and and gave it a cold bath. In a few minutes the dog was in its right mind and perfectly calm, and was sent to the society which cares for stray animals. We wish there were more policemen of this kind. If there were more more policemen of this kind. If there were, the number of "mad" dogs would soon become notably less.

IT IS quite probable that the new Freeholder act will be voted on at the Fall election. This act provides for three Freeholders instead of the present large number. Petitions are being prepared and will soon be circulated for the purpose of obtaining the necessary signatures in order to vote on it.

CAME FROM ALL STATES.

An Irish Soldier's Ready Wit When in Danger.

At the dinner of the Friendly Sons of St. Patrick, last Tuesday, Joseph L. Barbour, formerly Speaker of the Connecticut House of Representatives, told the following story to illustrate the "cosmopolitan spirit in which the Irishman becomes American:"

"There was an Irishman connected with the sutler's department in the Civil War," he said, "who fell asleep on the battlefield after Bull Run. A party of Confederate scouts saw him, and as he had no uniform, their leader prodded him awake, and asked, 'Who are you? Where do you belong? What's your name?'

"'Begobs,' says Pat, rubbing his eyes, 'them's too many questions, und be yure leave, I'll be afther askin' yez the same.'

"'We're McClellan's men, just from Washington.'

"'I knew yez ware, gintlemen, and I'm thot same.'

"'Oho—that's where we've caught you. Put him under arrest, men! We belong to Beauregard's army.'

"'Thin ye lied to me, an' suspectin' that same, I told ye the same thing yez told me' retorted the Irishman promptly. Now, give me the truth, an' I'll do the same by yez. What State do ye come from.'

"'From South Carolina.'

"'So do I, an' from all the other States, begobs, an' that's where I'm thinkin' I've got the best of yez. Yez don't think I'd be sich a fule as to come all the way from Ireland to belong to wan State, do yez?'"

An Absent-Minded Lightweight.

She—So poor Reggy sprained his ankle. How on earth did he do it?

He—He fell out of the window. He was flipping a cigarette butt out and forgot to let go.

The Greatest of These.

"Papa, what is Charity?"

"Charity, my son, is giving away what you don't want."

"What is Scientific Charity?"

"Scientific Charity is giving away what you don't want to someone who does not want it."

"What is Organized Charity?"

"Organized Charity, my son, is giving away something that you don't want to some Society which will give it away to some one who does not want it."

"Then what is Love, Papa?"

"Love? Oh, Love is only giving something that you want to some one who wants it—but that will pauperize the poor."—Life.

Getting Along.

She used to be a belle herself
With followers all her own,
But now she has gone 'way back to Sit
And is only a chaperon.

Some Facts About Ourselves.

By George Harvey.

SOME interesting experimental conclusions on the subject of habits have been published by Professor Arthur Allin, who occupies the Chair of Psychology and Education at the University of Colorado. Professor Allin illustrates, by familiar examples, certain of the laws underlying many of the most common of our acts and habits. For instance, it is a fact that a single weak stimulus, which is itself incapable of causing a reflex act, may produce it if it is repeated often enough.

"The sound of a door-bell may not call up much of a motor response, but repeated often may cause a very considerable response. A slight tickling when one is asleep or awake may, if continued, produce convulsive responses. To strike a horse repeatedly on the same spot is to invite him to kick. Continued dropping of water from a faucet during the night, or the intermittent sounds of a mouse gnawing, produce extreme irritability. . . . The psychology of advertising shows many evidences of this law. Temptation in all its forms usually works by the summation of stimuli. The young man of slight moral resistance, on his way home in the evening, passes through one, it may be two, streets of saloons; in the third street his inhibitory power is exhausted and he passes helplessly through the doors."

The training of one portion of the body trains at the same time the symmetrical part and also neighboring parts, says Professor Allin. "Experiments show, for example, that practice of the finger tip of the left hand increases the fineness of the touch of the finger tip of the right hand, but does not increase that of the left forearm. The ability to write with the left hand is obtained by learning with the right hand. Practice in writing the figure nine backwards with the left hand frequently causes one involuntarily to write the nine backward when using the right."

In learning nonsense-syllables, i. e., syllables consisting of a vowel between two consonants, an adult, writes Professor Allin, is able to memorize much larger rows of syllables than can children. "To give a relative estimate, those at the age of eighteen to twenty reproduce approximately one and a half times as many syllables as those from eight to ten years of age. After completed bodily development the figures remain practically constant."—Harper's Weekly.

An Unmuzzled Press the True Defense of Liberty.

By Judge Gray.

A FREE and untrammeled press is a potent influence for good. It is a reflex of public opinion, which, on the other hand, it helps to mold and direct. We all live to-day under its calcium light, and the growing sense of responsibility on the part of those who conduct it is new ground for hopefulness as to the future. We sometimes resent its invasion of our privacy, its mistakes and false judgments, and in our anger at the original offender we are apt to forget the beneficence of the institution and think we pay a high price, a very high price, for the untrammeled freedom of the press. But do not let us forget that we have received a hundredfold return for the price we have paid. Through it mainly does public opinion exert its salutary influence, and through it largely are exploited the true defenses of the individualism and personal liberty on which I have dwelt so much.

Public opinion . . . comes from the crucible of discussion and contention among a free people and from an awakened public conscience. Its most powerful instrument and vehicle is, as I have said, a free and untrammeled press. It is the sober second thought of virtuous and intelligent men and women, and the common law of our country is at its best but the authoritative expression of its behests.

Overmastering Passion.

The Acquisition of Unavailing Wealth the Dominant Passion of Our Age.

By Eliot Gregory.

THE acquisition of property for which the possessor has little or no use is fast becoming the dominant passion of our age. When a nation indulges in the weakness it is, I believe, called "imperialism," and hides behind a screen of patriotism. Individuals and corporations excuse their greed in much the same way. All classes and conditions feel the ambient suggestion. Even our women are bitten by the madness. When we read of old Croesus using up his torpid liver in midnight conferences, does any one suppose it is because he feels the necessity of more money? Preposterous! He can not, as it is, reckon up his possessions without the aid of a bookkeeper, and as far as personal wants go the income of his income would largely suffice. Millions are but the cotillion favors of such men. It is the vanity of pushing through a "deal" or astonishing the world by the daring of a new combine that holds them with their noses to the grindstone.

One would simply sigh at such wasting of life's heyday and pass the matter by if it were not that, in order to succeed, Dives will cajole the unworthy, consort with men he despises, and receive at his table fellow promoters of more than doubtful records, provided they can aid the scheme on which he has set his heart. Just where honorable industry ends and avaricious piling up of treasure begins no one can take it upon himself to say. The spirit, however, that impels a young man to sacrifice all the nobler aims of life in order to turn a liberal competence into wealth too great to be spent (and the giving away of which, unless carefully regulated, is a doubtful good), is certainly to be deplored. It is ambition, we are told—a commendable desire to be honored and envied, to make one's mark in the world and leave a respected name as an inheritance to one's children—that impels many of our men to years of needless toil.

If the people who place such a value on prestige and honor, and moil so furiously in the gold mill to achieve this end, would only suspend their labors long enough to look about them they would see an objection to the accumulation of wealth for wealth's sake that outbalances the minor reasons as mind outweighs matter. The really great rewards, the splendid and lasting prizes worthy to crown a life of effort and abnegation, have never yet been accorded in any land or by any race to mere wealth, not even here on this money loving continent and in our material age. With certain exceptions it is the Motleys, the Cheates and the Andrew D. Whites who are selected to represent us at imperial courts and international congresses. It is the features of their Shermans and Lincolns that an admiring nation casts in everlasting bronze, not those of pool presidents or syndicate magnates, pile they never so high. When discouraged by the sordid bent of men's minds and the disproportionate place accorded to the dollar on this side of the water, it is a satisfaction to recall this fact, for it proves that, in spite of appearances, the heart of the great mass of Americans is in the right place.

When Wealth is Too Costly.

By President J. M. Swain, of Swarthmore.

WEALTH is all right if it comes naturally and under economic laws, but if it comes through the sacrifice of home and the finer things of life it is all wrong. I can think of a man who has accumulated his millions, but with his wealth there has come a curse to his family. He has a degenerate son and a wife who has lost her reason. If wealth is the cause and not merely the accompaniment of the misery it comes at too dear a price.

I was present at one of the installations of Mr. Reed as Speaker of the House of Representatives. As he walked up the aisle and took his place at the Speaker's desk he was greeted with loud and prolonged applause, as his achievements deserved, for he had honorably won a place of great distinction. Among other things he said: "The honor lasts but for a moment, the anxiety and responsibility for many weary days and nights." It is ever thus with place and power. If wealth, fame, position, power come to you in the fulfillment of your position in life, well and good, but they are not necessary for a happy life and usually do not bring it. It is the opportunities open to all normally constituted men and women which offer the greatest opportunities for happiness.

Darwin was right when he placed domestic affection as a necessary part of happiness. The elevation of the family is an important, if not the most important, end of civilization. He who allows the pursuit of wealth, the struggle for place, the thirst for glory or the feverish haste of modern life to encroach upon the joys of domestic life crowds out the most sacred ties which bring joy to life.

SCENE AFTER A SUMMER SHOWER.

BY ANDREWS NORTON.

The rain is o'er—how dense and bright
Yon pearly clouds reposing lie!
Cloud above cloud, a glorious sight,
Contrasting with the dark blue sky!

In grateful silence earth receives
The general blessing; fresh and fair
Each flower expands its little leaves,
As glad the common joy to share.

The softened sunbeams pour around
A fairy light, uncertain, pale;
The wind flows cool; the scented ground
Is breathing odors on the gale.

'Mid yon rich clouds' voluptuous pile,
Methinks some spirit of the air
Might rest to gaze below awhile
Then turn to bathe and revel there.

The sun breaks forth—from off the scene
Its floating veil of mist is flung;
And all the wilderness of green
With trembling drops of light is hung.

Now gaze on nature—yet the same,
Glowing with life, by breezes fanned,
Luxuriant, lovely, as she came,
Fresh in her youth, from God's own hand!

Hear the rich music of that voice,
Which sounds from all below, above:
She calls her children to rejoice,
And round them throws her arms of love.

Drink in her influence—low-born care
And all the train of mean desire
Refuse to breathe this holy air,
And in the living light expire.

HOW THE DREAM ENDED.

A WIDOWER'S ROMANCE.

AFTER the wedding there was a supper at a boulevard restaurant and, after the supper, a dance. Early in the evening Marius Lournier approached the radiant young bride and extended his hand.

"Good-by, my child," he said. "Are you going so soon, father? Please stay a little longer." Cecile coaxed, looking at him affectionately.

"No, you cannot persuade me. I feel—rather tired."

And he added with a dismal smile:

"I am not so young as I used to be."

He made his adieux to the bridal pair and walked slowly home to his cottage at Montrogne.

Marius Lournier was fifty years old, and possessed of a modest fortune and a philosophical disposition. He had long been a widower, and his experience of matrimony had not been pleasant enough to tempt him to repeat it.

One drizzling November night, as he entered his garden, his attention was attracted by the vaguely outlined figure of a woman who at that instant sank rather than sat down upon the public bench hard by. He peered through the darkness at the shadowy form and, seeing that it did not move, mechanically reopened the gate and walked toward it.

He found a girl of perhaps twenty, poorly clad, but with an appearance of distinction. She seemed utterly exhausted and her face was bathed in tears. He questioned her gently, but her replies were vague and unsatisfactory.

"But you cannot stay here in the rain," said Marius.

In spite of her resistance—which was but feeble, poor thing!—Marius raised her from the bench and drew her toward the house. When at last she was seated before a cheery fire she consented to tell her sad story.

Her name was Cecile Martel, and she was the daughter of an army captain who had died in the service. With her mother she had come to Paris in the hope of obtaining a tobacco shop license which had been promised to the widow long ago.

Their last articles of furniture, their few trinkets, had been sacrificed to obtain funds for the journey.

Soon after their arrival the mother had died very suddenly, leaving Cecile alone and almost penniless in the great city in which she did not know a human soul.

By dint of great economy the girl had contrived to live for a few weeks on the little money remaining in her purse; but that morning her landlady had informed her with great politeness that she must either pay her arrears of rent or go elsewhere.

She had wandered through the streets all day, without eating or resting, and at night had turned her steps instinctively toward the cemetery at Montrogue where her mother lay at rest.

This pitiful tale, told in almost inaudible tones, and interrupted by fits of shivering and weeping, affected Marius very deeply.

He hastily got together the elements of a rudimentary banquet, but Cecile, in spite of her desire to show her appreciation of this unhoped for succor, could not eat a mouthful. Though the room was warm, she shivered more and more, until at last, overcome by fatigue, she closed her eyes and fell asleep.

"This will never do," thought Marius. "She will get pneumonia or something in her damp clothes."

"If only there were a woman in the house! Then we could put the poor child to bed."

He wrapped a big cloak about her and fell to studying her face. It was not strikingly pretty, but it was a pleasing face and a good face. Its greatest beauty was now veiled—the large, velvety black eyes, tender and passionate. Suddenly she moaned, and then Marius saw that her face was scarlet and her breathing labored.

"Ah! Just what I feared!" he exclaimed, and ran to fetch a physician. The doctor pronounced the case very serious, and sent a nurse to take care of the girl during the night. In the morning she must be sent to the hospital.

"The hospital!" thought Marius, who had a horror of hospitals.

"Hasn't the poor child suffered enough already?"

He lay awake all night, thinking, and when the ambulance came in the morning he curtly sent it away.

Months elapsed before Cecile was pronounced out of danger. Marius Lournier found himself intensely interested in the battle of life and death, and was overjoyed when the physician informed him that the crisis was passed.

Soon youth and health resumed their sway. Cecile wrought a wonderful transformation in the lonely cottage. Thoroughly feminine in taste, she loved everything that is pretty and delicate, and Marius, enchanted by the simple elegance which had succeeded to the former disorder of his home, smiled gratefully upon the fairy who had brought about the change.

He took his meals at home, and long conversations with his Chatelaine replaced the nightly sessions at the card table. He was so happy, basking in this mild and wholesome physical and moral atmosphere, that he took no account of the flight of time. After some months of this idyllic existence, she suddenly became very serious and sad. Marius, greatly surprised, questioned her, and finally she said:

"I think that I ought not to live any longer at your——"

But Marius frowned so fiercely that she checked herself.

"Oh, do not doubt my affection," she exclaimed. "I am not ungrateful, believe me. But I must earn my own living. My self-respect demands that."

"Well, well!" said Marius, impatiently. "We will speak of that to-morrow."

But that very day a friendly neighbor, an old lady, said to him:

"My dear M. Lournier, I feel it my duty to tell you that people are beginning to talk. I know that you are the soul of honor and that Cecile is an angel, but evil tongues will wag. Why don't you stop them?"

"How can I?"

"By marrying Cecile."

"What! Do you imagine that she——"

"I imagine nothing. I know she is in love with you. Trust a woman's intuition."

And the old lady added with a smile:

"What if you are fifty, so long as you don't look it?"

Marry Cecile? He? What an absurd idea!

But the more he thought about it the less absurd it appeared. And, looking squarely into his heart, he saw that he loved the girl passionately. The little fairy had given him back his youth and awakened the heart that he had thought dead forever.

Ah! if the old lady's intuition were correct!

Then he began to pay great attention to his dress and manners. He even gave up his pipe. Cecile noticed his rejuvenation and complimented him upon it frankly, and then he felt inspired to tell his love and ask her to be his wife.

She listened in smiling silence and, in a burst of grateful affection, put her hand in that of her benefactor and said: "Yes."

The wedding was arranged to take place in the autumn.

Meanwhile Marius lived at a hotel, but came every day to his old house to see his young sweetheart, who always welcomed him with a smile of tender affection.

The summer wore on, and there came a time when the smile gave place to grief and tears as soon as the unconscious lover's back was turned.

Then, one evening, he came and heard Cecile's voice and another's coming from the unlighted parlor. He recognized the other voice as that of a young architect who was spending his vacation with his mother, the lady who had suggested the marriage of Marius and Cecile.

The situation at once became horribly clear to Marius. He listened.

"You are unkind," Cecile was saying. "I cannot be your wife; you know that."

"I only know that I hate the old fool," the young man replied.

"Hush! Robert! You shall not insult him."

"I hate him, I say! He has ruined my life."

"He loves me, Robert, and I owe him everything. I have given him my promise—and I will keep it."

"But it is enough to drive me mad! I will tell him to his face that I love you—and that you love me!"

"If you love me as you say you do, Robert, you will let me do my simple duty."

Marius had heard enough. He went back to his hotel, staggering like a drunken man.

He was an old fool, then?

An old fool?

He asked his mirror and it told him the truth.

How had he come to forget his thin gray hair and the crows' feet about his eyes and to fancy that Cecile could really love him?

Yes! He was an old fool.

To a night of agony succeeded a heroic resolve.

He sought Cecile and said:

"My child, I have come to the conclusion that an old fellow like me, who has been single so long, had better remain single. I give you back your promise."

Cecile's heart leaped for joy, but she replied:

"I do not understand you, dear Marius."

"Hush!" said he. "Call me 'Father,' won't you, my dear?"

She comprehended the admirable, self-abnegation expressed in those words, and cried:

"Oh, how good you are to me always—Father!"

"And now," said Marius, with his old-time, good-natured smile, "suppose we ask our neighbors to dinner."—New York News.

SPECIAL "GOUT" SHOE.

They Open Clear to the Tip of the Toe and Can Be Loosely Laced.

Shiny leather shoes lead in popularity for summer footgear. Patent kid, patent and enamelled calf are worn in preference to all else, and will continue to be worn through the fall. Mannish effects have practically disappeared in favor of more feminine and lighter footwear.

An enormous variety of strap slippers in French patent calf, suede, castor and vici are being worn, every woman seeming to have an individual style on her foot. Those strap slippers have from one to twelve straps. Beading is seen on many slippers in jet, steel and colors. For boudoir and party use heels are getting higher and toes narrower, while aluminum heels in gold, silver and natural finish are seen on high priced dress slippers.

A good many women are buying tan shoes for summer morning and outing wear. At present tan shoes are rather dear. After years of immense popularity they went out altogether, but now are made up in expensive leather for exclusive customers.

As the summer progresses more and more shiny shoes with dull tops will be seen. It is predicted that this is going to be a dominant style in footwear during the fall. White canvas oxfords will be seen on many a well-shod foot.

A novelty in footwear is a "gout" shoe for men. These shoes open clear to the tip of the toe and open wide, so that the foot can be laid on the soft inner sole and laced as loosely as desired. There are no seams, no lining in the shoe, nothing to bind or rub. The soles are light and the leather is soft and flexible.

Plant That Keeps Off Mosquitoes.

There would appear to be some hope for those who suffer from flies, gnats, and wasps in summer time. Captain H. D. Larrymore, who has recently presented a growing specimen of the "mosquito plant" to Kew Gardens, writes thus in the [illegible] it:

"I can personally [illegible] traordinary effect wi[illegible] on mosquitoes by the pleasant odor of its fresh leaves, and by placing two or three growing pots of the plant in each room and along the windward veranda, a house can be kept practically free of these insects.

"I am really anxious to know whether the aforesaid "mosquito plant" will flourish out of doors and in this country. If so, its proprietors will probably make a fortune. The "mosquito plant" would be invaluable; but I am terribly afraid we shall presently hear that it will not flourish in the open air in this country.—London Graphic.

Singularly Preserved Coins.

Some fifteen years ago a Virginia gentleman purchased in Alexandria, Egypt, from a native who had found it in the wall of a building broken during a conflagration, what appeared to be a mass of corroded copper weighing twenty pounds. It was kept as a heart ornament, until recently it was found to consist of about 500 Roman coins, struck in the days of the early Caesars. Professor Dunnington, of the University of Virginia, finds that the coins contain one part of silver to four of copper, but when dipped in acid a part of the copper disappears, leaving a silvery surface, which "wears" as a white metal. He believes the coins passed for silver. The mass had become encrusted with a double skin of malachite and of red oxide of copper and remarkable changes had gone on within, although the lettering and the dates remained legible.

Have a Peanut?

An original young woman of Lamar has invented a new kind of social diversion. It is the "progressive peanut party." Four guests are seated about each table, and on the table is placed a crock full of peanuts. Each guest is provided with a hatpin, and when the word is given all begin jabbing for peanuts. The quartet that empties its crock first wins the game, and then the sets of players change. It is needless to say that the peanut party is strictly a "hen" function. A man couldn't jab a crockful of peanuts with a hatpin in a week, but the young women of Lamar played thirty games in a single afternoon.—Kansas City Journal.

Remarkable Natural Bridge.

Recently a man prospecting in the mining regions of Arizona found a remarkable natural bridge. It spans a deep canyon forty-five feet in width. The bridge is made by a great petrified tree that lies across the gorge. Scientific men say that many ages since this tree was prostrated by some terrific storm and fell across the canyon. By the effects of the water and of time it has passed through many stages of mineralization, and is now a wonderful tree of solid agate. And there it lies, making an agate bridge over which men may pass from side to side.

SCIENCE & MECHANICS

Several patents for producing solid alcohol have been granted in Germany.

Seventy-six per cent. of all Bremen steamers and eighty per cent. of the Hamburg fleet are built of steel.

The catching of snakes and the collecting of their venom, which fetches $1 per grain, is a new industry in Australia.

An electric machine which is intended to produce rain in times of drought is being constructed in Paris by a municipal engineer.

The South African cycle trade is practically in the hands of British manufacturers, even American makes being imported in very small quantities.

Telegraph poles the lower end of which has been soaked in creosote last more than thirty years; in Ireland there are some erected in 1858 and still in good condition.

There is a large demand for pocket knives all over South Africa. The Kaffir, however, seldom pays more than twenty-five cents for a knife, and consequently cheap knives would find the best sale.

The opinion of Sir John Herschel that the southern portion of the milky way, near the southern cross, is nearer to us than the northern, is quoted against the assertion of Professor Wallace that we are in the centre of the universe.

Electricity is a great economizer of space. At Essen two electric machines are now being built, which will require about [illegible] horsepower. The whole apparatus occupies a space less than nine feet in height and width and about sixty feet in length.

Capers are the flower buds of a bush that grows in France, Spain and Algeria. The buds are picked by women and are placed in barrels of vinegar for preservation. An expert can gather forty-four pounds a day. It is believed that the bush would do well in California.

All new schools in Switzerland now have a portion of the ground floor appropriated for purposes of baths. Each class bathes about once a fortnight, summer and winter. Soap is used, and a warm bath is followed by a cooler one. [illegible]

Nerves are the disease of the present day among human beings, but I did not know until recently that hysteria is also a malady of dogs. A friend of mine owned a dog which suddenly one day was seized with an attack of nerves. Since then it has been very ill, wandering incessantly round and round the room, refusing food, but still recognizing its owner. Another little dog suffered from hysteria in consequence of fright from railway traveling, and it really seems as though civilization, in rendering dogs more delicate and more susceptible, had done them a distinct physical injury.—London Graphic.

New Safety Lamp.

At a recent meeting of the Academy of Sciences of Vienna, Professor Molisch, of Prague, communicated a paper upon phosphorescent bacteria. He has been able to photograph the colonies of a phosphorescent micrococcus by means of its own light. By inoculating large glass flasks of half-litre capacity containing a suitable culture medium with the organisms, a "bacterial lamp" is obtained with which it is quite possible for an observer at a distance of one or two metres to read a thermometer or to see the time of a watch. On a dark night the "bacterial lamp" is visible at a distance of more than sixty paces.

Running Extraordinary.

If we would see the most remarkable racing in the world we must go to the cave-dwellers of Mexico. Endurance and distance covered are more esteemed among these people than speed in running. They will run a distance of 170 miles at a stretch, going at a slow trot, running steadily and constantly. Frequently a letter has been carried from Guazapores to Chihuahua, a distance of over 600 miles, in five days, the carrier living all the time on a simple diet of pinole, a finely ground corn mixed with water into a thin kind of gruel.

Clark's Fine Residence.

United States Senator William A. Clark, of Montana, intends to build the finest house in Washington. To make sure that it will surpass all other mansions and will possess the best features of others, he will not break ground on site of the old Stewart castle, facing Dupont circle, until the Massachusetts avenue residence of Thomas F. Walsh, a Colorado millionaire, is completed. Then if there are any features of Mr. Walsh's house that Senator Clark desires to incorporate in his own dwelling he can easily alter his plans.

Jackal Worse Than Tiger.

It is not generally known that the jackal is a greater destroyer of humanity in India than the tiger. Statistics published by the Government of India show that while 928 persons were killed by tigers more than 1000 children were carried away by jackals.

FACTS ABOUT SIR THOMAS LIPTON AND HIS ATTEMPTS TO "LIFT THE CUP."

WE present herewith a recent portrait of Sir Thomas Lipton, merchant prince and prince of good fellows, hard fighter and most desirable of antagonists.

Sir Thomas has already taken a great deal from this country in the shape of experience, like most of his countrymen who have come here with their [illegible] a stowaway to one of the richest merchants on earth, from a worker in the rice swamps of South Carolina to the possessor of millions—from such beginnings did Sir Thomas Johnstone Lipton rise in a few years by his industry; and while he has made a huge fortune for himself, he vastly benefited the poor of London and other great cities by supplying good provisions at cheap prices.

We hear and read a great deal about obstacles in the way of young men in England, when those young men have to start from the ground at the foot of the ladder. Sir Thomas is a proof that much more depends on the man than on the circumstances. He says that he used to work twenty-five hours out of the twenty-four. When he floated his business as a joint stock company he was able to take a little rest. He cut his working hours to eighteen. He took up yachting with the same intensity that he ran his business; and that is why he has produced so much impression on the American sport-loving public. He simply doesn't know when he is beaten.

Lipton is of Scotch-Irish blood. He is tall, straight, athletic, always well dressed, well groomed, always unassuming. His father was a wage-worker. When the son was fifteen years old he sailed for America to seek his fortune. The capital with which he started business was $500, lent to him by his father. He came into prominence by a deed of charity. The Princess of Wales, to celebrate Queen Victoria's jubilee, started a fund to give dinners to the outcast poor of London. The fund languished until an unknown donor gave it £25,000 ($125,000). Rumor had it for a while that William Waldorf Astor was he who recognized how hard it is for a hungry man to rejoice, even at his Queen's jubilee. It turned out that Lipton gave the money. The Princess of Wales sent him a magnificent diamond scarfpin Christmas, and shortly afterward he was knighted.

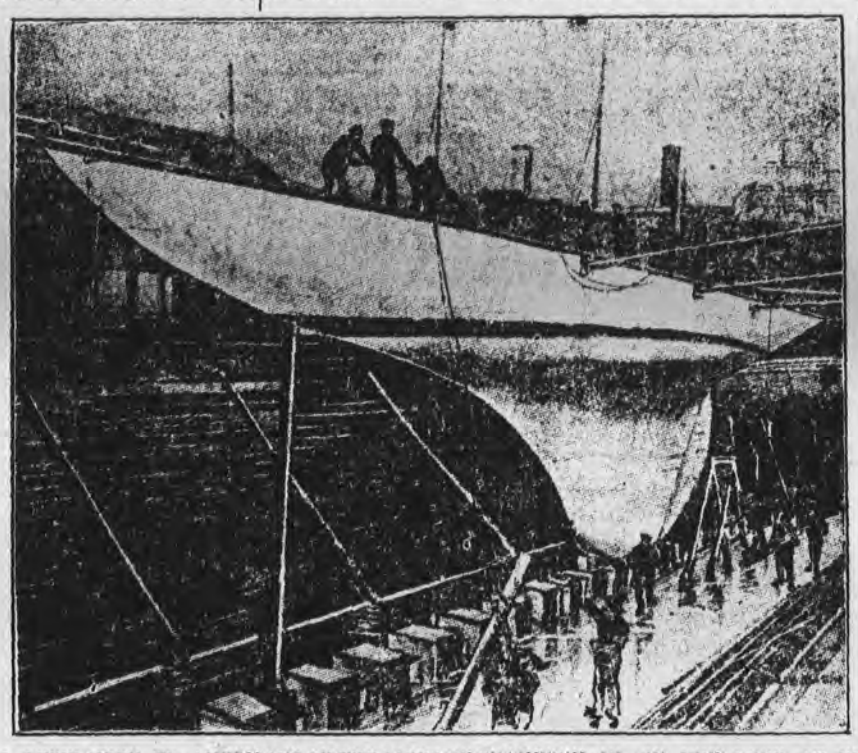
As a result of his first attempt to lift the cup Sir Thomas made such a favorable impression upon those who beat him that, to console him and at the same time to express their admiration for his unlike qualities, [illegible] presented cup, which, it is his endeavor to solace himself for having failed to lift the other.

A RECENT PORTRAIT OF SIR THOMAS LIPTON.

A few figures concerning the cost of the pastime in which Sir Thomas is indulging so freely should be of interest:

He estimated the expense of his effort to get the Cup in 1899 at $800,000. That, however, included $400,000 which he paid to Count Florio of Italy for the fine yacht which the count called the Aegusa, and which is now known as the Erin. This would leave his actual racing expenses in 1899 at $400,000. It is probable that the cost of the second races to him was a little over that figure, but still within $500,000. In other words, including the sum of $500,000 or thereabouts for the purchase and refitting of the Erin, the total cost to the challenger in the last two series of races was somewhere in the neighborhood of $1,300,000. But the cost of the Erin is not, of course, a legitimate factor in the estimate of the actual racing expenses. Probably these last for both series were about $850,000.

Leaving the yacht proper and coming to the collateral expenses, there is as the largest item the cost of running the steam yacht Erin, for, say, the two months she actually is in service in connection with the races. This was estimated by a man familiar with the subject at $30,000 a month—$60,000 in all.—New York Commercial Advertiser



FULL REVELATION TO AMERICANS OF THE LINES OF SHAMROCK III., IN DRY DOCK AT ERIE BASIN JUST AFTER THE WATER WAS PUMPED OUT—CREW ERECTING SCAFFOLDING.

A PORTABLE HOUSE

Can Be Put Together in a Half Hour For Automobile Accommodation.

F. W. Barker has devised a portable house to meet the need of suitable storage-room for automobiles, says the Springfield Republican. The house is made in sections, and can be put up or taken down in a short time, as there is not a nail used in the whole process. The house is made of pine, and the roof is covered with chemically-prepared duck or pressed steel in imitation of shingles. Both of these roofs are waterproof and the latter is absolutely fireproof. The house is made in sections within the factory and these sections are put together wherever the owner wishes. The device is used not only for automobile houses, but for houses for boats, launches, bicycles, summer cottages, children's playhouses and other purposes. Its primary use, however, is for automobiles.

PORTABLE AUTOMOBILE HOUSE.

Such a house can be bought from $75 up, and when it is considered that the cost of storing an automobile for a season at the seashore is about $40 and in the city about $25, so far as expense is concerned, the new idea is an economizer. The fact that the house can be moved from place to place makes it convenient for those who change their location frequently, and as nothing but a few screws and bolts are used in its erection, it is not a permanent fixture on the land where it is put up. Means are provided for ventilation, and the solid earth furnishes the floor of the house. Used as a summer cottage, it can be taken to the seashore one summer and the next to the mountains. It takes about a day to turn out a house, and about half an hour to put one up.

A Spry Farmer.

Uncle Ned Giggory of Fort Fairfield, Me., is the oldest man in his part of the State. He celebrated his ninety-ninth birthday on the 24th of May, and the celebration took the form of planting an acre of potatoes, which acre he cleared of brush last winter.

In Writing "Ads."

"It is a good idea," remarks a man of experience, "to assume that people know nothing about your business and the goods you sell, and that it is your duty and privilege to enlighten them on these points."

A Motor Toque.

The motor toque here sketched is a very clever invention of English design. It is a soft mounted tricorne shape, extremely becoming to all faces, and charming either for town or country driving. The little "weather curtain" at the back is a dexterous addition, and when not required forms a portion of the toque, and is fastened

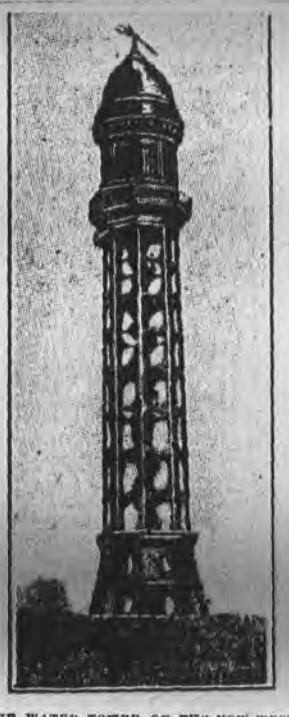
down on to the crown with neat but toned straps.

A REMARKABLE WATER TOWER

It Has Just Been Erected at Manchester, England.

The erection of a water tower for the British Westinghouse Electric and Manufacturing Company's Works, at Manchester, has just been completed. This building, of which we give an illustration, is constructed mainly of steel, and its lofty proportions form a conspicuous landmark for many miles round the works.

The tower (which has been constructed for the purpose of supporting two large tanks for the storage of a large volume of water under constant high pressure) is placed on the southern limit of the grounds of the works, far removed from all the buildings. It is octagonal in plan, the eight legs being supported on granite blocks, and the extreme height of the tower is 210 feet. The three lightning darts are sheathed in copper, and they, together with the forearm and the hand holding them, form the extreme top portion of the tower, and are free to revolve with the wind. Outside the tower a flight of stairs is fixed, leading from the ground floor through one of the first tier panels, and landing upon a platform, supported by the panel bracing at one end and by a steel-built tube four feet in diameter at the other end. This tube is built in the centre of the tower, from the ground level to the underside of the lower water tank, a height of 142 feet. From the platform, and fixed round the centre tube, rises a spiral staircase, constructed of 187 treads, and communicating with a second platform, 127 feet above. The two water tanks on the top platform are each twenty-four feet diameter and sixteen feet deep. They are placed one above the other. The capacity of each tank is 27,400 gallons, equaling 122 tons of water.



THE WATER TOWER OF THE NEW WESTINGHOUSE WORKS IN LONDON.

New Portable Gas Boiler.

An English firm has brought out an improvement in portable gas boilers, one of which is illustrated herewith. The construction of the boiler is simple; it is self-contained, and, occupying little space, it can be readily fixed in any part of the house and removed in a few moments when not required. The boiler is strongly made with an outer casing of corrugated galvanized steel sheets, according to size, and an internal copper boiler tinned inside. The heat for boiling the water is obtained by means of a powerful atmospheric gas burner. A copper condenser is provided, and the casing is also well ventilated, so that the necessity for a chimney to convey away the steam and gas fumes is dispensed with.

PORTABLE GAS HEATER BOILER.

A Queer Turkey.

The country press of Missouri is discussing a turkey chick that was taken into the sanctum of the editor of the Pleasant Hill paper. Miss Annie Lee Hayes brought it. It had two heads, three bills, six legs, six wings and four feet.

"Some Hen."

A farmer on Long Island has a hen with a record of 265 eggs. Of course he calls her "Macduff" to encourage her to "lay on." This remarkable fowl is valued at $300.

A Maine man is trying to teach his dog to talk English.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "THE JOY OF CHRISTIAN SERVICE."

The Rev. Dr. George D. Adams Tells of the Spiritual Uplifting Which Abides With Those Who Walk Constantly With God—Pleasure in Christian Suffering.

NEW YORK CITY.—When Rev. Dr. Geo. D. Adams, the new pastor of the First Baptist Church, Lee avenue and Keap street, preached his first sermon as pastor of the church, he selected for his text: Hebrews xii: 1 and 2: "Therefore, let us also, seeing we are compassed about with so great a cloud of witnesses, lay aside every weight and the sin which is admired by many and let us run with patience the race that is set before us, looking unto Jesus, the author and perfecter of our faith; who, for the joy that was before Him, endured the cross, despised the shame and hath sat down at the right hand of the throne of God" (N. V.), and said:

A very casual observer could easily tell that many Christians have lost the joy of the Christian service which they once had. It takes no scholar, nor, indeed, a critic, of Christian life or human living to see that many, who one day rejoiced with "unspeakable joy" in the service of Jesus Christ, are to-day indifferent. Indeed, we ourselves find some times, when to come to the house of God is a burden, and we drag a weary body or reluctant soul into the presence of the Almighty and try to worship Him in the "beauty of holiness." We find again and again, if we should follow the inclination of our hearts and minds that we should stay at home. But those are new experiences comparatively. Once we could give up any pleasure for an hour with God, and when to have been in His presence and feel that He was hearing us; to enjoy the touch of kindred spirits; to have enjoyed the song and the prayer and the service, out of God's heart, would have been better to us than riches and more precious than fine gold. But that is gone. We find ourselves sometimes coming because we think we ought; doing this or that service because it is customary; entering into this form or that because it is a habit to do so, and in the saner moments of our conscience we come sometimes to say: "Why is this so?" Has God changed? Has the power of the old gospel to alleviate human life of its brudens and sufferings gone? Is there less of power and efficacy in the saving grace of Jesus Christ now than once? After all, is God's service really and truly at bottom nothing but a drudgery? Or, has something taken place with us? Have we left behind something we once had and have we passed beyond that moment of exultant spirit when in the presence of Jesus our hears bounded with the joy of a new faith and the experience of salvation? Well, we are perfectly sure God has not changed. We are perfectly sure Jesus is "the same, yesterday, to-day and forever." We have not a doubt that the old gospel will save men to-day, and when we come to think of it after all is not the matter of being saved a subject of just as much joy in the twentieth century as in the first century? Has there been any change in the attitude of the gospel? We are bound to confess there has been none, and if that is true, then the trouble is with us. Somewhere we have lost something, and I am looking into faces this morning that know better than I do, in their experience, that that something is the priceless treasure of Christian hope. Now, to get that back. When I was a boy I wept when first I saw the wrinkles coming on my mother's face. I wanted her to remain always young, and there are thousands of Christian hearts, some represented here, doubtless, that have wept at the loss of their Christian experience—it is dead, joy is gone. Oh, what would we give to get it back! I am persuaded that we would give a great deal to get it back, but I am more thoroughly persuaded that the way to get it back is to get into the attitude of life that makes it constant. The best thing is not to get back the Christian experience of years ago, but to get into the attitude of life that makes that experience perennial.

I am going, therefore, to discuss the sources of joy. The thing that most lies behind that experience and the first thing that confronts the Christian in the matter is duty. We do not like that word duty. We associate with the word duty, sacrifice, and are surprised when we find that it is in itself a term of freedom. When I say to you, "I want you to do your duty," you say, "Don't talk to me about duty; I don't like that word." That is largely because the word has come to you to mean a matter of bondage, when in reality it ought to mean a matter of freedom. Why it was duty behind the text: "Let us, therefore, seeing we are compassed about with so great a cloud of witnesses lay aside every weight and the sin which is admired by many (or so delight in—some special sin of the age, I suppose) and let us run with patience the race that is set before us, looking unto Jesus, the author and perfecter of our faith, who, for the joy that was set before Him, endured the cross, despised the shame, and hath sat down at the right hand of the throne of God." That is duty. In the light with which Jesus despised the cross we ought not to stop and reason about duty. I want you to notice that duty is an ethical term, not a legal. There is a kind of doctrine abroad to-day which is called the ethical religious idea. I do not mean that at all. Duty is ethical, not legal. Duty resides in the recesses of a man's character, not in the external legislation concerning him. I am a moral being, therefore I ought. A dog or a horse can never be called upon because of oughtness—they are not moral beings. They are within the restrictions of a master and that is legal. There is something in man that is an oughtness. "I ought, therefore I must." Because I am a moral being I ought, therefore duty is ethical. Many a man fulfills the law and breaks every possible moral duty. The saloonkeeper is keeping the letter of the law, but he is doing an immoral thing. It is not a matter of legality or politics, but of moral oughtness. Until that moral oughtness is obeyed I am in bondage, but when I obey the moral oughtness I am free. I passed through a great sewing machine works in Belvidere, Ill., and saw the machine called the automatic screw. The ordinary machine knows more than a lot of men. Men can't do a thing as you tell them to. You set a man on a job of work and he will change the way of doing it just as sure as he lives—that is, if he is an American. If he is a Chinaman or a Russian he won't. That is why corporations hire that kind of man, because he will do no more nor less than he is told. But you tell an American to do a thing precisely in a certain way; he won't do it; you can't hire him to do it. But a machine will. You say that it is restricted. No, it is not. It will take the pig iron and turn it out perfect screws as small as a piece in your watch, and do it all day long. That is liberty. The iron was restricted in the pig iron, it is at liberty in the screw shape because it is doing its intended work, and man is at liberty only when he is doing his God-intended service. Morally speaking, duty is ethical, then. I do my duty before God, not because I must, but because I ought. I am less a man and less free when I refuse to do a thing I was made to do. The chief end of man, says the catechism, is to worship God and enjoy Him. Exactly. So that duty is a part of joy in service.

Selfishness is incompatible with service. The servant is not the servant when thinking more of the wage than the business. You cannot serve and be selfish. The sin of this age is selfishness, my friends. I am thankful that I live in the age of electricity, wireless telegraphy and automobiles, but let me tell you, the sin of the age is pure, unadulterated selfishness. Ten thousand people to-day in this great city are seeking absolutely their own selfish pleasure, and when self dethrones God and enthrones itself the sin of all sin in this age is committed. "Son, give me thine heart." "No," you say, "you cannot have it; it is mine. I am going to keep my heart to myself." I was reminded as I came down from Binghamton through the mountains on Saturday—I love those mountains. (I have been hungry out on the Western plains to see a hill. You would be surprised to see what they call a hill out there. Why, an Irishman with a wheelbarrow could build a bigger mountain in a day than some of those mountains!) I looked over those mountains and remembered an experience some years ago in the Adirondacks. We started out early one morning to climb a mountain. The valley was full of light, and as we looked back from the top of one of the foothills in the valley at our feet the beautiful verdure seemed to throw back the beauties of the sunlight. Then we entered a fog, where we could not see more than five or six feet away. Where was the beauty gone? Our attention became riveted upon our efforts to climb out of the fog. Presently we emerged from it and were on the mountain top. My, what a scene! There lay the valley at our feet, like an extensive world; towns, rivers and railways—the great Valley of the Mohawk. True, it was nearly 150 miles away, but we were looking at it. That was like the Christian experience. When you came to the seat that day you were on the foothill. You forgot all because Jesus was everything and you saw the little landscape. You thought, "The Christian life is beautiful. I am full of joy." And a few weeks passed and you said, "But to live as a Christian is not so easy; I do not see the joy. The little valley, where is it? What a tremendous thing it is to be climbing up to God." And the cloud settles and you get to be selfish. But if you persevered and climbed upward you have come to the mountain peak. Experience, and you feel that all your powers and love ought to be settled on one effort to climb still further and further in the vision of the Eternal. I wonder if some of us are not still in the cloud, because we have lost the joy of service.

Suffering is only incident to service. I am perfectly aware, when I ask you to enter with greater zeal in the service of God that I am asking you to suffer. You will not be killed, or asked to move out of the United States or persecuted because you are a Christian, but you will have to suffer, and when you suffer you will begin to enjoy. No man laughs so heartily as the man who weeps most bitterly. No laughter rings so in heaven as that which comes through the tears down here. By suffering I mean you will be asked to endure the cross. Jesus endured the cross. Now, right here let me say that suffering is not service. Some one says: "See here, do you mean to say that when I suffer for Jesus Christ that is not service?" That is exactly what I mean to say. God has no pleasure in your pain, but if your service for Him demands it, and you bear it heroically, He has pleasure in the attitude of your life. Jesus Christ endured the cross. Why? Because it was incident to the work of saving this race. Somebody will call me heretic, but I am not. I believe, and you believe, that Jesus Christ came to this world to save this race. I believe and you believe that without Christ there is no salvation. The key note of all my ministry shall ever be that Jesus is the divine Son of God. If He is not divine let us stop our preaching, sell our property and be infidels. If Jesus is a mere man let us all quit business. I may be an old fogy, but as long as this tongue preaches the gospel Jesus Christ will be the divine Christ in my message. Do I mean that Jesus came to His cross by accident? Not at all. He saw the cross standing at the end of His mission, and for the joy that was set before Him endured and came to save this race, and that meant the bearing of a cross and He bore it. But the real mission was the saving of the race, not the bearing of the cross. His mission was to save men. "God so loved the world that He gave His only begotten Son that whosoever believeth in Him might not perish, but have everlasting life." When the cross stood in the way of the perfection of salvation Jesus endured it divinely, heroically and unflinchingly died upon it to save us. Suffering is incident to service, and when I call you to serve God you will have your cross. The men you work with will say you are too much of a crank and a fanatic. It will hurt and pain and go deep, and you will flinch. Sometimes you will try to apologize for being a crank and fanatic, and you will thank God there is something you can endure. It is part of service and behind the suffering comes a joy, deep and profound, when you are true. Yes, you will have shame to bear, too. Two or three young ladies where I have been holding meetings lately and baptizing some have said, "I do not like to think of getting up before all those people and being baptized." I wonder if we are going into the joy of fulfilling God's command. If we are we have got to endure some of that shame He endured. Let me tell you if you had administered baptism and you saw as a minister sees in the face of the believer buried out of sight and raised to resurrection of newness of life—if you saw what he sees just once you would drop your quibbling now. Shame on us if we cannot bear in the twentieth century light of Christian truth all that following Jesus demands of us. A writer in the British Weekly in an article entitled "Beating to Windward," says sailing against the wind by steam power was opposing one force to another, and was simply a matter of victory for the stronger force, but to sail to windward in a sailing vessel was a matter of skill for here "forces that oppose are not opposed but used." Brethren, we must "beat to windward." Christian living that meet with no opposition is not Christian living at all. If you are beating to windward for Jesus this world will oppose you. It is a matter of skill, then, to take the opposing forces of suffering and sin and use them to advance your life in the kingdom of heaven. When I begin to sacrifice I begin to enjoy. Beloved, if you would have the joy of Christian service you must have the heart of Christian sacrifice.

The Last Sabbath.

When that last Sabbath comes—the Sabbath of all creation—the heart, wearied with its tumultuous beatings, shall have rest; the soul, fevered with its anxieties, shall enjoy peace. The sun of the Sabbath will never set or hide its splendors in a cloud. The flowers that grow in its light will never fade. Our earthly Sabbaths are but dim reflections of the heavenly Sabbath, cast down upon the earth, dimmed by the transit of their rays from so great a height and so distant a world. The fairest landscapes, or combinations of scenery upon earth, are but the outskirts of the paradise of God, fore-earnests and intimations of that which lies beyond them, and the happiest Sabbath-heart, whose very pulse is a Sabbath bell, hears but a very inadequate echo of the chimes and harmonies of that Sabbath, that rest, where we "rest not day and night," in which the song is never new, and yet ever sung.—Cumming.

What We Can Give.

One of the bravest things in the world is to give to others out of one's deepest poverty, whatever that may be—cheer out of sorrow, hope out of disappointment, help out of weariness, courage out of defeat, the precious mite out of the slender store. It is a brave thing to do this, and yet not often an unrewarded thing. We do not know that the recording angel keeps any special account of such heroic benevolences, but surely they do not escape the loving cognizance of God.—Wellspring.

True Courage.

The world and the church need to-day men of true courage, men who dare to have the courage of their convictions; men who are not afraid to do what is right; men who will stand up for the right. We have too many cowards in the church, and they are a reproach to Christianity. The world despises a cowardly Christian and God has no use for such.—The Rev. Dr. Holderby, Atlanta, Ga.

Never to Meet Again.

The Frenchman's politeness sometimes serves him in good stead to point a rebuke.

A Frenchman who was staying at a hotel asked how much his bill was, and was astonished to find how great an amount he had been charged.

He felt that he had been plundered, but he paid the bill, and then asked to see the proprietor.

Presently the landlord came down, in response to the call, all beaming with smiles.

The Frenchman rushed up to him, exclaiming:

"Ah, let me embrace you! Let me kees you!"

"But why do you want to embrace me, sir? I—I don't understand."

"Ah, saire, but look at zees beel."

"Your bill? Yes; but what of it?"

"Vot of it? Vy, it means zat I s'all nevaire, nevaire see you again, dear saire."

Some Achieve Greatness.

There is truth in the saying that "a prophet has no honor in his own country."

A gentleman, visiting Eccelfechan to see the birthplace of Carlyle, in the course of conversation with an aged inhabitant of the village asked him if he had been acquainted with 'the great Thomas Carlyle."

"Oh, ay," replied the rustic, with a touch of scorn. "I kent Tam. He was a puir havering body who leeved in London and wrote books. Ah, man" (and his voice became enthusiastic), "ye should have kent his brither Jamie, the farmer. He bred the finest pig in a' the countryside."—Tit Bits.

Uneasy Lies the Head That Wears a Crown.

Dr. Foote—Well, this ad. writer has made a pretty mess of my advertisement. "Dr. Foote is eminently fitted to practice chiropody, having removed corns from all the crowned heads of Europe"!

Bridget's Easy Job.

Lady (to new servant)—You quite understand, Bridget, that I shall only be "at home" every Wednesday from 3 to 5?

Bridget—Yis, mum. (To herself.) Bridget, me swate soul, if iver a woman had a hivenly sitivation, sure it's yerself has got it. Wid the mistress only at home for two hours ivery wake, phwat a roarin' time Oi can have out. Hurroo for ould Oireland!

In Pittsburg.

Amid the soot, black and grime of the railroads and passing locomotives a little child sat on the doorstep of a West Carson street tenement and cried because she had nothing better to do.

"Don't cry child," said her distracted mother. "Be a good girl, and this afternoon I'll take you up on the hill and let you see the sun."—Pittsburg Dispatch.

The Right Kind.

Jilson—Do you think Mercer knows anything about parliamentary laws?

Brown—Oh, he's all right. He's the model presiding officer. I saw him in the chair at a meeting once, and, instead of rapping on the table for order, he hit the man who was making the disturbance over the head with the gavel.—Boston Transcript.

Entertaining in Poverty Hollow.

Deacon B. Gosh—Naow, I want yew folks to tell tew 'n' make yourselves tew hum! I'm tew hum, 'n' I wish yew wuz!

LEGAL NOTICES

PROPOSED AMENDMENTS

TO THE

CONSTITUTION

STATE OF NEW JERSEY.

DEPARTMENT OF STATE

As required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State, to the people thereof," approved April 8, 1903, notice is hereby given that on Tuesday, the twenty-second day of September, 1903, a

SPECIAL ELECTION

will be held in the several election districts or precincts of this State, at such places as the clerks of the several townships, cities and municipalities of the State shall provide, to enable the electors qualified to vote for members of the Legislature to vote for or against each of the following proposed amendments to the Constitution.

S. D. DICKINSON,
Secretary of State.

ARTICLE V.

EXECUTIVE.

1. Insert in lieu of p[ar]agraph 10 a new paragraph, as follows: [Gov]ernor.

10. The governor, [duri]ng his term of office, shall reside at the seat of government, and during his [term] of office he shall receive a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the government of this or any other state or the United States. He shall be commander-in-chief of the military and naval forces of the state, except when they shall be called into the service of the United States. He may convene the legislature on extraordinary occasions. He shall from time to time give to the legislature information of the state of the government, and recommend to their consideration such measures as he may deem expedient. He shall take care that the laws be faithfully executed, and shall commission all officers elected or appointed to office. In case of disagreement between the two houses with respect to the time of adjournment, he may adjourn the legislature to such time as he shall think proper, not exceeding four months. He shall be the chief executive officer in and over the state, and during an insurrection or rebellion, or the imminent danger of an invasion, may, with the advice of the council of state, take such measures for the defence of the state as he may deem necessary, and may for the purpose assemble the legislature at such place within the state as he may designate, although it may not be the usual place of meeting. He shall have power to grant reprieves and pardons after conviction, except in cases of impeachment, and may remit fines and forfeitures, and may, with the advice of the council of state, grant pardons, after conviction, in all cases except impeachment.

ARTICLE VI.

JUDICIARY.

1. Insert in lieu of Section II a new section, as follows:

1. The court of errors and appeals shall consist of a chief judge and four associate judges, or any four of them.

2. In case any judge of said court shall be disqualified to sit in any cause, or shall be unable for the time being to discharge the duties of his office, whereby the whole number of judges capable of sitting shall be reduced below four, the governor shall designate a justice of the supreme court, the chancellor or a vice-chancellor, to discharge such duties until the disqualification or inability shall cease.

3. The secretary of state shall be the clerk of this court.

4. When a writ of error shall be brought, any judicial opinion in the cause, in favor of or against any error complained of, shall be assigned to the court in writing, when an appeal shall be taken from an order or decree of the court of chancery, the chancellor or vice-chancellor making such decree or order shall inform the court in writing of his reasons therefor.

5. The jurisdiction heretofore exercised by the supreme court by writ of error shall be exclusively vested in the court of errors and appeals; but any writ of error pending in the supreme court at the time of the adoption of this amendment shall be proceeded upon as if no change had taken place.

Section IV.

1. Insert in lieu of paragraph I a new paragraph as follows:

1. The court of chancery shall consist of a chancellor and such number of vice-chancellors as shall be provided by law, each of whom may exercise the jurisdiction of the court; the court shall make rules governing the hearing of causes and the practice of the court where the same is not regulated by statute.

Section V.

1. At the end of paragraph 1 add the following:

The court may sit in divisions at the same or different times and places.

Strike out paragraph 3.

Section VI.

1. Insert in lieu of paragraphs 1 and 2 the following:

The court of common pleas shall be constituted and held in each county in such manner as may be provided by law.

ARTICLE VII.

CIVIL OFFICERS.

Section II.

1. Insert in lieu of paragraph 1 a new paragraph, as follows:

1. Judges of the court of errors and appeals, justices of the supreme court, the chancellor, the vice-chancellors, and the judges of the circuit court and the court of common pleas shall be nominated by the governor and appointed by him with the advice and consent of the Senate; all persons now holding any office in this paragraph named, except the judges of the court of errors and appeals as heretofore existing, shall continue in the exercise of the duties of their respective offices according to their respective commissions or appointments; the judges of the court of errors and appeals, except those first appointed; the justices of the supreme court, the chancellor, and the vice-chancellors shall hold their offices for the term of seven years, and shall, at stated times, receive for their services a compensation which shall not be diminished during the term of their appointment; and they shall hold no other office under the government of this state or the United States; the judges of the court of errors and appeals first appointed shall be appointed one for three years, two for five years and two for seven years; judges of the court of common pleas shall hold their offices for the term of five years.

Strike out paragraph 2.

SPECIAL MASTER'S SALE.

IN CHANCERY OF NEW JERSEY.

By virtue of a Decree of the Court of Chancery of the State of New Jersey, bearing date on the Twenty-ninth day of June, A. D. Nineteen hundred and three, in a cause pending in said court wherein Abram M. Vall, is complainant and Edgar R. Vall and others are defendants, I shall expose for sale at public vendue to the highest bidder on

FRIDAY, THE FOURTH (4) DAY OF SEPTEMBER A. D. NINETEEN HUNDRED AND THREE,

between the hours of twelve o'clock noon and five o'clock in the afternoon, to wit, at two o'clock in the afternoon of said day, at the dwelling house on the premises hereinafter described, all of the following tract of land and premises being a certain farm or tract of land situate, lying and being, in the Township of North Plainfield, in the County of Somerset and State of New Jersey, bounded and described as follows, to wit:

Beginning at a point in the center of the mill race in the southwesterly line of property known as property of Goldson Smalley, said point being distant fifty (50) feet in a magnetic course of north twenty-eight degrees and fifty-four minutes West (N. 28° 54' W.) from a stone monument on the northwesterly bank of Green Brook, and running thence along line of said Smalley's property in a magnetic course of north twenty-eight degrees and fifty-four minutes West a distance of two thousand six hundred seventy and seven tenths (2670.7) feet to a stone monument being the southerly corner of property known as property of Garretson and Gray; thence along the line of said last mentioned property, north twenty-three degrees and thirteen minutes West (N. 23° 13' W.) a distance of one thousand six hundred fifty-nine (1659) feet to a stake and stone-heap in line of land formerly of Ephraim Runyon and making a corner; thence along the line of said last mentioned property south sixty-seven degrees and thirty-two minutes west (S. 67° 32' W.) a distance of thirty-four and six-tenths (34.6) feet to a stake and stone heap, thence along another line of said last mentioned property, north twenty-one degrees and forty-eight minutes West (N. 21° 48' W.) a distance of three hundred nine and fifty-four one-hundredths (309.54) feet to a stake and stone heap and corner of property of Helen B. H. Pellow; thence along the line of said last mentioned property South sixty-seven degrees and thirty-two minutes west (S 67° 32' W.) a distance of sixty-six (66.0) feet to a stake and stone heap; thence still along another line of said last mentioned property, south twenty-one degrees and forty-eight minutes east (S. 21° 48' E.) a distance of three hundred nine and fifty-four one hundredths (309.54) feet to a stake and stone-heap; thence still along another line of said last mentioned property, south sixty-seven degrees and thirty-two minutes west (S. 67° 32' W.) a distance of four hundred ninety-one and four tenths (491.4) feet to a stake and stone heap, being the northerly corner of other property known as property of Garretson and Gray; thence along the line of said last mentioned property, south twenty-two degrees and twenty-eight minutes east (S. 22° 28' E.) a distance of one thousand one hundred and seventy-eight (1178.00) feet to the easterly side of an Elm tree being the northerly corner of property of John Grogan; thence along the line of said last mentioned property, south twenty-two degrees and nineteen minutes east (S. 22° 19' E.) a distance of six hundred two (602) feet to a stake and stone heap; thence still along line of said last mentioned property, south fifty-eight degrees and thirty minutes west (S. 58° 30' W.) a distance of one hundred and nineteen and seventy-two one hundredths (119.72) feet to a stake and stone heap; thence still along property of said Gregon, south thirty-one degrees and forty-four minutes east (S. 31° 44' E.) a distance of two thousand two hundred and seventy-nine and two tenths (2279.2) feet to an iron monument in the center of the Green Brook Road; thence along the center of said road, north sixty-three degrees and forty-two minutes east (N. 63° 42' E.) a distance of two hundred thirty-six (236) feet to an iron monument and corner of property of Abram M. Vall; thence along the line of said last mentioned property south thirty-one degrees and forty-four minutes east (S. 31° 44' E.) a distance of four hundred five (405) feet to a point in the center of the mill race; thence up the center of the mill race in a general northeasterly direction a distance of three hundred seventy-six (376) feet more or less to the place of beginning; containing 63.762 acres of land more or less, which said property is shown on the map annexed to the bill of complaint in this cause, including the inchoate estate of dower and interest of Sarah A. Vall, wife of complainant, Abram M. Vall, in the said premises, together with all and singular the hereditaments and appurtenances to the said premises belonging or in anywise appertaining.

Conditions made known on day of sale by

JOHN H. VAN WINKLE,
Special Master in Chancery.

CRAIG A. MARSH,
Solicitor.

Dated July 30, 1903. [$22.50]—1-29.

SHERIFF'S SALE

IN CHANCERY OF NEW JERSEY.

Between Fredrick C. Jennings, complainant, and Ada M. Cuming et al., defendants.—Fi Fa for sale of mortgaged premises.

By virtue of the above stated writ of Fi Fa., to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE SEVENTEENTH (17) DAY OF AUGUST NEXT,

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All that certain tract or parcel of lands and premises, situate, lying and being in the borough of North Plainfield, in the county of Somerset and State of New Jersey.

Being known and designated as No. 215 Somerset street, and more particularly described as follows:

Beginning at a point in the southwesterly side of Somerset street and corner of A. Jacot's lot, as shown on a Map of Valuable Villa Sites and Building Plots, North Plainfield, N. J., on file in the Clerk's office of the county of Somerset. Thence running along his line south forty-five degrees and forty-seven minutes west one hundred and fifty-nine feet to a stake in the line of Lot No. 5; thence running in a northwesterly course parallel with Somerset street thirty-five feet to a point where the centre line of the division wall if extended would reach; thence running in a northeasterly course along the centre line of said division wall one hundred and fifty-nine feet to the southwesterly side of Somerset street as formerly laid out; thence running along said old line of Somerset street in a southeasterly course thirty-five feet to the place of beginning

North Plainfield Weekly Review.

VOL. 4—NO. 21 NORTH PLAINFIELD, N. J., SATURDAY, AUGUST 15, 1903. PRICE 3 CENTS

NEWS OF THE WEEK.

Brief Bits About Many Matters of Local Interest.

The Independent Gun Club will hold the annual King shoot Labor Day.

Harry Hansen, of Lincoln place ran a pitchfork into his right foot.

Miss Ann Vanderweg, who attempted suicide last week is steadily recovering.

The Sunday School of Hope Chapel will go to Asbury Park, Saturday, August 22.

Fourteen members of Hope Y. M. A. will leave Plainfield today to camp out at Lake Hopatcong.

The choir of the Crescent Avenue Church will take a vacation until the first Sunday in September.

Thursday afternoon David Hand gave a straw ride to the little ones at the Fresh Air Home, Netherwood.

The Retail Clerks' Mutual Aid Association will go on an excursion to Boynton Beach Thursday evening, August 27.

The second annual excursion of Benevolent Council, No. 256, Jr. O. U. A. M. to Atlantic City took place Thursday.

The first annual excursion of Miantonomo Tribe, No. 118, I. O. R. M. will be to Atlantic City, Thursday September 17.

The congregation and Sunday School of Warren Chapel will go on their annual excursion to Asbury Park, Thursday, August 27.

The Union Trolley Employes Benevolent Association held their second annual picnic Wednesday evening in the grove at the end of trolley line on Somerset street.

Rev. Charles B. Mitchell, of Cleveland, Ohio, who was pastor of the First Methodist Episcopal Church, Plainfield, twelve years ago, will visit friends here next week.

Mrs. Elizabeth Werner, who lived alone in a house on New street, was found dead in bed yesterday. The [illegible]

[illegible] sex counties met at Riverside Park, Thursday, on their annual picnic held under the auspices of the Middlesex county Board of Freeholders.

Twenty members of Warren Engine Company accepted the invitation of the Bound Brook firemen to meet them at Riverside Park Monday evening, where an entertainment was given.

Walter Carr, the colored boy, who is accused of stealing change out of the cash drawer of Vail & Gardiner's grocery store last Wednesday, has been held by Justice Huff under two hundred dollars bail to await the action of the Grand Jury.

While Howard Perry, of Prideville tried to step off a moving wagon last Wednesday his foot slipped and he fell underneath the wheels which passed over his body. He was rendered unconscious for a little while, but is not considered dangerously injured.

Suits aggregating $15,000 have been brought against James A. Galvin, who runs the trolley park near Westfield, by colored people who have been refused admission to the grounds. The claim made is that it was a public place, and that they were wrongfully excluded.

At a meeting of the North Plainfield Fireman Relief Association of this borough held Tuesday evening Chief J. J. Stahl, David Bodine, Jacob M. Higgins and Charles Keller were elected delegates to attend the convention which takes place at Atlantic City, September 8 and 9.

Price of Coal Advancing.

It is positively asserted by the knowing ones that coal will be advanced in price (not quality) each month until December. Now is the time to order coal if the increased price is to be avoided.

Clark—Blimm Wedding.

Miss Sarah Isabelle Blimm, youngest daughter of Mr. and Mrs. Jacob Blimm, of Plainfield, and Edward Osborne Clark, son of Mr. and Mrs. Robert Clark, Jr., of this borough, were married Monday evening, at the home of the bride's parents, by Rev. J. N. Norris, of Newark.

Sunday Excursion to Mauch Chunk.

The New Jersey Central will run an excursion to Mauch Chunk on Sunday, Aug 16, 1903. Round trip 1.50, child 75 cents, from Plainfield, at 9.22 a.m. Mauch Chunk is one of most charming mountain resorts in thissection. The trip over the gravity railroad to Summit and Mt. Pisgah is one of scenic grandeur and a trip that will never be forgotten. After the trip over the Switch back you should go to Glen Onoko where yon will find beautiful little cascades, caverns and like attractions.

Mrs. Powlison an Octogenarian.

Last Monday, Aug. 10, Mrs. Joseph S. Powlison, of 25 Grandview avenue was the recipient of one hundred and five letters of congratulations and good wishes in honor of her eightieth birthday. These messages were from the immediate family and friends from Maine, New York, Michigan, Illinois, Pennsylvania, New Jersey and Washington, D. C.

Mrs. Powlison has lived all her life in Somerset county, except one year. Was born at Pluckemin, eighteen miles northwest of here, Aug. 10, 1823. At the age of 31 years she married Joseph S. Powlison, now deceased, and lived in Pluckemin until 1874, when they moved to Bound Brook.

After living there four years they came to Plainfield, where she has lived for twenty-five years.

Mrs. Powlison is wonderfully preserved for one of her age, and she received many flattering congratulations for being so young, both physically and in spirit.

Mrs. Powlison is the proud mother of three children, Mrs. A. C. La Boyteaux, of Fairview avenue, J. A. Powlison, of Somerset street, and Charles F. Powlison, of New York City.

J. A. Powlison states that his four grandparents average age at their death is eighty-four years.

Freeholders' Meeting.

At a meeting of the Freeholders last Tuesday a new petition for the construction of the road from the Davidson's bridge, through Basking Ridge to Blazure's corner was presented and filed as a substitute for a former filed petition.

The report of the committee to enquire about a typewriting machine was heard and laid over. Messrs. R. W. and E. B. Hoagland, Vreeland, Gibson, and Lutkins were appointed to procure the ballot boxes necessary under the new Primary Law.

It was estimated that the possible cost of bridges in the respective townships and boroughs for the current year, as follows: Bedminster $2500, Bernards $4000, Bridgewater, $5000, Branchburg $1800, Franklin, $1100, Hillsborough, $[illegible]

[illegible] Charles Jen- and Christian [illegible], Frank Keller, in rifle shooting will receive gold medals. Among the rifle shooters, George Kaeting received the captain's prize for the most bulls-eyes. William Mills received the captain's leather medal prize.

[illegible] moved that the amount appropriation for the current year for county expenses and bridges be fixed at $120,000, and that the Clerk be authorized to certify the same to County Board of Assessors. Carried.

County Collector Allen was authorized to borrow $20,000.

The Board adjourned to meet on the road from Far Hills and Peapack this morning at 11 o'clock.

Somerville People Lost Their Fight.

At the Somerville Council meeting last Monday night the trolley fight was discussed and the result was that the fight was called off and the traction company can go ahead put up wooden instead of iron poles. The matter of changing the track to the middle of the street was dropped. For this concession the traction company will return to the former ten cent rate of excursion ticket between Somerville and Bound Brook.

A Family Mix-up.

Adam Young, a prosperous and well-known real estate dealer, and Mrs. Ella Ayres, both of Plainfield, have just announced their marriage, which took place in New York on July 14. Peculiar circumstances have arisen from the wedding in which it is rather perplexing to construe the relations of the two families. Mrs. Ayres, the bride, is the widow of Alonzo Ayres, a local merchant, who died four years ago. Mr. Young was a widower, his first wife having died one year ago. In 1899 his son, John Young, married the elder daughter of the former Mrs. Ayres. Another interesting chapter in the family mix up is to be added later. The engagement has been announced of Miss Mabelle Ayres, the younger daughter of the second Mrs. Adam Young, to Edward Young, the elder son of Adam Young. The wedding is to take place in the fall.

Guide to Yacht Races.

A handsome Pocket Guide to the International Yacht Races between Reliance and Shamrock III, off Sandy Hook, has been issued by The Prudential Insurance Company of America, Home Office, Newark, N. J. The Guide contains valuable information for those visiting the races, as well as for others who will not be able to see the contests.

Where are you going to buy your mantels for the new house you are just having erected? R. B. Van Arsdale is having an exceptional run on mantels, tiles and fire place fixtures. He has just completed some big contracts in Elizabeth and Dunellen. He does good work very cheap, which accounts for the large business he is doing.

SWEDISH CONVENTION.

Swedish Societies from New York and New Jersey Meet here in Borough Today.

The Young People's Societies of the Swedish Congregational Churches of New York and New Jersey will hold services here at Edgewood Grove, Somerset street today. The following program will be observed:

Morning service at 10:30; 1, singing by congregation; 2, Bible reading and prayer by Rev. C. M. Ahlberg, of Montclair; 3, solo by Professor J. Scott, of Philadelphia; 4, address of welcome by Rev. L. T. Lindholm, of Plainfield; 5, duet; 6, address by Rev. O. Nelson, of New York City; 7, solo; 8, address by Rev. C. G. Ellstrom, of Brooklyn.

Afternoon session at 3 o'clock. 1, congregational singing; 2, scripture reading and prayer by Rev. J. Quish, of New York City; 3, song by the united choirs of Brooklyn and New York; 4, address by Rev. C. W. Holm, Philadelphia; 5, solo by Professor Scott; 6, address by Rev. C. G. Peterson, of East Orange.

Should it rain, services will be held in the Y. M. C. A. building.

Score for Gun Club's Contests.

The following is the score for the past year of members of the Independent Gun Club:

Rifle contest—First class, Christian Stoeckle, 1164; second class, Henry Haurand, 917; William Krause, 912; G. Kaeting, 892; Dennis Gavin. 826; John Wirth, 747; F. Schaefer, 730; Charles Jensen, 547. Third class, Frank Keller, 503; William Mills, 465.

Trap shooting—First class, C. M. Luckey, 52; Henry Haurand, 43. Second class, Lewis Van Dyke, 39; Charles Keller, 37; G. Kaeting, 26; William Mills, 21; W. Krause, 17. Third class [illegible]

Another Rap at Rahway, N. J.

In a certain learned treatise on slang, published not long ago, the author declared that all the odd words and expressive catch-phrases included under that title had their birth in "brilliant brains which have nothing else to do but conceive them." There is at least one brilliant brain here at Atlantic City, remarks the Philadelphia Press correspondent. Here is an incident which includes one bit of it:

"I saw her going down the beach," said one young man to another, presumably talking of some feminine bather, "and I followed her trail. From the back she was a ripper, but when she turned around—well, she looked like R. N. J."

Again, in one of the cafes, a woman remarked, "We're staying at the Blankley now. We had to leave the other house—it was a regular R. N. J. hotel."

And what do you suppose R. N. J. means? Nothing more or less than Rahway, New Jersey—the town which comedians and travelers and the like have poked fun at since time out of mind.

The phrase has spread like wildfire in the past few days, and so whenever folks see anything not quite up to the high standard of everything here they pronounce it R. N. J.

That may be hard on the little Jersey city, but it seems to fill a long-felt want. —*Elizabeth Journal.*

Advises Extreme Measures.

In a county such as this where there are so many valuable horses, unusual efforts should be made to discover the coward who either deliberately or carelessly put Paris green and arsenic into the food of the animals belonging to Undertaker McGrath, of Rockaway. The person who did this act is not entitled to be classed as a human being. His place is among the reptiles of the earth and there should be no lodging place for him above the grass. If he is to be found, the authorities of Somerset should set to run him down and administer justice to him. A goodly sum should be offered as a reward for the arrest and conviction of the perpetrator of the crime. The law provides a way for this. No time should be permitted to be wasted before the reward is offered.—*Morris County Chronicle.*

A Popular Railroad Official.

Mr. C. W. Burt, General Passenger Agent of the New Jersey Central Railroad has made many warm friends among the patrons of the road by always endeavoring to give them the very best of railroad service. At the time Mr. Burt accepted his present position, the road had made many enemies of the people who daily go to and from their business in New York City. This feeling has now all passed away and so long as Mr. Burt remains at the head of the passenger department the people have no fear but that he will continue the present policy.

An excellent article concerning Mr. Burt and his career was recently published in the Railroad Employee.

Rich Doctor Arrested.

A news item to the *State Gazette* says that Dr. Kemp has been placed in the Somerset county jail at Somerville, charged with forgery and embezzlement.

Kemp, first appeared a few months ago, accompanied by a prepossessing young woman, who posed as his wife. The pair registered at a leading hotel, remained there a few weeks and then disappeared, leaving an unpaid board bill.

After their disappearance the doctor was traced to New Brunswick, Atlantic City by a detective of New [illegible], who was after him on charges of embezzlement, preferred by the Credit Adjustment company of New York.

The W. S. Cowley company, of Somerville subsequently swore out a warrant for his arrest for forgery.

Kemp was captured in Newark.

Little is known of his history but it is stated he is wealthy and has influential relatives, who are now negotiating with his accuser with the object of having the charges against him withdrawn.

SUBURBAN NOTES.

LIBERTY CORNER.

Charles Baker, of Newark, is visiting Mrs. Fennimore.

Benjamin Voorhees, of Plainfield, is visiting Mrs. W. D. Acken.

B. P. Mulford, Jr., of Newark has been a guest at the parsonage.

[illegible] are pleased to see W. R. Latimer [illegible]

Mrs. Hales and son Kenneth have returned to New York for a few days.

The Sunday school picnic has been postponed until Tuesday, August 25.

Mrs. Frank Apgar, of Plainfield visited at Professor Hammond's home Sunday.

Do not forget the lawn fete to be held on the church grounds, Tuesday, August 18.

Mr. and Mrs. Robertson, of Newark, and the Misses Edna and Mildred Bunn, of Bernardsville, are visiting Mr. and Mrs. George Acken.

At a meeting of the Oriental Chapter No. 61, all members were present. A committee was appointed to name the place for the summer meeting of 1904. After all business had been attended to, there was a smoker and several speeches. Among the speakers were Dr. Hubschmidt, Professor Detgen, William Smith and Henry Stegmen.

WATCHUNG.

Dave Flammer is all smiles—a boy.

Mrs. J. H. Koch is spending the week in New York City.

Leons and Edward Texier have gone to camp at Lake Hopatcong.

Mrs. Sherer, of Alabama is visiting her cousin, Mrs. John Wilson.

Mrs. S. S. Higgins and daughter spent a few days with friends in New York City.

There is someone who has a dog that howls all night long keeping people awake.

After a long time the case of Drosin versus Hudly, formerly the proprietors of the knitting mill at Watchung, has been settled. The knitting mill will be started again under the name of Auben Messe & Co. It will card its own wool and manufacture woolen goods in general. It is hoped that it will be a success.

A Record Breaker for Jerseyite.

A tabulated statement of the inventions of Thomas A. Edison, prepared by an official of the United States patent office, shows that on the last day of this month Mr. Edison will have obtained 791 patents from the patent office on as many inventions, more by several hundred than any other individual has received in the history of the office. Prior to 1895 the inventor had obtained 711 patents, and since that time he has received the following numbers: In 1896, 3; in 1897, 2; in 1898, 8; in 1899, 3; in 1900, 16; in 1901, 23; in 1902, 19; and in 1903 he has so far received 6 patents.

Attention is called to the advertisement in another column of J. J. Goff & Co., whose facilities are superior for handling fish, clams and oysters at wholesale and retail. Every week they make a specialty. This week, halibut at 15c a pound.

ROUND ABOUT JERSEY

Summary of News From the Four Corners of the State.

From a little over 100 trees, Daniel Ewan, of Smithville, has picked over 1,500 baskets of apples this season, most of which have been barreled and shipped to city markets.

Mahlon Riker, of Stanhope has a leaf of rhubarb thirty-one inches wide and thirty-five inches long, with a stem two feet long and one and three-quarter inches thick. The plant weighed three and a quarter pounds.

While at work in Franklin, last week tearing down an old frame house, which he had purchased for a song and was demolishing for firewood, Watson Little came across an old-fashioned farmer's dinner bell, in which was carefully packed $400.

The Lebanon Telephone Company which recently originated in Hunterdon county, furnishes a service to its patrons for $12.50 per year. This is the entire cost; there is no red tape about it, and you can 'phone anywhere over the line in the county.

The huckleberry crop in the vicinity of Medford this year is enormous and thousands of crates are being shipped to the New York markets. Pickers and growers have found this to be a most profitable season. In addition to the immense crop there has been a great demand and prices have ruled high.

A New York company composed of Hebrews proposes to build a summer hotel at Budd's Lake to be used exclusively by members of that race. Many of these have been denied accommodation at the other public houses. The land they have in view lies at the junction of the Stanhope road on the north side of the lake.

The largest shipments of tomatoes ever made from the Swedesboro station were [illegible] last week, the [illegible] for the week being 110,300 crates, filling 183 cars. Great difficulty is experienced in getting crates and the prospect is that there will be great loss on that account, although crate stuff is being brought there by the carload and men and boys are manufacturing them as fast as possible.

The shipment of potatoes last week from Elmer was larger than the week previous and would probably have eclipsed all records had the commission men not been handicapped by the lack of cars. On Wednesday fourteen carloads of potatoes and one of apples were sent to Pittsburg. It is thought that the shipment of potatoes, which averaged about 200 barrels to the car, was worth about $4,000. The prices ranged from $1 55 to $1.65 per barrel.

Wallington is a daring little borough. It has its own water plant and is making it pay. Now it wants to install a municipal gas plant. At present Wallington is without gas. The Public Service Corporation has agreed to supply the borough with gas upon certain conditions, which the borough considers unbearable, and at the meeting of the borough council last week a committee was appointed "to make agreeable arrangements, if possible, with a corporation, or to investigate in what manner the borough of Wallington could erect her own gas plant and the running expenses of the same." The committee, it seems, is to consider a supply from a private corporation first.

At one of the services at Ocean Grove Bishop FitGerald administered a rebuke to those individuals who appropriate to their own use articles they find in the auditorium or elsewhere about the camp grounds. On average 100 articles are lost every day, and on an average only five per cent. of the missing articles of clothing, jewelry, souvenirs and mementoes, are turned over to the custodian of found articles. The bishop said: "I regret to be compelled to say that some people attending these services are grossly dishonest. Somebody finds these lost articles, and somebody takes them from this building and appropriates to himself or herself something that does not belong to them."

Webb Davis, 15 years old, and a nephew of James A. Webb, of Madison, has just completed a little steamboat, which can be seen almost daily running on the Passaic River. The boat and its entire fittings were made by the boy in his own workshop and he is now engaged in constructing a new boiler, with which he expects to get more speed out of the boat. It is not built by rule of thumb, but from scale drawings and specifications carefully worked out by the young mechanic. The first run to Sterling was a complete success and he surprised many of the farmers, who had never expected to see a steamboat capable of carrying passengers on the stream. Several months ago the boy appeared on the streets in an automobile of his own manufacture. He spends most of his time in his workshop, which has been fitted up with a good deal of expensive machinery. The lad is a student at Stevens Institute at Hoboken.

The rumors which have been current for a long time that the projected line of the New York and Four Junction Railroad would be built in the near future have been strengthened by the fact that a representative of the road has been getting extensions of time on the right of way, setting the limit at January 1 next, and giving assurance that work would be started this fall. The course of the road will be from New Orange to Union, then into the Springfield, and over the mountain near the Baltusrol Golf Club into Park avenue, Summit, and terminating in a station to be erected adjoining the Lackawanna Railroad station. The company now holds a clear right of way over the entire route and contracts for the work have been let. It plans to compete with the Lackawanna between Summit and New York. There will also be direct communication between Summit and Springfield and Elizabeth. Springfield is at present without railroad communication.

A runaway engine on the Caldwell branch of the Erie Railroad created excitement in Cedar Grove last Tuesday. It was a heavy, six-wheeled engine, and had brought a train of cars of the flat type used for heavy freight work to Essex Fells, and had drilled several of them, when one got beyond control of the brakeman, who shouted for help. The engineer, and fireman, who were on the engine near the turntable, jumped off and ran to his aid. It is believed that in the excitement the engineer left his engine under air pressure and forgot to put on the reverse leever, with the result that when the pressure became exhausted the ponderous locomotive started down the track, [illegible] backward toward Caldwell. The [illegible] which a chicken house stood, owned by Webb Mitchell. About fifty chickens were killed by flying dirt. The coal from the tender flew in all directions, and one piece struck a watering can in the hands of Mrs. Mitchell, smashing it into a shapeless mass. Another struck a dog in the head, killing the animal instantly. The tender struck a large oak tree, tearing it out by its roots. The engine turned upside down. The noise made by escaping steam could be heard nearly a mile away.

Weather and Crop Bulletins.

Central Office U. S. Weather Bureau,
Atlantic City, N. J., Aug. 11, 1903.

Frequent showers, quite heavy in some places, a general lack of sunshine and continued cool nights, have been very detrimental to all growing and maturing crops, and also retarded the harvesting of hay and oats in portions of the central and northern sections. Cultivation of crops has been greatly hindered, as the ground is still too wet to work; late planted corn is very uneven and backward.

In the southern section the continued cool, wet weather has been very unfavorable for all vine truck, especially watermelons, cantaloupes, lima beans and cucumbers; these crops need more sunshine and warmer weather. The young fruit of the former is rotting on the vines. The digging of potatoes continues, and while the yield is large, considerable rot is reported from many places.

Very heavy rains fell in portions of Passaic and Essex counties, on the 3d and 5th, flooding the Passaic valley lowlands and doing great damage to meadow hay.

W. C. T. U. State Convention.

The State Convention of the Women's Christian Temperance Union will be held at Morristown on October 20th, 21st and 22d, in the First Presbyterian Church. Two hundred delegates will be entertained, among them many of the national officers. This organization is doing a grand, good work, for it is not only doing much to reclaim drunkards, but it is likewise doing much to inculcate principles of temperance in the young.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Calvin D. McMurtry, sheriff, to Mary J. Sanford et al, $1500.

Alfred University to Martha Goodman et al, $3300.

Alex. E. Faber, Jr., et ux to Cornelius E. Gulick, $1.

Alex. E. Faber, Jr. et ux to Cornelius E. Gulick, $1.

John Spencer et ux to W. R. Codington, $1.

THE MONTHLY CROP REPORT

A Winter Wheat Yield of 410,000,000 Bushels Indicated.

CEREAL AVERAGES FALL OFF

Oats, Barley, Rye and Buckwheat Poorer Than Last Year, While the Hay Acreage Increases—Percentage of Spring Wheat Much Lower—Good Showing in Corn—Falling Off in Wheat.

Washington, D. C.—The monthly report of the Chief of the Bureau of Statistics of the Department of Agriculture will show the condition of corn on August 1 to have been 78.7, as compared with 79.4 on July 1, 1903; 86.5 on August 1, 1902; 54 at the corresponding date in 1901, and a ten-year average of 84.4.

The report contains a table showing the condition on August 1 of the last three years and on July 1 of this year of the corn crop in the twenty principal corn States. Texas, Georgia, Tennessee, Alabama, Mississippi, Virginia and South Dakota are the only States in which a better condition of the corn crop was shown on August 1 of this year than on the same date of last year.

Preliminary returns indicate a winter wheat crop of about 410,000,000 bushels, or an average of 12.4 bushels per acre, as compared with 13.8 bushels last year.

Of eleven principal winter wheat States the average yield in Kansas, Pennsylvania, Oklahoma and Tennessee is greater this year than last; in Missouri, California, Indiana, Nebraska, Ohio, Illinois and Michigan the yield is less than last year.

The average condition of spring wheat on August 1 was 77.1, as compared with 82.5 last month, 89.7 on August 1, 1902; 80.3 on August 1, 1901, and a ten-year average of 80.2.

Of the five principal spring wheat States, only one, South Dakota, shows a better condition of spring wheat this year than last. The others—Minnesota, North Dakota, Iowa and Washington—show a much more backward condition.

The average condition of the wheat crop on August 1 was 79.5, as compared with 84.3 one month ago, 89.4 on August 1, 1902; 73.6 on August 1, 1901, and a ten-year average of 82.6.

New York, Pennsylvania and Michigan show a better condition than last year, and Illinois, Iowa, Wisconsin, Minnesota, Nebraska, Indiana and Ohio a poorer condition.

The proportion of the wheat crop of last year still in the hands of farmers is estimated at 7.4 per cent., as compared with 4.2 per cent. of the crop of 1901 in farmers' hands one year ago, 5.9 per cent. of the crop of 1900 in farmers' hands two years ago, and an eight-year average of 7.4 per cent.

The average condition of barley on August 1 was 83.4, against 86.8 on month ago, 90.2 on August 1, 1902, 86.9 at the corresponding date in 1901, and a ten-year average of 83.4.

The average condition of spring rye on August 1 was 87.2, as compared with 88.3 on month ago, 90.5 on August 1, 1902, 83.6 at the corresponding date in 1901, and a ten-year average of 87.3.

The average condition of tobacco on August 1 was 82.9, as compared with 85.1 one month ago.

The average condition of potatoes on August 1 was 87.2, as compared with 88.1 one month ago, 94.8 on August 1, 1902; 62.3 at the corresponding date in 1901, and a ten-year average of 84.5.

Preliminary returns indicate an increase of .3 per cent. in the hay average.

WIFE BEATER'S NOVEL DEFENSE.

Pleads "New Woman" Game in a Court to Justify Blows.

New York City.—In sorting out the morning batch of prisoners at Harlem Police Court, Magistrate Crane found an alleged wife-beater rejoicing in the name of Thomas Duffy. His wife charged that he had struck her in the face.

"She tried the new woman game on me," explained Duffy.

"That's a new excuse," said the Magistrate. "What do you mean?"

"She went out and left me to take care of the children," Duffy explained.

"And so you blackened her face and closed her left eye," exclaimed the Magistrate; "$500 bail."

POWERS PUT BAN ON SERVIANS.

Austria Sends Home Students and Russia Forbids All Intercourse.

Vienna, Austria.—In consequence of the assassination of King Alexander and Queen Draga and the subsequent attitude of the Servian military officers, both Russia and Austria have decided to send home all the Servian officers studying in their military schools.

Russia has forbidden her officers to have either official or social intercourse with Servian officers.

LITTLE HOPE OF REFORM.

China's Empress Makes Pretence of Conciliating the People.

Tien-Tsin, China.—The Empress Dowager is trying to remove the bad impression caused by the execution of Shen-Chien, the reform journalist who was recently put to death by her order, by issuing popular edicts, but the anti-reform movement continues threatening, even in the case of Viceroy Chang-Chih-Tung, who remains hostile to Russian influence.

Saves Wife and Baby From Wreck.

The barge Volunteer, with a cargo of coal, went down in a choppy sea off Narragansett Pier, R. I., Captain Closson, his wife and eighteen-months-old baby escaped in a small boat, as did also a Portuguese deck hand.

Ten Years For Snatching Purse.

Henry Hall, a negro, who snatched Alice Sodergren's pocketbook at Kansas City, Mo., was sentenced to ten years in the penitentiary. It was also proved that Hall had first attempted a criminal assault on Miss Sodergren

SAYS CRAWFORDS EXIST

Mme. Humbert, in Court, Promises to Reveal Their Identity.

She Declares She Will Tell All at the End of the Trial—A Ruse to Gain Time.

Paris, France.—The trial of the Humbert family on the charges of forgery and swindling in connection with the fictitious Crawford millions, has been drawing large crowds to the Palais de Justice.

Mme. Therese Humbert continued to dominate the proceedings, and created several scenes when the Court attempted to examine the other members of the family. M. Bonnet, the Presiding Judge, insisted on examining Frederic Humbert, her husband, but Mme. Therese, rising, said:

"I demand to be heard. I am strong to-day, and will explain where the millions are."

Frederic Humbert testified lengthily regarding the affairs of the Reute Viagere, the insurance concern which the Humberts started and in the crash of which thousands of poor people lost all their savings. He maintained that the operations were conducted in good faith and claimed that public prejudice aroused against the Humbert family brought about the failure of the concern.

The Judge sought to bring out that Romain himself impersonated the Crawfords and instituted suits in their name. The defendant denied ever impersonating the Crawfords or writing the letters signed by the Crawfords.

Mme. Humbert here made another declamatory statement protesting her complete innocence.

"I have tried to find the Crawfords and their millions," she said. "I have not succeeded in finding the money, but I have found the Crawfords. They have made a terrible revelation to me. I have told Maître Labori all. He knows the real name of the Crawfords, for they do not call themselves by the name of Crawford. No one will suffer any loss. I will pay every one. Perhaps the Crawfords may not appear, but they exist. It is only their name that does not exist."

The Judge, interrupting her, asked: "Then where are the Crawfords?"

"If the Crawfords do not come here I will give their name and that will suffice," replied Mme. Therese. "I have already told Maître Labori that when the witnesses have been heard and the hearing is concluded I will tell all."

There was a profound silence in the courtroom during Mme. Humbert's declaration, but her final words, again putting off the promised disclosures, aroused derisive laughter. When the Court intimated that the statement was vague, Maître Labori answered: "But Mme. Humbert engages herself to speak at the close of the hearing."

The Court then began the examination of the ninety witnesses called, outside the family, which will occupy many days. It is the declaration that the Crawfords actually exist under another name is generally regarded as only another of her ruses to gain time.

JUSTIFIES CANNIBALISM.

Professor Starr Says It Is Not Wrong to Eat a Man When He is Dead.

Chicago. — According to Professor Frederick E. Starr, head of the Anthropological Department at the University of Chicago, cannibalism among the savage tribes of Africa, Australia and Greenland is justifiable. This statement was made before his class in the course of a lecture. He explained to his startled audience that he would not justify any one for killing a man for food, but that in his opinion it was not wrong to eat him when dead.

"The bushmen and pigmies of Africa, the Fuegians and Bolo-Cudos of South America, and the Eskimos of North America," said he, "are all cannibals. Some eat human flesh from desire and some from necessity. It is especially in the case of the latter that I say their cannibalism is justifiable. It is a fact that every known tribe which eats dogs also feeds on human beings. Dog eating and man eating go together. When the Eskimo has no walrus he eats his dog, and when his dogs are gone he eats his brother, if the brother happens to be a corpse. If he did not eat the human flesh he would starve, or at least go hungry, and I think he is all right in doing as he does."

Professor Starr further remarked that the finest tribes in Africa are cannibals who think that they attain the attributes of the dead relatives or friends by eating them.

SUN DANCE PUNISHMENT.

It Will Be Meted Out to Those Who Incited Indians to Torture Themselves.

Washington, D. C.—Secretary of the Interior Hitchcock issued an order to Superintendent Seger, of the Seger Indian Training School, of Oklahoma, to remain in Washington and make complete oral and written reports of the recent "personally conducted" sun dance, given for the edification of Professor Mooney, of the Bureau of Ethnology, and Professor Dorsey, of the Field Museum of Chicago, by the Cheyenne and Arapahoe Indians of Oklahoma.

Secretary Hitchcock is highly incensed over the holding of the sun dance under the direction of Government officials. He said:

"If it is found that any persons, whether in the Government service or not, were instrumental in inciting the Indians to the sun dance torture, they shall be reached and punished if there is a law on the statute books under which it can be done."

China Satisfied With Arrangements.

Sir Chen-Tung Liang-Cheng, the Chinese Minister at Washington, discussed with Acting Secretary Loomis details regarding the admission of the Chinese Commissioner and his suite to the Woman's Fair at St. Louis. The arrangements made are satisfactory to the Chinese Government.

Played on a Raft, Drowned.

While playing on a raft Ernest and Raymond Connor, children, fell into a creek at Harlow, N. C., and were drowned.

POPE PIUS X. IS CROWNED

70,000 Persons Witness Ceremony in the Basilica of St. Peter's.

MANY FAINT IN TERRIFIC CRUSH

The Pontiff Almost Overcome by the Fatiguing Five-Hour Ceremony—Great Throng Acclaims the New Pope in Spite of the Notices Forbidding Applause—Stifling Heat in Rome.

Rome. — Before princes, diplomats, Roman nobles and 70,000 plain citizens of Rome the coronation of Pope Pius X. took place in the Basilica of St. Peter's. The ceremonies covered five hours, and at the end the Pope was fatigued and almost unable to raise his hand in blessing the multitude that did him honor.

Early in the morning the Cardinals assembled in the Sistine Chapel to bow in adoration before the new Supreme Pontiff. Then they formed in procession and conducted His Holiness to the Basilica of St. Peter.

The far-famed Sistine choir led the way. It was a cortege in which the order of procedure was reversed. Immediately following the choir were the junior clergy of Rome, and after them the bishops, archbishops, Cardinals and finally the head of the church.

The Papal Guard and the Noble Guard surrounded the moving line, while the chief officers acted as a special escort for the Pope.

The procession moved up the centre aisle of the huge cathedral, and came to a halt before the chapel of the Most Holy Trinity. Here the Pope adored the Host, then moved onward with his attendants to the high altar. On the east side the procession halted again, and, escorted by the Cardinals, he entered a small space railed off from the rest of the altar.

There was a moment of complete, most impressive silence as the Pope advanced to the front of the altar and kneeling on the lowest step engaged in prayer, while every head in the vast audience was bowed.

Then he mounted to the centre of the altar and seated himself before it. The Cardinals advanced, this time in the order of precedence, and again adored him. Kneeling down they kissed the Pope's slipper, then his hand and received from His Holiness an embrace in return.

After the Cardinals had returned to their places the Pope rose and stretching forth his hand gave to the people in the cathedral his blessing. This ended the ceremony of the consecration, and His Holiness left the cathedral in the same manner as he had entered.

The ceremony of the coronation was, if possible, on an even grander scale than the consecration.

The Pope entered the church in full state, and immediately upon his arrival began the celebration of mass. While it was being said the Cardinal Deacon approached His Holiness and placed upon his shoulders the Pontifical mantle, saying the following prayer as he did so:

"Receive the Holy Mantle, the plenitude of the Pontifical offices, to the honor of Almighty God, and of the most glorious Virgin Mary, His mother and of the blessed apostles, Peter and Paul, and of the Holy Roman Church."

The choir then sang "Esse Sacerdos Magnus," while the Pope marched slowly to the balcony over the principal entrance of the cathedral. Here in full view of the great throng assembled in the street below, the Pontifical mantle was removed and the Cardinal Dean placed on the Pope's head the pontifical crown, as he did so praying aloud:

"Receive the tiara adorned with three crowns, and know that thou art the father of princes and kings, the governor of the world, on earth the vicar of our Saviour, Jesus Christ, to whom is honor and glory for ever and ever."

The Pope then ended the ceremony by making two prayers, in blessing the people below.

Fully 70,000 persons thronged St. Peter's square when the Pope made his appearance later on the balcony and blessed the people. The enthusiasm was tremendous.

Thousands of people remained outside of St. Peter's all night so that they might be in advantageous positions during the ceremony this morning.

Notices were posted on every hand instructing the crowd to keep perfect silence when the Pope made his appearance, but this command was disregarded. As soon as His Holiness appeared on the balcony shout after shout went up, nor did the people cease from shouting until His Holiness motioned for them to keep silence so that he might give them his blessing.

The heat was terrific, and hundreds of people fainted, while a number of sunstrokes were reported.

Pope Pius went through the trying ordeal admirably, but a few minutes after the conclusion of the ceremony he broke down and would have fainted had not Cardinal Rampolla come to his assistance with a bottle of smelling salts.

Dropped Revolver on the Floor.

Mrs. Van Wagoner, wife of Martin Van Wagoner, one of Sheriff Franklin Carpenter's deputies, met death in an unusual manner at her home in Gansevoort, Saratoga County, New York. While carrying a self-cocking revolver to her husband, who was about to drive away on the Sheriff's business she dropped the weapon, which was discharged, the bullet entering a vital part of her body. She was sixty-two years old.

Four Lost When Yacht Went Down.

The small sloop yacht Lizzie sank near Vallejo, Cal., and Herman Salomon, Emil Cheline, William Hanson and David Wilson were drowned. Salomon and Cheline were business men and leave families. Hanson was a chief machinist in the United States Navy.

48,614,000 Barrels of Apples.

The revised estimate of the Apple Shippers' Association for the 1903 crop is 48,614,000 barrels. This is not much less than the 1902 crop.

PERISH IN A PARIS TUNNEL

Passengers Suffocated by Smoke From Burning Cars.

SCORES OF BODIES RECOVERED

The Disaster Caused by Two Empty Trains Catching Fire—Smoke Spread Panic Among the Passengers on Other Trains—A Wild, Selfish Scramble Followed, Resulting in Loss of Life.

Paris, France. — A catastrophe, in which about ninety persons were killed, eighty-two of whose bodies had been found, occurred on the Metropolitan Electric Railway, which runs mostly under ground. About 8 o'clock one of the trains which run on five-minute schedules broke down at Menilmontant Station, which is in a poor and populous section of the city. This train was promptly emptied, and the train which followed was ordered to push it to the repairing sheds. On the way these two trains caught fire, but the employes succeeded in escaping.

Meanwhile a crowded train reached Les Charonnes, the preceding station, and the officials, seeing smoke pouring out of the tunnel, gave the alarm. A panic ensued, the passengers struggling to escape from the station. Amid the increasing smoke many attempted to return along the line toward Belleville, and were suffocated.

The officials seem to have lost their heads, and are quite unable to say how many passengers went out. It is known that about half a dozen who were partially suffocated were treated at a pharmacy near the station. The fire brigade was for a long time unable to enter the station or the tunnel, owing to the dense smoke. Tens of thousands of anxious people gathered about the station. All the police and fire authorities were on the spot, and the excitement was intense.

At 3 a. m. the firemen succeeded in flooding the burning mass, and shortly afterward they were able to enter the tunnel. They brought up the bodies of five men and two women, all belonging to the working class.

The extent of the disaster was only learned about 6 o'clock, when it became known that three empty trains were burned and a fourth was full of victims.

FOUR YOUNG MEN DROWNED.

Explosion of Their Naphtha Launch While on a Fishing Trip.

Bangor, Me.—By the capsizing of a naphtha launch off Ash Point, near Rockland, four young men were drowned and two others narrowly escaped with their lives.

The drowned are Henry K. Crocker, twenty-three years old, son of Superintendent Jonathan Crocker, of the Rockland and Camden Water Company, a graduate of the University of Maine this year; [illegible] ty-one, a [illegible] sity of Ma[illegible] an athlete [illegible] twenty-three; Raymond G. Hall, aged nineteen, all of Rockland. Those saved are Oliver Hills, of Rockland, and Thomas Hodges, of Bridgeton, Me. The young men were on a fishing excursion.

HURRICANE ON MARTINIQUE.

Houses Unroofed and Sailing Vessels Badly Damaged.

Fort de France, Martinique.—The Island of Martinique was swept by a hurricane of great violence. Its duration was ten hours, and it was particularly severe during two hours at Fort de France, where it caused much destruction. Hundreds of houses were unroofed and several sailing vessels were badly damaged.

No fatalities, however, have been reported. The roads are impassable on account of the fallen trees, which were torn up by the roots. Several towns on the island suffered considerably, principally Trinito, Ste. Marie, Carbet, St. Joseph and Francois. The storm moved in a northwesterly direction.

LOST CHILD FOUND IN CISTERN.

Rewards Aggregating $1100 Were Offered For Little Lad Found Drowned.

Indianapolis, Ind.—Little Ted Kendall, who disappeared from the home of his parents, Mr. and Mrs. Harry Kendall, and for whom a diligent search had been made by the neighbors and the police force, was found in a cistern a few doors from the Kendall home.

It is supposed he walked into the cistern and was drowned. Rewards aggregating $1100 had been offered for his return.

The child last was seen alive standing on a corner watching a hand organ grinder.

PENNY POSTAGE WOULDN'T PAY.

England's Postmaster-General Frowns on International Proposal.

London.—In response to a correspondent advising penny postage between Great Britain and the United States, Postmaster-General Austen Chamberlain writes that it would be difficult to adopt such a scheme for the benefit of one country while refusing it to others.

He says the sacrifice of revenue involved in the adoption of international penny postage would be so great he does not feel justified in proposing it.

Fatal Quarrel Over Indian Girl.

A lovers' quarrel over Florence Mackey, an Indian girl, resulted in the killing, at Cree Camp, near Havre, Mont., of Cree Tom and the wounding of two other men.

Earthquake in Lisbon.

A violent earthquake shook Lisbon, Portugal, and vicinity. The duration of the shock was two seconds. The earthquake caused a great panic and some damage, but no fatalities have been reported.

$500,000 Damage by Hail.

Reports from the farming region of Northern Colorado show such great destruction of crops by a terrific hailstorm that the total damage is conservatively estimated at more than $500,000.

PRESIDENT ON LYNCHING

Letter of Praise Sent to Governor Durbin, of Indiana.

Says Mob Violence is Anarchy, the Forerunner of Tyranny—Laws Should Work Swiftly and Surely.

Oyster Bay, L. I.—In a letter, the publication of which was authorized, President Roosevelt commends Governor Winfield T. Durbin, of Indiana, for the attitude he assumed recently respecting lynching. The President also embraces the opportunity to express his own views in reference to lynching and mob violence generally, pointing out that mob violence is merely one form of Anarchy, and that Anarchy is the forerunner of tyranny. The President vigorously urges that the penalty for that crime which most frequently induces a resort to lynching shall be applied swiftly and surely, but by due process of the courts, so that it may be demonstrated "that the law is adequate to deal with crime by freeing it from every vestige of technicality and delay."

A portion of the President's letter is as follows:

"All thoughtful men must feel the gravest alarm over the growth of lynching in this country, and especially over the peculiarly hideous forms so often taken by mob violence when colored men are the victims—on which occasion the mob seems to lay most weight not on the crime but on the color of the criminal.

"In a certain proportion of these cases the man lynched has been guilty of a crime horrible beyond description; a crime so horrible that so far as he himself is concerned he has forfeited the right to any kind of sympathy whatsoever. The feeling of all good citizens that such a hideous crime shall not be hideously punished by mob violence is due not in the least to sympathy for the criminal, but to a very lively sense of the train of dreadful consequences which follow the course taken by the mob in exacting inhuman vengeance for an inhuman wrong.

"It certainly ought to be possible by the proper administration of the laws to secure swift vengeance upon the criminal, and the best and immediate efforts of all legislators, judges and citizens should be addressed to securing such reformation in our legal procedure as to leave no vestige of excuse for those misguided men who undertake to reap vengeance through violent methods.

"The nation, like the individual, cannot commit a crime with impunity. If we are guilty of lawlessness and brutal violence, whether our guilt consists in active participation therein or in mere connivance and encouragement, we shall assuredly suffer later on because of what we have done. The cornerstone of this Republic, as of all free governments, is respect for and obedience to the law. Where we permit the law to be defied or evaded, whether [illegible] overthrow, and of the substitution therefor of a system in which there shall be violent alternations of anarchy and tyranny."

TOOK $80,000 FROM PREACHERS.

Fugitive Treasurer of Aid Society Sends Confession to Pastor.

Boston.—In a letter written from Montreal to the pastor of his church in East Boston, Willard S. Allen, Treasurer of the Preachers' Aid Society of the New England Conference of the Methodist Episcopal Church, confessed that he was a defaulter to the amount of more than $80,000 of the society's funds. He will be arrested.

Mr. Allen has been Treasurer of the society for twelve years and Clerk of the East Boston District Court for twenty-nine years, and for sixteen years was a prominent member of the School Committee of Boston. He left home about a week ago without announcing his destination, and the first heard from him was the letter to the East Boston clergyman. Mr. Allen said he had lost the money in speculation. He requested the minister to inform the members of the Allen family and the officers of the society of his confession.

Mr. Allen for more than forty years has been prominent in the legal circles and political and social life of East Boston. He is sixty-two years old.

BASEBALL PARK'S ACCIDENT.

Many Killed and Injured by Balcony Collapsing in Philadelphia.

Philadelphia, Pa.—As a result of the accident at the Philadelphia baseball park, when the balcony at the Fifteenth street side of the grounds fell to the street, carrying with it several hundred baseball enthusiasts, six persons are dead, ten wounded mortally and about 200 others injured.

The authorities have set to work to find who is to blame. That the people themselves caused the accident by rushing on the frail balcony to see a street disturbance is not denied.

Coroner Dugan, who has assumed charge of the investigation, visited the ball ground and made a careful examination of the collapsed balcony and the entire equipments of the ground.

Manager Shettlin, in behalf of the Philadelphia Baseball Club, issued a statement deploring the accident. The manager said that the disaster was in no way due to any neglect on the part of the officials of the club.

The dead are: Edward Williamson, sixty years old; George Cunningham, forty-six; Mathew P. Reid, thirty-nine; Joseph Edgar, forty; Alfred Rogers, sixty-nine; William Graham, twenty-four.

Irish Land Bill's Progress.

The Irish Land bill has passed the committee stage in the House of Lords. Many more amendments were pressed with great persistency, but none was successful, except one providing that a person aggrieved by an order made by a Commissioner may apply to the Land Commission for a rehearing.

Battle Won by the Turks.

A fight occurred near Sorovuch in which 1700 Macedonian revolutionists were routed by five battalions of Turkish troops with artillery.

SECRETARY ROOT TO RESIGN

He Will Tender Resignation Before Sailing For England.

TAFT MAY BE HIS SUCCESSOR

The Resignation Will Take Effect Whenever the President Sees Fit—Change is Not Expected Until Congress Meets—Root a Member of the Alaskan Boundary Commission.

Washington, D. C.—Before Secretary Root sails for London to sit with the Alaskan Boundary Commission he will place his resignation in the hands of President Roosevelt in order that the President may appoint a Secretary of War if it is deemed necessary during Mr. Root's absence. It is expected, however, that the resignation will not be acted upon until after Congress meets. The appointment of Mr. Root's successor will depend somewhat upon the length of time that Secretary Root will be engaged upon the Alaskan Boundary Commission.

Secretary Root's desire to leave public life is based largely on personal grounds. His family does not like the life in Washington, and the Secretary desires also to return to his law practice in New York City. The great questions that were pending in the War Department, relating mainly to the administration of the islands acquired from Spain and the establishment of a government in Cuba, have been disposed of during Secretary Root's administration. The reorganization of the army under the general staff plan is now under way, and the Secretary feels that he has accomplished the work that he was called on to do when he became Secretary of War.

While Secretary Root is in London he will remain in communication with the War Department, and matters pertaining to the General Staff and other important affairs will be referred to him. If the sittings of the Alaskan Commission extend beyond December 1 it is likely that the Secretary's resignation will be accepted and his successor appointed at that time, and if the situation in the War Department becomes such that a Secretary is needed to take charge of affairs, one will be appointed earlier.

It is believed here that there will be a great deal of delay in the consideration of the Alaskan boundary case and that the United States Commissioners may be detained in London several months.

It is understood that the matter of his successor has been discussed, and, while nothing official can be obtained, it is believed that the position will be tendered to Governor Taft of the Philippines.

Oyster Bay, L. I.—It is understood here that the resignation of Mr. Root [illegible]

For a long time Secretary Root has desired, for pressing private reasons, to retire from the Cabinet. When Mr. Root became President, Secretary Root indicated his wish to leave the Cabinet within a year, but his friendship for the President was so staunch and his interest in pending questions before the War Department so deep that he was persuaded to remain for a longer period than he had intended.

Even now he has not indicated to the President just when he may leave the Cabinet, but he and the President have discussed the subject many times and have a mutual understanding regarding it. It can be said that the President expects that the country will have the benefit of Secretary Root's services yet for several months, certainly until the beginning of the next year.

APOLOGY TO RUSSIA.

Sultan Sends His Son to Express Regret at Murder of Consul.

St. Petersburg, Russia.—A telegram was received from M. Zinovieff, Russian Ambassador at Constantinople, stating that by command of the Sultan Prince Ahmed Effendi, the fifth son of the Turkish sovereign, called at the embassy to express the deep distress and regret occasioned to his Majesty by the assassination of the Russian Consul by a Turkish sentry at Monastir. The Prince requested M. Zinovieff to bring to the notice of the Czar this renewed expression of feeling.

SAW PLAYMATE KILLED.

Little Paterson Boy Ran Under a Wagon After a Ball.

Paterson, N. J.—David McKellin, four years old, was killed in the presence of his playmates on Union avenue.

McKellin and half a dozen other children had a rubber ball and were throwing it around, when William Wilson drove by on a wagon filled with sand. The ball bounced under the vehicle, and little David ran between the front and rear wheels to recover it. The rear wheel, caught him, knocked him down, and crushed his head.

$12,000 FOR KILLING OUTLAWS.

Oklahoma Deputy Marshals Return With Two Bodies to Claim Reward.

Guthrie, Okla. Ter.—Deputy Marshals Bennett, Willetts and Jacobson arrived here from Pawhuska, Osage Nation, with the bodies of two members of the Martin gang of outlaws, killed in a fight a few days ago.

The dead men have been identified as Will and Sam Martin. Rewards aggregating $12,000 had been offered for the men dead or alive.

Boston Tax Rate Unchanged.

The tax rate for Boston, Mass., for 1903 was announced as $14.80 per thousand, the same rate as last year. A total city valuation of $1,220,450,323 includes real estate to the value of $985,553,300, and personal estate, $234,897,023.

King Peter's Sons in Servia.

The children of King Peter arrived at Belgrade, Servia, from Russia. The Crown Prince expressed his delight at being able to step on the soil of his forefathers.

A Sham Fight in Earnest.

At the encampment of the Missouri National Guard on Lake Contrary last night's sham battle proved a battle indeed. Far off in the darkness, away from the sight of the gayly dressed throngs of spectators, there was a fierce conflict.

A company of infantry had stolen upon a battery to capture it, but the battery refused to be captured. This fight was not down on the programme, but it was by far the most important of the battle. The heavy butted Krag or Springfield rifle was used with telling effect upon the battery men, who forgot not to use their sabres.

The fight was led by Capt. Connelly, of the First Regiment of St. Louis. During the battle Private Gates and Private Kiefler, of Company F of the infantry, were seriously injured, both by sabre blows. They are in a dangerous condition. A dozen other soldiers were more or less seriously injured.—Chicago Tribune.

Register on the Wrist.

A Viennese physician named Dr. Guertner has patented an instrument which tells exactly the rate of the pulse while a patient is under the influence of anaesthetics, says the London Express.

The instrument is fastened on the forearm of the patient, and shows on a graduated dial the varying strength or weakness of the action of the heart as affected by the narcotic. It has been experimented with at several of the leading hospitals in Vienna, and excites universal admiration.

With the aid of this instrument it is hoped that many of the deaths which take place while the patients are under the influence of anaesthetics may be avoided.

Fully 2500 persons commit suicide in Russia every year. N. Y.—33

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. Dr. R. H. Kline, Ltd., 931 Arch St., Phila., Pa.

Eighty-five per cent. of the children of Japan are now in school.

Ask Your Dealer For Allen's Foot-Ease. A powder to shake into your shoes; rests the feet. Cures Corns, Bunions, Swollen, Sore, Hot Callous, Aching, Sweating Feet and Ingrowing Nails. Allen's Foot-Ease makes new or tight shoes easy. At all druggists and shoe stores, 25 cents. Sample mailed FREE. Address Allen S. Olmsted, LeRoy, N. Y.

Automobile building gives employment to 20,000 persons in France.

How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & Co., Toledo, O.

We, the undersigned, have known F. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by their firm.

Piso's Cure cannot be too highly spoken of as a cough cure.—J. W. O'BRIEN, 322 Third Avenue, N., Minneapolis, Minn., Jan. 6, 1900.

Thirteen new theatres, to cost $3,000,000, are building in New York City.

My Hair

"I had a very severe sickness that took off all my hair. I purchased a bottle of Ayer's Hair Vigor and it brought all my hair back again."
W. D. Quinn, Marseilles, Ill.

One thing is certain,—Ayer's Hair Vigor makes the hair grow. This is because it is a hair food. It feeds the hair and the hair grows, that's all there is to it. It stops falling of the hair, too, and always restores color to gray hair.

$1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

FREE! TO WOMEN
A Large Trial Package of
PAXTINE TOILET ANTISEPTIC

A NEW SPECIALTY FOR WOMEN.

Internal cleanliness is the key to woman's health and vigor. Inflammation, Soreness, Pelvic Catarrh cannot exist with it.

Paxtine used as a vaginal douche is a revelation in combined cleansing and healing power. It kills all disease germs. In local treatment of female ills it is invaluable. Heals inflammation and cures all discharges. Never fails to cure Nasal Catarrh. Cures offensive perspiration of arm pits and feet. Cures Sore Throat, Sore Mouth and Sore Eyes.

As a tooth powder nothing equals it. Removes Tartar, Hardens the Gums and whitens the teeth, makes a bad breath sweet and agreeable.

Thousands of letters from women prove that it is the greatest cure for Leucorrhoea ever discovered. We have yet to hear of the first case it failed to cure.

To prove all this we will mail a large trial package with book of instructions absolutely free. This is not a tiny sample, but enough to convince anyone.

At druggists or sent postpaid by us, 50 cts. large box. Satisfaction guaranteed. The R. Paxton Co., Dept. , Boston, Mass.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE BY THE REV. DONALD D. MacLAURIN.

Subject: The Greatest Thing in the World —The Distinguished Divine Delivers a Sermon Which is as Scholarly and Readable as Any of Recent Years.

NEW YORK CITY.—Dr. Donald D. MacLaurin, of Rochester, preached Sunday morning in St. John's M. E. Church to a large audience. His sermon was the first in a series on "The Greatest Thing in the World." Dr. MacLaurin said:

I have most earnestly sought to bring you on successive Sundays the best ministry I have yet been able to give you, that your lives may be broadened and deepened and lifted up into higher realms of spiritual achievement; and I could find no theme of greater value, as I saw it, than that which is suggested by the chapter which I read to you, the thirteenth chapter of Paul's first epistle of the church at Corinth. And so for eight weeks, we shall have our texts from this chapter; and this morning you will find our text in the first verse of the first chapter of First Corinthians: "If I speak with the tongues of men and angels, but have not love, I am become sounding brass or a clanging cymbal."

Nor must we not think that we shall become tired of this wonderful theme. Did you ever know any one to become weary of a diamond? Among the gems of the Lord God is found this chapter, and though I do not profess to be a skillful lapidary to bring out its flashing facets, I think, with the aid of the divine spirit, we shall find in each service something fresh and helpful and new.

This chapter has been in all ages of the church especially admired; would that it had received in all the ages of Christian history that more practical and valuable appreciation which would have been experienced by a practice of its principles and an acceptance of its precepts. Tertullian said: "It is uttered with all the force of the spirit," and the great thinker is right. As I have pondered it for several years with ever growing interest, I have come to feel that, indeed, mortal faculty could never have written it. It never could have sprung from the brain or heart of even so great a man as Paul, unless heaven had given him the inspiration. It is, dear friends, an utterance of heaven, through Paul, a servant of God, to the sons of men.

It is a glorious hymn or pean in honor of Christian love, song as we have intimated, by the Apostle Paul when soaring up on the wings of inspiration into the very heights of Christian eloquence. Like the Forty-fifth Psalm, it may be fittingly called the "Psalm of Love," and not infrequently your speaker will so designate it in these Sunday morning services. It has the form of poetry; it has the inspiration of poetry; it has the coloring of the finest poetry. And if you could read it in the Greek you would catch the fullness of its imagery, as it is impossible for you to do in the best English version. It seems a profanation to attempt its exposition. It seems like analyzing a rose or dissecting a nightingale to take these principles apart one from another for the necessary analysis in the progress of our work. But it is so full of the very heart of the gospel message that we would be cowardly were we not to attempt the exposition.

The position of the psalm in the book in which it is found heightens its effect. You find it in the midst of lengthy argument. It reminds us very much of an oasis of towering palm trees and springing flowers and running brooks in the midst of a desert of sand. On either side is argument, is tumult; and right in the midst of all bursts forth his sublime song. It is very much like the song of the sweet-voiced school children in the midst of their hard work and the babel of their games. Or, better, like the very sound of the song of heaven's choir in the pit of Wall Street on a panicky day. We can easily imagine the deepening hush that must have fallen on the Corinthian church as they read this chapter, and we can imagine, too, the consternation produced in the minds of those Christians as they discovered one after another their favorite gifts or favorite possessions swept away by the great teacher. For Paul here shows that love is the one essential of Christian life. Love did you say? Love! that soft sentiment that hard-headed men say belongs to women and children. Do you mean to say that this is the spirit of his language? That is precisely what the apostle formulated. He affirms most explicitly the absolute worthlessness of life without love. Love at the beginning of it; love at the end of it: love filling the whole space between. Love at the end is not the same as love at the beginning. It is richer, grander, nobler, diviner. But without the first love the other could never be. The blossom and the fruitage bespeak the rootage, and the seed and the flower and the tree. And unless you have the first love—love for God—in your heart, the love that shall engage our attention on Sunday mornings will be a stranger to your experience. "If I speak with the tongues of men and angels, but have not love, I am become sounding brass or a clanging cymbal." It would seem as if all the Corinthian church were eloquent speakers, or at least were eloquent hearers; and let me say that eloquent hearers are as essential as eloquent speech. The Corinthian Christians were distinguished for their gifts in this direction; and so the apostle, knowing it, knowing them right well, for he was their father in the gospel, he supposes them capable of speaking in every tongue that rose from the lips of men or angels. That were they to have all and were destitute of love they were nothing but sounding brass or clanging cymbals. How hard this must have been on those people who cherished eloquence as more easy to imagine than to describe, for they placed great store by their gift of tongues and their eloquence of speech. And do you know we are often placing the emphasis at their wrong place. We are often guilty of that characteristic. These Corinthians were often putting the emphasis where the emphasis should not be. What Paul affirms and what the Gospel affirms over and over again is that it is not speech, that it is not doing but being, that God regards. Being is finer than doing; finer than saying; finer than any expression which it is possible for it to make of itself. So it is not speech but reality that God looks for and the church waits for, and the world is hungry for in you and in me.

Now, let us consider, if you please, in the first place, wherein love is superior to the most eloquent speech. "If I speak with the tongues of men and angels, but have not love, I am become sounding brass or a clanging cymbal." What is Christian love? It is more easily described than defined. That is precisely what the apostle has done in this great psalm of love. He nowhere defines it. He simply describes it, giving some fifteen characteristics of it. Indeed, I do not know where love is defined in the entire Bible, nor do I know a definition for it. You have heard the story of the teacher of psychology, who upon receiving a new class at the beginning of the term, instead of giving them a lecture, he asked one of the members of the class to define the human soul; and the young man rose and said: "The human soul is that faculty that thinks and feels and determine;" another member of the class added that the soul is immaterial. And then he said, will you tell me what the soul is not; and the young man had the sense to say, "I do not know;" and the great professor, whose familiarity with the subject is felt throughout the continent, replied, "Nor more do I." And I fancy that the first theologian in the world, were he asked to define love, and if he was honest and candid as the teacher of psychology he would say, "No more do I." That which comes nearest to being a definition of love is the summary of the divine law of the Old Testament and the New. Thou shalt love the Lord thy God with all thy heart and with all thy mind and with all thy strength, and thy neighbor as thyself. But this is not a definition of love; nor would it apply, especially the former part of it to the love under consideration now. It is not the reverent love of the heart to God, but it is that mysterious bond that unites men, the one to the other. A love that exists between people of a common spiritual experience. It is as Dr. Dodds well says: "The ligament by which the body of Jesus Christ is bound together. It is the cement by which the stones in the temple are united into one. That is as near a definition as you will be able to get from any known writing. It has Christianity in it. And so we sing, and we sing it heartily:

"Blessed be the tie that binds our hearts in Christian love,
The fellowship of kindred minds is like to that above."

But though we may not be able to define this Christian love, we know it when we see it, when we hear it, and we know how it appears in the earth. We know that love seeks with total self-forgetfulness the happiness of the object loved, and so long as we know what it does and how it behaves itself in the social fabric, we ought to be quite content. And I want you to notice at this point wherein love is superior to the most eloquent speech. Eloquent speech may mean self advertisement. Love always means self effacement. "The gift in question," says the brilliant Drummond, in his book entitled "The Greatest Thing in the World," and which I commend to you to read, "was once splendid and dazzling. It was a brilliant faculty drawing all eyes to the speaker and all ears to his voice." It is the gift of eloquence by which a man sways the mind and thrills the hearts of his hearers. Now you can see how a man without love, possessing such a power, gives to himself advertisement, and the fact is that some of the most brilliant orators of fame, and among them occupants of pulpits, are so fond of themselves and glory so much in their eloquence, that they forget the other elements that go to make up a manly Christian character. And I want to say to you that the man possessing that eloquence is in constant danger. The attraction which he has for the people always tends to centre his mind upon himself; and by and by he gets to be greater if he is not aware, than the Master Himself whom he professes to serve and represent.

Love, on the other hand, is self-effacement. Love goes forth in beneficent ministry, alleviating the wounds of broken lives all around. In perfect harmony with this thought is the teaching of the Master Himself. You remember that marvelous sermon in the mountain, in which He says: "Even so, let your light shine before men that they shall see your good works and may glorify your Father in heaven." The word "so" is to be emphasized as indicating the manner of the shining. Light may be held so close to the eyes as to dazzle the eyes; light may be held so close before the eyes of the world as to dazzle the eyes of the world. You are not to see the shining one, but you are to see the fruits, the results of the shining. This is the way with the old sun itself. You look out upon the lawns in the parks and the country side, and I have never seen the parks more beautiful than when I visited them soon after my arrival in this city a few days ago. You look out upon the grass and the growing grains and the vegetation and the flowers and you feast your eyes on the beauty and the wealth of the earth's surface; and you begin to say, whence came all this; who is the worker; who produced all this; and you undertake to look up at the sun shining yonder in the zenith of the heavens. And the old sun, for your termerity, will dart his red hot fire into your eyes and will leave a mark upon you that you will not forget for many a day. Do not look at me; look at the grass; look at the growing grain; look at the trees—look at the work, not at the worker. So with God Himself. No man has seen God at any time; we see Him only in Jesus Christ. No man has seen God the eternal, at any time; but we count the stars that bejem the dome above us, when the great daylight is gone, and the more we study them the more are we thrown back on the teaching of our childhood, when we learned to sing: "Twinkle, twinkle, little star, how I wonder what you are, up above the world so high like a diamond in the sky." You see the stars and the glory of them transports your wondering soul, but you do not see Him who made and keeps the stars. If God is invisible in Himself, He is not invisible in His ministry. You and I, beloved, who have been born anew, are sons and daughters of God, and we please Him most when like Him, we efface ourselves and are seen only in the beneficent ministry of our lives, in our homes, in our communities, in our churches, in our city, in the world. Then under this first point, we say again that love is of greater value to the church and to the world than the most eloquent speech. Now I may not say that eloquence is not valuable. No one of us would refuse it if proffered to us. I may not say—neither would Paul say—that eloquence, even the gift of tongues, was anything to be despised. In the apostolic age it served to attract the attention of men to the divine manifestations among the sons of men; and it was greatly coveted because of this force resident in it. But I want you to notice that only a few people can be eloquent and the great majority of us in regard to speech will have to exhibit reality rather than eloquence in speech, and serve our generation in the most practical manner available to us. Now I might establish this point by argument and by declamation, but I prefer to give you a few illustrations, to fasten what I mean in your mind.

A woman over here in New York City, some years ago, came to the City Mission Society and sought the secretary. "I would like to do something for God. I am not eloquent in speech, but I think I could distribute tracts among the poor and needy. Give me a suitable supply and I will render this service to my Lord." She was supplied abundantly. On going down the street she saw a policeman taking a poor woman to the station; she went to the station house and there learned the facts in the woman's case and when the woman was to be discharged. When she came out she was met by this good woman, who threw her arms around her neck and kissed her; and the woman said: "My God! Why did you do that? No one has kissed me since my mother died; why did you do that?" And the humble Christian woman said: "I do not know, unless it was Jesus sent me to do it." Without going into further detail, let me say that that life was redeemed by the kiss of that Christian woman, whose heart was full of love for her kind. This is the kind I mean. No eloquent preaching from the most brilliant preacher that you have ever had in the city could have reached that life as did that kiss. That reminded her of her departed mother. A poor young girl was dying in the city of Paris and on seeing a Christian woman who was a stranger to her, said to her: "You know I hate you Christians. You have nothing to give but good advice. You build fine institutions for us when we have fallen, but you do nothing for us to keep us from being thrown into the path of temptation." And no one but that good woman, acting with Miss Hunt in her beneficent work in the gay city of Paris, understood the dying energy with which she uttered those words. By and by this woman won her into the kingdom of God, and just before she died said to the Christian woman, who represented for the first time Christianity unto her: "Let me die on something that is yours. Won't you let me put my head on your pillow? I would like to die with my head on such a pillow as your pure head has rested on." It was granted. That is what I mean. That is the ministry that is open to love. Over yonder in the city of Detroit, a reporter called a little bootblack in the street to polish his boots. The little fellow came, but as he got out his brush and was about to begin a big, brusk fellow came along and said: "You go away, Jimmy; you go away. I will do this." And the reporter became indignant and said: "What do you mean by this?" "O, that is all right, boss. Do you know that Jimmy has been sick in the hospital for more than a month and he is not very strong and we boys when we are not doing anything turn in and help him. Is that right, Jimmy?" "Yes, that's right." And so he said: "All right, go ahead;" and as the boy was plying his brush and his cloth, and while he was so doing the reporter plied him with questions: "What per cent. of what you earn do you give to Jimmy?" "Eh?" "What per cent. of what you earn do you give to Jimmy?" "I don't know what you mean." "How much of the money that you receive do you keep and how much do you give to Jimmy?" "Do you think I am a sneak? I give all of it to him, and so do all the boys; we don't keep any of it." So when he finished the reporter said: "You are a pretty good fellow; here is a quarter, and you keep ten cents and give fifteen cents to Jimmy." "No, you don't," and he gave the quarter to Jimmy. That was diviner, that was nobler far than the grandest eloquence that Brooklyn ever heard.

Now notice in the second place, and I will make this point brief, the comparison by which Paul sets forth the superiority of love to eloquence. He says, If I speak with the tongues of men and angels, but have not love, I am become as sounding brass as a clanging cymbal. The gift without the grace is likened to the sounding of brass, to the clashing of cymbals of bronze. A great many preachers boast themselves of their soundness, sound in their theology—and I am not saying anything against soundness in theology. And one is sometimes tempted to say, Sound, yes, that is what it is, but it is without a ministry and without meaning for a hungry world. A clanging cymbal—noise, confusion, but no ministry, never helpful for a weary, hungry world. Let us be something more than jangling voices, clanging noises. Let us have reality, genuineness of heart, genuineness of love, genuineness of religion; that is what tells. That is what the world wants. That is what it is looking for. That is what God is begging for. I read a story some months ago in one of your newspapers: Two men who had met to talk on the corner of a street. While they were talking a hand organ began to grind out its dismal music. One of the men said, let us go on and get away from that wretched stuff. And the other said, now, I will not let you talk like that about that music. Why, do you know that that was "See the Conquering Hero Comes," composed by the great Handel. And his friend said: "I want you to come with me to a Handel festival. So a month later, he invited his friend to the concert, and so when the lively choruses were sung and the great symphony went on, this friend of his became enraptured. And he said: "Isn't that glorious, isn't that beautiful?" "Yes," said his friend, "do you know what it is? It is 'See the Conquering Hero Comes.' It is what you heard on the organ." Let love conquer your hearts and the world will make way for your coming, and we shall startle the world by the originality of our unselfishness. "If I speak with the tongues of men and angels, but have not love, I am become as sounding brass or a clanging cymbal." Let us have love.

Resisting Power.

When a physician is called to a case of severe sickness, the first thing that he estimates is the resisting power of the patient. The chances for his recovery are in proportion to his vitality. If there be little of that at the outset there is small hope of overcoming the disease. The resisting power of persons in full health is such that in an epidemic they throw off the disease germs that prostrate others. One cannot always tell from appearances just how much ability one has to withstand the inroads of a malady. Some who apparently are robust almost immediately succumb, while others who look frail recover from violent attacks. Of course dissipation, unhygienic living, unhealthful surroundings, sap one's resisting power, so that when a virulent ailment makes an attack one has strength insufficient to fight it off.

You see that it is not so much the malignancy of the disease as it is the vitality of the man that determines the result. Just so it is also in the moral world, says Wellspring. There are some persons living lives so upright, so spiritually healthy, that they are practically immune from temptation. And when they are overcome, they soon recover themselves, for their power of resistance is great. On the other hand, there are those who after succumbing to one temptation are completely swept away by the power of evil. How can that be accounted for? Obviously in the same way that the ability to resist physical disease is to be explained. There has been unwholesome moral living; the mind has been permitted to become familiar with evil thoughts; the soul has breathed in miasma and corruption, until one has no ability to put away temptation.

All this suggests the need of resisting power both against disease and against sin. A pure, clean, wholesome life, physical and moral, will make one secure against any harm that either can do.

Our Worst Enemy.

Dr. Theodore L. Cuyler, in estimating what he deems to be our worst enemy in this life, says: "Dangerous as the devil is, dangerous as worldly amusements are, the most dangerous enemy that we often have to encounter walks in our own shoes. That cunning, artful, smooth-tongued heart-devil, self, is the foe that needs the most constant watching and subjects us to the worse defeats. 'The flesh lusteth against the Spirit, and the Spirit against the flesh, and these are contrary the one to the other.' Paul had a tremendous battle along these lines, beating down his carnal nature by hard blows, and the old hero was able at the last to shout, 'I have fought a good fight; henceforth there is laid up for me a crown of righteousness!' Whoever has, by God's help, laid his desires, his plans, his purposes, his property, and, above all, his own will at the feet of Jesus Christ, is already one of the overcomers. He already begins to wear clean raiment, and the omniscient eye of God discerns on his brow the first flashings of the victor's crown!"

Discipline the Appetite.

Archdeacon Govett, of Gibraltar, in a letter to the public upon the consumption of alcohol in the British army, points out that despite the strong evidence adduced by Lord Napier and Lord Wolseley as to the criminal effects of alcohol in the army (nearly ninety per cent. of the crime being attributed to it), and despite the evidence of statistics, science and experience, the lads of both the army and navy of Britain are daily dosed with intoxicants. The marine, at the age of twenty, is served every day with his lot of rum, and cheap drinking canteens are regimental institutions. "Until these customs, supported by high authority, are destroyed," says Mr. Govett, "we shall have the shameful vices which send men to hospital or prison flourishing both in the army and navy. What is the use of discipline for the body, if there is no discipline applied to the appetite?"

Run With Patience.

It is not talent or genius that enables one to succeed so much as perseverance. We win not by the sudden start, but by keeping persistently at it. One may tire himself more by running a mile than by walking five. If we must run, let us run with patience the race that is set before us.—United Presbyterian.

U. S. SENATOR FROM SOUTH CAROLINA

Recommends Pe-ru-na

For Dyspepsia and Stomach Trouble

Ex-Senator M. C. Butler.

Catarrh of the Stomach Is Generally Called Dyspepsia—Something to Produce Artificial Digestion is Generally Taken.

Hence, Pepsin, Pancreatin and a Host of Other Digestive Remedies Have Been Invented.

These Remedies Do Not Reach the Seat of the Difficulty, Which is Really Catarrh.

EX. U. S. Senator M. C. Butler, from South Carolina, was Senator from that State for two terms. In a recent letter to The Peruna Medicine Co., from Washington, D. C., says:

"I can recommend Peruna for dyspepsia and stomach trouble. I have been using your medicine for a short period and I feel very much relieved. It is indeed a wonderful medicine besides a good tonic."—M. C. Butler.

The only rational way to cure dyspepsia is to remove the catarrh. Peruna cures catarrh. Peruna does not produce artificial digestion. It cures catarrh and leaves the stomach to perform digestion in a natural way. This is vastly better and safer than resorting to artificial methods.

Peruna has cured more cases of dyspepsia than all other remedies combined, simply because it cures catarrh wherever located. If catarrh is located in the head, Peruna cures it. If catarrh has fastened itself in the throat or bronchial tubes, Peruna cures it. When catarrh becomes settled in the stomach, Peruna cures it, as well in this location as in any other.

Peruna is not simply a remedy for dyspepsia. Peruna is a catarrh remedy. Peruna cures dyspepsia because it is generally dependent upon catarrh.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

The Influence of Climate.

Many instances might be cited in which climate has had a material influence on manufactures. A case in point is that of anhydrous paper, which is said to be the best dielectric for underground cables. This paper was formerly made almost exclusively in England, but it has been found that to get the best results a drier climate is needed, and the paper is now made in this country on an extensive scale, while its making has been discontinued in England.

For the Hour Was Late.

"I have something to tell you before I go," he finally said.

"Is it a long story?" she hastily asked.

"No; it is a very short one."

"Then I think you will just have time," she sweetly said.—Cleveland Plain Dealer.

Two immense anchors, supposed to be 200 years old, have been recovered from Irvine Bar (Ayrshire) by a dredger.

COMPELLED TO USE A CRUTCH FOR EIGHT MONTHS. DOAN'S KIDNEY PILLS CURED MRS. P. CONLIN, CARBONDALE, PA.

Mrs. P. Conlin, 80 Greenfield Avenue, Carbondale, Pa., says: "I suffered with backache, and, despite the use of medicines, I could not get rid of it. I was compelled to use a crutch for eight months, and a part of the time was unable to walk at all. I fairly screamed if I attempted to lift my feet from the floor, and, finally, I lost control of my limbs through weakness, as I could neither bend nor straighten up to my full height, and if ever a woman was in a serious condition, I was. My husband went to Kelly's drug store and brought home a box of Doan's Pills. I felt easier in a few days, and, continuing the treatment, I was soon able to walk. At the end of two weeks the pains in my loins left. When I had completed the treatment, I had not an ache nor a pain, and I have been in that condition ever since.

Doan's Kidney Pills, PRICE 50 CENTS. A SPECIFIC FOR KIDNEY TROUBLE.

NAME.....
P. O.....
STATE.....

For free trial box, mail this coupon to Foster-Milburn Co., Buffalo, N. Y. If above space is insufficient, write address on separate slip.

Aching backs are relieved. Hip, back, and loin pains overcome. Swelling of the limbs and dropsy signs vanish.

They correct urine with brick dust sediment, high colored, pain in passing, dribbling, frequency, bed wetting. Doan's Kidney Pills remove calculi and gravel. Relieve heart palpitation, sleeplessness, headache, nervousness, dizziness.

BEST FOR THE BOWELS

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

TARRANT'S SELTZER APERIENT
Used by American Physicians since 1844.

The Cooling Effervescent
For Prickly Heat, Stomach Disorders, Headaches, Constipation.

North Plainfield Weekly Review.

Founded March 24, 1900.

An Independent Republican Newspaper published every Saturday at 33 Somerset Street, North Plainfield, N. J.

HARRY H. WEBB, Editor and Publisher.

TERMS OF SUBSCRIPTION:

If paid in advance $1 per year; if not paid in advance $1.25 per year. The REVIEW is delivered by carrier in Plainfield and North Plainfield, and is on sale at news stands

Long distance and local telephone : : : 217.

Entered at the Plainfield post office as second class mail matter.

SATURDAY, AUGUST 15, 1903.

Subscribers of the Review who change their address for the summer, or for a shorter period, can have the Review sent to their vacation address without additional cost, by notifying the office to that effect. Addresses may be changed as often as desired.

AN INCONSISTENT STAND.

It is inconsistent for Democrats to try and make a political issue of the new amendments. For three years these amendments have been under discussion, and were passed by the legislature by a strictly non partisan vote. Not until they were passed did any opposition arise, and all thinking men will recognize the fact that the opposition comes from politicians who are at a loss for an issue, and take this up as their only hope.

The amendments may not be perfect, but they are a great stride forward, and can be changed if it is found necessary.

Among the leading lawyers of the State who favor these amendments are the following:

Former Justice Collins, Former Assistant Postmaster General Wm. M. Johnson, Attorney General Robt. H. McCarter, Edward Q. Keasbey, Judge George M. Shipman, Joseph Coult, William H. Corbin, John Whitehead, Chauncey G. Parker, Frank Bergen, DeWitt Van Buskirk, William T. Hilliard, Former Judge John B. Vreeland, Former Judge D. J. Pancoast, Hon. James J. Bergen and Richard V. Lindabury.

Among those opposing it we hear of only three, namely: Charles H. Hartshorne, William Nelson and Barton B. Hutchinson; and they oppose it on technical grounds only.

With the Governor and nearly every leading lawyer and judge in the State favoring the amendments, and a few politicians opposing them, no argument is necessary to convince a voter of the wisdom of voting for the measure.

INCREASE IN COUNTY TAX.

Tax payers will object to the increased appropriation of the Somerset County Board of Freeholders, but for all that they will be compelled to "grin and bear it." The increase in the appropriation is $10,000 over last year—just the amount needed to repair the macadam roads already built. This appears to be a large sum of money for this purpose, and from a superficial view, reflects on the construction of the roads, but the repairs are necessary and must be made if the roads are to be preserved.

Another large sum is required for bridges—a necessity which cannot be put off. New ballot boxes, to comply with the new primary election law, must be purchased, entailing a cost of several hundred dollars.

These extras, added to the regular current expenses, necessitate an increased appropriation.

We believe the board of freeholders of Somerset county will compare favorably with any board in the State for honesty, loyalty to the county, intelligence and in the economical conduct of the business, but at the same time this increased appropriation may possibly affect the new freeholder act which may be voted on at the next election and which provides for three commissioners instead of the present freeholders.

THE DEADLY TOY PISTOL.

The toy pistol, with its terrible record of lockjaw and resultant death, will soon be done away with if municipalities follow the example of Kansas City and Minneapolis, where toy pistols have been proscribed for every day in the year.

At Pittsburg a boy was wounded by one of these pistols; tetanus resulted and death soon followed. His father brought suit for $5,000 against the man who sold the pistol to his son. This is the first law-suit of the kind and is attracting wide-spread interest. Should the father be successful, other suits will no doubt follow.

The Newark Evening News wisely remarks in this connection: "A little State legislation of the right kind, not merely prohibiting the sale of these deadly weapons but giving the afflicted parents a specific, statutory right to sue for damages in case of accidents, might also help to abolish the toy pistol altogether." To which we might add, that a little common sense judiciously applied by parents with proper punishment whenever their children are found in possession of these pistols would also go a long way toward making them unpopular.

IN FAVOR OF AMENDMENTS.

Arguments in favor of the adoption of the proposed amendments to the constitution are many, while those against are few.

Attorney General McCarter, over his signature, sums up his argument as follows:

One—All agree that the vast increase in the business of the courts make a change necessary.

Two—If these amendments are not adopted no other amendments can be submitted to the people until the expiration of five years from next January.

Three—The present amendments were most carefully considered for more than a year and received the approval of the bar of the State, with few exceptions.

Four—The members of the Legislature, with few exceptions, and without regard to party, have approved them at three successive sessions.

Five—The Legislature, at its last session, voted to submit them to a vote of the people at an expense of $50,000 or $60,000 that they might be adopted.

Six—Both parties have thus committed themselves to the acceptance of these amendments, and those who voted in the Legislature to approve them cannot now be expected to array themselves in opposition.

Seven—The number of courts will not be increased, nor will anything be added the State's expenses. If the amendments are not adopted the business of the courts will require an increase in the number of circuit judges, the cost of which will fully equal the cost of a new Court of Appeals, without giving anything like equal relief and convenience to suitors.

Eight—There is no reason why vice-chancellors should not be appointed in the same way as the chancellor himself and the justices of the Supreme Court are appointed.

Nine—It is an unjust reflection upon the Governor, the Senate and the Supreme Court to hold otherwise.

Ten—The suggestion that vice-chancellors may conflict with each other is not to be entertained, assuming, as we must, that fit men will be appointed. New Jersey judges have not in the past acted in that way, and will not in the future.

Eleven—The mode of submission is simple and fair. The criticism of it is unjust and without merit.

Twelve—No judicial system can be proposed which will be accepted by all who are competent to form an opinion as to the best possible system. A system similar to that now advocated by the objector was submitted to the Legislature during the term of Governor Griggs and was rejected.

Thirteen—After many years of conference and consideration these amendments have been framed by the best minds of the State and have been met with scarcely any opposition during the three years they have been considered by the representatives of the people in the Legislature.

Fourteen—Pass them, and if the experience of the next five years suggests a better plan it can then be adopted. Do not continue the present condition for five years longer.

The first and last reasons are complementary. If the proposed amendments are defeated no others can be proposed for five more years. If the present system is to be changed, the proposed way is the only way possible until 1908. If the amendments prove unsatisfactory, other amendments can be voted on then. Rejection means five more years of the present dissatisfaction.

A NOTED United States Senator recently said, "My idea of the only way to succeed in politics is included in the following principles—perseverance, truthfulness, fidelity to friends, fairness to foes; above all strict integrity. I have sought to observe these principles, no matter whether I was up or down and it has paid." This is a good rule to follow not alone by the politician but by every business man as well.

that can be purchased, at as low prices as consistent with quality.
A specialty of vegetables and fruits.

Habits.

"Habits is hard t' change," observed Uncle Bill. That's true of pants jest as much as it is of people. Once a pair of flannel pants contracts a habit they'll keep right on contractin' an' nothin' 'll stop 'em."

"Jake Abbott's boy Hi went ter town last summer an' brought back a pair uf flannel pants, same as them swell city fellers wear. The man in the store told Hi thet they wouldn't shrink. He said they'd been washed an' shrunk so much already thet they couldn't shrink any more.

"They did though. After th' first time Aunt Mandy washed 'em they shrunk up t' th' top of Hi's shoes. After th' third washin's she ran peke-rin' strings round th' bottoms ter make knee pants fur Hi's little brother Eb.

"Which all goes to show th' truth uf what I said about habits. Them pants had been shunk so durn much afore they wus bought thet they'd got th' habit an' couldn't break 'emselves afterward."

An Awful Temptation.

Tim—So you wuz in Washin'ton, wuz yer? Wot kind of a burg is it, anyhow?

Hermes, Hooligan—Easy graft, Why, say, 'twould have been worth millions t' me if I'd forgot t' deliver dat message de President sent t' Congress.

Breaking It Gently.

The cashier of a certain firm had absconded, and the head clerk was decided on as being a fit and proper person to acquaint the head of the firm of the fact on his arrival.

There had been a dog fight in the street, and a small crowd was just dispersing as the chief's carriage dashed up.

"Whats' the crowd after, Jorkins?" demanded the head of the firm.

The chief clerk thought he recognized a chance of breaking the news gently, and seized it.

"The vacancy, sir," he replied.

"Vacancy? What vacancy?"

"Cashier, sir."

"But we want no cashier, Jorkins."

"Beg pardon, sir, but we've a vacancy for one."

"Jorkins, are you mad?"

"No, sir. That is, sir, I don't know, sir. Fact is, sir—all the cash is gone, and—and——"

"Well?"

"The cashier's gone with it, sir."—Baltimore World.

Not His Fault.

An amusing street incident happened recently. A young lady left her husband's side to look in a window. On leaving it she took, as she thought, her husband's arm, and continued her conversation.

"You see," she said, "you don't even look at anything I want you to see. You never care how I am dressed. You no longer love me. Why, you have not even kissed me for a week, and ——"

"Madame, I am sorry; but that is my misfortune, not my fault," said the man, turning round.—Exchange.

The Gift of a Light Heart.

By Professor Lattimer.

IS it possible to cultivate a light heart? Probably not; but all sorts of shifts have been practiced at all times to retain one. There have always been men like Thoreau and St. Francis who believed that property brought with it a heavy heart, and have refused, as did the American philosopher, to be "harnessed to his possessions." St. Francis "cast aside every weight" that he might free himself from "idle sorrow." He and his first disciples "loved nothing earthly and feared nothing earthly; they were secure in all places, troubled by no fears, distracted by no cares; they lived without trouble of mind, waiting without solicitude for the coming day." St. Francis in the fastnesses of the Italian hills singing French hymns among the highway robbers in his whimsical lightness of heart makes a strange picture. He knew French badly, but it seemed to him the language of gayety. The founder of the Franciscans, though we are told that he possessed what was quaintly called the gift of tears when performing his devotions in his cell, was never seen abroad without a smile, neither would he tolerate any appearance of heaviness in his followers. He rebuked a brother to whom a dejected manner had become habitual, saying: "My brother, repent thy sins in private and do not appear before the community thus downcast."

We are inclined to think that those who make their living—provided it is a fairly good one—in the sweat of their brow have lighter hearts than those who make it in the sweat of their brain. The high spirits which seem to be enjoyed by domestic servants—to judge by the sounds which come upstairs—are a case in point. Dusting, scrubbing and plate-cleaning seem to weigh on the heart far less than doctoring, journalism or the study of law or theology. Too often spirits are broken by overwork or by disappointment in the wild struggle to succeed which goes on among professional people. Certainly in the literary world light hearts are generally lost early, yet the lighthearted man of letters, though he is rare, is the most attractive of all light-hearted men. He knows how to express the music that is in his mind and is like a composer who is also an executant.

A White Race in the Philippines.

By George Harvey.

HEARSAY talk in Washington informs us that the Government proposes to run down the story of the existence of a race of good looking and energetic whites in the mountains of the Island of Mindoro in the Philippines. It appears that an expedition has been organized to penetrate into the interior of Mindoro, and find out whether such people exist there. The story about them has been obstinately persistent. The best version of it seems to be based on the report of Manuel Castro, a Filipino, to one Lieutenant Lorenzo de Clairmont. Castro claims to have visited this white tribe, which, he says, has lived in the Philippines since long before the Spaniards came there, and centres in a town of 20,000 inhabitants. He says that the members of the tribe are warlike, and have effectually discouraged intrusion on their privacy by Spaniards, though they have dealings with trading Filipinos. The men are described as fair-haired and blue-eyed; the women are surprisingly handsome. They live in well kept homes, are fond of athletic sports, and know agriculture and some of the arts. Lieutenant de Clairmont's name does not appear in the army register for 1902, but if there is such an officer in the Philippines who has a well informed native friend Castro, and if Castro is a truthful person and knows whereof he speaks, there may be an interesting item of ethnological news coming from Mindoro, which will at least be useful to the makers of comic opera. There was a recent story that certain companies of isolated Jews had existed as Jews for centuries in Western China, and on investigation it turned out to be true.—Harper's Weekly.

How to Hold a Wife.

By Elizabeth Bacon Walling.

HOLD the wife as you won the sweetheart, by gallantry and devotion. Neither time nor trite repetition has threshed the truth out of that threadbare saying: "Man's love is of man's life a thing apart; it is woman's whole existence."

Even if this were not true of man, by reason of his peculiar masculine organization, his bread-winning training would make it so. A woman lives in her emotions. To the woman who loves life means love. If after all she does not get love she is wretchedly, utterly, desperately disappointed.

Words of endearment and caresses are a necessity with woman because of her love nature and because they have formed her constant nourishment since the days of cradle.

Woman is a great big grown-up affectionate baby, eternally crying for love and putting up her mouth to be kissed. The things that contrive to make or mar a woman's happiness are mighty important to woman herself. Such an insignificant change in the heading of his letter as "darling" to "dear" has been known to send brides straightway into violent hysterics.

If a young husband omits in to-day's letter the "precious" by which for the first time he had called her in yesterday's letter—a meaningful love term that only proved the endearing power of absence—she mopes around the house all day in heavy hearted despondency. Could he have met anybody in Chicago between Sunday's letter and Monday's that has come in between them?

She reads his letters several times a day, wears them upon her heart, sleeps upon them and keeps the gas burning low to read over certain passages at intervals during the night. If in the bustle and bustle of things out in Chicago he fails in so many words to speak of their love she telegraphs to ask if he loves her still.

If he change his hotel before he can notify her, or if any of her letters are miscarried, he is routed out of bed by the porter in the wee sma' hours of the night with the information that his wife is waiting below in the parlor.

And then there is the kiss. In matters of the heart a woman is always measuring and analyzing and comparing and defining. If his married kiss, from some one of the various natural causes, is not as warm, as long, as deep or as often as the courtship one, she gets out her thermometer and yardstick.

The husband must be, to hold his wife, not boorish, but gallant; not indifferent, but loving and devoted; not domineering, but chivalrous; not stupid and bungling, but clever and patient.

The Peril to Liberal Education.

By Dr. Andrew F. West, Dean of the Graduate School of Princeton University.

IS it not a fact that the majority of college students to-day are not familiar with the commonplaces of literary information and the standard books of history, poetry and so on? Do they know the greatest book of our tongue, the English Bible, as their fathers did? What have so many of them been reading? The newspapers, of course, and fiction—not always the better fiction. As between books and the short stories in magazines; how few read the former! I am not speaking of the hard books of philosophy and science, or generally of the books that involve severe thought, but of the readable, delightful books, the pleasant classics of English. What a confession of the state of things it is that colleges have to make the reading of a few books of English literature a set task as an entrance requirement, and then ask formal questions on what ought to be the free and eager reading of every boy at home! How far it is true that the advocacy of teaching science may have operated, not to beget a taste for science, but merely a neglect of literature, is, perhaps, idle to ask. It is at least true that these neglecters of literature are not usually giving laborious hours to reading scientific works. Perhaps some day our schools generally will get "Readers" that have literature in them and that will help matters a little. But the so-called students who do not care to read or do not know how to read as all students should are with us in abundance as an ever present peril. The quiet book by the quiet lamp is a good charmer. Here the true student forms his friendships with the masters of thought and fancy, here they speak to him not under the constraints of the classroom; here he may relax without weakness, adventure without limit, soar without fear and hope without end. It is the old story. Books are as Huxley put it, "his main helpers," and the free reading outside the set tasks is, perhaps, next to music, his most ennobling pleasure. The loss of this is to-day the thing that does so much to deprive our college life and conversation of the fine flavor of that much misunderstood thing—Culture.

New York City.—Shirt waists with yoke fronts are among the latest features of the season and are peculiarly well adapted to young girls. This one,

MISSES' SHIRT WAIST.

designed by May Manton, includes box pleats and straps over the shoulders as well as the yoke, which is cut in battlements at the lower edge. The model is made of white linen, machine stitched and trimmed with pearl buttons, but all waisting materials, cotton, linen, silk and wool are appropriate. The straps over the shoulders are novel and effective, but both they and the yoke can be omitted if a plainer waist is desired.

The waist consists of the fronts, back and yoke. Both fronts and back are laid in full length box pleats stitched at each edge, but the backs are drawn down smoothly while the fronts pouch over the belt. The yoke is arranged over the upper edges of the fronts and beneath the centre pleat, which is cut in one with the front. The sleeves are among the latest with cuffs that match the yoke.

The quantity of material required for the medium size is four and a quarter yards twenty-one inches wide, three and three-quarter yards twenty-seven inches wide, three and three-quarter yards thirty-two inches, or two and a quarter yards forty-four inches wide.

WOMAN'S WAIST.

Woman's Waist.

Waists with extensions over the shoulders are among the most fashionable of the season and are becoming to the greater number of figures. The stylish one, shown in the large drawing, combines that feature with a novel trimming that gives a yoke effect and is adapted to many materials. As designed by May Manton, it is of nile green lousine silk with the trimming of cream lace piped with panne a shade darker than the silk, and the tucked portion above the centre pleat of cream mousseline, but all waist and gown materials are appropriate.

The waist is made with a smoothly fitted lining on which its various parts are arranged. The back is smooth across the shoulders and is drawn down in gathers at the waist line. The fronts are tucked to yoke depth and are gathered at the waist line where they pouch slightly over the belt. At the centre is a wide box pleat that is pointed at its upper edge, and above this pleat is the tucked chemisette, the edges of which are concealed by the lace. The sleeves are tucked above the elbows but form full puffs below and are gathered into straight cuffs.

The quantity of material required for the medium size is four and a half yards twenty-one inches wide, four yards twenty-seven inches wide, or two and a quarter yards forty-four inches wide, with five-eighth yards of all-over lace, one and three-quarter yards of applique and one-quarter yard of tucking to make as illustrated.

Baby's Short Clothes.

In putting the baby into his first short clothes, it is important to bear in mind that hitherto his skirts have not only served the purpose of protecting his limbs and abdomen from cold, but have prevented free movement of his little limbs. With shorter skirts comes the natural impulse to use his limbs, and baby becomes quite a "kicker." Long woolen stockings now become a necessity, and with them should be worn comfortable little shoes of soft, flexible leather. Do not take the flannels off the baby too soon, and, when put off, replace them on the least sign of chill. Many mothers do not lay aside thin little shirts and petticoats of flannel at all during the summer.—The Commoner.

Details of Dress.

It is the attention to the small details of her costume that makes a woman well dressed. Her dress may be beautiful, but if her gloves are not appropriate the effect is ruined. Her hat may be suitable and becoming, but if it be covered by the wrong veil all is lost. If her shoes are not in keeping, she will not appear as a well dressed woman.

The reason that the French woman is one of the best dressed women in the world is that she pays strict attention to even the smallest details. She has no flaring contrasts and no one part of her costume is conspicuous, all is harmony and the tout ensemble restful and pleasing.

Long and Slender Figures the Fashion.

The fashionable figure is long and slender, so Madame la Mode designs her trimming modes accordingly. Many smart frocks for morning wear have flat, band-trimmed bodices, with the bands adorning the front of the waist hanging loose from the belt over the skirt.

Colored Handkerchiefs.

Colored handkerchiefs to accompany morning frocks are enjoying greater vogue than they have ever known on this side of the water. They are shown in stripes, checks, plaids and in all the colorings common to tub frocks.

Shoulder Collars.

Shoulder collars of all kinds are gradually growing deeper and deeper, so that now they really should all be termed capes.

Pongee Petticoats.

Pongee petticoats, with double bias

BOX PLEATED WAIST.

yards twenty-one inches wide, three and three-quarter yards twenty-seven inches wide, or two and a quarter yards forty-four inches wide.

ruffles have each of these closely tucked and finished with deep stitched hems.

Woman's Box Pleated Waist.

Box pleated waists are much in vogue and bid fair to extend their popularity for many months to come. This one, designed by May Manton, is made of embroidered pongee stitched with corticelli silk, but the design is suited to the many washable fabrics as well as to silks and wools. When greater elaboration is desired, the collar and cuffs can be made of embroidery, lace or plain contrasting material.

The waist consists of the lining, which can be used or omitted as preferred; the fronts and back are closed at the centre front. Fronts, back and sleeves are laid in box pleats that are stitched just a quarter of an inch from each edge. Those of the waist extend for full length, but those of the sleeves are left free at the elbows to form soft and graceful puffs below.

The quantity of material required for the medium size is four and a quarter

HE SAW THE POINT.

Noticed a Marked Change When He Decorated Himself.

Here is a story that might have come from Secretary Hay. Perhaps it was told him by the traveler in foreign lands.

"I was traveling abroad," said the returned tourist, "and I noticed that in the railway carriages, at the stations, in the hotels, and everywhere, a certain class of travelers were paid every consideration, although they spent no more money than I did. The railway guard sprang to open the door for them; the hotel people gave them the best they had, and every one seemed anxious to do them honor. At one of the big hotels I noticed a number of these men who had got the best of me at all times for a number of days back, and I consulted the waiter.

"'Why is it,' I asked, 'that this man, and that man, and the other man are shown so much courtesy and attention?'

"'Ah,' said the waiter, 'they have been decorated. One has the Legion of Honor, the other the Golden Eagle, and that one the Order of the Star. All gentlemen having decorations are given the utmost consideration.'

"I saw the point and bethought me of an old inauguration badge I had with me, which I had worn as chairman of some committee. I dug it out of my trunk and pinned it on my coat. It was about ten inches long and three broad and as gaudy and tinselled as a dozen orders all in one. No one knew what it meant, but it was a decoration, and as such carried me all over Europe in as fine style as if it were an emblem of the noblest order of the Old World."—Washington Post.

WISE WORDS.

The people who win their way into the inmost recesses of others' hearts, observes a writer of keen perception, are not usually the most brilliant and gifted, but those who have sympathy, patience, self-forgetfulness, and that indefinable faculty of eliciting the better natures of others. Most of us know of persons who have appealed to us in this way. We have many friends who are more beautiful and gifted; but there is not one of them whose companionship we enjoy better than that of the plain-faced man or woman who never makes a witty or profound remark, but whose simple quality of human goodness makes up for every other deficiency.

But not by rolling seas, not from the heights of hills, not from out of the depths of starry and unfathomable regions, not from or through any of Nature's bounties or immensities does God show Himself as clearly to us as He does through the character of a man consecrated to Him and to His children on earth.

The catastrophe of every play is caused always by the folly or fault of a man; the redemption, if there be any, is by the wisdom and virtue of a woman, and failing that there is none.

Providence has nothing good or high in store for one who does not resolutely aim at something high and good. A purpose is the eternal condition of success. Nothing will take its place.

Error is a great deal worse than ignorance; it is better to know nothing than to know what isn't true.

Of almsgiving, as of giving advice, it may be said its value depends on the way in which it is done.

How easy it is for one to suggest a sure way for some one else to manage a troublesome affair.

The best sermon is that which prompts the hearer to do the most thinking for himself.

When the day is opened in praise and closed in prayer its progress will be sure.

Cleverness is a sort of genius for instrumentality. It is the brain of the hand.

The character that needs law to mend it is hardly worth tinkering.

There is no killing the suspicion that deceit has once begotten.

A Shakespeare Mulberry.

The bond of union between Stratford-on-Avon and Southwark, says the Westminster Gazette, was cordially acknowledged the other day by the reception accorded by the Mayor of Shakespeare's native town to the Mayor of Southwark. In the course of the visit to New-place the Mayor of Stratford offered to present a seedling of the famous mulberry tree in the grounds there for planting in one of the public gardens of Southwark—an offer which Councilor Bryan, himself an ardent Shakespearean student, cordially accepted. The interesting sapling is to be transplanted in the autumn.

Greatest of Gold Bricks.

The largest and most perfect gold brick to be received at the United States assay office, says the Minneapolis Journal, has been deposited at Deadwood, S. D., by a gold mining company. It weighs 1175 ounces and is over 900 fine, being worth approximately $22,000. It is seldom that gold of such fineness is brought to the Deadwood office from the plants in the hills, and while the office has received bars weighing about as much, they have not possessed the same value or anywhere near it. The gold is usually associated with silver or copper.

Unexpected Sympathy.

A lady from Belgrave square, addressing a working girls' club down at Bow the other evening in regard to general deportment, mentioned that in her grade of society girls would never think of conversing with any young man to whom they had not been formally introduced. "Don't we know it, miss," replied one of the audience sympathetically, "and ain't we sorry for you."—London Queries.

You should have seen her soar, George. Ha! ha!"

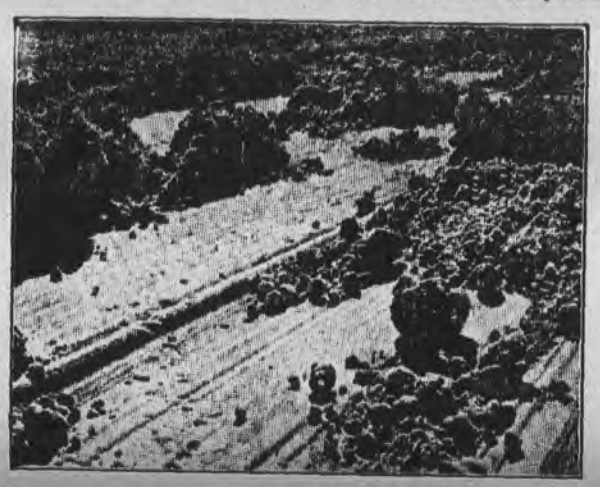
George—"Ha! ha! What a joker you are, James."—New York Sun.

AKS OF AN AVALANCHE

DOWN A PINE FOREST AND A VALLEY—FORMATION OF VO[illegible] AVALANCHE FLOOR.

M[illegible] tremendous force and strange ...es of the Alpine avalanches are ...ted in an article in the Wide ... Magazine (London) by John ...waffham. The avalanche to which particular reference is made by Mr. Swaffham was seen by him in the valley of the Dischmathal in the Engadine a year ago. "The Dischmathal is a fairly broad valley, with well wooded and not very steep sides. It lies, however, between mountains on many of which there are large glaciers, and it was from one of these that the immense mass of snow which caused so thick as to become a veritable fog, through which nothing could be seen for many minutes. For weeks after every tree and rock within a large radius was shrouded with a dirty covering of wet snow mingled with all manner of dust taken up by the fierce draught of the fall. Now, an ordinary well-behaved avalanche is content to roll its troubled masses down into the bed of a valley, there to stay until the sun has effaced its last relics from the summer landscape. Not so this one, the force and weight of which carried it right across the valley so that it *partly mounted the opposite* hillside—a thing almost unprecedented *in the history of avalanches in the* Alps or anywhere else.

"This same impetus and weight, acting on snow already packing under the heat of a week of spring sun, compressed the moving masses into a consistency little short of the familiar asphalt. Moreover, the masses naturally split up, and it was the side pressure



THE FLOOR OF AN AVALANCHE SLIDE.

chi[illegible] ruin originally fell. Gathering Tu[illegible]us as it went, *the avalanche pro*d its thousands of tons of snow The pine woods, through which it being road as clean as though every Cross[illegible] had been felled flush with the [illegible]nd by the axe of a miraculous [illegible]oodman.

"The chief glacier above the woods is the famous one called the Scaletta, but it was from a smaller field on the Jatzhorn that the trouble came. It had been snowing for about a week and the depth of new snow in the valley was about ten or twelve feet, much more on the high peaks. Next came a warm spell of true April weather. The new snow settled—i. e., grew compressed by its own weight and the softening influence of the sun. You are to remember that this new snow did not l[illegible] upon the earth nor yet upon a bare ro[illegible]

[illegible] Winter's rains. As it contracted [illegible] above it naturally began to expand slightly on its unstable base. The movement begun continued, and the whole mass commenced to shift. Finally it came away, leaving a gash of over a mile long on the side of the Jatzhorn where it had parted from the main mass. This gash was upwards of fifteen feet deep and was plainly visible miles away from the bottom of the valley.

"The fall was on such a scale that it swept everything before it down the valley sides. Acres of pines of unknown age went down as easily as skittles, *and the giant moved down* the valley with a roar heard for miles away, *and under a cloud of snow-dust* of the later parts which threw up the extraordinary levels or mouldings of snow shown in the photograph. At the same time five successive falls occurred from the same mountain on its other side in the Zuge gorge, which is on the coach road from Davos to the Upper Engadine. The noise of these joined forces with that of the Dischmathal, and the combined result was very curious. First there arose a loud, dull roar, which soon changed into a deafening thunder of ever-increasing volume, which again rose in a weird sort of *chromatic scale, mingled at last* with a wild sighing, almost a moan, *as of a thousand storm-wraiths* wailing for some dread disaster. This curious phenomenon was doubtless due to the great displacement of atmosphere caused in two valleys, the air from which rushed upwards only to meet a [illegible] either side to a height of over thirty feet."

It will be seen from the illustration that the motion of the avalanche has rolled the snow into innumerable balls and cylindrical masses.

Uncle Reuben Says:

A man may announce his own value, but nine times outer ten he will find dat odder men's figgers don't agree with his.—Detroit Free Pres.

Fire Fatalities.

There were in England last year 1684 *inquests on children who were burnt* to death. In 1425 of these cases there were no *fireguards.*

BUTTERFLY FARMS IN FRANCE

BY JACQUES BOYER.

Up to within a year or two, the butterfly farm *established at Eastbourn*, England, by William Watkins, an entomologist, was the only one of its kind. To-day, however, there exist several such farms in France, among which we desire to call special attention to those of M. Andre at Macon, Department Saone-et-Loire; M. de Labonnefon, at Cercoux, Department Charente-Inferieure; and Doctor Hugues, at Chomerac, Department Ardeche.

These gentlemen practically confine their efforts to the rearing of the rarest genera of the family bombycidae or

FIG. I.—COCOONS OF SEVERAL VARIETIES OF SILKWORM.

silkworms; and by fortunate crossings they have obtained some new varieties for which the collectors and the museums of natural history contend with weapons of gold. Moreover, they are endeavoring to acclimate in France the silkworms indigenous to other countries. The silk-producing larvae will live and reproduce in a wild state in the forests of France, and it is only necessary to collect the cocoons, from which the silk threads are easily obtained.

These attempts at acclimation have *in some cases been attended with en*couraging results. The ailanthus silk*worm, Attacus Cynthia, so called* because its caterpillar feeds upon the *leaves of the ailanthus tree, is a native* of Japan; the Antheraea Yama-Ma, a native of India, and a most beautiful butterfly whose caterpillar thrives [illegible] silkworms, the Antheraea Mylitta, which because of its late hatching or breaking forth is more difficult to raise; and the Attacus Atlas, the largest known of the bombycidae and which produces very large cocoons, have all been successfully domesticated or acclimated. Fig. 1 shows the cocoons of the exotic silkworms which are being introduced in France. 1 is that *of the Attacus Cynthia; 2, Antheraea* Pernyi, one having broken out of and *one being still concealed in an oak* leaf; 3 is the full ovoid cocoon of the *Antheraea Mylitta; and 4 is the Atta*cus Atlas carefully wrapped up in the leaf. The requisites for the successful

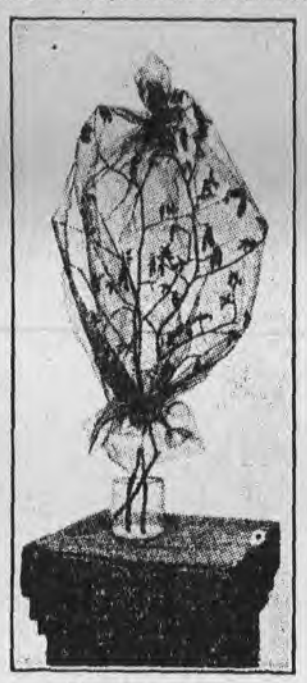


FIG. II.—A BROODER.

culture of the butterfly are a garden of greater or less extent in which are oaks, *ailanthus trees, pines*, plum trees, *ricinus* or castor-oil plants, and other bushes the leaves of which serve to nourish the larvae or caterpillars. Disposed here and there about the garden are various appliances of the most simple kind. Ordinarily the eggs are placed in a brooder such as is shown in Fig. 2. This is altogether a homemade contrivance for preserving the larvae from destruction and at the same time affording them a means of nourishment after they are hatched.

Branches of the trees with the cocoons still clinging to them are plucked and arranged so that their woody stems may be inserted in a vase of water, the whole upper part being enveloped by gauze or mosquito netting. In the lower part of the netting, where it comes in contact with the stems, is placed a lot of crumpled paper to prevent the wandering insect from taking an involuntary bath. Notwithstanding all these precautions, *sometimes* the imprudent little beasts fall into the

FIG. III.—PLACING THE SLEEVES AND THEIR CONTENTS ON THE TUBES.

water, and if an attendant with his pincers does not come promptly to their aid, they suffer the same penalty as *other mortals who cannot swim.* On the other hand, these caterpillars have *a most fastidious taste.*

They need pure air, offensive odors are detrimental to their *health; above* all, their food must be sound, succulent and plentiful. They are ravenous feeders, incessant eaters, and consume much more in proportion to their size than an ox. Accordingly, as soon as the leaves in a brooder have been nearly devoured, another one is prepared, placed in a vessel of water, and brought sufficiently close to the first one to allow the insects to change their habitation without great disturbance. Should it be the desire of the breeder to mount the butterflies for the museum, he first asphyxiates them in a vial containing potassium cyanide. Once dead, they are mounted on stands with wings *carefully and completely* distended. To prepare the caterpillars for the entomologist's *cabinet is quite* another thing. The best process for preserving them is by inflation, a

FIG. IV.—INFLATING A CATERPILLAR.

manipulation which requires no little dexterity and patience. Fig. 4 shows M. Andre in the act of inflating a caterpillar. Before this can be done *the insect must first be prepared* by pressing it between sheets of paper, and, after all the soft parts of the body are expelled through the posterior opening, by making an incision with a scalpel in the large intestine two or three centimetres from the end of the body, the latter is threaded, so to speak, upon the fine point of a thin glass tube, which is connected by its other end to an ordinary rubber spraying bulb, or any bulb provided with valves for the admission and ejection of air. The one shown in Fig. 4 is a combination of two bulbs and an idea of M. Andre, the naturalist.

Moreover, during the inflating process, the subject is placed in a little stove or oven heated by an alcoholic *lamp, shown in the figure just in front* of the operator. After a few minutes *the caterpillar begins to assume the* appearance of life, and it is then ready to be placed in an entomologist's collection.

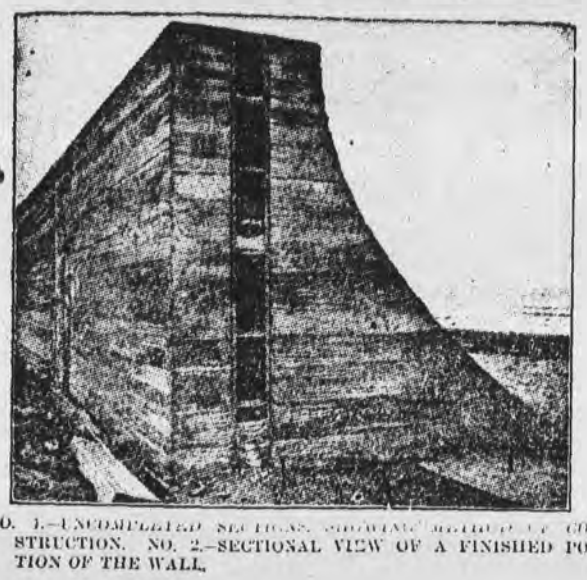
Various other openings of an industrial or artistic nature are available to the French "bombyculturist." The butterflies are worked into brooches or even into highly ornamental cathedral windows by placing, for example, some Actias Mimosae and other insects together with some desiccated flowers and leaves, between panes of glass. Our elegant dames also affect a gorgeous decoration of their hats with butterflies, for which purpose the insects must undergo a certain extensive *preparation.* After the wings have been covered with a transparent alcoholic *varnish, the butterfly is glued upon* a piece of satinette which is afterward cut out to conform exactly to their contour. A steel or silver wire is run through the thorax, forming a skeleton at once rigid and light. Mounted in this manner, the butterflies become a very attractive and graceful ornament. —Scientific American.

Whence Comes Volcanic Dust?

Dr. E. O. Horey, *of the American* Museum of Natural History, New York, writes from Kingston that the Soufriere in St. Vincent is still in a state of agitation. Outbursts issue from time to time from the centre of the lake in the crater. The most impressive changes which have taken place are in the erasion of the lately erupted volcanic material, and he estimates that 25,000,000 tons have been carried to the sea from the valley of the Wallilton alone!

Large numbers of ladybirds are looked upon with superstitious dread, and the owl and raven are birds of evil omen without good reason.

BUILDING THE NEW SEA-WALL FOR THE PROTECTION OF GALVESTON, TEXAS.



NO. 1.—UNCOMPLETED SECTIONS, SHOWING METHOD OF CONSTRUCTION. NO. 2.—SECTIONAL VIEW OF A FINISHED PORTION OF THE WALL.

GOOD ROADS

The Necessity.

If the State of Georgia should appropriate annually a half million dollars for the next five years, to be expended in the establishment of an improved public road system in the State, the expenditure would not be extravagant. On the other hand, the State could make no better investment. Such an appropriation is, of course, out of the question. The Legislature is precluded from making such appropriations both by reason of the financial condition of the State and the laws governing such matters. It is, however, within the power of the Legislature to accomplish in another way a result which, measured in actual dollars and cents, is equal to such an appropriation. We refer to the bill now pending before the Legislature to employ the felony convicts of the State upon the public roads.

An opportunity is now presented to utilize the State criminals by working them upon the public roads throughout the State, systematically and scientifically, so that in a few years Georgia instead of being far behind other States, will be equal to, if not in advance of, any other section of the country. Good roads are the arteries of trade, the avenues of wealth. Nothing save education contributes so much to the prosperity, happiness and comfort of the citizens. There are few things that add as much to the value of property. What good reason is there for refusing to work the criminals of the State upon the public roads —*so that the people may receive the* benefit of their labor? Absolutely none. If it be *urged that the State* will receive a revenue of $150 or $200 per head from each convict by leasing them, the reply is that it will receive many times that amount in increased values, increased taxes, extended business, improved citizenship, and enlarged prosperity by employing these convicts on the public roads.

Public roads, next to railroads, are the greatest developers we have. Who can estimate the value of the turnpikes of Kentucky, Tennessee and Virginia? Convenience to market, to post-offices, schools and churches is what is necessary to make useful and permanent citizens. Good roads furnish all of these things. The tendency of late years has been for people in the country to flock towards the towns and cities. The reason for this is obvious. *On account of the present* public road system of the State, or rather *lack of system, they are unable often*times to market their products, they have no educational facilities, they are removed from churches and otherwise subjected to inconveniences that people in the cities and towns do not feel. A good system of public roads will do more to remove these troubles and satisfy the farming element, which, at last, is the backbone of the country, than all other influences combined. If the State of Georgia will employ her criminals in the improvement of the public roads of the State, instead of receiving $200 per head for their services, she will receive many times that amount in actual increased *values, to say nothing of the benefits* conferred upon her citizens, which can*not be estimated in dollars and cents.*

Georgia is a reasonably prosperous *State, but she would be tenfold more* prosperous if by reason of a perfect system of public roads *every foot of* her territory was accessible to market and thereby rendered available for homes. The criminals of the State—those who violate the law—can do the work that is necessary to establish such a system. The Felder bill now pending before the Legislature, it seems to us, is meritorious in the highest degree. The idea of leasing the convicts should be entirely eliminated from consideration, unless made necessary by reason of inability to utilize them all on the public roads. If there should not be a demand at once for all of the convicts, it might be that they should be temporarily leased until other provision can be made; but, for the sake of humanity, for the sake of civilization, for the benefit of the citizens of Georgia and for the good *name of this good old State, of* which we are all proud, let us just as quickly and as *completely as possible blot out* the lease system, which for so many years has been a burning shame and disgrace to the good name of Georgia. —Atlanta Journal.

Searching For Road Material.

W. S. Blatchley, State Geologist of Indiana, will, with three assistants, go over the State thoroughly in search of material for building roads, testing the stone that is found in the stone belts, and searching for gravel deposits where none are as yet known, as rich stores of gravel can often be found a few feet below the surface by those who know the geological features which indicate their presence.

A Good Example.

A. S. Graves, who lives near Shenandoah, Iowa, manages to have good roads alongside of his farm nearly the year around. He keeps the road graded up properly, and when the ruts get dry and rough he goes out with his team and harrows and scrapes the road and makes it smooth.

Monocles For Ladies.

Wearing monocles, the latest fashion for ladies, *a craze recently started in* Paris by ladies of the Servian colony, is extending to London.

SCIENTIFIC & INDUSTRIAL

The most powerful automobile ever built is the Gobron-Brille racing car, having 120 horse-power.

When the Mississippi River is at flood one can drink fresh water from the gulf, twenty miles from the river's mouth.

Balloonists who ascended about 10,000 feet in Europe the other day found a temperature of twenty seven degrees below zero.

Artemieff, a Russian electrician, has *invented a pliable coat of mail which* effectively protects against currents of 150,000 volts.

In America alone 30,000 automobiles will be placed on the market during the present year, which will only supply half the demand.

The fluctuation of the light of Nova Geminorum is often as much as half a magnitude in twenty-four hours, like that of Nova Persei No. 2.

Harvard University is to have the famous zoological collection of Baron de Beyet, of Brussels, through the kindness of Mr. Carnegie. It is rich in extinct birds.

In Utah there are large deposits of *radio-active uranium ores and com*pounds that are about to be opened. Analysis shows that they will yield fifteen grains of radium to the ton of ore.

Last year 60,000,000 barrels of kerosene were produced in the United States, and it is reckoned that the proceeds from the sale of this and the various by-products from crude petroleum aggregated nearly $500,000,000.

Since the return of the polar expeditions led by Peary, Sverdrup and Baldwin only the Russian expedition of Baron Toll is left in the north. He spent the winter of 1901-2 on the island *of Kateinoi* and has not been heard from since.

In times of typhoid fever: Sterilize *all drinking water by boiling it.* Pasteurize all milk and cream. Keep flies from *all food supplies.* Thoroughly wash in boiled water all fruit and vegetables intended to be eaten raw. Disinfect all discharges of every description from those sick with typhoid fever.

In view of the fact that chickens do not suffer from tuberculosis Dr. Vignier de Mailiane, of France, tried to cultivate the bacillus of consumption in the serum of fowls' blood and completely failed. He is now experimenting, with encouraging results, in the use of chicken serum as an anti-toxin *for consumption.*

The subject of aerial navigation is one of never-failing interest, particularly at this time, when many engineers agree that the problem is one whose solution may be expected in the near future. Almost all engineers, however, further agree that the solution will never come along the lines of the dirigible balloon, and that the many interesting experiments with so-called airships, which rely upon the gas bag to overcome the attraction of gravitation, while drawing popular interest to the subject of air navigation, do nothing toward advancing the time when real airships will become a possibility.

Feathers by Photograph.

The power of the camera in reproducing form and texture in feathers is well shown in an article in "Photography." The marvelous accuracy of its drawing, its power of reproducing texture as well as form, appear to render photography a most suitable process for the purpose of recording *those minute variations in plumage on* which our classifications are based. *The one difficulty which presents* itself, that of color values, can be overcome by the use of ortho-chromatic plates and light filters.—Ornlarotogic Review.

Mule Made Costly Meal.

Out of the thousands paid at Shenandoah, Pa., the other day two men, Daniel and James Richards, missed their pay in an odd and amusing way. After they had received their six checks for different work they placed them in a jacket pocket and hung it on a post, and went up abreast for their dinner pails. They returned shortly afterward, just in time, to witness a large black mule devour the last remnant of the jacket, checks and all, to their amusement and disgust.

Self-Sacrifice Extraordinary.

Two elegantly dressed men, who have long been wanted on a charge of burglary at Mayence, Germany, were arrested there the other day while in the act of committing robbery. They were taken to the police station and confined in separate cells. While one of the men was being examined the other committed suicide by cutting his *throat, and during the confusion* caused by the suicide the other prisoner availed himself of the opportunity to escape.

German Commercial Victory.

A German contemporary states that, in spite of a formidable international competition, a Berlin firm has secured the contract for the supply of all the furniture required for the waiting rooms of 324 Siberian railroad stations. The order calls for wooden furniture exclusively and includes 16,000 chairs, 1240 tables, etc

No Complete History of New Jersey.

The recent criticism by the Hoboken *Observer* of the form of the gift to be made by the State of New Jersey to the new battleship named in her honor, recalls the fact that a few months ago an official of the navy department wrote to a State officer and announced that as the new battleship was nearly completed, the work of equipping her had been begun, and it was thought to be desirable that a history of the State in whose honor the vessel was to be named should be placed in the officers' library. A request was made that a satisfactory history, in one volume, be recommended.

The communication was referred to the governor, who directed that such books as might be needed should be purchased and given to the New Jersey, in name of the State. The inquiry that followed developed the fact that there is no satisfactory history of New Jersey in existence. There is Smith's, which covers the period down to about 1750; Raum's, in two volumes, disconnected, uninteresting and *incomplete*; Barber & Howe's Collections; Francis B. Lee's five-volume edition, in which the State's history is treated topically; a couple of small school histories, and the pretentions county histories in which the greater part of the space is devoted to the glorification of prominent citizens who gave up from $50 to $200 in order to secure the prominence.

But a comprehensive and accurate history of the State, in one or two volumes, was not to be found. Here is a chance for a competent man to make a reputation for himself, and some profit. A satisfactory work of the kind would doubtless be approved by the State Board of Education and introduced into the schools of the State. Surely it is needed in them. And there would be a considerable demand on the part of the public. —*Trenton Times.*

A Summer of Extremes.

Captain R. R. Cook, the United States weather observer for this district said last night says the Trenton *State Gazette* that while the summer had been a remarkably cool one, yet he remembered a summer in the late sixties which was still cooler. In that year the official records showed that there was frost in every month of the year.

He had no report of frost this year in this section. One night the thermometer started to go down to that point, but it did not get there. Light frosts had been reported from the northern part of the state.

The summer had been one of extremes. At first there was the drought which lasted *six or seven weeks. Then came a* series of rains which bothered the farmers almost as much as the dry spell. Cool days and nights like late fall set in and have continued with but little interruption by short hot waves.

Probably.

Algy—Yes, we're very happy. As the poets put it, we're two souls with but a *single thought.*"

Monty—And that belongs to her, of course. Did she have it before you were married?

LEGAL NOTICES

PROPOSED AMENDMENTS TO THE CONSTITUTION

STATE OF NEW JERSEY.
DEPARTMENT OF STATE

As required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State, to the people thereof," approved April 8, 1903, notice is hereby given that on Tuesday, the twenty-second day of September, 1903, a

SPECIAL ELECTION

will be held in the several election districts or precincts of this State, at such places as the clerks of the several townships, cities and municipalities of the State shall provide, to enable the electors qualified to vote for members of the Legislature to vote for or against each of the following proposed amendments to the Constitution.

S. D. DICKINSON,
Secretary of State

ARTICLE V.

EXECUTIVE.

1. Insert in lieu of paragraph 10 a new paragraph, as follows:

10. The governor, or person administering the government, the chancellor and the attorney-general, or two of them, of whom the governor, or person administering the government, shall be one, may remit fines and forfeitures and grant pardons, after conviction in all cases except impeachment.

ARTICLE VI.

JUDICIARY.

1. Insert in lieu of Section II a new section, as follows:

1. The court of errors and appeals shall consist of a chief judge and four associate judges or any four of them.

2. In case any judge of said court shall be disqualified to sit in any cause, or shall be unable for the time being to discharge the duties of his office, whereby the whole number of judges capable of sitting shall be reduced below four, the governor shall designate a justice of the supreme court, the chancellor or a vice-chancellor, to discharge such duties until the disqualification or inability shall cease.

3. The secretary of state shall be the clerk of this court.

4. When a writ of error shall be brought, any judicial opinion in the cause, in favor of or against any error complained of, shall be assigned to the court in writing; when an appeal shall be taken from an order or decree of the court of chancery, the chancellor or vice-chancellor making such decree or order shall inform the court in writing of his reasons therefor.

5. The jurisdiction heretofore exercised by the supreme court by writ of error shall be exclusively vested in the court of errors and appeals; but any writ of error pending in the supreme court at the time of the adoption of this amendment shall be proceeded upon as if no change had taken place.

Section IV.

1. Insert in lieu of paragraph 1 a new paragraph as follows:

1. The court of chancery shall consist of a chancellor and such number of vice-chancellors as shall be provided by law, each of whom may exercise the jurisdiction of the court; the court shall make rules governing the hearing of causes and the practice of the court where the same is not regulated by statute.

Section V.

1. At the end of paragraph 1 add the following:

The court may sit in divisions at the same or different times and places.

Strike out paragraph 3.

Section VI.

1. Insert in lieu of paragraphs 1 and 2 the following:

The court of common pleas shall be constituted and held in each county in such manner as may be provided by law.

ARTICLE VII.

CIVIL OFFICERS.

Section II.

1. Insert in lieu of paragraph 1 a new paragraph, as follows:

1. Judges of the court of errors and appeals, justices of the supreme court, the chancellor, the vice-chancellors, and the judges of the circuit court and the court of common pleas shall be nominated by the governor and appointed by him with the advice and consent of the Senate; all persons now holding any office in this paragraph named, except the judges of the court of errors and appeals as heretofore existing, shall continue in the exercise of the duties of their respective offices according to their respective commissions or appointments; the judges of the court of errors and appeals, except those first appointed; the justices of the supreme court, the chancellor, and the vice-chancellors shall hold their offices for the term of seven years, and shall, at stated times, receive for their services a compensation which shall not be diminished during the term of their appointment; and they shall hold no other office under the government of this State or the United States; the judges of the court of errors and appeals first appointed shall be appointed one for three years, two for five years and two for seven years; judges of the court of common pleas shall hold their offices for the term of five years.

Strike out paragraph 2.

SPECIAL MASTER'S SALE.
IN CHANCERY OF NEW JERSEY.

By virtue of a Decree of the Court of Chancery of the State of New Jersey, bearing date on the Twenty-ninth day of June, A. D. Nineteen hundred and three, in a cause pending in said court wherein Abram M. Vail, is complainant and Edgar R. Vail and others are defendants, I shall expose for sale at public vendue to the highest bidder on

FRIDAY, THE FOURTH (4) DAY OF SEPTEMBER A. D. NINETEEN HUNDRED AND THREE,

between the hours of twelve o'clock noon and five o'clock in the afternoon, to wit, at two o'clock in the afternoon of said day, at the dwelling house on the premises hereinafter described, all of the following tract of land and premises being a certain farm or tract of land situate, lying and being, in the Township of North Plainfield, in the County of Somerset and State of New Jersey, bounded and described as follows, to wit:

Beginning at a point in the center of the mill race in the southwesterly line of property known as property of Goldson Smalley, said point being distant fifty (50) feet in a magnetic course of north twenty-eight degrees and fifty-four minutes West (N. 28° 54' W.) from a stone monument on the northwesterly bank of Green Brook, and running thence along line of said Smalley's property in a magnetic course of north twenty-eight degrees and fifty-four minutes West a distance of two thousand six hundred seventy and seven tenths (2670.7) feet to a stone monument being the southerly corner of property known as property of Garretson and Gray; thence along the line of said last mentioned property, north twenty-three degrees and thirteen minutes West (N. 23° 13' W.) a distance of one thousand six hundred fifty-nine (1659) feet to a stake and stone-heap in line of land formerly of Ephraim Runyon and making a corner; thence along the line of said last mentioned property south sixty-seven degrees and thirty-two minutes west (S. 67° 32' W.) a distance of thirty-four and six-tenths (34.6) feet to a stake and stone heap, thence along another line of said last mentioned property, north twenty-one degrees and forty-eight minutes West (N. 21° 48' W.) a distance of three hundred nine and fifty-four one-hundredths (309.54) feet to a stake and stone heap and corner of property of Helen H. H. Pellow; thence along the line of said last mentioned property South sixty-seven degrees and thirty-two minutes west (S 67° 32' W.) a distance of sixty-six (66.0) feet to a stake and stone heap; thence still along another line of said last mentioned property, south twenty-one degrees and forty-eight minutes east (S. 21° 48' E.) a distance of three hundred nine and fifty-four one hundredths (309.54) feet to a stake and stone-heap; thence still along another line of said last mentioned property, south sixty-seven degrees and thirty-two minutes west (S. 67° 32' W.) a distance of four hundred ninety-one and four tenths (491.4) feet to a stake and stone heap, being the northerly corner of other property known as property of Garretson and Gray; thence along the line of said last mentioned property, south twenty-two degrees and twenty-eight minutes east (S. 22° 28' E.) a distance of one thousand one hundred and seventy-eight (1178.00) feet to the easterly side of an Elm tree being the northerly corner of property of John Grogan; thence along the line of said last mentioned property, south twenty-two degrees and nineteen minutes east (S. 22° 19' E.) a distance of six hundred two (602) feet to a stake and stone heap; thence still along line of said last mentioned property, south fifty-eight degrees and thirty minutes west (S. 58° 30' W.) a distance of one hundred and nineteen and seventy-two one hundredths (119.72) feet to a stake and stone heap; thence still along property of said Grogon, south thirty-one degrees and forty-four minutes east (S. 31° 44' E.) a distance of two thousand two hundred and seventy-nine and two tenths (2279.2) feet to an iron monument in the center of the Green Brook Road; thence along the center of said road, north sixty-three degrees and forty-two minutes east (N. 63° 42' E.) a distance of two hundred thirty-six (236) feet to an iron monument and corner of property of Abram M. Vail; thence along the line of said last mentioned property south thirty-one degrees and forty-four minutes east (S. 31° 44' E.) a distance of four hundred five (405) feet to a point in the center of the mill-race; thence up the center of the mill race in a general northeasterly direction a distance of three hundred seventy-six (376) feet more or less to the place of beginning; containing 63.762 acres of land more or less, which said property is shown on the map annexed to the bill of complaint in this cause, including the inchoate estate of dower and interest of Sarah A. Vail, wife of complainant, Abram M. Vail, in the said premises, together with all and singular the hereditaments and appurtenances to the said premises belonging or in anywise appertaining.

Conditions made known on day of sale by

JOHN H. VAN WINKLE,
Special Master in Chancery.

CRAIG A. MARSH,
Solicitor.

Dated July 30, 1903. ($22.50)—1-29.

SHERIFF'S SALE.
IN CHANCERY OF NEW JERSEY.

Between Fredrick C. Jennings, complainant, and Ada M. Cumings et al., defendants.—Fi Fa. for sale of mortgaged premises.

By virtue of the above stated writ of Fi Fa., to me directed and delivered, I will expose for sale, at public vendue, on

MONDAY, THE SEVENTEENTH (17) DAY OF AUGUST NEXT,

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit:

All that certain tract or parcel of lands and premises, situate, lying and being in the borough of North Plainfield, in the county of Somerset and State of New Jersey.

Being known and designated as No. 215 Somerset street, and more particularly described as follows:

Beginning at a point in the southwesterly side of Somerset street and corner of A. Jacot's lot, as shown on a Map of Valuable Villa Sites and Building Plots, North Plainfield, N. J., on file in the Clerk's office of the county of Somerset. Thence running along his line south forty-five degrees and forty-seven minutes west one hundred and fifty-nine feet to a stake in the line of Lot No. 5; thence running in a northwesterly course parallel with Somerset street thirty-five feet to a point where the centre line of the division wall if extended would reach; thence running in a northeasterly course along the centre line of said division wall one hundred and fifty-nine feet to the southwesterly side of Somerset street as formerly laid out; thence running along said old line of Somerset street in a southeasterly course thirty-five feet to the place of beginning

The school building on Park avenue which has remained vacant for a number of years will be reopened September 16, by R. M. Huse as a school for boys.

Miss May Stagga , of Cedar street, this borough, and Newton Kane, of Plainfield were married by Father Miller of St. Joseph's Church last month. Announcement first made public.

Word has been received by R. F. Hazard of 11 Mountain avenue, of the death at Los Angeles, Cal., of Mrs Geo. R. Musgrave, formerly of Plainfield. She was a member of the First M. E. Church also of the W. C. T. U.

Deb. Crane, one of New Jersey's unique characters, who died Monday night, was known in nearly every city in the State as an expert in stopping runaway horses. In ten years he caught ninety runaways and saved eight lives. He was publicly commended in Plainfield several times, and also received official recognition at Asbury Park and Belmar, and was presented with a medal by a Newark society.

A Former Pastor Will Preach.

Rev. C. B. Mitchell, of Cleveland will preach in the First M. E. Church tomorrow morning and in Grace M. E. Church in the evening.

There will be no service in the Grace Church in the morning. The congregation has been invited to attend the First Church.

Mr. Mitchell was a pastor of the First M. E. Church about twelve years ago and is now visiting some of his friends here.

Convention of the Patriotic Sons of America.

The annual convention of the Patriotic Order Sons of America was held in the Somerset Hall, Somerville, this week. About 200 hundred delegates were present, and all the State officers.

Reports presented showed an increase in membership of between 800 and 900 larger in proportion than any other Route. Pr

Borough Council Meeting.

An adjourned meeting of the Borough Council was held Monday night. Reports from the several committees were read and were as follows: Chairman of the street committee reported paying $657.55 for pay roll and $614.80 for stone. Chairman of the fire, water and lamps committee reported paying $2918.94 on fire house.

Chairman of police committee reported eleven arrests and received $13 in fines.

The collector's report was:

Receipts, taxes and interest, $143.75. Board of Health, $1.14, macadamizing, $105.00; licenses, $17.50; dog tags, .20; dogs registered, $1.10; sidewalks, $47.50; refunded on interest, .06; Recorder, $8; balance on hand July 1, $10275.29, total receipts, $10,599.54; disbursements, $3688.62; cash on hand $6910.62; engine house fund, $8962.58; borough fund over drawn, $2051.66.

The Smith Family Reunion.

The twenty-eighth annual reunion of the Smith family and friends will be held in the Grove on the farm of the late Peter Z. Smith, one mile east of Peapack, N. J., at 10 a. m. on Wednesday, August 26, 1903. Rev. C. H. von Glahn, pastor of the Bernardsville, M. E. Church, will deliver an address at 2 p. m. Other short addresses will follow. The Raritan Cor. et Band will be in attendance to furnish music for the occasion. All relatives and friends of the family have been requested to attend. If stormy it will be held the next fair day. No fakirs will be allowed at the grounds.

County Board of Agriculture to Meet.

The County Board of Agriculture will meet in the Court House, Somerville, Saturday, August 29, 1903 at 2 o'clock p. m. The program will be as follows:

Calling meeting to order by the President, E. E. Cooper. Address by State Secretary Franklin Dye., Subject, "Increasing Agricultural Values." A recess of ten minutes will be taken for the enrollment of members. The annual dues [illegible] will be

The purpose of the society is to aid the farmers in getting a better knowledge of how to make their business more successful. E. E. Cooper is president, and A. P. Sutphen, Secretary.

Reunion of Veterans of Fifteenth N. J. V.

The annual reunion of the Fifteenth Regiment, N. J. Volunteers, will be held at Dover on Thursday, September 16. The Fifteenth Regiment was made up of three companies from Morris, Hunterdon and Warren counties, and one from Somerset county. It took part in thirty-five battles, being in every important fight the Army of the Potomac was engaged in. At the battle of Spottsylvania Court House the regiment sustained a loss of sixty-five per cent. Although there had been from first to last 1,800 names on its roster, there remained only 329 when the regiment was finally mustered out. A census taken in 1901 showed only 260 still living.

An Old Resident of Readington Passes Away.

Mrs. Mary Ann Schomp, eighty-six years old, widow of the late Peter D. Schomp, passed away at her home near Readington last Sunday afternoon, from old age. She was one of the oldest members of the Readington Reformed Church, and one of the best known residents of that section. Mrs. Schomp is survived by the following children: Winfield Schomp, of Plainfield; Nathaniel Schomp, of Somerville; Theodore Schomp, of Centrefield; Mrs. Lister Schenck, of Readington; Levi Schomp, of Macon City, Mo.; David Schomp, of Readington, and Mrs. John Haver, of New Brunswick. The funeral will be held in the Reformed Church at Readington tomorrow morning. Rev. B. V. D. Wyckoff will officiate. Interment will be at Readington.

No Place Like It.

There are seashore resorts everywhere but few sections can compare with the famous New Jersey Coast and there is nothing more beautiful. The bathing is the finest, the climate delightful and the surroundings enchanting. There are fine roads in every direction and the traveler is in the midst of a region in every way to his liking. Likewise the interior of Jersey is interesting from every standpoint. The General Passenger Department of the New Jersey Central has just issued a profusely illustrated book on New Jersey entitled "Sea-shore and Mountains," which is sent to any address upon receipt of 6 cents in stamps by C. M. Burt, General Passenger Agent, New Jersey Central, 143 Liberty Street, New York.

All's Well That Ends Well.

A large delegation of Seventh Day Baptists of Plainfield had quite an experience last Tuesday night. The delegates were to take a Royal Blue "flyer" which it was understood would stop at the Plainfield station for them. But through some misunderstanding the train did not stop. General Manager Burt, who lives in this borough was seen and he gave orders to hold the express at Wayne Junction until the delegates reached there on the next train. This made a delay of over an hour to the express.

The Plainfield *Daily Press* yesterday reported Mayor Smalley as saying there would be no increase in the borough tax rate.

SUBURBAN NOTES.

WATCHUNG.

Arrival and departure of mails at Watchung.

Leave	Plainfield 9 a. m.	5:35 p. m.
Arrive	Watchung 9:30 a. m.	6:00 p. m.
Leave	Watchung 12:30 p. m.	6.10 p. m.
Arrive	Plainfield 1:00 p. m.	*6.40 p. m.

*This mail makes connection for all outgoing mail from Plainfield the same evening.

Dr. Richard Moldenke has just been granted a valuable patent for the manufacture of iron.

It looks as though the side-walk between Watchung and the trolley terminus would soon be a reality.

Extensive improvements are being made in Bartle's quarry to facilitate the getting out of stone more rapidly.

* * *

LIBERTY CORNER.

Miss Alice Brady, of New York City, is the guest of Mrs. J. D. Stantial.

Mrs. H. B. Rommel spent Sunday with friends in Peapack.

Misses Gussie and Bessie Condit, of East Orange, are visiting their brother Rev. C. B. Condit.

John N. Conkling, of Morristown, spent Sunday with his mother, Mrs. C. N. Conkling.

Miss Jessie Monroe, of Jersey City, is visiting Mrs. W. D. Wheat.

Peter Stantial, of New York, is visiting his son J. D. Stantial.

Mr. and Mrs. Peter W. Voorhees, of Plainfield, spent Sunday with his mother and sister at Mrs. C. C. Acken's.

Mrs. Clauson and daughter of Newark, is stopping at L. H. Nuses.

Philip I. Koechline, Jr., threshed on the Zeglio Farm 485 bushels of wheat in seven hours.

Weather and Crop Bulletins.

Central Office U. S. Weather Bureau,
ATLANTIC CITY, N. J., Aug. 19, 1903.

During the week ending Monday, August 17, 1903, the temperature has averaged 4 to 6 degrees below the daily normal. The days and nights are unseasonably cool, especially in the northern section, where the night temperature averaged 54 degrees, the highest being 79, and the lowest 48. In the central and southern sections, the mean of the maximum temperatures was about 77, and the minimum 59 degrees. Heavy showers fell in portions of the central and southern sections on the 9th, 10th, 11th, 12th and 14th; in these districts the rainfall was slightly in excess of the average and below it in the northern section. These conditions have still further retarded, and to some extent, injured the maturing vine truck. Melons, cantaloupes, citrons and late tomatoes are not at all promising, a total failure of the two former is reported in some places. Lima beans are molding on the vines and peaches are rotting on the trees from the lack of warm sunshine. The potato rot is increasing, and to such an extent in portions of Monmouth county that several fields will not be worth the digging. In the northern section, a fairly good crop of hay has been gathered. Buckwheat is making a fine growth, but tomatoes and beans will be a short crop, owing to the prevailing cool nights. The harvesting of oats is about completed, with only a fair yield of grain and straw. Corn is generally backward in all portions of the State.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Borough of North Plainfield to Addison A. Hoffman, $8.03.

John Herrmann et ux to Willard N. Apgar, $1.

James P. Homan to N. J. Boarding & Rectifying Co. $450.

Willard N. Apgar et ux to Rose A. Garrett, $1.

George H. Craig to Frederick J. Hughes, $1.

Calvin D. McMurtry, sheriff, to Union County Investment Co., $6500.

Calvin D. McMurtry, sheriff, to Union County Investment Co. $9693.47.

WARREN.

Mattie J. Wolfe and husband to Jennie Poggio, $1550.

Tiffany & Co. to John H. Graceley, $125.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State

Three-year-old Irene D. Stalker, of New Brunswick, is dead from injuries received while playing with a putty blower. The toy lacerated her throat, blood poisoning set in and she succumbed in less than twenty-four hours.

Trains on the New York and Long Branch Railroad now have the right of way on drawbridges over steam vessels. Heretofore all vessels were let through the draws before trains could proceed. Now, only sailing vessels are allowed to interfere with trains, and if they can be held up safely they, too, have to wait for the draw to open. Pilots are planning a strong protest.

The Newark *Evening News* gives the following egg story from Newton: Manning F. Current, a farmer living near Germany Flats, is the possessor of a hen that is a marvel among biped in the egg-laying line. He recently exhibited to several people of that town an egg laid by the hen which was about six and one half inches in circumference and a little less than three inches in length.

A mirage appeared a little while before noon at Long Branch last Monday which lasted three minutes. It was in evidence only in the sky southeast of that place. Attention of bathers was called to it by the reflection of a three masted ship in the skies. Immediately every one turned eyes to the spectacle, but as they looked it faded from view. Several persons who have spent many years along this coast said the sight was one of the best of its kind they had ever seen.

John Hubertus, a local saloon-keeper, of Paterson, has just received from his nephew at Dawson, N. Y., a present in the shape of a cat. Something out of the ordinary run of cats. It is striped like the tiger family and is one of a litter found in the hollow trunk of a tree in a dense wood, miles from any habitation. It has six claws on each paw, and its two front feet are shaped exactly like a pair of boxing gloves. He has named it Corbett.

Mrs. Kate Lewis, of High Bridge, in looking over an assortment of old papers of her late husband, Jacob A. Lewis, a few days ago, found an old deed given to Robert Parkinson, of Basking Ridge, Somerset county, for 104½ acres of land at that place, executed June 8, 1791, 142 years ago. The deed was written on fine parchment and is well preserved, every portion being easily read. The deed was given by Richard Peters and Lynson Lardner, of Philadelphia, attorneys and agents of Thomas and Richard Penn, proprietors of the province of Pennsylvania.

An order has been received at New Brunswick by John S. Voorhees from Supreme Court Justice J. Franklin Fort, dated August 15, which requires that the Board of Chosen Freeholders, and David Serviss, the county collector of Middlesex county, be notified that an application in the form of a petition to appoint experts to examine the affairs of the county has been presented to the court. The order sets September 15 as the time when the case will be considered and passed upon all parties interested to be heard that day.

There is much speculation at present as to the tomato canning industry of South Jersey, and various opinions are expressed. As a rule, the vines look thrifty except in localities where heavy rains with hot sun made the scald detrimental, and in some sections the usual blight was severe. In Cumberland county there was a rather rank growth with light settings. Those who are in a position to know say that there will be plenty of tomatoes. The canning industry means much to Southern New Jersey. Of the fifty-two canneries in the State, most of them are in the lower part. Statistics show that more than 7,000 persons are employed during the packing season, a majority of whom are women.

Authorities of Middlesex County are waiting patiently for a supply of tramps, to inaugurate crusade against them by the ball and chain system. The resolution reviving the means of ridding the county of tramps was adopted at a recent meeting, and as soon as a few tramps are caught will be put into execution. Five years ago the crusade against the tramps was so effective that none could be found within the confines of the county. They went around Middlesex. Of late the tramp nuisance has been so pronounced that it was not safe to venture out after dark in some sections unless armed. The authorities will engage an overseer, and set the tramps to work on the county roads or city streets.

Prisoners in the Camden County Jail have been disturbed during the last few nights by what they claimed to be a ghost. In their imagination the spectre was headless and did all kinds of stunts, from carrying the coal away to making cord wood float about in the air. So wrought up did some of the inmates become they could not eat or sleep. Then an investigation was made, with the result that it was discovered that some one had smeared phosphorus on one side of the walls in the cellar and a vivid imagination did the rest.

St. Paul's admonition to women not to go uncovered in the place of worship was called to the attention of the women of the Trinity Episcopal Church, of Asbury Park, by the Rev. A. L. Longley, its rector, Sunday. Mr. Longley said that the women of his church constantly violated this rule, and that, in compliance with the request of Bishop Scarborough, issued in a circular letter, noticing the laxity with which this law is observed, he must request that in the future no women should enter the church with uncovered heads.

Michael Gilta, a mill employe in Passaic, has a church on his hands, which he won last week at a raffle. It is an old building now used by St. Michael's Greek Rite congregation, which is erecting a new edifice. Father Molscanyci decided to raffle off the old building. Tickets were sold at $1 each, and the drawing was held Saturday night in the old building. Gilta won. He bought his ticket for a quarter from a friend who had gone to the old country. He will tear the building down when the new church is occupied next month and put up a home for his family with the lumber.

Concerning Proctor's Attractions.

The Fall campaign at Mr. Proctor's combination house, the Fifty-eighth Street Theatre, has been ushered in most auspiciously, and all the signs are that the regular season at that handsome playhouse will be marked by a sucession of strong hits. Mr. Proctor's clientage at this house is largly composed of lovers melodrama, and taste will de catered to in full measure. Among the attractions already docked are such winners as "The Factory Girl," "The Fatel Wedding," "Joe Welch, in "The Pedler; "The Child Slaves of New York," "In the Palace of the King," etc.

A distinctive feature of the summer season at Mr. Proctor's Fifth Avenue Theatre has been the production of new plays, and the revival of farces which are practically new to the present generation of playgoers. This policy, it is understood, has met with such gratifying success that it will be continued during the Fall and winter.

Since the recent purchase by Mr. Proctor of the One Hundred and Twenty-fifth Street Theatre, he has made extensive plans for the complete renovation and alteration of the house, and already a large force of workmen are busily engaged. It is no easy job, by the way, to accomplish this work, because the theatre is in constant use from noon until 11 o'clock at night, as well as on Sundays, when continuous concerts are given. The result is that the workmen have to perform most of their labors between midnight and noon of the following day. Thus far Mr. Proctor has been specially fortunate in avoiding strikes, as he is a firm believer in organized labor.

At Mr. Proctor's Newark house the Fall season is now well under way, and many new and high class vaudeville attractions never before seen in this country will be offered in rapid succession, starting in September. This cozy little playhouse, scarcely more than a year old has been most successful, not only during the usually hard Summer season This good business is due perhaps to the fact that only high class vaudeville is presented in conjunction with a beautiful and modern playhouse, and courteous attention on the part of Mr. Proctor's employes.

Up the Hudson.

History teaches us that Hudson, in his trip up the river which bears his name was highly pleased with the marvelous scenic surroundings. Were he to make the trip to-day words could not express his delight, for in addition to nature's handiwork the embellishments by man have made the Hudson one of the grandest spots in the country. The New Jersey Central will run in connection with Steamer St. Johns a popular priced excursion up the Hudson on August 26 1903. Rate to be $1.00 and train will leave Plainfield at 8.46 a. m. Fare for children half of above rate. Steamer St. Johns is one of the famous Sandy Hook Fleet and is the best appointed and fastest excursion boat in the harbor.

No Excuse for Remaining Uneducated.

There are some men and women whose work is so heavy and engrossing that they have no leisure; but such people are relatively few in number, and are, as a rule, at the head of great enterprises, writes Hamilton Wright Mable in Success. Practically all young men and women have some hours from work which need not be devoted to exercise and sleep—two things which ought never to be overlooked or neglected. These unoccupied hours are of priceless worth if they are wisely used. They determine the value of the working hours because they educate a man to use and enjoy what the working hours bring him, for a man's ability to enjoy success depends on his intelligence, his tasks and the variety of his interests.

Many of the most successful business men have so many interests, outside of their business, that they can always give themselves the rest of a change of occupation, and can get pleasure and profit out of any form of leisure. They understand that, in order to use wealth with judgment, and to get satisfaction and happiness out of it, a man must grow rich in mind as fast as he grows rich in pocket.

One of the most substantially successful men of the time recently said that in his boyhood he revolted against poverty, not because it denied him the luxuries of life, but because it curtailed his freedom, and he resolved that he would gain freedom at all costs. Having an unusually clear mind, this body decided to get an education first, and become rich afterward; he went through college and then made a fortune. His extraordinary influence and usefulness are largely due to the fact that he has kept his inward growth in line with his outward advancement.

On the other hand, there are few more pathetic spectacles than a man who has grown rich and remained ignorant. Every increase of his wealth only makes his inward poverty more apparent, and he gets out of this only his housing, his clothing, his food and a small sense of power.

Now, it is the use of the [illegible] that enables a man to use [illegible] working hours bring him, [illegible] hours develop his character [illegible] of his principles are good, while they [illegible] ase his fortune, but they do not gi[illegible] oread views of life, knowledge and [illegible] on the best things. These are the gifts and fruits of the leisure hours, for the leisure hours constitute a man's educational opportunity. No man has a few hours every week which can be used as he pleases should remain uneducated. Education is not a matter of schools, colleges and universities; these are valuable instruments and aids to education, but they are not so essential that the man who cannot command their privileges needs remain uneducated.

Some men are better educated out of college than in it. All highly educated men, no matter how liberal their opportunities may have been, are self-educated. The school and college teach men how to study and what tools to use, but, when they have done with the school and the college, they are only at the beginning of education.

Testimony in Divorce Case Heard.

Testimony in the divorce suit brought by Newton O. Dunster, of Somerville, against his wife, Lillie M. Dunster, was taken before Major Nelson Y. Dungan, of Somerville, the special master appointed by the chancellor last week. The petitioner charges his wife with desertion. The special master reports that the alleged desertion was due to frequent quarrels between the petitioner and the defendant, caused by mutual distrust, and which resulted in the defendant's loss of affection for her husband.

The petitioner conducts a livery business at Somerville and is well known throughout Somerset county. Mrs. Dunster's maiden name was Lillie M. Abrams. Before her marriage she lived a few miles from Basking Ridge, on the road to Morristown.

Lake Hopatcong.

Lake Hopatcong has become justly famous for several reasons but chief of these is its location. High up in New Jersey's beautiful mountains, a thousand feet above the sea level, surrounded by verdant hills and charming landscape, it is the perfection of outing places. To reach it is a delightful journey through a series of picturesque valleys, and the time of the traveler is so occupied feasting on the scenic sights that the few hours journey are like fleeting moments. For Sunday excursion no place is more popular than Lake Hopatcong, and if you want a day of enjoyment take in the $1. excursion to Lake Hopatcong. The New Jersey Central is to run on August 23, 1903. There will be a special train from Plainfield at 9.20 a. m., and the return train does leave the lake until late afternoon. There is ample opportunity for a trip over the lake or such enjoyment as one may care to indulge in.

FROM FAR-AWAY EDINBURGH.

E. A. Embury, in His Delightful Way, Writes About The Famous Old City.

The following personal letter was sent to the editor of the REVIEW by E. A. Embury, a former resident of this borough, but who is now traveling and sight-seeing in different parts of Europe. As Mr. Embury has many friends here we publish the letter that they may enjoy his interesting description of Edinburgh with us.

EDINBURGH, Aug. 8th, 1903.

After wandering about upon the face of the earth in strange lands and among strange people, to dream of home and friends at home is both pleasure and consolation. So if my poor letter shall be of little account to you, yet it serves a purpose to me.

One may go far as well as near and find places worse than (North) Plainfield.

In comparison to these grey thick-walled gloomy dwellings, which give to Edinburgh such a cheerless aspect, our own frame structures seem miserably frail shelters. But the color-blind man has less to lose here than with us. And there are here contrasts of light and shade deplorably great.

Edinburgh is a great city [illegible] its elegance and extreme poverty.

In general course north and south run its two most noted thoroughfares at no great distance the one from the other—one modern and suggestive of Paris in its gaiety and fashion—the other ancient and sombre, with buildings dating far back into the centuries. At what was once the north end of this street and the extremity of the city, is Castle Hill completely capped with its greystone battlements of irregular shape.

The apartment in which the unhappy Mary was confined, and the [illegible] surrounded on all sides with life and bustle, is one of the sights and ornaments of the town. For its sides are not all crags harmonizing in color with the grey buildings below and upon it, but a moist climate causes much small growth of green to flourish among the rocks and relieve the view. Making your way south along the old street, amid crowds of dirty children and numerous men and women lamentably showing signs of strong drink, you pass a house once occupied by John Knox, and reach at its southern extremity Holywood palace and Abbey. The picturesque ruins of the abbey in part date back almost a thousand years, and here rests the dust of the Scottish Queen Mary, who had some of her unfortunate revels with Lord Darnley in the adjoining palace.

Her apartments containing her once elegant couch and other furniture are now well in possession of moth and rust, giving evident proof of the folly of placing treason where these destroy. Many of the more recent buildings are in Doric and Ionic styles, well suggesting the name of modern Athens.

I see by the daily papers that the people of Scotland are being perplexed over the questions of tariff and taxes and church establishments, and as things move very slowly here, their perplexity will continue long. As you no doubt have already seen, Carnegie has just made a gift of half a million sterling to his native town for public park, etc. Many good things for which we may be thankful, Scotland is lacking.

And one bad thing it seems to lack—a mosquito. One shower a day here is a moderation, you may expect rather a half dozen. With the thermometer at 65 degrees these people talk about having "a hot day." In fact they know nothing about the real thing as we do.

In their street cars and stages there is not always "room for one more." They carry a fixed number only and you may have to exercise patience and wait your car no matter what you hurry. The cable system for the cars is in general use through the city, although the streets and buildings are lighted with electricity.

The pavements are good and kept well cleaned and besides the Castle Hill the city is ornamented with several patches of green of more or less size. And yet an aspect of gloom and formality prevails. Plainfield has trees enough and to spare along its streets, but here one may find none at all except in the small parks.

In a conspicuous position our honored president Lincoln is remembered by a fine statue representing himself with a negro fallen at his feet imploring protection.

So little I know of Edinburgh. Of

(Continued on Last Page.)

Lost Hair

"My hair came out by the handful, and the gray hairs began to creep in. I tried Ayer's Hair Vigor, and it stopped the hair from coming out and restored the color."—Mrs. M. D. Gray, No. Salem, Mass.

There's a pleasure in offering such a preparation as Ayer's Hair Vigor. It gives to all who use it such satisfaction. The hair becomes thicker, longer, softer, and more glossy. And you feel so secure in using such an old and reliable preparation. $1.00 a bottle. All druggists.

If your druggist cannot supply you, send us one dollar and we will express you a bottle. Be sure and give the name of your nearest express office. Address, J. C. AYER CO., Lowell, Mass.

She Knew Too Much.

When diamonds were first discovered in South Africa the rush of prospectors was, of course, tremendous, and a certain guileless old lady who lived on a farm near Kimberly determined to turn the golden opportunity to her own advantage.

Hearing that a party of prospectors were in the neighborhood, she sent a polite invitation to them to "fossick" for diamonds on her property.

In due course they came, and prodded and prospected the whole day.

Towards evening the dear old lay hobbled out.

"Have you found any?" she asked.

"That we have," said a delighted prospector; "five, old lady—five little beauties."

"Five?" was the surprised reply. "Look again, there should be eight!"

But, somehow, that remark seemed to damp the ardor of the prospectors, and the old lady did not sell her farm that time.

When a girl finally marries the man of her choice there are generally a lot of others to whom she awards "honorable mention."

Fighters Would Get Hurt.

The toy pistol in South America would make those revolutions far more dangerous than they are.—Philadelphia Press.

Shadow Dodgers.

They are folks who are so careful that they dodge the shadows of their own making.—New York Press.

$100 Reward. $100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address

Hall's Family Pills are the best.

No Need to Be Introduced.

Scene—Dinner party at house of millionaire.

Prosperous Barrister (recounting his career)—"When I took my first brief I was excited and nervous, especially as my client was a bad egg; but then I was beginning to practice. He was a man of good family, the reputation of which would have been fatally tarnished had he been convicted, so I took up the case and got the rascal off."

After dinner an important personage entered. He was a great friend of the host, who presented the lawyer to him.

Great Personage (patronizingly)—"I do not need to be introduced to this gentleman; I met him long ago—in fact, I may say I gave him his start in life. I was his first client."

The roar of laughter that followed was never explained to the late comer.—Tit-Bits.

Traveling Baths.

Traveling baths on one of the Russian railways are the latest provision for its employes' comfort in the outlying districts.

The Matter of Confidence.

The man who has too little confidence in himself generally has too much in others.

A Beautiful Design in Flowers.

The thousands of women who have admired the sunken garden at the west end of Horticultural Hall, Fairmount Park, will be interested in this very striking presentation of a geometrical garden at Stoke Edith, the seat of Paul Henry Foley, Hertfordshire, England. The design is a patternwork of flowers, grass and various colored stones. The hedge is of clipped yew. One of the wonders of Stoke Edith is a formal garden in needlework, executed by the wives of Thomas Foley, 1730-50. There were five of them. Imagine five wives working successively on the same design.—Philadelphia Record.

BUILT 27 BRIDGES IN 53 WEEKS.

An American bridge-building company, represented by a boy of twenty-four, has just completed twenty-seven railroad bridges for a British line in Uganda, Africa, in record time.

The Uganda Railway is a line running from the coast above Zanzibar to Victoria Nyanza, the principal source of the Nile. Its construction presented difficult engineering problems, as the land rises sharply to nearly 9000 feet above sea-level, and necessitates a two-per-cent. grade much of the way. The road follows a tortuous course through broken hills and over numerous deep ravines.

After the British bridge-builders had taken two years to construct eight viaducts, it was resolved to place the rest of the work in the hands of American engineers. An American firm undertook to do the work, and to finish the bridges complete for a sum less than asked by British contractors for loading the material on shipboard. The contract with the American concern called for the completion of the work within seven months after the foundations were complete; an unforseen delay, however, extended the duration of the work to a little over a year.

A graduate of Cornell, Mr. A. B. Lueder, of Wilkesbarre, Pa., was put in charge of the entire work of construction. He took with him to Africa twenty American "riggers," as the bridge-builders are called, together with 150 sailors and 'longshoremen from India; 150 native Africans were later pressed into service.

The British contractors shipped their material from England in small pieces, while the American company hired three tramp steamers which transported the bridges, practically complete, from the shops of Philadelphia to the African coast. All that remained to be done was to set the pieces in place, drive some rivets, and the bridge was ready for the rails.

In the actual work of construction, the British and American methods were still more divergent. The British idea was to employ as many men as could be had; the American, to do with as few as possible. The accompanying picture illustrates this contrast. Five men and an American "traveler" did the work of over a hundred natives employed by the British contractors. One of the longest of the viaducts was put up by the American force in sixty-nine hours, to the surprise and admiration of the English engineers in charge of the line.

The actual engineering work was simple. The bridges, of which the longest was 1200 feet and the highest 112 feet, were almost entirely on curves and steep gradients; but, thanks to the perfection of the construction work at home and the soundness of the foundation work by the British engineers, everything fitted admirably. There were 7000 tons of steel in the entire contract and the difficulties of transportation and erection that the energetic and adaptable bridge builders from the United States met and overcame would have been serious except for the foresight and discipline of the men in charge. The great traveling crane did most of the work, with never more than a score of men on the job at once.

In December of last year the work was completed and accepted by the British Government. It should be said in fairness to the contractors, that they do not consider their work in Africa remarkable in any way. They simply took the contract and filled it with American celerity.—Harper's Weekly.

THE BRITISH AT WORK—EMPLOYING A FORCE OF OVER A HUNDRED.

AMERICAN BRIDGE-BUILDERS AT WORK—ONLY FIVE NEEDED.

TEAS OF THE FOREST.

Native Plants As Substitutes for the Eastern Herb.

Picnickers and those who go a-camping and forget to take their tea caddies along, may find in the woods many a substitute for the fragrant bohea, wherewith to brew a steaming cup to add cheer to a cold luncheon. Indeed, it has not been so very long since Chinese tea was a luxury not easily acorded in the remoter rural districts of our country, and recourse was had habitually to native herbs or shrubs of the forest for makeshifts. Then, too, in the stormy days preceding the American Revolution, when the colonists were in a turmoil over the stamp taxes levied by the mother country, it was considered unpatriotic to drink tea that had paid tribute to the Government, and the so-called Liberty Tea was the popular drink.

This, no doubt, was made [illegible] riety of herbs, but certainly [illegible] four-leaved loosestrife, a plant [illegible] abundant in almost every wo[illegible] It grows a foot or two high and may be recognized by its simple upright stem upon which the leaves are set in whorls of four, or sometimes five, the yellow starlike flowers being on long slender stalks from near the base of the leaves.

During the Revolution the native leaves most extensively used for tea were probably those of the so-called New Jersey tea—a low bush that grows everywhere in dry woodlands. An infusion of the leaves boils a clear amber color, and in looks is as attractive as real tea; but the taste, though astringent, is by no means lively. Some effort has been made within comparatively recent years to revive the use of this plant as a substitute for tea on a commercial scale. The leaves are said to contain nearly ten per cent. of tannin. Hemlock leaves and those of the arbor vitae have also played a part in the making of rustic tea. The arbor vitae is a tree that grows wild in great abundance in northern woods, and the old-time Maine lumbermen used frequently to resort to its leaves for tea when other herbage failed for the purpose.

The little plant whose scarlet berries about the size of peas are sold under the name of teaberries by fruit venders on our city streets, is another herb which was long ago turned to use for tea, whence the common name by which we know it in Pennsylvania. New Englanders for some unknown reason call it checkerberry. The foliage is very aromatic and people who are fond of a dash of spiciness in their drink have sometimes employed its flavor in real tea.

Better known as a tea plant than the snowberry is the Labrador tea, or Ledum latifolium of botanists, which grows in cold bogs and mountain woods from Pennsylvania northward. The leaves, which emit a slight, not unpleasant fragrance when bruised, are tough and leathery, and densely clothed underneath with a rusty brown wool. Steeped they give a wild, gamy sort of taste to hot water, and the resultant drink suggests a poor grade of black tea.

Sweet fern, which is so abundant a growth everywhere on sterile hills and by mountain roadsides, is another famous tea plant, being often known as mountain tea. During the Civil War its use for tea was particularly prevalent in the Southern States, and many a Confederate lady who had been reared in luxury was reduced to drinking this poor substitute for her oolong or flowery Pekoe. The foliage and flowers of all the goldenrods are endued with an astringent principle, and are moderately stimulant, so that their suitability for the manufacture of a domestic tea was recognized by American country folk as long ago as the days when George III. was king over them.

One species, the fragrant-leaved golden rod, known sometimes as Blue Mountain Tea, possesses, in addition, the flavor of licorice. Drank piping hot in the wilderness it makes a pleasant feature in a camper's limited bill of fare.

Most, if not all, of these plants are more or less astringent, and contain considerable tannic acid in their make-up—qualities which go far to make tea the popular beverage that it is.

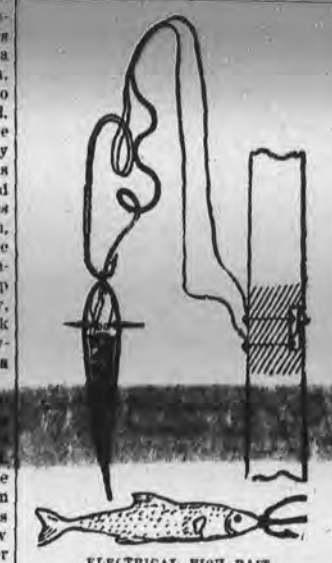
SOME NATIVE PLANTS THAT HAVE SERVED AS SUBSTITUTES FOR TEA.

MECHANICAL BAIT.

A Wiggling Life-Like Thing of Metal or Rubber.

The inventor of this device is Thomas A. Bryan, who claims that it may be made in the shape of a minnow, crawfish, fly or any other body, in the interior of which is mounted an electro-magnet, and having movable parts, such as fins and tail, having armatures for the electro-magnets connected therewith. By means of a small dry battery fastened to the rod or carried in the pocket of the fisherman and a convenient touch-button, with the necessary wire connection between them, it is possible to send a current through the parts as desired, when the tail and fins of the mimic fish will be agitated so rapidly and lifelike that no member of the finny tribe could think for a second of questioning its genuineness.

This deceptive construction can be made of metal, although the inventor is of the opinion that rubber would be preferable for the purpose. Where it is desired to make them of metal the wires connecting the fish and battery may be readily insulated, so that there will be no means offered for the escape of the current. Rubber, however, has advantages of construction, and Mr. Bryan says that the rubber can be as readily painted and colored to deceive the game fish as metal.



ELECTRICAL FISH BAIT.

Great Britain maintains a navy equal to the combined navies of France and Russia.

There are 40,000 persons in the municipal service in New York City.

THE LAST LIVING ANCESTOR OF THE MODERN HORSE.

The wild horse at present is limited to the Old World, and is found only on the desert plains of Central Asia and Africa. Two specimens male and female, of the little known Przewalsky's horse of Asia have just been received at the New York Zoological Gardens, having been captured by agents for Carl Hagenbeck in the Desert of Gobi. These are the nearest approach to the present horse of civilization, and supply an important link hitherto missing in the chain of evolution, which reaches down from the three-toed horse to the domestic animal of to-day. Prior to the discovery of the numerous fossil types of America, it was generally believed that the horse originated in Europe, especially as the Indian tribes first encountered on this continent had no horses. Modern paleontological research, however, such as is now being carried on by Professor Osborn and Professors Marsh and Cope in the past, has demonstrated that North America possesses a far more complete series of developmental stages, and points to the fact that the cradle of the modern horse lies probably not in Europe, but in the New World.—Scientific American.

WILD HORSE OF ASIA.

The trouble with quarrels is that they are generally picked before they are ripe.

Mrs. Hughson, of Chicago, whose letter follows, is another woman in high position who owes her health to the use of

Lydia E. Pinkham's Vegetable Compound.

"DEAR MRS. PINKHAM:—I suffered for several years with general weakness and bearing-down pains, caused by womb trouble. My appetite was fitful, and I would lie awake for hours, and could not sleep, until I seemed more weary in the morning than when I retired. After reading one of your advertisements I decided to try the merits of **Lydia E. Pinkham's Vegetable Compound**, and I am so glad I did. No one can describe the good it did me. I took three bottles faithfully, and besides building up my general health, it drove all disease and poison out of my body, and made me feel as spry and active as a young girl. Mrs. Pinkham's medicines are certainly all they are claimed to be."—MRS. M. E. HUGHSON, 347 East Ohio St., Chicago, Ill.

Mrs. Pinkham Tells How Ordinary Tasks Produce Displacements.

Apparently trifling incidents in woman's daily life frequently produce displacements of the womb. A slip on the stairs, lifting during menstruation, standing at a counter, running a sewing machine, or attending to the most ordinary tasks may result in displacement, and a train of serious evils is started.

The first indication of such trouble should be the signal for quick action. Don't let the condition become chronic through neglect or a mistaken idea that you can overcome it by exercise or leaving it alone.

More than a million women have regained health by the use of **Lydia E. Pinkham's Vegetable Compound.**

If the slightest trouble appears which you do not understand write to Mrs. Pinkham, at Lynn, Mass., for her advice, and a few timely words from her will show you the right thing to do. This advice costs you nothing, but it may mean life or happiness or both.

Mrs. Lelah Stowell, 177 Wellington St., Kingston, Ont., writes:

"DEAR MRS. PINKHAM:—You are indeed a godsend to women, and if they all knew what you could do for them, there would be no need of their dragging out miserable lives in agony.

"I suffered for years with bearing-down pains, womb trouble, nervousness, and excruciating headache, but a few bottles of **Lydia E. Pinkham's Vegetable Compound** made life look new and promising to me. I am light and happy, and I do not know what sickness is, and I now enjoy the best of health."

Lydia E. Pinkham's Vegetable Compound can always be relied upon to restore health to women who thus suffer. It is a sovereign cure for the worst forms of female complaints,—that bearing-down feeling, weak back, failing and displacement of the womb, inflammation of the ovaries, and all troubles of the uterus or womb. It dissolves and expels tumors from the uterus in the early stage of development, and checks any tendency to cancerous humors. It subdues excitability, nervous prostration, and tones up the entire female system. Its record of cures is the greatest in the world, and should be relied upon with confidence.

$5000 FORFEIT if we cannot forthwith produce the original letters and signatures of above testimonials, which will prove their absolute genuineness.
Lydia E. Pinkham Medicine Co., Lynn, Mass.

GETTING THERE.

To put your best foot forward
Is advice that can be beat,
For the ones who gain the great success
Get there with both their feet.
—Ohio State Journal.

PROOF ABSOLUTE.

Peters—"What proof did the doctors have for declaring Blank insane?"

Parr—"He refused to take their medicine."—Baltimore American.

GET ALL YOU CAN.

"Ain't you goin' to git no transfers, ma?"

"Why, no, Tommy. We don't need them. This car goes through."

"Yes, but I want the transfers to play street car with when I get home."—New York Journal.

DECEIVED.

"She seems to have no confidence in her husband."

"No. She says she caught him telling the truth the other day."—New York Sun.

THE EXCEPTION.

"Don't you think that a billion dollars is too much for any man to have?"

"Yes," answered Senator Sorghum; "that is, for any other man to have."—Washington Star.

FINIS.

The Teacher—"What were Noah Webster's last words?"

The Scholar—"I don't remember just [illegible]"

"The Ka Flippes evidently feel very aristocratic."

"Oh, they are! Mrs. Ka Flippe wouldn't think of having anything but real Panama hats for her horses."—Chicago Record-Herald.

AIRING HIS FRENCH.

"Gracious! What in the world is that man ordering such a lot of dishes for? Will he be able to eat them?"

"Oh, no. He merely likes to show that he can pronounce all those French names."—San Francisco Bulletin.

UNEXPLAINED.

S. How—"Are there any sword or stage fights in 'Dr. Jekyll and Mr. Hyde?'"

P. Lay—"None whatever."

S. How—"Then why is it called a dual role?"—Chicago Record-Herald.

NOT SURPRISED.

"Didn't it surprise you to find the conversation of that author so very ordinary?"

"Not at all," answered Miss Cayenne. "I thought all along that if he had anything bright to say, he would have put it into some of his books."—Washington Star.

JUST MEDIUM.

Diner—"I say, waiter, either this chop is very tough, or the knife very dull."

Waiter—"I guess they're both about medium, sir."—New York Sun.

LAY AND LIE.

The other hens cast glances of envy and dislike at Biddy Dorkins, the proud Plymouth Rock, when she saunters across the barnyard, clucking serenely.

"Uppish thing!" sniffs the white Leghorn. "The idea of her claiming that her average lay is three eggs a day!"

"Lay?" cackles the Shanghai pullet. "Lay? She ought to say 'lie.'"—Judge.

NEW IDEAS in TOILETTES

New York City.—Berthas make a marked feature of the season and are to be noted upon most of the latest and smartest gowns. The May Manton

WOMAN'S BERTHA.

designs here given offer a wide variety and are all graceful and smart. In addition to being ornamental they can often be made to serve the double end of modernizing a bodice that has become slightly passe, as they can be relied upon to give the broad-shouldered effect demanded by fashion.

No. 1 is made in handkerchief style and falls in deep points, the fullness forming folds which give an effect of pleats.

No. 2 is circular and elongated at the front to form the stoles that are so much liked, and is extended over the shoulders.

No. 3 is simply circular and falls in soft ripples at its lower edge.

As illustrated, they are all made from lace, finished with bands of batiste fancy stitched, but various other materials are equally appropriate. No. 1 is cut in two pieces and can be made to close at the shoulders or at both front and back. No. 2 closes at the front. No. 3 closes at the front as illustrated, but can be made to close at the front if preferred.

The quantity of material required is, for No. 1, one yard eighteen inches wide, or one yard twenty-one inches wide; for No. 2, three-quarter yard eighteen inches wide or three-quarter yard twenty-one inches wide; for No. 3, one yard eighteen inches wide or three-quarter yard twenty-one inches wide.

RUSSIAN COAT.

Russian Coat With Box Pleats.

Long coats are much in vogue and are in favor with each succeeding week. The May Manton one shown in the large drawing is made in Russian style and is well adapted both to the entire suit and the general wrap. The model is made of black taffeta stitched with corticelli silk, but all coat and suit materials both silk and wool are equally appropriate.

The coat consists of a blouse portion, that is made with applied box pleats at front and back and is fitted by means of shoulder and under-arm seams, and the skirt which is attached thereto beneath the belt. The skirt includes applied pleats that form continuous lines with the blouse and is laid in inverted pleats at the centre back, which provide graceful fullness. The right front laps over the left to close in double-breasted style beneath the edge of the pleat. The sleeves are box pleated from the elbows to the shoulders, so providing the snug fit required by fashion, but form full puffs at the wrists where they are finished by flare cuffs.

The quantity of material required for the medium size is six and a half yards twenty-seven inches wide, four yards forty-four inches wide or four yards fifty-two inches wide.

Pleated Skirts For Fall Wear.

Pleated skirts will be popular for fall wear, and with them will be worn the long coat which has been so successful for a season or two. Long skirts will be relegated more and more for formal and dress occasions, while the just-off-the-ground skirt will be adopted for matinee, walking, slop-

Shoulder Adornments Doomed.

Ladies' tailors prophesy that the cape collar and all shoulder adornments will have met their Waterloo by the fall, and that on outer garments at least collars will be reduced to a mere band at the back, fading into nothingness at the front. Sleeves, they say, will show less of the pouch effect at the wrist and more fullness at the shoulder. For tailor made garments of the severe style the plain, old-fashioned coat sleeves, finished at the wrist with a narrow turn back cuff or rows of stitching, will be de rigueur. To put a fussy, dressy sleeve on an otherwise plain garment is an artistic mistake.

Fancy Border Umbrella.

The fancy border umbrella is much more favored this year than for several seasons past. The new feature is its barathea edge. These fancy borders come in white on blue or green or garter, and black with self border. Taffeta umbrellas in all popular shades, with satin self borders, are also much liked.

Woman's Blouse Waist.

Blouse waists create an ever increasing demand. They are greatly in vogue both for the entire gown and the separate bodice and show almost endless variety. This May Manton one is made of white batiste, unlined, with tiny pearl buttons as trimming and is charming, but the design can be reproduced in any of the season's materials, and later will be admirable for soft wool and silk waistings when the fitted lining will be found desirable.

The waist consists of the foundation, that is smoothly fitted and closes at the centre front, the fronts and the back. The back is tucked in groups that extend for its entire length and give tapering lines to the figure, the fronts in narrow tucks at the centre and again at the shoulders, where they extend to yoke depth, with wider tucks between the two which serve to outline the centre and give a vest effect. The sleeves are plain, snug above the elbows and full below, with straight cuffs. At the neck is a stock with a turn-over in clerical style.

The quantity of material required for the medium size is four and a quar-

BLOUSE WAIST.

ter yards twenty-one inches wide, three and three-quarter yards twenty-seven inches wide or two and three-quarter yards forty-four inches wide.

SCIENCE & MECHANICS

The electric crane has largely displaced the ordinary hand and steam apparatus on German steamships and in German docks. The largest crane of this kind in the world was recently installed at the harbor of Kiel. It is placed so that two of the largest vessels may lie, one on each side of it, for the purpose of unloading or exchanging cargoes.

Experiments recently made on the North River, at New York City, demonstrated the practicability of telephoning by the wireless method between two moving boats. In these experiments each boat carried a telephone in its pilot-house, connected with apparatus attached to the flagstaff, and copper plates dipped in the water. Messages were distinctly heard from one boat to another passing at a distance of 500 feet. The inventor believes that the range can be greatly increased, though that is hardly necessary, as the object of his device is to serve vessels at comparatively close quarters in order to prevent collisions.

The Lancet gives the following formula for an effective egg preservative: One pound of water glass, silicate of soda (which can be obtained from the pharmacist), should be dissolved in a gallon of cold water. It will take some time to mix the syrup silicate with the water, but it should be thoroughly done. The resulting solution is placed in an earthen jar, and the eggs put point downward in it, care being taken that every egg is entirely covered by fluid. Any loss caused by evaporation may be "made good" by simply adding more water. Eggs placed in this solution will keep "perfectly fresh" for a year or more. Just before boiling the shell should be pierced, otherwise the egg may burst.

The new form of coal cars have swinging steel bottoms opening lengthwise from end to end over the trucks, will carry from sixty to seventy tons of either coal or coke—three times their own weight, and double the weight carried by old style cars, the coke racks being made of steel. These cars are of the usual length and height for large capacity. The largest share of increased capacity is at the bottom, where it is most needed; and because the centre of gravity is lower, the cars ride more steadily and can stand increased weight. A safety locking device at the end of the car instantly lets loose the longitudinal doors extending from end to end below the bed-frame of the car, and in less than a minute, after the car is in place, it is empty.

To prove the prediction that accessible causes may yield to radium comes the report from Vienna of the cure of twenty-two cases of this terrible disease. Cancer is definitely and rapidly on the increase in all civilized countries. Its causation is still absolutely unknown, and though proof of its infectiousness— and therefore presumption that it is due to a germ—is steadily accumulating, the morbific agent is as yet unfound. The first epoch in the cure of cancer—however it be caused—was marked when the Rontgen rays, some years ago, cured a rodent ulcer. That cure is now a commonplace. The characteristic of the rodent ulcer is that it is the most superficial form of cancer, and hopes that Rontgen rays might be caused to penetrate to other forms, unfortunately far more common have been utterly falsified.

Righted the Record.

The following incident is related in V. C. as having occurred in South Africa: One of the soldiers who had been reported killed in a certain battle, and against whose name in the regimental books a note to that effect had been made, afterward turned up and reported himself. Then the Sergeant made another note in the book. "Died by mistake." The man was placed in the hospital and a few weeks later succumbed to the injuries he had received. This fact was communicated to the Sergeant through the Colonel of the regiment, and then a third note was made: "Re-died by order of the Colonel."—New York Tribune.

Where India's Diamonds Were Made.

The geology of Kalahandi State, in the central provinces of India, is described by Dr. T. L. Walker, who says: "The entire State is made up of unfossiliferous rocks, mainly crystalline schists, with occasional masses of laterite, which cap the broad hills in the southeastern part of the State. The occurrence of graphite, which may be of commercial importance, is noticed, and it is remarked that the graphite-bearing rocks may become diamond-bearing in places where they have been subjected to intense pressure. In sands from the streams near Roudsor minute crystals, regarded as diamonds, have been detected."

Unexpected Sympathy.

A lady from Belgrave square, addressing a working girls' club down at Bow the other evening in regard to general deportment, mentioned that in her grade of society girls would never think of conversing with any young man to whom they had not been formally introduced. "Don't we know it, miss!" replied one of the audience, sympathetically, "and ain't we sorry for you."—The Queen.

Visitors to Niagara Falls.

The number of visitors to Niagara Falls averages three-fourths of a million a year. In the year of the Buffalo Exposition there were three millions.

A SERMON FOR SUNDAY

AN ELOQUENT DISCOURSE ENTITLED "PRESENT-DAY INCARNATION."

The Rev. C. E. McNally Gives an Answer to the Question, "What Ails the Church?"—She Has Forgotten Her Real Status in the World.

NEW YORK CITY.—The Rev. Charles E. McNally, the pastor of the Sixth Avenue Baptist Church, preached his first sermon in his new pulpit Sunday morning. His subject was "Present Day Incarnation." He took his text from First Corinthians xii:27: "We are the body of Christ and severally members thereof." Mr. McNally said:

Throughout the land, with somewhat of a wail, the question is being asked, "What ails the church?" That she is sick seems to be a foregone conclusion. The religious periodicals and some others are quick to give a diagnosis of the case. It is because the pew has been elevated educationally. It is because the ministry has lost self-respect and prestige. It is because men everywhere are too busy to attend to the concerns of the soul, or because Christianity is so "other worldly" it is not sufficiently practical for the practical life of to-day. Many other reasons are given for why the church lacks power.

Is this charge against the church just? If statistics may be trusted, it is. The last religious returns for the nation disclose the lamentable fact that Christianity has made no gain that even her warmest friends can call proportionate to the increase of population and the mighty development of commercial interests. In the city as well as in the rural districts, the preachers of the gospel are finding it hard to get enough people to take a hold of church affairs to make the church live with a commanding influence in the community. The land is full of reports of man's greed, his tricks of trade and other disregard of sacred obligations. Men are looking to the church to stem the tide of moral recklessness. It must be frankly conceded that the church has seemed to be powerless to arrest the drift. The masses of the people pass her doors or rarely enter. Her hold upon public morals does not seem to be very strong. Her ability to mold the ethical life of the world does not seem to be adequate to the needs. If the conditions are what they seem to be, if the church is really failing to enlighten the world by the ethical standards of Jesus Christ, something is surely wrong, and the church should quickly awaken to a realization of her real condition, and take measures to strengthen her hold upon the life of the nation.

Where does the difficulty lie? I believe in this: The church has too much forgotten what her real status in the world is. She has in her effort to solve the mighty problems that the last few generations have presented to her, gone away from the simple teaching and simple method of Christ, her founder. The ministry has too much given itself to the work of education, of culture, of reform. The pew has too much demanded these things. The result is the hearts of men have been spiritually starved. Many who would have waited on the ministrations of the church have forsaken her because their spiritual natures were not satisfied and developed. Education, esthetics and reform, they could obtain from the schools and the papers of the day.

It must be remembered that Christ, while incarnate, gave Himself to none of these things. He devoted His entire ministry to lodging in the minds of His disciples the fact that He was in the world for one purpose and that to save men from sin. To the end that He might save the sinner from his sin He devoted all His time, He gave all His energy, and sacrificed His life. The mission of Christ was primarily not a mission of education or reform, it was a mission of salvation. "I come—to call sinners to repentance." "The Son of Man is come to seek and to save that which was lost." "This is a faithful saying and worthy of all acceptation, Christ Jesus came into the world to save sinners." When the church will concentrate her efforts upon this one thing—the saving of sinful men and women from the power of sin—the questions of education and reform will take care of themselves.

The status of the church in the world is pointed out by Paul in the words of our text, "Ye are the body of Christ," and severally members thereof. If Christ gave Himself while in the flesh to saving men from sin by manifesting to them the life of God, can that body—the church—in which He is willing to incarnate Himself, do better that to devote its undivided attention and energies to the salvation of men, by the manifestation of the life and will of God? The church is the body of Christ. In it He has incarnated Himself. What Christ was in the world while in the flesh that the church must be in the world to-day. What Christ did for the world while in the flesh that the church must do for the world to-day. "Ye," as a church and as individual members of the church, "are the body of Christ." Ye must be Christ to the world. Except the church as a body and the several members thereof as individuals live as Christ in the world, the world will never know Christ.

Paul, the master mind, could use such a figure with such potent power. Of all his figures there is perhaps no other more elaborately worked out or more carefully applied. The body is not one member, but many, and the many members only one body. So is it with the church, and the church is the body of Christ.

Observe that this figure permits of a detailed analysis. While the church is the body of Christ, it is only the body, that in which Christ has incarnated Himself.

I. Christ is the life of the church. He is the inner vitalizing spirit which animates and directs. The church which recognizes this has by this very recognition marvelously vitalized itself.

There are two kinds of churches—the man-led and the Christ-led. The man-led church gives itself to hero worship and leans on the arm of flesh. The Christ-led church gives itself to the worship of Christ and leans hard on the arm of God. You may be able from the history of your city to supply an illustration of the fact that there have been churches where the preacher has been the church. When the preacher has gone the church has gone. Mark such a church as one that has been man-led. The church has looked to its pastor for vitality and to lead it. What the heart is to the body that is Jesus Christ to His church. From Him through the agency of the Holy Spirit it receives the impulse of its life. The quickening, vitalizing power can no more be imparted to the heart of man by the visiting physician. Christ is that inner muscle at whose every pulsation the life blood of spiritual power is made to surge through the body. To it Christ and Christ only can give life, color and beauty. This should be a self-evident fact. The fact is, however, that it is not so self-evident as it ought to be.

Never has there been a time when the churches set so much store by the man, their leader, as to-day. Hero worship runs rampant. The church when it seeks a leader searches for the orator, the scholar, the man of executive parts, and upon the man they depend. Many a church gets all these, but does not get any regenerating of its life. The reason is clear. They have looked to the wrong source for life-giving power. Christ alone can give it. Upon Christ, church and minister alike are dependent for their spiritual vitality. It is only as they are together animated by the warm impulse of His life that they live at all. When the church will look to the Lord of Life for its life, then, and not until then, will it throb from head to foot with real life and power.

Not only is Christ the heart of the church, He is its head. We read that He was given to be head over all things to His church. He is the head of the spiritual body—the head is the governing or organizing power of the body. From the head comes the purposes that give direction to the life. The will sways and directs all. The government and organization of a church are only the expression of the will of Him who leads and directs it. This suggests a criterion by which we may judge the church. Jesus Christ has made His will concerning the body of disciples very clear. The sole object for its existence is that through it His kingdom may be advanced; i. e., that through it men may be led to abandon the life of sin and cleave to the promise of salvation in and through Christ the Saviour. When this result is being accomplished here Christ has been directing the work and the members harmoniously doing His bidding.

This test must be applied to every organization connected with the church. Does it directly accomplish this end? Does it qualify men and women in bringing to pass this desired result? If so it is of Christ and has a legitimate place in the church. The thing the church should do at all times in all its parts is to discover the thought of the head. That is the most perfect body which most perfectly responds to the direction of the brain. That is the best church which sets itself most assiduously to know the thought and purpose of Christ, and which most promptly responds to that thought and purpose. No man, minister, deacon or any other has any authority to be head of the church. Christ is the head. The chief business of the church is to know the mind of the Master.

Let a church recognize its vital connection with Jesus Christ as its heart, its head, its life giving and directing powers, and its success as an agency in extending the kingdom is already assured. Such a church will be found much in prayer seeking to know the will of its Lord at every point. It will not be content with seating itself in softly cushioned pews once a week with the feeling that it has fulfilled its religious obligations. On the contrary, you will find it seven days in every week out searching the highways and hedges trying to inoculate the life of the Lord into a sin-sick world. As the growing lad cannot but express the superabounding life leaping through his veins, no more can a church, tingling with the superabounding spiritual life of Christ fail to give expression to its powers.

But that church has recognized only half the truth when it has come to know that Christ is the life of the church. The other half is that while Christ is the heart and the head we are the body.

II. The church is the body of Christ. Why the Creator saw fit to confine these spirits of ours in a material body we cannot know. The fact remains that the soul must work through the body to find expression. When God was pleased to give expression to His spirit through the church or His body we cannot say. He has done it. We are the body of Christ. That organism through which He works, by means of which He finds expression to the world. Christ exalted is seated at the right hand of God, but Christ incarnate is in the world to-day. He lives in and works through His body the church. This should be a deeply solemn and impressive thought to every church of the Redeemer. God also manifested Himself in Christ, is manifest to-day only through the church His body. This is why the church fails in her mission and lacks power. She has failed to realized her status in the world. She has not sufficiently appreciated her responsibility and the divine dignity which is hers. Think of it! You are a hand to do His bidding, feet to fulfill His missions, eyes to look to his interests, ears to hear His truth, tongues to sound forth that truth and utter His praise. Christ has incarnated Himself in you. Through you men must come to know Him.

Except the church manifests the life of Christ it is no true church, except it performs His mission it is not a church of the Redeemer. As the body is one and hath many members, and all the members of the body, being many, are one body, so also is the church. The body of Christ—one though many, unity in diversity. All the members are necessary in order that the symmetry may be complete, and its usefulness unimpaired.

Independence is the cry of our time—independence of the nation, independence of the individual. This spirit seen everywhere has found a large place in the church. Within limits this is well. Within limits, I say, for just as soon as individuality becomes obtrusive as soon as independency, or obstinate, it has passed the limit where it can be of the most good to the world here it can be of the most use especially. Within the church this is literally true. It is one body—it is Christ, in the world, each part must be in closest union with every other part. More and more the church must work together, more and more the denominations must work as one in manifesting the life of God to the world in the transformation and salvation of men.

You have before now seen a couple of puppies get a hold of an old rope and then as though life depended on the process pull one way while the other tugged the other. I have seen churches whose condition would not be unaptly illustrated by the dogs. Lack of unity in aim and effort is a great source of weakness to the church. The spirit of independence, good in itself, runs riot, until concerted action to a definite end is impossible. When independence thus errs against unity it is a curse rather than a blessing. All the members of the body must work together, vitalized by the heart, directed by the head. One of the most beautiful sights in the world is a symmetrical and responsive human body. One of the most beautiful sights to the spiritual eye is the body of Christ—the church—harmoniously responsive to His thought and purpose. In the light of Christ's mission while incarnate in the flesh the church can make no mistake as to her mission. She must save souls. In the light of this purpose every petty difference should drop out of sight and the whole Christian body become one mind in regard to the chief aim of their existence. The educator will take care of the education of the community, the aesthetic will look after the culture, the reformer will lead reforms, but the church must save men from sin and manifest the life of God to the world.

I have seen in one of the great mills of our country two great wheels. Note one point, they fit each other. Moving in ceaseless unison. If a single point be broken off the machinery grates, if a number be broken the wheel runs and the whole network of machinery is helpless. Each members of the church has his place. If he fails the body is hampered in its efficiency.

But while there is to be union in diversity, there is also to be diversity in unity. Individuality is not effaced by the Gospel of Christ. This gives the widest possible scope to the churches' ties which may be included within the church. There is a place of usefulness for all. Each one is to find his or her place and then in union with the whole body work for its highest efficiency.

When the church of Christ awakens to a full consciousness of its status in the world, no longer will men call her sick. Within her borders there will be cries of joy over many sinners that have repented and tested the power of Christ to save. This church will realize her highest usefulness when she writes over her activities, "We are the body of Christ—Christ incarnate in the present day—and severally we are members thereof."

Weakness and Strength.

It becomes us to know our weakness as well as our strength. The man who feels that he can do more than he has the strength to do often fails. So we see the necessity of preparing ourselves in our special weaknesses. In order to accomplish anything in life we must exert our strength, but we must not overestimate it. We must be true to ourselves to accomplish all the tasks before us.—The Rev. G. F. Miller.

Parental Love.

God loves you not because you are clever, not because you are good, but because He is your Father.—Andrew Murray.

THE SALESWOMAN

Compelled to Be on Her Feet the Larger Part of the Day Finds a Tonic in Peruna.

Miss Curtain, of St. Paul, Gives Her Experience.

MISS NELLIE CURTAIN, 646 Pearl street, St. Paul, Minn., head saleswoman in a department store, writes:

"I have charge of a department in a dry goods store, and after standing the larger part of the day, I would go home with a dull ache, generally through my entire body. I used Peruna and feel so much better that I walk to and from the store now. I know Peruna to be the best medicine on the market for the diseases peculiar to women."—Miss Nellie Curtain.

Nothing is so weakening to the human system as the constant loss of mucus. Catarrhal inflammation of the mucous membrane produces an excessive formation of mucus. Whether the mucous membrane be located in the head or pelvic organs, the discharge of mucus is sure to occur.

This discharge of mucus constitutes a weakening drain; the system cannot long withstand the loss of mucus, hence it is that women afflicted with catarrhal affections of the pelvic organs feel tired and languid, with weak back and throbbing brain. A course of Peruna is sure to restore health by cutting off the weakening drain of the daily loss of mucus.

An Admirable Tonic.

Congressman Mark H. Dunnell, National Hotel, Washington, D. C., writes:

"Your Peruna being used by myself and many of my friends and acquaintances, not only as a cure for catarrh but also as an admirable tonic for physical recuperation, I gladly recommend it to all persons requiring such remedies."—Mark H. Dunnell.

If you do not derive prompt and satisfactory results from the use of Peruna, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis.

Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, Ohio.

Oldest Ship in the World.

The time was when American ships carried a broom at the masthead as a sign that America swept the seas. In those days fine shipbuilding timber grew right down to the shore on the Atlantic coast, and there was hardly a bay on the New England shore where there was not a shipbuilding yard. So it happens that most of the old sailing ships are built of American or Norwegian timber, says a writer in Leslie's. I have seen hundreds of square riggers roaming the world under strange flags whose every plank grew on American soil. Ships built of Essex oak are famous for their longevity. The oldest ship in the world, the small schooner, Vigilant, running into St. Croix, French West Indies, now under the French flag, was built, so I have been told, in 1802 of Essex oak at Essex, Mass., and was long under the Stars and Stripes.

The Yankees of Portugal.

"Observe them, Senor," said a hotel-keeper in Lisbon, to one of his English guests. "They are the Yankees of Portugal."

He indicated a group of Brazilians, consisting of a prosperous sugar planter, his wife, who literally blazed with diamonds, and two pretty daughters.

"They regard Portugal as their 'old country,' for they broke away from us as the Americans broke away from you. They make immense fortunes in Brazil and come here to spend them, just as the American millionaires go to England."—New York Press.

Blackpool claims to be the best lighted town in England. N. Y.—34

FITS permanently cured. No fits or nervousness after first day's use of Dr. Kline's Great Nerve Restorer. $2 trial bottle and treatise free. Dr. R. H. KLINE, Ltd., 931 Arch St., Phila., Pa.

A philosopher is very often a man who preaches what other people should practice.

The Summer Bath.

Nothing is more refreshing or invigorating in summer than a daily bath. Use soft, tepid water and good soap. Ivory Soap is ideal for the bath; it is pure, lathers quickly and leaves the skin soft and white. The bath should be taken early in the morning or just before retiring at night.

ELEANOR R. PARKER.

Even the business of the contractor has been known to expand.

Use Allen's Foot-Ease.

It is the only cure for Swollen, Smarting, Tired, Aching, Hot, Sweating Feet, Corns and Bunions. Ask for Allen's Foot-Ease, a powder to be shaken into the shoes. Cures while you walk. At all Druggists and Shoe Stores, 25c. Don't accept any substitute. Sample sent FREE. Address, Allen S. Olmsted, LeRoy, N.Y.

An egg is waylaid when the hen steals a nest by the roadside.

Mrs. Winslow's Soothing Syrup for children teething, softens the gums, reduces inflammation, allays pain, cures wind colic. 25c. a bottle

To boast of one's honesty doesn't always prove it.

I do not believe Piso's Cure for Consumption has an equal for coughs and colds.—JOHN F. BOYER, Trinity Springs, Ind., Feb. 15, 1900.

Money may make the mare go, but it's different with an automobile.

FREE! TO WOMEN A Large Trial Package of PAXTINE TOILET ANTISEPTIC

A NEW SPECIALTY FOR WOMEN.

Internal cleanliness is the key to woman's health and vigor. Inflammation, Soreness, Pelvic Catarrh cannot exist with it.

Paxtine used as a vaginal douche is a revelation in combined cleansing and healing power. It kills all disease germs. ... treatment of female ills it is invaluable. ... and cures all discharges. ... Catarrh. ... feet. ... Cures ... Sore Throat, Sore Mouth and Sore Eyes. As a tooth powder nothing equals it. Removes Tartar, Hardens the Gums and whitens the teeth, makes a bad breath sweet and agreeable.

Thousands of letters from women prove that it is the greatest cure for Leucorrhoea ever discovered. We have yet to hear of the first case it failed to cure.

To prove all this we will mail a large trial package with book of instructions absolutely free. This is not a tiny sample, but enough to convince anyone.

At druggists or sent postpaid by us, 50 cts. large box. Satisfaction guaranteed. The R. Paxton Co., Dept. ..., Boston, Mass.

HEADACHE

"My father had been a sufferer from sick headache for the last twenty-five years and never found any relief until he began taking your Cascarets. Since he has begun taking Cascarets he has never had the headache. They have entirely cured him. Cascarets do what you recommend them to do. I will give you the privilege of using his name." E. M. Dickson, 1120 Resiner St., W. Indianapolis, Ind.

ANNUAL SALE, TEN MILLION BOXES

RIPANS TABULES

Ripans Tabules are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted, there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tabules. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.

DROPSY NEW DISCOVERY; gives quick relief and cures worst cases. Book of testimonials and 10 days' treatment Free. Dr. H. H. GREEN'S SONS, Box B, Atlanta, Ga.

TO ADVERTISERS.

Frequent changes of advertisements is one of the main requisite for a successful result; we therefore urge our advertisers to change their ads at least once a week. Try and get such changes to us as early in the week as possible; never later than Thursday noon.

WHAT NEXT?

"You can fool some of the people all the time; all the people some of the time, but you can't fool all the people all of the time."

PLAINFIELD, Aug 18.—With a determination to get even with Somerville for the way in which she has been treated in county matters, North Plainfield has taken the first step in an effort to change itself from a borough to a city. Disappointed in the attempt to become a part of Union County, and failing to be consolidated with Plainfield, throwing aside the government of a borough for that of a city has been agreed on as a last resort.

Mayor N. B. Smalley and the Council at its regular meeting, held [illegible] evening, unanimously adopted a resolution [illegible] appointing Counsel Reed [illegible] ascertain what steps would be necessary to obtain home rule and the control of licenses. If this is done North Plainfield will pass from a first class borough to a third class city.

The question of licenses has become an important one. They are granted by the courts at the county seat, Somerville, and the borough officials have no word in the matter. This has resulted in a number of "speak easies" and unlicensed places doing business and the usual trouble of getting evidence has been met.

The above article, with slight variations, appeared in New York, Newark, Trenton and Plainfield newspapers, and bears the ear-marks of the famous local "Literary Bureau," which became well-known during the days when annexation was the slogan of the politicians here.

"Disappointed in the attempt to become a part of Union county and failing to consolidate with Plainfield," reads very nicely to a stranger, but not so to those who are acquainted with the facts.

Who are the disappointed ones in this matter?

An election was held here and a large majority of the people by their ballots declared in favor of remaining in Somerset county. Evidently these people are not disappointed because they are not a part of Union county. Then it must be the minority, the one who favored robbing the county of North Plainfield, who now proclaim themselves disappointed, and not a majority of North Plainfield citizens.

"Failing to consolidate with Plainfield," they cry. Well, why don't they consolidate? They have it in their power to call an election for this purpose at any time by giving ten days notice to that effect.

It would be supposed that such warriors as head this fight would not give up the battle before measuring lances with their foe. They are not the kind of people to cry enough before they strike a blow.

Let us see, what were the words of the "big chief" at Trenton, when the argument for annexation was held before the Senate? Fortunately a record was kept of his notable speech and here it is:

"We are going to have it (annexation) whatever you gentlemen do."

That does not sound like a squaw man or dough faced warrior does it? Then why not consolidate, or at least make the attempt?

Listen, now, and we will tell you: Politics, politics, politics—and politics.

Politicians head this latter scheme of making a city government of North Plainfield.

Politicians tried to set North Plainfield over into Union county, without the consent of the people, and when trapped, a referendum was added to the bill and an election called which resulted in the defeat of the political scheme. Failing in this they shouted for consolidation, but their cry was only a bluff to hide their real purpose which now shows itself in their latest cry for city government.

Borough government is the best municipal government afforded in the state, and while it is not claimed to be an ideal government, yet it approaches the ideal nearer than any other form. It is a government for the people by the people and in any and all events, is much preferable to a city form of government, where everything, including school matters, licenses, etc., is controlled by the Mayor and council and not by a vote of the people as in a borough.

Again quoting from the "Literary Bureau":

"The question of licenses has become an important one. They are granted by the courts at the county seat, and the borough officials have no word in the matter."

And right glad are we and all other good citizens that borough officials do not have anything to do with granting the licenses in North Plainfield.

The record of Judge Schenck, of Somerville on liquor licenses needs [illegible] is no eulogy from the REVIEW. It is above reproach and reflects the sentiment of all good citizens of the borough and county. The decision of licenses in the hands of one such honest man as Judge Schenck is a thousand times preferable to a city government where the ward politician, as a rule, has the matter in charge.

Continuing the quotation:

"This has resulted in a number of 'speak easies' and unlicensed places."

Because the courts at Somerville did not license the "speak easies in North Plainfield the courts are to blame!

But what about the borough officials allowing these "speak easies" and unlicensed places to exist, in direct violation of borough ordinances? What has Somerville or the courts to do with those things? Does any man pretend to claim that these unlicensed places cannot be closed up by our borough officials? Hardly.

No, no, Messrs. politicians, your scheme is entirely too transparent. You may hoodwink the people some of the time, but you cannot keep it up indefinitely.

ALL FAVOR THE AMENDMENTS.

Naturally the men most qualified to pass on the proposed amendments are the lawyers of the state, and among other prominent members of the profession to come out in favor of them is Alvah A. Clark, of this county. Mr. Clark, in the Law Journal, says:

"I do not know that the proposed amendments will be the best thing to do, but it is obvious to any practitioner that something should be done, and they seem to be a move in the right direction. The court of last resort thus constituted will be enabled to give all the time necessary to the consideration of the great mass of business which now comes before our court of errors and appeals. It will be an appellate court.

"The change in the court of chancery, giving the appointment of vice chancellors to the governor instead of the chancellor, does not strike me as an important one. I do not know that I would favor depriving the chancellor of his prerogative of selecting the persons to whom he will refer his cases; it does seem to me that the chancellor is better qualified to select those who should assist him in the court of chancery. Nevertheless, it may be said with equal force that the governors of New Jersey have always been cautious and careful in the selection of judges to whom they submit the rights of the people to be determined, and the like care will doubtless be exercised in the future as in the past."

No matter how the amendments might have been proposed there would have been some opposition to them, but it is the fact that nearly every prominent lawyer favors them for the reason that while they may not, in their present form, be perfect, they are a step in the right direction, and will lead to perfection later on.

THE long vacation which the "Literary Bureau" has had does not appear to have improved its truth telling qualities in the least.

THERE are a few more people in North Plainfield than are numbered with the Mayor and Common Council and they may have something to say as to whether our borough shall be made a city or not.

IF the Mayor and Common Council desire consolidation with Plainfield why does not that body call an election and thus give the North Plainfield people (those that are not numbered with the Mayor and Common Council) an opportunity to express their wishes?

NOW THAT the limit has been reached in the way of spending the borough money without an appeal to a vote of the people, it is proposed to make the borough into a city. Like other similar schemes, the promoters seem to forget that there are others to reckon with.

THE people of North Plainfield may not get as much free advertising in newspapers as is given the Mayor and Common Council, but when a question which concerns their homes is laid before them they know how to settle it. They did this last fall when on the annexation question they decided to remain in Somerset county.

THE enlarged appearance this week of the REVIEW is not to be construed that either its head or that of its editor has had a similar change; at the same time we cannot help feeling just a little proud of this prosperous looking, and we thank our many subscribers and advertisers who have enabled us to change from a six to a seven column form.

THE Trenton Times says that "if any voter is dissatisfied with the nominations made this year, it will be his own fault. Under the new primary law any 10 voters may, by petition, nominate for any office the candidate they desire. Saturday, August 29, is the last day for filing such petitions with the city or municipal clerks, who are obliged, under the law, to print the names of all such candidates on the ballots that are to be used at the primary elections in September. Delegates to the various conventions may be nominated in the same manner. In the past there has been much grumbling, at times, over the character of the candidates. This year there will be no good excuse for such complaints."

STAIN OF YELLOW GOLD

By Ellen Page Finn.

In poor attire she was and poverty had drawn its gaunt lines on all of her environment, but there was a rich beauty in her face, and the serious symmetry of figure seemed to give warmth and color to the thin and faded gown she wore.

Her little room was high up, and near its one window she sat by a small table on which stood a typewriter. A few sheets of paper were strewn around, and half a page on the machine showed her work had ended with no more to follow.

She sat with her hands folded in her lap—clenched, if the tense lines were read aright—and gazed helplessly and hopelessly out toward the gray sky that seemed to come so close down, and yet was so far away. Tear stains were on her cheeks where the pink was fast fading, and what was gentle in her face was growing harder as she thought day by day and night by night the desperate fate that was crowding her to the wall.

That temptation was hers could be easily said, for is not beauty in adversity the first food of the tempter?

But she had struggled bravely, and the sharp click, click of her typewriter had been sweeter music to her than the song of the bird in the gilded cage belonging to the girl who occupied the suite of elegant apartments on a lower floor.

Still, she could not help thinking, help contrasting her starvation, her rags, her dreadful poverty with the luxury and ease she saw about her, ready to come at her call.

She was cold, hungry and penniless; the pawnbroker had everything except a gold medallion of her mother which she wore around her neck. She took it in her hand, and, as she looked into the face so like her own, the tears came to her eyes again, and, leaning her head upon her arms on the typewriter, she sobbed aloud.

For an instant only she gave way to her feelings; then she rose to her feet and, standing by her typewriter, she laid her hand upon it as if it were sentient and knew.

"Be still now if you will, my dear," she said to it smiling, "but to-morrow you may click again, for I know I shall get something to do, and then we will have a royal feast, a fire and good cheer. You and I——"

She was interrupted by a knock at the door.

"Come in," she called cheerily, and a man whom she had seen before came in.

"Excuse me, miss," he said, not unkindly, "but I come for the pay for the typewriter. You are two months due, and the boss said if you couldn't pay I was to take it away."

All the sunshine gone at one short message; all the hope, all the comfort of hopeless always find in to-morrow all gone, and with a moan she sank down to the chair by the table.

The collector in his poor way tried to cheer her, but she only shook her head.

Suddenly she dashed the tears from her eyes, her face grew desperately white and hard, and she shook herself as if she would be rid of her pain.

"Come to-morrow morning," she said harshly, "and if I have no money you may take the machine."

"It's contrary to orders, miss, but I'll do that much for a poor girl, even if I have to suffer for it. Hoping you will have good luck, miss, good day miss," and he went out, wondering that there was in the face of the girl he had never seen there before.

An hour later she was in the office of a broker for whom she had done some work, and who offered her other assistance, which she had refused.

When the collector called the next morning he found the typewriter in peace waiting for him.

"Here's your money," said the girl, "and you may take your machine. I shall have no further use for it."

The man was curious, and would have questioned her, but her eyes forbade either curiosity or sympathy, so he turned to go out with the machine and the money he had come to get.

"Here," she said to him, as she held out the picture of her mother, "you have always been kind to me. Take this and give it to your little girl, that one with blue eyes like mine, who has one here with you once. Tell her it is the picture of a mother whose little girl was lost in the great city. It is all; goodby."

Playing Cards in Russia.

In Russia the manufacture of playing cards is an imperial monopoly. In 1848 14,000 packs were issued daily, so that the demand was so much in excess of this that a petition was addressed to the czar praying for a still more liberal supply. Among the card devotees the Russian soldiers are conspicuous. They commonly carry packs in their pockets, but when there is an actual call to arms and they prepare themselves for the battlefield they make it a point to get rid of all their cards. This is due to a superstition amounting to conviction, which leads them to believe that to retain them upon their persons at such a time would be to court grave disaster.—Ohio Valley Manufacturer.

"Julius, was you ever in business?" "Of course I was!" "What business?" "Sugar planter!" "When was that, my colored friend?" "Der day I bersuaded that old sweetheart of mine!"

The coward is generaly a sheep in his clothing.

Threnody.

My grandpa bought a little farm,
Some chickens and a calf;
And farmed, and farmed, and farmed, and farmed,
But only raised a laugh.
My uncle's baby ran away
(It scared the unc. to death);
He chased him up and down the land,
But only caught his breath.
"Oh, stop my little boy for me,"
He cried, nigh choked with tears,
The neighbors laughed and then some more,
But only stopped their ears.

The Power of Prompt Decision.

THE man who makes up his mind quickly and firmly has an infinitely better chance of success than the one who is always hovering on the brink of hesitation and uncertainty. The temptation to open up and reconsider should be cut off immediately, for to be weak in your power of decision is to be shorn of most of your strength.

One of the most dangerous habits in which a youth can indulge is that of weighing, balancing, reconsidering, and making up his mind, and yet again reconsidering, balancing, and weighing all the arguments, for and against, until the brain becomes confused and incapable of clear judgment. Such a habit is one of the greatest dissipators of mental power, and the man who allows himself to become its victim is foredoomed to failure.

A young man who starts out to succeed must resolve firmly that he will not become a prey to indecision, that he will suffer the consequences of mistakes rather than be forever digging up matters de novo. He should make up his mind not to act hastily, or without proper consideration of the thing in hand, but to use his best judgment in arriving at a decision, and then, without hesitation or reconsideration of the arguments for and against, try to execute it with all his might. If he finds he has made a mistake he must not be discouraged; he has had a new experience, which will prove helpful to him in the future, and the benefit accruing to him from the practice of self-reliance, prompt, unwavering decision, will be of infinitely greater value to him than a successful move would have been had he hesitated, weighed, and considered, reconsidered, and changed his mind over and over again before making a final decision.

Many people of great ability do not succeed to any extent because of the weakness of their power of decision. They seem incapable of acting independently. They must see their friends and consult their neighbors before they can tell what to do about the simplest thing. They must think it over and over until the brain grows weary of the treadmill round forced upon it; and the more they think it over, the more consultations they have about it, the less able are they to reach any conclusion. So they go through life, halting, uncertain, robbed of their strength, deprived of the large success they were fitted by their ability to win, because of this fatal lack of power to decide for themselves, and to decide promptly.

The Survival of the Best.

By Frederick Breithut.

A CORRESPONDENT asks, "Is the survival of the fittest always the survival of the best?"

No, it is not. At times, the survival of the fittest means the survival of the very worst.

Of course, the words "fittest" and "best" are relative terms and their meanings vary according to the time and the conditions. What is best at one time is the opposite at another What is fittest under one set of conditions is utterly unfit under another.

In answering our correspondent's very interesting question, therefore, we must first state what is meant by "fittest" and what is meant by "best."

By "fittest" we mean that which is best able to adapt itself to its environment. Perhaps it would do to define "best" as that which will contribute most to the advancement of the race.

Let us take a few concrete illustrations, which will show how the survival of the fittest sometimes causes the best to go under.

Very often in the intense competition of business, the most unscrupulous man wins out. Though he shows his fitness by winning the fight, surely he is not the best competitor who could have won.

Sometimes the man who adulterates his goods can sell them at a lower figure than the man who is selling the genuine, pure article. He may succeed in driving the honest dealer out of business. His survival shows his fitness but does not indicate that he was the best who could have survived.

[redacted]is wool can manufacture his cloth [redacted]r "all wool." Being able to under- [redacted] may beat him out.

[redacted] those men who have shown their greatest fitness by the degree of their success are of the Rockefeller and Morgan type. These are far from representing our best types of citizenship.

In a state of nature, where no artificial conditions exist, the survival of the fittest generally does mean the survival of the best. But, in a state of civilization, such as we live in, with its conventions, usages, restraints and inequalities of wealth, social position and opportunity, it may mean something very different.

Our present system tends to let the fittest survive, but the fittest are often those [redacted]lest and least. Now the man who demands least is the one who has the fe[redacted] n[redacted] and he is usually the least highly organized and therefore t[redacted]

An[redacted]tion which seems very prevalent is, that the survival of the fit[redacted] killing off of a lot of people. This does not follow from the la[redacted]

Though the [redacted]ablishment of the principle of the survival of the fittest may appear as something which is purely theoretical and abstract, it has very practical applications.

We learn at least two things from it.

One is that our aim in all legislative and other acts should be to try to make conditions such that the majority are fittest.

The second is, that we should strive so to organize society in future that the fittest who survive are the best, i. e., those most desirable to society.—New York American.

Motives of "Settlement" Workers.

By Ellen Burns Shefman.

WHIMSICAL wonder is tempted to figure upon those unknown quantities, the X Y Z of motives that lie behind the college woman's election of college settlement work. One may concede a certain per cent.—a large one, indeed—of motives wholly creditable to such workers. But of the composite nature of the remaining per cent., has the world any conception?

Sirene naively confesses that she "went into settlement work," partly to show how the other half lived, partly because she wanted to "study a new type," and partly because "doing settlement work" sounds better than "living at home."

Others undoubtedly take up settlement work under the influence of the old idea that a missionary must go away, or be sent away, to proclaim a beneficent fiat lux, over a people sitting in darkness. Beyond a peradventure, some people must "go away somewhere" to find their work. But there are cases where people have gone away from their proper work to find it; for a good deal of the world's work lies at people's elbows, and nudges them.—Good Housekeeping.

Men Who Do Things.

By Bliss Perry, Editor of The Atlantic.

A JADED millionaire trying to get pleasure out of a too long deferred holiday in Europe is one of the most depressing spectacles. For twenty or thirty years he has been amassing a fortune with the pluck and energy which we all admire. And here he is, set down in Paris or Dresden or Florence, ignorant of the language, the history, the architecture, the ideas of the country. He is a good fellow, but he is homesick, listless, indifferent. He is taking his holiday too late. Curiosity, imagination, sympathy, zest, have burned out of him in that fierce competitive struggle where his life forces have been spent.

None of our contemporary hallucinations leads more certainly to ultimate weariness and indifferentism than the exclusive glorification of "men who do things." Study the faces of the "men who do things," of the "men of to-morrow," as you find them presented in the illustrated periodicals. They are strong, straightforward faces, the sign of a powerful, high-geared bodily mechanism. These men are the winners in the game which our generation has set itself to play. But many of the faces are singularly hard, insensitive, untouched by meditation. If we have purchased speed and power at the cost of nobler qualities, if the men who do things are bred at the expense of the men who think and feel, surely the present American model needs modification.

A NOBLE REFORMATION.

BY M. SILINGSBY.

IN a miserable hovel, a few miles from the populous city of D——, a woman lay dying. Toil, care and want had done their inevitable work, for she was a drunkard's wife. The scant furniture of the dilapidated room was shabby and worn, and not even the most meagre comforts of life were to be found within its squalid interior.

The dying wife, with two daughters, of the respective ages of three and fourteen years, comprised the half-starved and otherwise neglected family of Enoch Goldwait. The half-naked children were wailing out their misery and grief at their mother's bedside, for she had just acquainted Ruth, the elder, with the startling fact that the dreaded moment in which she must leave them to the cold mercies of the world was now rapidly approaching.

Enoch Goldwait was stretched out upon the bare boards in a drunken stupor, a quart bottle half filled with whisky within easy reach of him. He was snoring heavily, his face purple and bloated, and his whole appearance betokened a most miserable and degraded wretch. But in the midst of his besetting sin Enoch Goldwait was not without some redeeming qualities.

He never was known to abuse or maltreat his family either by word or blow, but through his inordinate love for strong drink was led to neglect them in a most shameful and unpardonable manner. To use a trite phrase, "rum had mastered him"—had got the complete upper hand of him. If it was to be but one thing, either drink for himself or food for his family, he would have taken the drink, though he saw the gaunt figure of starvation staring his sick wife and hungry children in the face.

He knew that his wife was failing daily, and that the physician who attended her as a matter of humanity, not pay—to his praise be it spoken—encouraged no hopes of her recovery: and yet to his stupefied senses it could only appear that she must ever continue the drudge and martyr she had been. He could not seem to realize the possibility of her dying, or the still more startling reality that it was himself who was killing her.

He had once loved her truly and earnestly, and would still were not all his senses blunted or paralyzed by the poison. But now, as he lay outstretched upon the bare boards, bloated and beastly, and odorous with the disgusting effluvia of vile rum, he looked, as he really was, a besotted brute; and yet this man had been blessed by nature in the beginning with more than average intellect.

For some minutes the dying woman had been lying quite still and calm, scarcely seeming to notice the heart-rending grief of the children, when she suddenly aroused herself from the temporary state of apathy into which she had fallen, and said:

"Ruth, darling, wake your father. I must not die without making one last effort to reclaim him. When I first knew him no truer or more loyal heart ever beat in the breast of man; but, alas! the accursed rum has deadened all its finer impulses."

Ruth, the older daughter, went hastily, and shook her father somewhat roughly by the shoulder before she could arouse him. At length he raised himself on his elbow, and his bloodshot eyes wandered vacantly for a moment around the desolate room. He then reached for his bottle, exclaiming, as he did so:

"What's—hic—up? Nobody burt—I guess not."

"Hush!" said Ruth, tearfully. "I fear poor mother is dying, and she wishes to talk with you. Don't drink again, papa—at least not now—it will only stupefy you; you won't remember what she says."

Without heeding the child's appeal or the sad moans of the heartbroken wife, he drew out the cork with an unsteady hand, and took a deep draught of the fiery poison.

"It's victuals and drink, Ruthy," he said, staggering to his feet, and approaching the bed. "What's the matter, Susie—hic? Ain't the neighbors brought in nothing?"

"It is not of the neighbors' kindness or neglect that I would now speak," said Susie Goldwait, in a feeble but earnest voice. "It is of you, Enoch, and the wretched end you are surely coming to unless you abandon that which has brutalized, and will destroy you body and soul. I have always been a good and true wife to you; always willing to take my share, and much more than my share, of the burden——"

"Hic! I know it, Susie. You're a nice old gal; but what the deuce is up?" interrupted the inebriate, with a maudlin attempt to make light of the wife's solemn warning.

"In the last five years I have drudged myself to death for you and the children, and rum—accursed rum—has been the whole cause of it. I do not mention it to censure you for the past, or waste further words about what might have been. But it is of the future that I would now speak; for I am dying. I can already feel the touch of death upon me——"

"Tell you ain't going to die 'tall, Susie," interrupted the slightly startled inebriate, stubbornly. "Tell you—hic—no such thing! Live fif-years longer, bet seven life on it."

"No, Enoch, I shall not last till the midnight hour—I know, I feel it; but I am too weak to discuss the point longer. I want you to be a sober man, Enoch, so that our children will have some one beside strangers to look after them, and provide for them when I am gone."

"Tell ye ain't goin' die!" again interposed the drunkard, swaggering back and forth unsteadily, but still clinging with a vise-like grip to the bottle; "live thousand year old, bet your buttons."

The dying wife gave utterance to a despondent sigh, for she saw how hard a task it would be to make an impression upon his mind in his present condition; but in her great anxiety for the future welfare of her children, she felt that she could not die without making another effort to bring him back, in some degree, to his sober senses. We shall see with what effect; and then let its advocates answer if rum is not accursed.

"Oh, my dear husband! can you, will you not be warned by my dying words?"

The earnest, beseeching tone seemed to fasten his attention for a moment with something very nearly akin to partial understanding and sobriety; but the effect was only momentary.

"Promise me, if not for my sake," the woman pleaded, "at least for the children's sake, that you will become a sober man—that you will never again raise the poison to your lips?"

"What mean by poison, Susie (hic)—whisky?"

"Yes, husband, whisky—rum; but more properly poison; that which has so long been your bane, and the source of all our present misery. Swear to me, before I die, that you will never, never taste it again!"

"Couldn't think such thing, Susie," answered Goldwait, with a drunken leer of stupid obstinacy; for the last drink was beginning to manifest itself powerfully. "Drink when I want it. Good for me. Victuals and drink, both (hic); s'don't say no more 'bout it, old woman. Drink always, sure's born."

And suiting the action to the word, the miserable creature again drew the cork and raised the bottle to his parched and swollen lips; but in the action he lost his equilibrium and fell heavily to the floor. The next moment he rolled over on his side, and was soon unconscious; and in this state he continued up to the moment of his wife's death, which occurred about midnight.

Of course he was somewhat shocked when he came to a realizing sense of his bereavement, but it did not last long, for he drowned in strong drink whatever sorrow or remorse he was then capable of feeling. The neighbors tidied up the children for the solemn occasion, and Mrs. Goldwait was interred at the public expense; but the husband was too drunk to follow his wife's remains to their last resting place, and the children went alone as chief mourners.

From this hour, if such a thing can be believed possible, Enoch Goldwait continued to grow worse and worse. He sold one article after another of the shabby furniture, when he could find any one unprincipled enough to purchase, and the meagre sums he obtained from time to time went for liquor, instead of food for his half-starved children. As the cold autumn nights approached he sold the very bed from under them, and lay drunk for a week while the neglected children slept on the bare floor and suffered for want of the commonest nourishment.

Little Ruth had often gazed at the indistinct outlines of the great city only a few miles away, and wondered if there were not food enough for all there. At length she determined to run away with her little sister, Eva, and seek a home in the great city. The father was too drunk to take any heed of their departure, and so the houseless little wanderers drifted out into the great world of which even the elder knew but little.

It was past the middle of November, and the nights were chilly.

Tom Newcomb was reading the evening paper to his wife. He was a thriving young trader in B——, lately married to a most estimable and kind-hearted young lady. It was near the hour of ten, and while occupied as we have stated, they were aroused by the plaintive sobs of a child.

They opened the street door and discovered the little wanderers seated on the steps, scantily clad and shivering in the bleak night air.

The kind-hearted trader and his wife took them in, and were much affected by the sorrowful story of little Ruth. The next day she was stricken down with a fever, and a week after she was laid in her little coffin. It was the verdict of sympathizing friends that her death was the result of neglect and exposure.

The father was sent for, and was found just recovering from his protracted debauch. He was in a most deplorable condition, both in mind and body. Not a solitary article of furniture, save a broken-backed chair, remained in the hovel. Everything had gone for rum, and he had kept on drinking day and night till money and credit were both exhausted, and then he was obliged to stop, and in stopping, to reflect. He upbraided himself now as the murderer of his wife and child, and was, when too late, thoroughly humbled and repentant.

Tom Newcomb was not only a strong advocate of temperance, but a good Samaritan. He took Enoch Goldwait home, gave him the advantages of a bath and shave, and clothed him in a suitable manner to attend the funeral. When Tom Newcomb took him into the room where little Ruth lay in the coffin, he knelt beside it, and burst into tears.

"I killed her!" he said, as he turned his haggard face toward the solitary witness; "and I killed her mother, too, heaven forgive me!"

"No," answered Tom, "it was not you; it was rum. And now I want you to make me a solemn promise, over the dead form of your child, and as you hope for mercy in the hereafter, never to let the vile poison pollute your lips more."

"I promise!" said Enoch, solemnly, "as I hope for salvation; and if I fail to keep my word, may I suffer in the hereafter never-ending tortures!" And from that moment he rose up a redeemed man, never more to sink under the power of the tempter. He gave his consent to the Newcomb's adopting little Eva; and a few days after the funeral Enoch Goldwait started for California, Tom Newcomb furnishing the money for his outfit and traveling expenses. This was at the height of the gold fever.

For the next few years they received an occasional letter from him, stating that he was doing well, and had kept his pledge, and then all communications ceased. Gradually the Newcombs came to the conclusion that he must be either dead, or fallen back again into his old habits of dissipation. Thus, fifteen years had passed away since Enoch Goldwait's departure, and little Eva had developed into a beautiful girl of eighteen.

During these fifteen years the Newcomb family had been increased by the addition of three legitimate members—two girls and a boy; but this did not prevent them from doing full justice to Eva, who had received every educational advantage that money could procure.

It is true, they could not see their way clear to do much more, now that they had children of their own to provide for and settle in life; and when Winfield Marsh, one of Mr. Newcomb's clerks—a very handsome fellow, and of good moral character, on a salary of a thousand dollars a year—paid court to Eva, the Newcombs thought favorably of it, and raised no opposition to the match.

Mr. Newcomb gave his adopted daughter a good marriage outfit, and raised Marsh's salary to twelve hundred a year. The wedding day was fixed, and the young couple were very happy over the prospect of their approaching nuptials.

They were to begin life humbly, but they loved each other, and the world was all before them.

The auspicious evening had arrived, and the invited guests were assembled at the residence of the Newcombs. The young couple had rented and furnished a small cottage—or rather Mr. Newcomb had furnished it—whither they were to retire after the ceremony, and commence housekeeping.

Everything was in readiness, and Mr. Newcomb was on the point of giving away the bride, when the street bell rang, and the servant ushered in a middle-aged gentleman, a stranger to all present. He approached Mr. Newcomb with an expression of pleasure, exclaiming as he did so:

"You do not seem to know me. I am Enoch Goldwait, just returned, as the saying is, with a pocket full of rocks, and not a drop of liquor has passed my lips since I last saw you."

"And you are just in season, my dear friend, to witness your daughter's marriage to a poor but estimable man, one of my clerks," said Newcomb.

"All right," exclaimed the returned Californian; "I will set him up in business." And he did.—New York Weekly.

Girls Who Work For Uncle Sam.

From 8 o'clock in the morning until close to 6 in the evening there are 5000 typewriters grinding out letters for the United States Government. During these hours there are, of course, 5000 typewriter girls busily hammering the machines.

Uncle Sam is the largest employer of typists in the country, and should be the patron saint of the typewriter girl. The amount of manuscript his workers turn out would make even Clyde Fitch look dizzy.

Uncle Sam is the nicest kind of a man for typewriter girls to work for. He pays large salaries and he supplies his workers with everything they want. If a girl expresses a preference for a certain kind of a machine she gets it. She does not have to sit down and try to pound a typewriter she does not like.

Whenever a new typewriter girl is employed in one of the departments she names the machine and it is purchased for her.—Chicago Tribune.

Man's Friend, the King Snake.

The most relentless exterminator of reptiles, says a writer in McClure's Magazine, is a member of the family itself—the beautiful little yellow and black king snake, the friend of man and the avowed enemy of anything that creeps or crawls, regardless of size or poison fang. A native of our own South, the king snake is between five and eight feet long and no thicker around than a man's thumb. Built in every muscle and bone for speed and tremendous constricting power, there is not another snake on earth that can withstand his assault. He is immune to the poison of the cobra and the rattler alike, and the strength of a thirty-foot python has no terrors for him. Within five minutes from the opening of the fight the king snake could kill the biggest python that ever lived. Ferocious as the little constrictor is toward his own kind, toward man he is friendly and rarely tries to escape when met afield.

Following the Recipe.

A side-light on character comes from a cooking-school by the way of the New York Times.

"There are women," said the instructor, "who, when the recipe calls for a teaspoonful of hot water, will go to a teakettle and attempt to pour the water directly into the teaspoon."

CHILDREN'S DEPARTMENT.

WHAT DO THEY TALK ABOUT?

What do the robins whisper about
From their homes in the elms and birches?
I've tried to study the riddle out;
But still in my mind is many a doubt,
In spite of deep researches.

While over the world is silence deep,
In the twilight of early dawning,
They begin to chirp and twitter and peep,
As if they were talking in their sleep,
At three o'clock in the morning.

Perhaps the little ones stir and complain
That it's time to be up and doing;
But the mother-bird sings a drowsy strain
To coax them back to their dreams again,
Though distant cocks are crowing.

Or do they tell secrets that should not be heard
By mortals listening and prying?
Perhaps we might learn from some whispering word
The best way to bring up a bird,
Or the wonderful art of flying.

It may be they speak of an autumn day
When, with many a feathered roamer,
Under the clouds so cold and gray,
Over the hills they take their way
In search of the vanished summer.

It may be they gossip from nest to nest,
Hidden and leaf-enfolded;
For do we not often hear it confessed
When a long-kept secret at last is guessed,
That "a little bird has told it?"

Perhaps; but the question is wrapped in doubt,
They give me no hint or warning.
Listen, and tell me if you find out
What do the robins talk about
At three o'clock in the morning?
—R. S. Palfrey, in Every Other Sunday.

When Bobbie came near them the squirrels in the park sat up and looked curiously at him, with their heads on one side and their tails curled over their backs. That is, all but one of them did.

Bobbie stopped all at once, when he saw that one, and gave a little gasp. He went closer, to make sure, and held out a nut. The squirrel crept toward him, stopped once or twice, and then snatched the nut from his hand and scampered away. It was true. The squirrel had no tail!

Bobbie watched it for a while, with a sorry feeling in his heart. It must be a terrible thing, he thought, to be a squirrel without a tail. He wondered how it happened to be gone; whether a stray dog had caught the squirrel or whether one of the hinged doors of the boxes on the limbs of the trees had closed on it. Anyhow, the tail was gone, and the squirrel was a cripple, like a man without an arm.

The squirrel looked at Bobbie with its bright little eyes and the boy held out another nut. As it had before, the squirrel came up bit by bit and took it. It made Bobbie's eyes fill with tears to see the little stub of a tail, and he turned away. One of the keepers of the park, an old soldier who had lost an arm, was coming down the walk.

"If you please, sir," said Bobbie to the man, "can you tell me how the squirrel lost its tail?"

The man stopped. "No," he said, "no one knows. We saw it late one afternoon, as sound and well as any squirrel in the park, but the next morning we noticed that its tail was gone."

"Oh," said Bobbie, with wide eyes, "how do you suppose it happened?"

"A dog, I guess," replied the man.

"I am so sorry for the poor squirrel," began Bobbie.

"You needn't be," said the keeper. "Unless I am very much mistaken the squirrel does not know that its tail is gone."

"Not know its tail is gone!" echoed Bobbie. "What do you mean?"

The man looked at the empty sleeve of his blue coat. "My arm was shot off in a battle a long time ago, before you were even born, but some days it seems to me it is still there. I try to curl up the fingers on the hand of that arm, just as I used to do before it was taken off. Sometimes it seems to me the fingers itch, and I forget myself and reach for the hand. If I couldn't see and feel with my other hand that it is gone I don't believe I should ever know it."

"Yes, sir," said Bobbie, eagerly, "and the squirrel——"

"Just so," smiled the man. "A squirrel cannot see its tail and has no hands to feel for it. Look here!"

He held out a nut, and the squirrel, not content with the two Bobbie had given it, crept closer to them. Suddenly the man gave a sharp cry that startled the squirrel and it halted trembling. The man clicked two nuts together, and Bobbie, who was watching the queer stub of a tail, saw it turn up just as if the whole tail were there. The keeper tossed the nut to the squirrel. Then he turned to Bobbie.

"Did you see that stub of a tail try to curl?" he asked. "Well, I am sure that the squirrel never knew but what its tail was curled over its back as nice as any squirrel's."

"Yes, sir," said Bobbie, "and its eyes were just as bright and happy as any squirrel's, too. I know it thinks it has a tail. I am glad it does."

And now every afternoon Bobbie hunts up the keeper, and together they feed the squirrel without a tail, which is the happiest squirrel in all the park. —Leslie W. Quirk, in Chicago Record-Herald.

MOTHER'S QUEER HOARD

Husband at Her Death Finds $2300 About the House.

She Had Taken the Money From the Pockets of Her Sons When They Came Home Drunk.

Dover, N. J.—John Keenan, an old miner of the Borough of Wharton, has made a deposit in the National Union Bank of money his wife had saved in a novel way. Keenan has long been incapacitated for work because of his age. Mrs. Keenan died a few days ago. After her funeral Keenan recalled a habit she had of going through the pockets of their two sons, both miners, whenever either happened to come home somewhat the worse for liquor.

The sums which she would find on such occasions she used to confiscate as a penalty for their transgressions. She never spent any of it. Remembering this Keenan began a systematic search of the house. He found coin and bills in odd corners. Being an illiterate man, Keenan was unable to count so big a pile. He tied it up in a big cloth and carried it to a friend, who, after a count, announced that the "pile" footed up exactly $2300.

Keenan at once drove to Dover and deposited the money.

LINER SINKS CHINESE CRUISER.

Seventeen Lives Lost Off Hong Kong and 170 Members of Crew Rescued.

Hong Kong, China.—The Canadian Pacific Railway's steamer Empress of India was in collision near this port with the Chinese cruiser Huang-Tai. The warship sank an hour afterward. The Empress of India saved 170 of the crew of the cruiser. The captain of the Huang-Tai, who refused to leave his ship, and thirteen of her crew were drowned. The Empress of India was damaged badly amidships.

Montreal, Que.—In an official explanation which the Canadian Pacific Railway gives of the collision off Hong Kong, the railway officials say that the two vessels were running parallel courses about midnight, when, without warning, the captain of the Chinese cruiser suddenly starboarded his boat and tried to cross the bow of the Empress. The latter's captain immediately manuevred so that the collision, which he knew would be the result, should be a glancing one. The bow of the cruiser slid along the side of the Empress, but the starboard propeller of the Empress caught the cruiser and injured her so seriously that she sank in a few seconds.

GIRLS ACCUSED OF TREASON.

Polish Pupils Expressed a Wish For Re-establishment of the Old Kingdom.

... authorities ... Polish girls at ..., East Prussia, on the charge of conspiring against the State. The girls, whose ages range from fourteen to twenty years, were, with three exceptions, pupils at the high school. The three exceptions, who are the oldest of the prisoners, were teachers in the school.

All of them were in the habit of reading Polish books and studying Polish history, and in their discussions expressed hopes for the re-establishment of the ancient kingdom of Poland. The Public Prosecutor announces that he will proceed against the girls.

TEXAS PASTURES BURNED.

Incendiaries Start Fires That Destroy 200,000 Acres.

Austin, Texas.—Captain W. J. Miller, of Big Springs, Texas, a member of the State Legislature, was here and reported to the State authorities that many thousands of acres of grazing land situated in western Texas had been burned over during the past few days, and that the fire was started by incendiaries.

The stockmen and farmers of the section were guarding their pastures with armed men. Captain Miller says that up to the time he left home more than 200,000 acres of the grass had been destroyed, and new fires had just been started in Gaines and Dawson counties.

TROOPS SIDE WITH STRIKERS.

Young Captain Suffers Death For Making a Speech in Kief.

London.—The Daily Mail's correspondent at St. Petersburg describes a sensational incident which occurred during the Kieff strikes.

On one occasion, he says, when the troops were ordered by the Governor to fire on the strikers, a young captain stepped in front of his company and forbade the troops to fire upon "their poor starving brothers."

The soldiers obeyed the counter order and the captain made a flaming revolutionary speech to his men. He was arrested and brought to St. Petersburg, where he was tried by court martial and sentenced to death.

LONG LOST BROTHER FOUND.

For Years It Was Supposed He Was Killed in the Custer Massacre.

Augusta, Me.—After a lapse of thirty-three years Mrs. George Diplock, of this city, who has long believed that her brother, George B. Smith, was killed in the Custer massacre in 1875, has received a letter from him dated Oakland, Cal.

Smith is fifty-three years old and owns a large stock farm fifteen miles out of Oakland. He escaped the Custer massacre by being detailed with Gibbon's command June 26, 1876, going up the Little Yellowstone instead of the Rosebud.

Aged Bank Cashier a Suicide.

W. L. Pettit, for many years assistant cashier of the First National Bank at Fort Wayne, Ind., shot himself in the head, dying instantly. Continued ill health is believed to have been the cause. He was sixty-three years old.

Americans in Fighting in China.

The rioting which began at Fatshan, six miles from Canton, China, has spread to towns along the railroad. American engineers at work on the road have fired at the rioters. Several casualties are reported.

THE RACE FOR AMERICA'S CUP

AMERICA'S CUP, the Blue Ribbon of the Sea, has inspired British yachtsmen to put forth their mightiest efforts ever since it was captured from them by the victorious America half a century ago. The attempts of Sir Thomas Lipton, Bart., to "lift the mug" are familiar to every American who takes an interest in sports, especially in yachting. It seems almost incredible that so much money, what would be more than an ample fortune even in these days of huge accumulations of wealth, should be spent with no other object than to secure a silver cup of little intrinsic value. A few figures concerning the cost of the pastime in which Sir Thomas is indulging so freely should be of interest to lovers of thorough sportmanship:

WM. FIFE, DESIGNER.

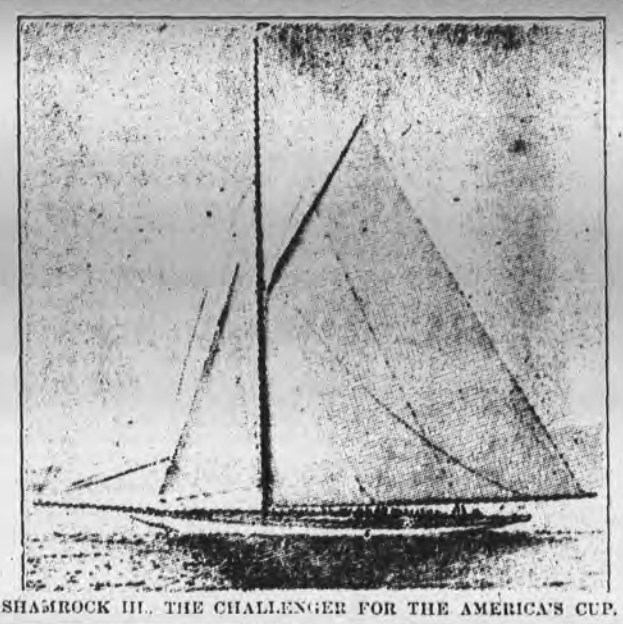
He estimated the expense of his effort to get the cup in 1899 at $800,000. That, however, included $400,000 which he paid to Count Florio, of Italy, for the fine yacht which the Count called the Aegusa, and which is now known as the Erin. This would leave his actual racing expenses in 1899 at $400,000. It is probable that the cost of the second races to him was a little over that figure, but still within $500,000. In other words, including the sum of $500,000 or thereabouts for the purchase and refitting of the Erin, the total cost to the challenger in the last two series of races was somewhere in the neighborhood of $1,300,000. But the cost of the Erin is not, of course, a legitimate factor in the estimate of the actual racing expenses. Probably these last for both series were $500,000.

CAPT. WRINGE.

Leaving the yacht proper and coming to the collateral expenses, there is as the largest item the cost of running the steam yacht Erin, for, say, the two months she actually is in service in connection with the races. This was estimated by a man familiar with the subject at $30,000 a month—$60,000 in all.

While Sir Thomas Lipton repeatedly expressed his confidence in Shamrock III.'s ability to win back the America's Cup, it appeared that his confidence was not shared by those who were actively concerned in the management of the Shamrocks. That Designer Fife, who had a reputation at stake, and who knew the challenger as a father knows his child, had grave doubts as to Shamrock III.'s ability to cope with Reliance was evidenced by the fact that under his orders the bowsprit of the challenger was lengthened three feet.

So radical a change in the rig of the yacht was important, not so much because it increased the area of the head sails and changed the trim of the yacht, but chiefly because, on account of having been effected on the very eve of the cup races, it indicated that the owner and designer of the yacht were not satisfied with the trim of the challenger and wanted to make last-minute improvements on the sail plan as originally designed. Such a change, if it had been made before the yacht crossed the Atlantic, would not have excited comment, but occurring as it did just before the cup races, it was a tacit admission on the part of her owner and designer that the yacht was not fast enough.



SHAMROCK III., THE CHALLENGER FOR THE AMERICA'S CUP.

RELIANCE, THE AMERICAN DEFENDER.

While the contest decides the question of superiority as racing machines between the Reliance and Shamrock III., there has long been a growing opinion among yachting experts that a convincing test of the relative merits of opposite theories of yacht designing, especially of boats which shall be useful for cruising purposes after racing contests, is as far off as ever.

But the New York Sun voices the sentiments of an influential yachting element when it says that the truth is that the larger problems of yacht designing have been solved, and we owe their solution to the struggle for the America's Cup. The American type of yacht is no longer a wide, shallow hull with inside ballast and a sail plan founded on a great hoist of lower sails and short topmasts. The British model is no longer a plank set upon edge and kept there by a load of lead on its bottom, and propelled by a set of sails of which the main one is low and wide and surmounted by a long topmast.

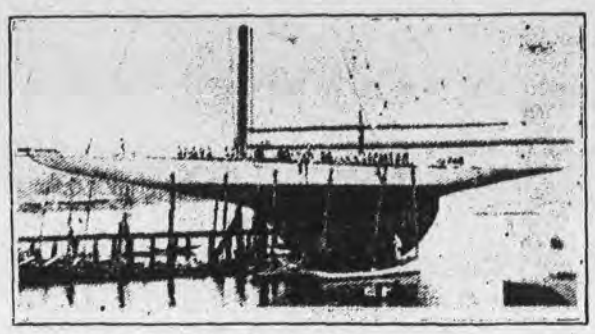
SIR THOMAS LIPTON, BART.

The managing-owner of Reliance, the defender, is C. Oliver Iselin, the leading yachtsman in America. He is now forty-six years old. He was elected a member of the New York Yacht Club in 1877, and has since become a life member. Though of Swiss descent he is tall and slender enough to be called a typical Yankee seaman, and his cast of countenance would confirm his claim to that title.

The skipper of the Reliance is Captain Charles Barr, who steered the Columbia to victory in the two previous international contests, when Sir Thomas failed to bring winning boats across the line off Sandy Hook. The designers of the defender, it is needless to add, are the famous Herreshoff brothers, who have done much to increase the prestige of America as the land of peerless boat builders.

Shamrock III. was designed by William Fife, who also designed Shamrock I. Captain Wringe, who is considered the most daring and capable seaman in all Britain, is skipper of the challenger, and to him and the speed qualities of Shamrock III. Sir Thomas Lipton pinned his faith to "lift" the America's Cup.

NATL HERRESHOFF, C. O. ISELIN AND CAPTAIN BARR.
(Respectively Designer, Managing Owner and Skipper of Reliance.)



THE UNDERBODY OF THE RELIANCE.

Ice Fraud Exposed in Washington.

Frauds have been discovered in the sales of the American Ice Company in Washington to the several branches of the district government. The scales used by the company in weighing caused a shortage of fifteen out of every 100 pounds ordered.

Free Distribution of Bibles.

It is reported that, in view of the looting of Boer Bibles that took place during the late war, the British Bible Society is to make a free distribution of 5000 Dutch Bibles bound in leather.

Child Death-Rate in Spain.

The mortality among children in Spain is extremely great. During the last six years the number of children who died under one year of age in Madrid alone was 22,295, as against 4068 in Paris during the same period.

German Fleet to Visit Us.

Advices from Berlin state that Germany will send a fleet of her finest war vessels to participate in the naval display at Hampton Roads in connection with the opening of the World's Fair at St. Louis May 1, 1904.

Miners Perish in Grand Canyon Rapids.

In order to reach a country where Indians said rich gold gravels existed two mining men attempted to shoot the most violent rapids in the Grand Canyon of the Colorado and perished in the attempt. The victims are P. H. McGanigle and Charles McLean.

Coal Discovered in British Columbia.

A large area of coal and petroleum has been discovered in Kootenay, B. C., near the northeast corner of Idaho, and within twenty-five miles of the Canadian Pacific Railway.

San Francisco Man Goes Up in Airship.

Dr. August Groth has made an ascension from San Francisco in a dirigible balloon, or airship, which he constructed. He did not cut loose from cable connections with the ground.

MISHAP AT NAVAL REVIEW

Destroyers in Collision Near the President's Yacht.

THE BARRY RAMS THE DECATUR

The Finest Array of American Warships Pass Before the President While Cannon Roar Salutes—A Magnificent Naval Spectacle Off Oyster Bay—Ideal Weather For the Ceremonies.

Oyster Bay, N. Y.—President Roosevelt took a hand in the naval games, assisted by Secretary Moody, Admiral Dewey and a distinguished party of guests. He reviewed the warships in the Sound from the deck of the Mayflower. Sun, breeze and waves were all propitious, and every man aboard the nineteen great fighting machines seemed to be on his mettle. The manoeuvers took place nearly midway in the Sound off Centre Island, which lies at the entrance of Oyster Bay.

The only event that marred the perfect day was a collision between the torpedo boat destroyers Barry and Decatur. At 4.45, almost at the close of the manoeuvers, the five black craft were the only remaining ships of the fleet. Their "stunt" was reserved until the last, and was to be an exhibition of speed and daring.

They were to dash past the reviewing boats in a "flying wedge," after first passing the Mayflower under half steam.

They carried out the first part of the program successfully, and were turning to come back under top steam when the Barry and Decatur were seen to come together. The Barry's bow had rammed the Decatur three-quarters of the distance from the stern.

As the hulls crashed a groan went up from the President's party, and the next moment, as the Decatur staggered and dipped, the cry, "She is sinking" was repeated from mouth to mouth.

"Man the boats!" came the order from the executive officer, and in less time than it takes to tell it the white garbed jackies were swarming into the boats swung from the davits.

In a few minutes the disabled boats came alongside the Mayflower. "No damage done!" shouted the captain of the Decatur through the megaphone. "The Barry ran into us and made a dent in our side that will necessitate repairs, that's all. Shall I take her to the Brooklyn Navy Yard?"

The Barry's injuries consisted of a somewhat crumpled bow. Neither one of the boats in collision suffered enough to cripple either her mobility or fighting powers.

Shortly before 8.30 o'clock President Roosevelt went on board the Mayflower. Sir Thomas Lipton followed the President over the side.

Admiral Dewey and others invited by the President to visit the manoeuvers soon appeared, and orders were given to proceed to the reviewing ground.

As soon as the Mayflower took her station the day's business opened up with booming cannon and dipping flags. Every one of the nineteen destroyers fired the Presidential salute of twenty-one guns when the Executive appeared to make his formal call, and fired it again when he left.

Review quarters were called at 8.40 a. m., an hour earlier than usual, on the flagship Kearsarge. All the men in the fleet having medals were required to wear them. After muster the men to man the rail were sent to their stations. They laid in until the Mayflower anchored.

It was just 9.25 a. m. when the first gun on the Kearsarge answered the Mayflower's approach. After the Mayflower anchored the flag officers and commanding officers called upon the President, and later the President returned their visits.

On the final return of the Mayflower to her anchorage an order was given to lay in. The anchor gear having already been thrown off, all boats were secured for sea, fenders were taken off the gangways and the final review was begun.

About 11.30 o'clock the Mayflower started eastward, followed by the fleet in single column. When the Mayflower stopped the vessels passed her in single file, the battleships leading, the cruisers next, and the torpedo boat flotilla bringing up the rear.

As the Stewart and Whipple passed the pleasure craft swung in behind and ran a mile or so down the Sound toward the eastward, passing in front of the Mayflower. Then the Mayflower started at full speed toward the bay again and the review was over.

President Roosevelt had enjoyed the distinction of being the first President of the United States who in time of peace had reviewed a great fleet of warships as Commander-in-Chief of the Navy.

At the luncheon served on the Mayflower after the manoeuvers Admiral Dewey escorted Miss Alice to the table, and the Secretary of the Navy Mrs. Roosevelt. After lunch was about concluded President Roosevelt rose and said:

"We have with us to-day the representative of the great powers—Great Britain, Germany, Russia and Japan. I ask you to drink to these powers and their sovereigns. We also have with us the representatives of an international incident. As to that, may the best boat win."

The toast was drunk by all present standing, while a ripple of laughter greeted Sir Thomas Lipton and C. Oliver Iselin went the rounds.

Turks Capture Krushevo.

The Turkish troops have captured Krushevo from the insurgents.

Ohio Bank Cashier's Shortage $100,000.

After three days' work the committee investigating the books of the Union Banking Company, of New Holland, Ohio, gave out a statement of the assets and liabilities, nailed upon the doors of the defunct banking institution, as follows: "Liabilities, $180,993.92; assets, $113,822.81." This leaves a shortage of $66,839.11, and this in connection with the $25,000 paid in capital stock, which is wiped out, will swell Cashier Brown's shortage to nearly $100,000.

DAN PATCH PACES IN 1:59

The Son of Joe Patchen Lowers Star Pointer's Mark.

Famous Horse Establishes a New Record Under Diverse Weather Conditions at the Brighton Beach Track.

New York City.—A new world's harness record of 1:59 was established at the Brighton Beach race track when in a race against time Dan Patch, the fastest trotting horse in the world, and the undisputed pacing champion, astonished patrons of the turf by overcoming a combination of unfavorable conditions and covering a mile in time a quarter of a second faster than the previous record was covered by a harness horse.

The race established an official record and carried for the owner of the horse a prize of $2500 offered by the New York Trotting Association should Dan Patch beat the old best pacing mark of 1:59¼, which officially was held by Star Pointer alone, though Dan Patch himself last year paced a mile in time just equalling Star Pointer's mark; that performance of the new king of the pacers not being recognized as a record, however, because of a technical failure to comply with the trotting rules.

Two runners were sent with Dan Patch, one to precede him and break the force of the wind and the other as a prompter. At the second score Driver McHenry nodded for the word, but there was really little interest at this time, for few believed Dan Patch would exceed his former performance.

When the quarter-mile pole was reached and hundreds saw that the clip had been faster than a two-minute gait there was a general awakening of interest. The timers hung out 0:29½, and by the time it was displayed many watches had clicked at the half and the figure 0:59¾ appeared on the timing board. Then everybody realized that a record-breaking performance was to come for the horse, and home on an easy stride the record was beaten at one mile, and he really had a heat at somewhat record pace to equal the mark. At the three-quarters 1:29¾ he had the time and that left him only thirty seconds, for he had fallen away a little around the second turn.

Then it was for the first time that Mr. Henry pulled the horse together for a short and decisive struggle. The runner in advance began to tire, and the spectators, wild with excitement, began to shout to him to get out of the way. Without a falter the king of pacers swept under the wire winner of the biggest honors that have yet come to a harness horse. The official time announced was 1:59, but the number of watches on the grounds that recorded it faster was too great to be counted. In this connection it may be said that no spectator has the opportunity to time correctly to a fraction of a second, as the official timers have, and the latter's decision is usually the correct one. In this case all the watches held by official hands recorded the same.

Dan Patch has never before, under the most favorable conditions of weather and track, been able to pace as fast a mile and he has been driven in many attempts. Yet under conditions that were decidedly adverse, but with a runner and sulky in advance to shelter him, he eclipsed all his former efforts at the first attempt.

Dan Patch, who now is seven years old, is by Joe Patchen-Zelica, by Wilkesberry, and is the property of W. A. Savage, of Minneapolis, Minn., who bought him last fall for a sum reported to have been $65,000. In all his career on the turf Dan Patch has never been defeated, and his record in races shows but one heat that he lost, that having been at Brighton Beach two years ago. The record that he broke was made in 1898 at the Readville (Mass.) track by Star Pointer.

PEON KING OF MINES DEAD.

From a Laborer Pedro Alvarado Became a Millionaire Within Six Years.

Chihuahua, Mexico.—Private dispatches received here from Parral, this State, confirm the report of the sudden death at that place of Pedro Alvarado, the mining man, who is known throughout Mexico and the United States. He leaves a fortune in cash amounting to about $70,000,000, according to reliable estimates by those who have been handling the ore from his mine during the past six years.

The value of the Palmillo mine, which he owned, and which he discovered a few years ago when he was a peon, working in a mine at thirty cents per day, is not know, as Alvarado persistently refused to admit mining experts to its workings. It is, however, one of the richest silver properties in the world. Of the $70,000,000 which Alvarado took out of the mine since its discovery, it is said that there is more than $50,000,000 worth of silver bars securely locked in a steel cage at the palatial residence of its late owner. This cage is constantly guarded by a strong force of armed men.

Alvarado recently acquired additional notoriety by offering to pay the public debt of Mexico. He leaves a widow to whom his estate will go.

Germany Wants a Bigger Army.

There seems to be no doubt that the Germany Government, under the impulse of the Emperor, is determined to ask the Reichstag for an increase in the permanent military establishment, by about 20,000 men, to be organized into two army corps, thus raising the standing army to about 617,000 officers and men. The increased annual charge is estimated at $20,000,000, exclusive of equipment.

Army Officer a Deserter.

Having been absent without leave from the Department of Texas for several months, Second Lieutenant Van Suhren has been declared a deserter.

Manufacturer Killed by Employe.

Thomas H. Morgan, a sash and door manufacturer, at Oshkosh, Wis., was shot to death by Frederick Hampel, a discharged employe.

The Trade Situation.

The general trade of the country has undergone no contraction.

FROM FAR-AWAY EDINBURGH.

(Continued from 1st Page.)

Munich, Germany I am better acquainted and several other places too, and hope to tell you something of interest when I see you once more. I trust that affairs of church and state are prospering at home. I am told that in Scotland the English Church is making favor and advancing amid the throes and disintegrations of the dissenting bodies.

Most sincerely and truly,

E. A. EMBURY.

MRS. OVERNICE.

The Text Was a New Commandment.

Mrs. Overnice had for her guest last autumn pretty Miss Fairlady, a modest, educated, highly cultured, but altogether lovable girl, such as any well regulated young man who is not "otherwise engaged," ought to fall in love with without delay.

Henry Hailfellow became acquainted with her, and fell into the habit of calling at the Overnice home rather too often to suit the taste of proud Madame Overnice. That is to say, he called too often with the avowed purpose of paying his respects to Miss Fairlady; for, it should be known, Mrs. Overnice had a daughter whom she had taken infinite pains to train up in the way that she should go, and she had no objections to her taking the matrimonial route under favorable auspices, and was not at all sure but that Hailfellow was himself a favorable auspice.

So it became all too apparent for the comfort of any of the young people about the house that Mrs. Overnice looked with marked disfavor upon the attentions of Mr. Hailfellow to Miss Fairlady. Sad to relate, that led these two young souls, who were rather fond of communion with each other, free from foreign intervention, to seek the protection, now and then, of subterfuge—not to say deceit.

One particularly bright and beautiful Sunday, Hailfellow called at the Overnice residence, just the regulation time before church. He and Miss Fairlady started away, as if, of course, they were going to the most approved place of worship in the city. But they were not, unless worshiping nature in her most attractive temples is the approved worship.

They went off for a long, delightful stroll in the suburbs. And they artfully returned just about the time they would naturally be expected back from church.

Probably no suspicion would have rested upon them had not the harum scarum Hailfellow remained at the house so long that Mrs. Overnice was compelled to invite him to remain for luncheon, which he promptly consented to do. Something in his manner excited the dame's suspicion, and at table she commenced to examine the witness.

"I hope you had a good sermon today, Mr. Hailfellow, wherever you attended church."

"Oh, yes, madame, a very good sermon, indeed."

"Where did you go?"

"To the — church?"

"The first ah—Presbyterian?"

"No, Universal."

Mrs. Overnice looked startled, but didn't conclude to commit herself too much to the theory of guilt.

"Was the music fine."

"The finest I ever heard."

"Solos—duets—vocal and instrumental. I suppose."

"Vocal, madame—entirely vocal, and in chorus—a grand, sweet song, by oh, so many, many singers!"

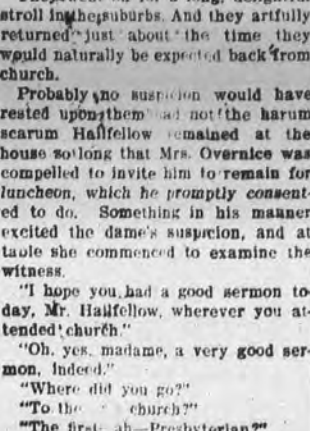
"That was very nice. I would rather enjoy that kind of music myself. By the way, what was the text, Mr Hailfellow?"

"A new commandment I give unto you. That ye love one another."

There was a "chorus" of smiles from the other meders of the party, and Mrs. Overnice subsided.—Philadelphia Public Ledger.

Persuasive.

Carvewell—No more, friend Hairfax. 'Twill go to my head, I fear.



Hairfax—So much the better for your stomach, sir.

A Leader Overlooked.

We had our items all written up last week, but did not get a chance to send them in, and there was some things that happened last week that we think worth mentioning again this week. One of which was the rag sewing at Mrs. Worsham's, given on her birthday. There were twelve ladies present, they all had a very pleasant time sewing rags, and chat, till dinner was announced, when they where ushered into the dining room, where the table fairly groaned under its load of goodies.—Comanche County (Oklahoma) Farmer.

LEGAL NOTICES

PROPOSED AMENDMENTS TO THE CONSTITUTION

STATE OF NEW JERSEY
DEPARTMENT OF STATE

As required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State, to the people thereof," (approved April 8, 1903), notice is hereby given that on Tuesday, the twenty second day of September, 1903, a

SPECIAL ELECTION

will be held in the several election districts or precincts of this State, at such places as the clerks of the several townships, cities, and municipalities of the State shall provide, to enable the electors qualified to vote for members of the Legislature to vote for or against each of the following proposed amendments to the Constitution.

S. D. DICKINSON,
Secretary of State.

ARTICLE V.

EXECUTIVE

1. Insert in lieu of paragraph 10 a new paragraph, as follows

10. The governor, or person administering the government, the chancellor and the attorney general, or two of them, of whom the governor, or person administering the government, shall be one, may remit fines and forfeitures and grant pardons, after conviction in all cases except impeachment.

RTICLE VI.

JUDICIARY.

1. Insert in lieu of Section II a new section, as follows:

1. The court of errors and appeals shall consist of a chief judge and four associate judges or any four of them.

2. In case any judge of said court shall be disqualified to sit in any cause, or shall be unable for the time being to discharge the duties of his office, whereby the whole number of judges capable of sitting shall be reduced below four, the governor shall designate a justice of the supreme court, the chancellor or a vice-chancellor, to discharge such duties until the disqualification or inability shall cease.

3. The secretary of state shall be the clerk of the court.

4. When a writ of error shall be brought and judicial opinion in the cause, in favor of or against any error complained of, shall be assigned to the court in writing; when an appeal shall be taken from an order or decree of the court of chancery, the chancellor or vice-chancellor making such decree or order shall inform the court in writing of his reasons therefor.

5. The jurisdiction heretofore exercised by the supreme court by writ of error shall be exclusively vested in the court of errors and appeals; but any writ of error pending in the supreme court at the time of the adoption of this amendment shall be proceeded upon as if no change had taken place.

Section IV.

1. Insert in lieu of paragraph 1 a new paragraph as follows:

1. The court of chancery shall consist of a chancellor and such number of vice-chancellors as shall be provided by law, each of whom may exercise the jurisdiction of the court; the court shall make rules governing the hearing of causes and the practice of the court where the same is not regulated by statute.

Section V.

1. At the end of paragraph 1 add the following

The court may sit in divisions at the same or different times and places.

Strike out paragraph 3.

Section VI.

1. Insert in lieu of paragraphs 1 and 2 the following

The court of common pleas shall be constituted and held in each county in such manner as may be provided by law.

ARTICLE VII.

CIVIL OFFICERS.

Section II.

1. Insert in lieu of paragraph 1 a new paragraph, as follows

1. Judges of the court of errors and appeals, justices of the supreme court, the chancellor, the vice-chancellors, and the judges of the circuit court and the court of common pleas shall be nominated by the governor and appointed by him with the advice and consent of the Senate; all persons now holding any office in this paragraph named, except the judges of the court of errors and appeals as heretofore existing, shall continue in the exercise of the duties of their respective offices according to their respective commissions or appointments; the judges of the court of errors and appeals, except those first appointed, the justices of the supreme court, the chancellor, and the vice-chancellors shall hold their offices for the term of seven years, and shall, at stated times, receive for their services a compensation which shall not be diminished during the term of their appointment, and they shall hold no other office under the government of this state or the United States; the judges of the court of errors and appeals first appointed shall be appointed one for three years, two for five years and two for seven years; judges of the court of common pleas shall hold their offices for the term of five years.

Strike out paragraph 2.

SHERIFF'S SALE.
IN CHANCERY OF NEW JERSEY.

Between Fredrick C. Jennings, complainant, and Ada M Cuming et al., defendants.—Fi Fa for sale of mortgaged premises.

By virtue of the above stated writ of Fi Fa, to me directed and delivered, I will expose for sale at public vendue, on

MONDAY, THE SEVENTEENTH (17) DAY OF AUGUST NEXT

between the hours of twelve and five o'clock in the afternoon of said day, that is to say, at two o'clock p. m., at the Court House in Somerville, to wit

All that certain tract or parcel of lands and premises, situate, lying and being in the borough of North Plainfield, in the county of Somerset and State of New Jersey.

Being known and designated as No. 215 somerset street, and more particularly described as follows:

Beginning at a point in the southwesterly side of Somerset street and corner of A. Jacot's lot, as shown on a Map of Valuable Villa Sites and Building Plots, North Plainfield, N. J., on file in the Clerk's office of the county of Somerset. Thence running along his line south forty five degrees and forty-seven minutes west one hundred and fifty-nine feet to a stake in the line of Lot No. 5; thence running in a northwesterly course parallel with Somerset street thirty-five feet to a point where the centre line of the division wall if extended would reach; thence running in a northeasterly course along the centre line of said division wall one hundred and fifty-nine feet to the southwesterly side of Somerset street as formerly laid out; thence running along said old line of Somerset street in a southeasterly course thirty-five feet to the place of beginning.

CALVIN D. McMURTRY, sheriff

NELSON & WM. N. RUNYON, Solicitors,

Dated July 9, 1903. $8.10.

SPECIAL ELECTION —ON— Constitutional Amendments.

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset, will meet on

TUESDAY, SEPT. 15, 1903,

from one o'clock p. m., at such places as may be designated by the Township Clerks of the respective townships of said county, for the purpose of making, altering and revising, as the case may require, the registry of voters entitled to vote in their several districts or voting precincts for use at the special election to be held on Tuesday, September 22, 1903, as required by an act entitled "An act to provide for submitting proposed amendments to the Constitution of this State to the people thereof," approved April 8, 1903.

Special Election
SEPTEMBER 22, 1903.

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHUKTS,
CHARLES H. BATEMAN.

Election Notice!

Notice is hereby given that the Boards of Registry and Election in and for each and every Election District or Voting Precinct in the County of Somerset will hold their first meeting on

TUESDAY, SEPT. 1, 1903.

At 10 o'clock in the morning, at such places as may be designated by the Township Clerks of the respective townships of said county. Such boards shall organize according to law and then proceed to ascertain the names and residences of all the legal voters in their respective districts, by making actual inquiry at every dwelling house or habitation, or of the head of every family residing therein, and shall continue such enumeration of voters from day to day, on successive days succeeding same on or before Tuesday, next [illegible] election law.

SECOND MEETING AND PRIMARY ELECTION

Said Boards of Registry and Election will also meet on

TUESDAY, SEPT. 8, 1903,

At the same places from 1 until 9 p. m., for the purpose of transcribing and making up from its canvass books two lists of all persons entitled to vote in its election District, who shall personally appear before the board for that purpose, or be shown to its satisfaction by the affidavit in writing of some voter in the election district to be a legal voter therein.

On the same day between 1 and 9 o'clock p.m., *the Primary Election shall be held in every* election district in the County of Somerset.

THIRD and FINAL MEETING.

Said Boards of Registry and Election will also meet on

TUESDAY, OCT. 27, 1903,

At the same places, and between the hours of 1 p. m. and 9 p. m. for the purpose of revising and correcting the Original Registers, and for adding thereto the names of all persons entitled to the right of suffrage in such Election District at the next election.

Notice is hereby given to all Boards of Registry and Election in the County of Somerset that they are required to strictly observe Sections 21 and 22 of "An Act to Regulate Elections (Revision of 1898)," approved April 4, 1898, and that the County Board of Elections will be in session in Somerville on

Wednesday, Oct. 28, 1903,

For the purpose of receiving the registers and receipting for affidavits, etc.,

General Election Nov. 3, 1903

No person will be allowed to vote at said election unless his name appears upon the Registry List of his Election District.

JOSEPH FITZGA, Chairman,
J. H. MATTISON, Secretary,
JACOB SHUKTS,
CHARLES H. BATEMAN.

SPECIAL MASTER'S SALE.
IN CHANCERY OF NEW JERSEY.

By virtue of a Decree of the Court of Chancery of the State of New Jersey, bearing date on the Twenty-ninth day of June, A. D. Nineteen hundred and three, in a cause pending in said court wherein Abram M. Vail, is complainant and Edgar R. Vail and others are defendants, I shall expose for sale at public vendue to the highest bidder on

FRIDAY, THE FOURTH (4) DAY OF SEPTEMBER A. D. NINETEEN HUNDRED AND THREE,

between the hours of twelve o'clock noon and five o'clock in the afternoon, to wit, at two o'clock in the afternoon of said day, at the dwelling house on the premises hereinafter described, all of the following tract of land and premises being a certain farm or tract of land situate, lying and being in the Township of North Plainfield, in the County of Somerset and State of New Jersey, bounded and described as follows, to wit:

Beginning at a point in the center of the mill race in the southwesterly line of property known as property of Goldson Smalley, said point being distant fifty (50) feet in a magnetic course of north twenty-eight degrees and fifty-four minutes West (N. 28° 54' W.) from a stone monument on the northwesterly bank of Green Brook, and running thence along line of said Smalley's property in a magnetic course of north twenty-eight degrees and fifty-four minutes West a distance of two thousand six hundred seventy and seven tenths (2670.7) feet to a stone monument being the southerly corner of property known as property of Garretson and Gray; thence along the line of said last mentioned property, north twenty-three degrees and thirteen minutes West (N. 23° 13' W.) a distance of one thousand six hundred fifty-nine (1659) feet to a stake and stone-heap in line of land formerly of Ephraim Runyon and leading a corner; thence along the line of said last mentioned property south sixty-seven degrees and thirty-two minutes west (S. 67° 32' W.) a distance of thirty-four and six-tenths (34.6) feet to a stake and stone heap, thence along another line of said last mentioned property, north twenty-one degrees and forty-eight minutes West (N. 21° 48' W.) a distance of three hundred nine and fifty-four one-hundredths (309.54) feet to a stake and stone heap and corner of property of Helen H. H. Pellow; thence along the line of said last mentioned property south sixty-seven degrees and thirty-two minutes west (S. 67° 32' W.) a distance of sixty-six (66.0) feet to a stake and stone heap; thence still along another line of said last mentioned property, south twenty-one degrees and forty-eight minutes east (S. 21° 48' E.) a distance of three hundred nine and fifty-four one hundredths (309.54) feet to a stake and stone-heap; thence still along another line of said last mentioned property, south sixty-seven degrees and thirty-two minutes west (S. 67° 32' W.) a distance of four hundred ninety-one and four tenths (491.4) feet to a stake and stone heap, being the northerly corner of other property known as property of Garretson and Gray; thence along the line of said last mentioned property, south twenty-two degrees and twenty-eight minutes east (S. 22° 28' E.) a distance of one thousand one hundred and seventy-eight (1178.0) feet to the easterly side of an Elm tree being the northerly corner of property of John Grogan; thence along the line of said last mentioned property, south twenty-two degrees and nineteen minutes east (S. 22° 19' E.) a distance of six hundred two (602) feet to a stake and stone heap; thence still along line of said last mentioned property, south fifty-eight degrees and thirty minutes west (S. 58° 30' W.) a distance of one hundred and nineteen and seventy-two one hundredths (119.72) feet to a stake and stone heap; thence still along property of said Grogon, south thirty-one degrees and forty-four minutes east (S. 31° 44' E.) a distance of two thousand two hundred and seventy-nine and two tenths (2279.2) feet to an iron monument in the center of the Green Brook Road; thence along the center of said road, north sixty-three degrees and forty-two minutes east (N. 63° 42' E.) a distance of two hundred thirty-six (236) feet to an iron monument and corner of property of Abram M. Vail; thence along the line of said last mentioned property south thirty-one degrees and forty-four minutes east (S. 31° 44' E.) a distance of four hundred five (405) feet to a point in the center of the mill-race; thence up the center of the mill race in a general northeasterly direction a distance of three hundred seventy-six (376) feet more or less to the place of beginning; containing 68,762 acres of land more or less, which said property is shown on the map annexed to the bill of complaint in this cause, including the inchoate estate of dower and interest of Sarah A. Vail, wife of complainant, Abram M. Vail, in the said premises, together with all and singular the hereditaments and appurtenances to the said premises belonging or in anywise appertaining.

Conditions made known on day of sale by

JOHN H. VAN WINKLE,
Special Master in Chancery.

CRAIG A. MARSH,
Solicitor.

Dated July 30, 1903. [illegible]

Notice to Correspondents.

Personals, social gatherings, celebrations, anniversaries of various kinds, reception, etc., will be published in the REVIEW free. All copy must be written plainly, preferably in ink; and names must be clearly written and correctly spelled, write only on one side of the paper. Full information in regard to weddings is always desired, and when requested a reporter will call to secure facts for publication. No attention will be paid to items of news forwarded to this office unless the sender gives his or her name and address. These will not be printed, but it is necessary to have them properly vouched for.

SUBURBAN NOTES.

WATCHUNG.

Arrival and departure of mails at Watchung.

Leave Plainfield	9 a. m.	5:35 p. m.
Arrive Watchung	9:30 a. m.	6:00 p. m.
Leave Watchung	12:30 p. m.	6.10 p. m.
Arrive Plainfield	1:00 p. m.	*6.40 p. m.

*This mail makes connection for all outgoing mail from Plainfield the same evening.

School opens September 8. A full attendance is hoped for.

Miss Ethel Comstock, of Brooklyn, is visiting friends in Watchung.

Mrs. J. M. Hayes and children, of Brooklyn, are visiting at J. M. Duffy's.

Mrs. George Demler will soon remove to North Plainfield on Duer street.

Mrs. H. Texier has returned from a very pleasant visit at Gloversville, N. Y.

Misses Elsie and Theresa Schmidt, who are visiting their grandmother on Staten Island are expected home Sunday.

Rev. Dr. Edward F. Moldenke, pastor of St. Peter's Lutheran Church, New York City, who has been seriously ill, is improving.

A pleasant party was held last week at the home of August Wersing on the second mountain.

Freeholder Wm. Demler, will continue the business heretofore conducted by his brother George (deceased) of buying and selling cows. Extensive improvements have been made to the barn and grounds.

About thirty members of the Christian Endeavor Society of Watchung visited the Baby Camp near Westfield Tuesday evening. Some excellent music was furnished by the famous Watchung Quartette, a solo by Miss Florence Ackor and instrumental music by the Spier brothers.

* * *

LIBERTY CORNER.

Miss Bell Acken has been spending a week with friends in Newark, N. J. visiting Coney Island and other pleasure resorts.

Mrs. Geo. W. Lowerie, of North Plainfield is now occupying her cottage in this place.

Mr. and Mrs. Walter M. Irving, of Boouton, N. J. are the guests of Mrs. Wm. Hayes.

Mr. and Mrs. Culmer and family are the guests of Professor F. W. Hammond.

Mr. and Mrs. Jerry Haden, of Loganville, N. J. spent Sunday with Mrs. Wm. I. Hayes.

The net receipts of the lawn fete amounted to $140 and the profits amounted to was $116. The Sunshine Band contributed to the total with their fancy work and their receipts were ten dollars.

* * *

SPRINGDALE.

W. H. A. Carpenter, of North Plainfield is building a large ice house for his brother, R. K. R. Waldron.

John H. Flammer, who drives a wagon for H. A. Voehl, was the first one to drive over the new bridge below Fister's park last Saturday. He pronounced it all right, which can be said of all bridges which come under the supervision of Joel Coddington, our up to-date Freeholder.

Fritz Giles, who is employed by John Mundy as sheep and lamb butcher, let two of the animals escape from the slaughter pen last Thursday night. Fritz being a good shot with the rifle soon had one of them back in the slaughter house. The last seen of the other one was in Lyman C. Hasley's cornfield, with John Linke in hot pursuit on one of Henry Albert's running horses known as "Famous bust."

* * *

WARRENVILLE.

Mr. and Mrs. Frank Stites, of Dunellen spent Sunday with Mrs. Stite's parents Mr. and Mrs. A. J. Jennings.

The case of M. E. Blazier vs Fred A. Pope was tried before Justice Cooper last Friday. Mr. Pope was granted a non suit.

Hon. E. E. Cooper, of South Stirling called on friends here last Friday.

Lawyer Horace Codington, of Somerville was here on business one day last week.

John Henrizzi and Walter Littell are visiting John W. Bowers.

John D. Bornman has just finished his harvest, which is one of the largest in years.

The Smith Family Reunion.

The twenty-eighth annual reunion of the Smith family and friends which took place at Peapack, Wednesday, was the largest ever held. About five thousand were present. Rev. C. H. Von Glahn, of Bernardsville made the principal address.

The reunion took place in a grove on the farm of the late Peter Z. Smith, one mile east of Peapack. This grove was once part of a farm owned by Zachariah Smith whose home was a log cabin and erected about A. D. 1800.

The officials of the family reunions are: Isaiah Smith, president, Abram Smith, vice president, John D. Smith, treasurer, James C. Smith, Secretary, Charles V. Smith and William Smith, recording secretaries.

STATE CHRISTIAN ENDEAVOR UNION

Annual Meeting to be Held at Orange on October 15 and 16

The seventeenth annual convention of the New Jersey State Christian Endeavor Union, will be held at Orange, N. J., on October 15th and 16th.

The Christian Endeavor Union of the Oranges and Vicinity has been active for some months past in its preparations to have the convention equal its best predecessor.

Twenty thousand Provisional Programs have been printed, and are being distributed throughout the State. Twenty copies have been sent to the Corresponding Secretary of each society, to dispense among its members. This program announces the names of prominent speakers, including Rev. Francis E. Clark, D. D., President United Society Christian Endeavor, Boston, Mass.; Rev. John F. Carson, D. D., Brooklyn; Rev. Beniah L. Whitmarsh, D. D. Philadelphia, Pa.; Rev. Edward [illegible] Ingersoll, D. D., New York American Bible Society, and Rev. John H. Wyckoff, D. D., Arcot Mission, India.

The convention will be called to order by the Chairman of the Local Committee, A. W. Abbott, President of the Christian Endeavor Union of the Oranges and Vicinity. After the addresses of welcome, response will be made by the State President, Rev. W. T. S. Lumbar, who takes the chair. Other sessions will be presided over by ex-State President Rev. Cornelius Brett, D. D., Jersey City, N. J.; State First Vice-President John T. Sproull, Arlington, N. J.; State Second Vice-President Rev. William D. Stultz, Manasquan, N. J.; and State Third Vice President Dr. A. W. Bailey, Atlantic City, N. J.

Reports will be made by State Secretary, Miss Ida B. Stephens; State Treasurer, Rev. Titus E. Davis; State Superintendent of Press Department, Alfred B. Johnson; State Superintendent of Correspondence Department, Mrs. Joseph S. Peacock; State Superintendent of work among colored people, Mrs. Florence Randolph, State Superintendent of Evangelistic Department, Rev. Frederick C. Klein; State Superintendent of Fresh Air Department, Arthur N. Pierson; State Superintendent of Bible Study Department. Rev. Charles A. Cook; State Superintendnt of Missionary Department, Robert A. Alberts, and State Superintendent of Junior Department, Rev. George C. Horter.

Open Parliaments will be held on Fresh Air Work, Bible Study, and Junior Work. One of the convention features will be a Junior Parade.

The roll-call will be conducted by ex-State President Arthur W. Spooner, D. D., Camden, N. J.

The music will be in charge of Prof. H. C. Lincoln, Director of the Philadelphia Choral Union.

The following are the Orange Union Convention Committees and Chairmen, to whom inquiries for information bearing on their various duties should be addressed:

RECEPTION—Rev. Charles B. Bullard, 4 Eppirt St., East Orange, N. J.
ENTERTAINMENT—Miss Etta Schroeder, 18 Scotland St., Orange, N. J.

DEVOTIONAL—A. W. Abbott, 65 Essex Ave., Orange, N. J.

SAM'L DEH. ATKIN,
Chr'm. Printing and Press Committee.

Station at Aldene Moved.

The Central railroad has moved the depot building at Aldene to a site about 500 feet west of its old location, where it will be used jointly by passengers for the Central and Lehigh Valley roads. Stairs will be built to the Lehigh Valley tracks, and that will be made a regular stop for valley trains. The stop a few hundred feet east, called Faitoute, will be discontinued and Aldene will take its place on the Lehigh Valley time tables.

Transfers of Real Estate.

The following transfers of real estate in Somerset county have been recorded in the County Clerk's office at Somerville since our last issue:

NORTH PLAINFIELD

Frank E. Woodruff et ux to Beena Newmiller, $1.

STORM KILLS FOUR MEN.

Five Others Nearly Drowned at Newark Bay Draw Bridge Tuesday.

During the severe storm of last Tuesday four men were drowned and five others nearly so by the collapse of a structure surmounted by a derrick. The men were on the derrick and when they saw the storm approaching, hastened to descend but before they did so the storm struck the derrick and its supports causing it to fall and thus threw the men into the water. The four men killed, J. J. Colan, of Jersey City, Otto Ellinsen, of New York, John McFann, of Bayonne, and Charles Tingley, of Jersey City were caught under the timbers and iron and did not rise again. Daniel Murphy was taken from the water nearly dead and the rest swam ashore.

Four Generations Under One Roof.

An interesting and odd fact, of which few places can boast, has just been discovered at Peapack says the White House *Review*. That is, that under one roof dwells a family in which four generations are represented all of which are quite hale and hearty. The family referred to is that of Mr. and Mrs. David Brady, and how this fact has been concealed so long is a mystery. This family consists of a great-grandmother, grandmother, and mother and daughter. The great grandmother, Mrs. Ann Campfield, was one of a family of twelve children. Her maiden name was Ann Disosway. Mrs. Campfield's family consisted of herself, husband and one daughter, Sarah, who at the age of seventeen years married her present husband, David Brady. Their family consisted of seven children, six of whom are living. The only daughter married Edward Swick, whose daughter makes the fourth generation that are living under the same roof.

Present List for the President's and the Golf Club's Cup.

For the President's cup at the Park Golf Club the following is the standing by points:

T. U. Dudley, Jr.	8

Weather and Crop Bulletins.

Central Office U. S. Weather Bureau
ATLANTIC CITY, N. J., Aug 26, 1903.

The weather conditions that prevailed during the week have been decidedly more favorable to the growing and maturing crops. The temperature was from two to four degrees above the daily normal and the sunshine more abundant than last week. The rainfall was decidedly below the weekly average in all sections, except in Essex, Union and Passaic counties, where a heavy thunderstorm occurred on the 19th, doing considerable injury by flooding low fields and blowing much fruit from the trees. Early planted field corn is earing well and the prospects are for a fair yield, but that planted early in July is very backward, only knee high, and fears are expressed that it will not mature. Lima beans are molding on the vines and many patches have been ruined; late tomatoes have a good set of fruit, but do not ripen. The potato rot is increasing, so much so that the digging has stopped in some places; orchard fruit is not at all promising. Cranberry growers in Atlantic county say that owing to the heaving rains during the past month at least one-third of the crops has been ruined.

From Plainfield, four local reporter, John Neagle, reports, all crops, in good condition; potatoes turning out well; tomatoes and garden truck maturing slowly; second crop of clover good; peaches scarce; apples fair yield.

September Petit Jurors.

Sheriff McMurtry yesterday, before Judge Schenck, drew the following petit jurors to serve at the September term of courts:

Bedminster—Charles P. Wyckoff, Geo. Philhower, Robert G. Lane, Frederick K. Lamerson.

Bernards—George Codington, Wm. N. Conkling.

Branchburg—Wm. Van Fleet, Asa O. Hall, Peter L. Tunison, Harmon P. Sutton, Elias H. Hoagland.

Bridgewater—Judson V. Cain, Charles Mehlenbeck, John Gernert, Jr., Lewis A. Bellis, Wm. Schure, J. Watson Terhune, David W. Pinkerton, George W. Smith, Thomas I. Honeyman, Samuel Ayres, Frederick Frech, John G. Gaston, James Hunter, Jr., Charles J. Smith.

Franklin—Garret V. Suydam, Wm. B. Voorhees, Henry Van Doren, John Stothoff, Edwin Garretson, John A. Voorhees J. Frank Westcott.

Hillsborough—Charles A. Stryker, Jas. McCrady.

Montgomery — Stephen H. Drake, Peter A. Staats, Louis R. Labaw, Howard W. Meserolle, John N. Brokaw, Augustus Bechtold.

North Plainfield—Levi C. Kline, Andrew Love, Jr., Richard E. Coriell, Albert Brokaw.

Warren—Aaron H. Spencer, Diedrich Ehlen, Joel Giddes, Adrian Martin, Peter Friday, Wm. H. Codington.

Indian Summer Carnivals.

Luna Park's Indian Summer Carnivals which are to close the first season of that popular seashore resort promise to outdo anything ever attempted in the outdoor spectacular amusement field. The series of carnivals are to be continued daily from Labor Day to October first with a daily change of programme. Even more sensational and daredevil aerial act than those which at Luna Park have astonished vast multitudes all summer are being arranged with by Mr. Frederic Thompson who is now in Europe for that purpose and his associate Mr. Elmer S. Dundy who is in charge of affairs at home.

There are to be Japanese day fireworks in the afternoons and regular pyrotechnics at night, with cakewalks, battles of confetti, athletic contests and fetes of all kinds.

Special excursions will be run from all points during the progress of these Indian Summer Carnivals at reduced rates and a record-breaking September crowd is expected at the island. In anticipation of increased interest from the carnivals the other principal attractions at Coney Island are making active preparations to secure a portion of the patronage.

A Bound Brook Opinion.

North Plainfield's borough officials are making a new move for a change in its municipal government. At a meeting of the Mayor and Council, held on Monday evening, a resolution was adopted directing Corporation Council Reed to ascertain what steps are necessary to convert the borough into a city of the third class. The principal object in making this change would be to secure for the local government the control of liquor licenses which is now vested in the country courts. It is stated that under the present system a number of unlicensed places are doing business but as the borough has police power, it is just as competent to suppress this traffic now as is would be were it a city. However, if a change is desirable there should be no objection from Somerset county at large, as long as it is not proposed to rob us of any of our territory.—*Bound Brook Chronicle.*

Concerning Proctor's Attractions.

The Fall and Winter season at Proctor's Fifty-eighth Street Theatre has opened with a veritable "boom," and bids fair to continue in that highly profitable manner many weeks to come. The audiences during the two inaugural weeks just closed were the largest in point of number ever assembled in this spacious house, while the enthusiasm that marked the rendition of the melodramas presented was simply remarkable.

An excellent company of Proctor favorites will make up the cast of players who will interpret the various roles of the comedies that will be presented at Proctor's One Hundred and Twenty-fifth Street Theatre throughout the Fall season. Among the old favorites who have been re-engaged are: Mr. Charles M. Seay, Mr. Sol Aiken, Mr. Paul McAllister, Miss Pearl Landers, Miss Cecylle Mayer, Miss Margaret Kirker, Mr. Albert Roberts, Mr. Louis Bond, Miss Lorna Elliott and numerous others.

The Fall season has opened at Proctor's Newark playhouse, and only the best vaudeville headliners and novelties will be presented throughout the season. This charming theatre has rapidly grown into the favor of all Newarkites, until now it is the most popular theatre in New Jersey.

HAPPENINGS IN NEW JERSEY.

Interesting Items of News Occurring in Different Portions of the State.

Paterson is to have an "Old Home Week" beginning with Monday, September 7.

A Gloucester woman has placed sticky fly paper on the back fence to keep off the cats, and it works.

Layton M. Parkhurst of Hammonton has a field containing over 7,000 hills of cucumbers. He has contracted with a Philadelphia field for the entire crop which he estimates at 1,000,000 pickles.

A new law which goes into effect September 1 makes the willful employment of children below the age of fourteen years in work shops, a misdemeanor punishable by a fine of $200, or a term of one year in the State Prison.

Phillipsburg is about to let the largest contract for sewer construction ever made in the State. The sewer will have about 2,000 feet of trunk sewer and 2,500 feet of pipe sewer. The work will cost from $30,000 to $50,000.

Some of the Warren county tax payers are kicking over the $300 bounty paid by the country for every fox killed, as they claim that fox raising for the pelts has become a thriving industry by some of the astute bounty receivers. The county pays out between $600 and $800 yearly for fox bounties.

The Westfield fire department has voted to turn its property over to the town council. All that is asked in return is that a meeting-room be furnished, lighted and heated, for the exempt firemen. If the three companies that compose the department ratify the actions of their representatives, the long contest between the firemen and the governing board of the town will be settled.

Richard Von Krebs,, who offered his farm recently free to some person who could manage it while he was away, received ninety-three replies, coming from Indiana, Illinois, Pennsylvania, Maryland, New York and other places. Mr. Von Krebs has about decided who shall have the place, although he does not want to announce the name as yet. The lucky one is a New Brunswick man.

The Milford Leader says John Shafer, a few days ago, received from Miss Susan Gaun, of near Mt. Pleasant, N. J., a check for $100, bearing date of 1884. At that time she deposited this sum in Frenchtown Bank, receiving in exchange a check from A. B. Haring, cashier, for the expence of paying for repairs on her property. All these nineteen years they had not been attended to, and when this year they were finished she proffered in settlement on the bill for labor the aforesaid check. Had the sum been placed at interest and compounded it would have amounted to about $300.

Samuel Perry, colored, of Springfield, collected $9 in bills from a customer in Short Hills and placed the money in a pocketbook, which he carried in his vest pocket. Later he stopped at the residence of his son, on Church street, Millburn, where his wife was staying, and brought a scuttle of coal from the cellar. While on the way home Perry had occasion to make a purchase, when he found that his pocketbook was gone. He hurried back to the house, but no one had seen the purse. His wife remembered seeing something on top of the coal when she put it on the fire, she said. Perry lifted off the stove lid and there saw the wallet blazing on the coals. He pulled it out and, stamping out the flames, found the money about half burned. He sent what was left to Washington for redemption, and had the pleasure of receiving new bills for it.

Sunday Excursion to Mauch Chunk.

The New Jersey Central will run an excursion to Mauch Chunk on Sunday, August, 30, 1903. Round trip $1.50, children 75c., from Plainfield at 9.00 a. m. Mauch Chunk is one of the most charming mountain resorts in this section. The trip over a gravity railroad to Summit and Mt. Pisgah is one of scenic grandeur and a trip that will never be forgotten. After the trip over the Switch-back you should go to Glen Onoko where you will find beautiful litte cascades, caverns and like attractions.

Fishing For Pearls Secreted in Clam Shells is a Picturesque Industry on the Mississippi.

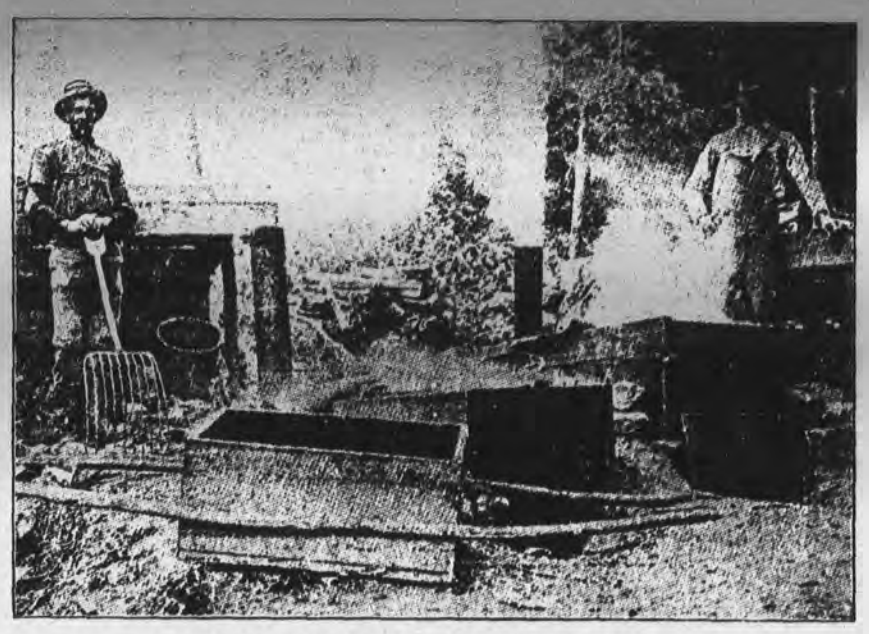
ALONG the upper Mississippi and some of its tributaries the pearl fisher is again seeking his fortune.

In the winter time the pearl fisher may be a farmer, who sticks to his "section" as long as the rivers are frozen over, but who cannot escape the get-rich-quick contagion which comes with spring skies and the return of the pearl-fishing season. Occasionally a tale reaches his ears of how some fellow countryman has attained sudden wealth by discovering a "strawberry" pearl, and the mere routine of farm life becomes all at once a slavish drudgery. A day later the farmer is off for the clam beds.

Hundreds of pearl fishers also come from river towns, where they have lived a precarious life through the winter, and having spent what little they earned the foregoing year are eager to get back to the clam beds at the earliest sign of a thaw. Men who have families, as a general thing, take their wives and children with them. When the season, therefore, has fully opened, many of these communities along the rivers of Wisconsin and Iowa are practically deserted. There is fortune lurking in the turbid waters, and the crowd which pushes thither has much of the nervous anxiety of adventurers which flock to a newly discovered gold field.

The pearl fisher with a family soon finds a home near the clam beds. He either pitches a tent on the river's edge or rigs up a house boat. In any case, it is a miserable habitation, visited at all hours of the day and night by mosquitoes which would drive even a Jerseyman frantic, and filled frequently with the miasma which breeds malaria.

CATCHING THE (OCCASIONALLY) PEARL BEARING CLAM.



STEAMING THE CLAM TILL HE OPENS HIS SHELL.

Having thus cared for the domestic or social side of life, the pearl fisher equips himself for business. If he has fished for pearls before he knows that he cannot depend alone on these foundlings of fortune for a livelihood. The only practical way for him is to dig up clams and sell their shells, and as he sorts over the bivalves he can keep his eye out for an elusive pearl. He may go through a whole season and only discover a few "seed ones," which are practically worthless, or of a sudden he may stare at a brilliant "turtle back" as large as a marble and worth $10,000.

The work is done from a scow-shaped boat which drifts with the current, dragging over the bottom a large number of hooks, on which the clams "bite." The hooks are on short strings, or clams, and are attached side by side on a long bar or gas pipe. There are two of these bars, which are kept on stanchions on either side of the boat. By means of a "mule," which consists of a frame covered with canvas, placed vertically into the water, and which acts as an under water sail, the clammer obtains enough motive power to propel his boat and drag the hooks over the bottom. The clams lie with their mouths toward the current, so that they may catch food particles that come floating toward them. When the hooks enter their mouths the clams immediately shut down on them and hang on like so many steel traps. On days when the water is muddy after a hard rain the clams are feeding and they "bite" freely.

The "clammer" starts out in the morning and rows up to the bed that he desires to work, keeping close to the shore and out of the current as much as possible. When he arrives at a desirable spot he rows out into the middle of the stream and drops one of the "drags" to which the hooks are attached, and makes it fast to the boat by means of a long strong rope. He then places the "mule" in the water in such a position that it will catch the force of the current and pull the boat down the river. The clammer waits until he thinks he has enough clams on his hooks, and then, taking the "mule" from the water, he lifts the bar from the bottom into the boat, suspends it on the stanchions and places the other "drag" in the stream. He drops the "mule" into the water again, and while he is taking the clams from the first "drag" the second is filling up. In this way he goes as far down the stream as he desires, provided he does not catch a snag.

The pearl seeker usually works on the river in the morning and spends the afternoon in camp "boiling out." This is the process by which the pearls are found, the shells cleaned and made ready for market. A tank constructed of planks with a metal bottom is used for this purpose, and the clams are placed in it with about enough water to cover the bottom. Then the whole is covered with boards or a blanket. A fire is built underneath the tank, and the clams steamed or boiled until they are so thoroughly cooked that the meat will drop out of the shell. Contrary to the general belief, this does not injure the pearl, for the reason that it is protected by the shell of the clam and is not exposed to the direct heat. The cooking requires an hour or two, and when it is finished the clams are shoveled on to a sorting table, where the search for pearls is made, and the shells graded and placed in bins. This work is extremely disagreeable, and if it were not for the fact that there is a possibility of finding something valuable it would be a great drudgery.

There are some fifty varieties of shells, most of which are valuable. The largest shells, or "washboards," are too brittle to be worth anything for commercial purposes. The smaller shells are all good for pearl buttons and bring the clammer $15 to $20 a ton. The shell buyers come with barges and take the shells at the camps. Very often a steamboat is sailing down the river, pushing several barges, each of which contains in the neighborhood of five hundred tons of clam shells. These shells are made into pearl buttons at factories at various river towns. The buttons are sawed out of the shell, and in this rough form are sent East to be finished. There are some fifty factories on the Mississippi, each employing from ten to sixty hands the year round.

The clammer's life is not one of pleasure. He must rise with the sun, be as busy as a beaver all day, in all kinds of weather, doing dirty, wet and hard work. His hands are continually sore and chapped from the dirty water, and his back acquires a crook that it takes months to get rid of. His food is cooked over an open fire, and often, when it rains, is not cooked at all. He is forced to bathe in the muddy river water, and sometimes must even drink it. Rowing a heavy boat against a current of four miles an hour taxes the endurance of the best; lifting out a heavy drag loaded with clam shells all day is not easy; pulling, sweating and trying to pull the drag off from a snag is not conducive of good morals. The hardships are real and the returns uncertain, and every one who tries it for a season is apt to wonder "if the game is worth the candle."

In the early days of clam fishing the perfect pearl was the only one marketable, while now all sizes and shapes are made use of. When the formation is round, or partly round, it goes by the name of pearl. One which is perfect on one side, the other being flat, is termed a button pearl. Buttons are divided into "haystacks" and "turtlebacks," according to the height of the projection above the flat surface. By far the greater number of pearls are of this variety. There are also numerous imperfections that are distinguished by various names, as "birdseyes," referring to a little projection on the best surface of the pearl that seems to be the finishing off place that the clam has left unsmoothed. "Ring arounds" are those with a dark or discolored ring appearing on the surface. "Strawberries" are pearls that have a large number of minute projections on the surface, and when of high lustre are exceedingly pretty. These names are supplemented by a great number of others that vary in the different localities.

A perfect pearl is, of course, round, but even then it must be of fair size and good color to be of any value. One the size of an ordinary pea is worth nearly, if not quite, $200. The color that is most sought after and is the most valuable is the pure white of the dewdrop transparency.

A pearl is built in layers the same as the shell. It is this fact which gives rise to the popular idea that its formation is caused by some foreign substance getting into the clam and thereby causing it to coat the offensive particle with mother of pearl. These coatings may be peeled off, and very often a dead surface conceals a splendid surface underneath. Several men in the river towns make a business of "peeling pearls," and do a thriving business at it, as nearly every one who finds a pearl believes or hopes that the poor part is all on the surface.

Very often the question is asked: "How much is the largest fresh water pearl worth, and who is its owner?" The largest one ever found was about three-quarters of an inch in diameter, and perfectly round and weighed 126 grains. A spot on one side was its only imperfection. It was found by a man named Ferguson and sold by him the same day for $1750. Later it was sold by the buyer for $10,000. The finest pearl ever found was one of seventy grains and brought the finder $900. It is now held by a jewelry firm for $20,000. Finds of this character are rare however, and men have fished for years and never found a really fine pearl. Others that have worked in the same manner and the same place have met with astounding success. A certain Charles Reed, of Prairie du Chien, has clammed for several years. He never found anything that brought him more than $400, yet, instead of being the poor man of a few years ago, he is now independently rich.

A great deal depends on the shrewdness of the finder in getting what his pearl is worth. All finds are usually disposed of on the spot within a few hours from the time that they are taken from the river. Pearl buyers are constantly plying the river in their launches, and the minute that a pearl is found a buyer is on hand. Often, with a little judicious lying, they are able to get fine pearls for a fraction of their value. One case is recorded where one of these Shylocks bought a pearl for $3, having convinced the clammer that it was of no value. In a few days the buyer had disposed of the same pearl for $1200.—New York Tribune.
